FAMILY INSIGHTS Q2 GROUP COMPANY UPDATE

Family Insights Group Limited (ASX: FAM) (Company) is pleased to provide the market with an update on Company operations, development of its grocery comparison engine **Frugl (FG)**, and parental control platform **Family Insights (FI)**.

Highlights

- FAM maintains focus on Frugl development for short term revenue growth
- Frugl mobile app beta test commenced January 2020
- Public launch of Frugl mobile app planned for February 2020
- Business development activities and development of retail analytics platform for business customers in progress
- Circa \$80k/quarter cost savings planned from March quarter onwards after review and consolidation of Family Insights operations

Operational Update

Short-term focus on Frugl as fastest path to revenue growth

The Company continued to focus internal resources on the foundational development of Frugl to accelerate future Company revenue growth, with data warehouse architecture, data collation, Frugl app design and business development as the four key focus areas.

Frugl Data Collation – Development and Operations

The Company continued to develop its data acquisition capabilities with full product, pricing, promotional, nutritional and catalogue data from three major grocery retailers (localised by state and region) being collated on an ongoing basis.

Early analysis of the data delivered major insights into grocery retailer behaviours and tactics, which were utilised for retail analytics development (for retail business clients) and for Frugl App development purposes.

Frugl App Design

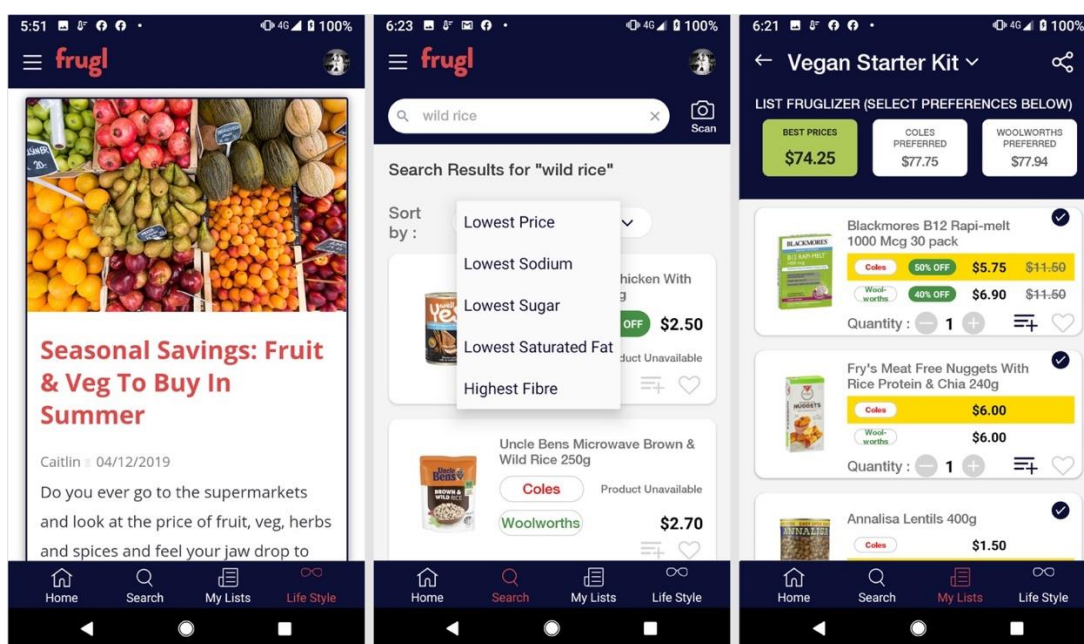

The Frugl App is a supermarket comparison engine that allows shoppers to compare products across Woolworths and Coles supermarkets, create brand-specific shopping baskets and optimise shopping lists by cheapest prices.

In addition, the Company is overlaying wellness tools for shoppers to enable them to compare products and optimise shopping baskets by nutritional value, ingredient listings, allergens inclusions, health ratings and product sustainability.

In December the initial production version of the Frugl Grocery App was received by the FAM team who commenced user acceptance testing (UAT) for both Android and iOS versions of the app. The UAT version of the app is running on the live production environment utilising up to date grocery pricing data from major grocery retailers to enable real time testing by the UAT testers.

The UAT phase allowed for significant internal testing and multiple rounds of bug-logging and bug-fixing prior to the beta-launch, which was packaged for release to the Frugl beta group for further testing at the end of January.

It is anticipated that the beta test period will be completed in early February and public launch of the Frugl app to follow shortly afterwards. The Company will then focus on accelerating user growth during the March and June quarters to enable it to unlock consumer behavioural data models and research panels for commercialisation.

