GAGE ROADS COMPLETES \$5.2 MILLION INSTITUTIONAL PLACEMENT

Gage Roads Brewing Co Ltd (“**Gage Roads**” or “**The Company**”) (ASX: **GRB**) is pleased to announce that it has successfully completed a bookbuild and received irrevocable commitments to raise \$5.2 million at an issue price of \$0.052 per share (100,000,000 shares) (**Institutional Placement**).

The Institutional Placement was very well supported by both existing and new high-quality institutional investors.

The Institutional Placement will be applied towards strengthening the balance sheet, positioning Good Drinks to capitalise on growth opportunities and provide financial flexibility as the Company looks with cautious optimism towards FY21 and COVID-19 recovery.

Managing Director John Hoedemaker was pleased with the confidence in the business and the strategy:

“The strong support from the investment community is both indicative of the success of the proprietary brand strategy as well as a vote of confidence for the Company’s Good Drinks strategy that is designed to deliver incremental earnings to all shareholders.

We would like to take the opportunity to thank our investors for their ongoing support and welcome a number of new highly credentialed institutional investors to our shareholder register.”

Institutional Placement

The Institutional Placement will comprise the issue of 100 million fully paid ordinary shares (“**New Shares**”) at an issue price of \$0.052 per New Share to institutional and sophisticated investors, raising \$5.2 million (before costs).

The New Shares issued under the Institutional Placement will be issued under the Company’s existing capacity under ASX Listing Rules 7.1. The New Shares will rank equally with existing fully paid ordinary shares. Settlement of the Institutional Placement is expected to be completed on Tuesday, 14 July 2020.

Argonaut Securities Pty Ltd and Petra Capital Pty Limited acted as Joint Lead Managers to the Institutional Placement.

APPENDIX: KEY RISKS

Introduction

The Shares offered under this Equity Raising Investor Presentation are considered highly speculative. An investment in the Company is not risk free and the Directors strongly recommend potential investors to consider the risk factors described below, together with information contained elsewhere in this Equity Raising Investor Presentation and to consult their professional advisers before deciding whether to apply for Shares pursuant to this Equity Raising Investor Presentation.

There are specific risks which relate directly to the Company's business. In addition, there are other general risks, many of which are largely beyond the control of the Company and the Directors. The risks identified in this section, or other risk factors, may have a material impact on the financial performance of the Company and the market price of the Shares.

The following is not intended to be an exhaustive list of the risk factors to which the Company