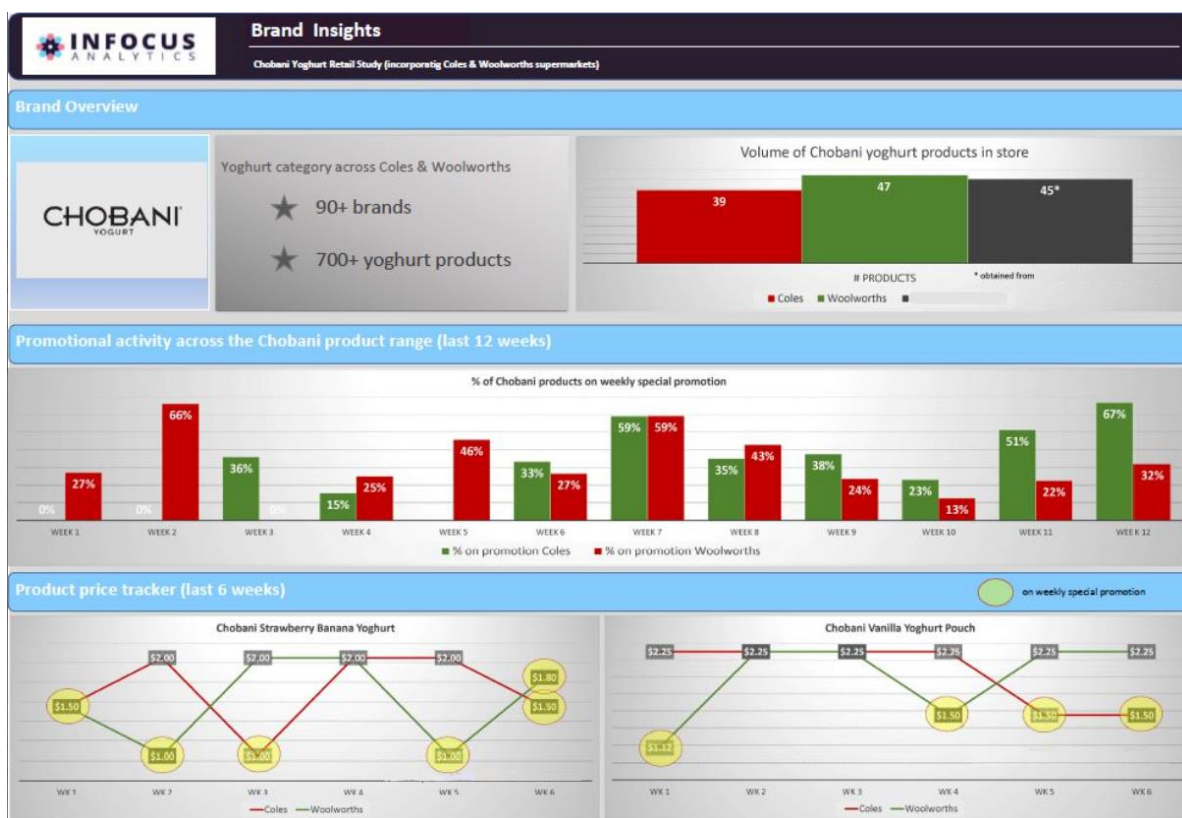

Frugl Data – Business Development

The Company commenced business development activities for its data analytics products, having initiated discussions with major Australian retailers to determine their key data analytics objectives and identify appropriate FAM-built solutions. Retailer feedback and analytics requirements were utilised for the data warehouse and analytics platform design process, in parallel with the business pipeline creation objectives of the business development team.

Grocery Analytics Platform

The Company developed a Grocery Pricing & Promotion Analytics platform utilising data collated since May 2019, with advanced product, category and retail supplier analytics capabilities now in readiness for immediate deployment with retailer clients.

The Company has been in business development discussions with potential analytics customers across grocery retailer and supply categories and expects to announce further news on business development in the March quarter.

Family Insights App Operational Costs Consolidated

Following a Q2 review of the Family Insights App operational requirements and costs, the Company initiated a consolidation program to minimise ongoing running costs whilst the core focus remained on Frugl development. The consolidation involves the withdrawal of the Family Insights App from appstores whilst continuing to operate Family Insights as a content provider until the future direction of the app is reviewed in the second half of 2020. Commencing in the March quarter, this consolidation of costs will reduce running costs by circa \$80k per quarter, and will remain in place until the Company returns development focus to Family Insights later in the year.

Corporate Update

During the quarter, the Company successfully completed a placement of 16,000,000 fully paid ordinary shares (**Placement Shares**) at an issue price of \$0.0625 per Placement Share to raise a total of \$1,000,000 before costs (**Placement**). Following the completion of the Placement, the Company was reinstated to official quotation.

As announced on 24 October 2019, the Company entered into a binding loan facility agreement with Mathew Walker, a Company director, for up to \$600,000, available on call, unsecured, interest free and repayable upon the earlier of, the completion of a capital raising of not less than \$1,000,000, or 31 October 2020 (**Director Loan**). The terms of the Director Loan have subsequently been varied and the Director Loan is now available on call, unsecured, interest free and repayable on 1 October 2020.

Additionally, the Company deregistered its New Zealand based wholly owned subsidiary, NexGen Networks Limited.

ABOUT FRUGL

Frugl is a data insights business utilising a price comparison platform that allows families to compare the cost of goods between different supermarket retailers in their local areas, whilst simultaneously analysing shopper behaviours in real time against the changing landscape of product merchandising and pricing changes across over 60,000 different products from major supermarket chains.

ABOUT FAMILY INSIGHTS

Family Insights offers parents a unique approach to ensuring the safe use of the internet by children and teenagers. By utilising Family Insights' world class secure VPN network, backed by the research insights of childhood development research organisation Telethon Kids Institute, Family Insights monitors mobile network patterns in real time and advises parents of potential threats as well as providing greater details and resources to parents on the threats identified.

Notes

1. The quarterly report provides a basis for informing the market how the entity's activities have been financed for the past quarter and the effect on its cash position. An entity that wishes to disclose additional information is encouraged to do so, in a note or notes included in or attached to this report.
2. If this quarterly report has been prepared in accordance with Australian Accounting Standards, the definitions in, and provisions of, *AASB 107: Statement of Cash Flows* apply to this report. If this quarterly report has been prepared in accordance with other accounting standards agreed by ASX pursuant to Listing Rule 19.11A, the corresponding equivalent standard applies to this report.
3. Dividends received may be classified either as cash flows from operating activities or cash flows from investing activities, depending on the accounting policy of the entity.
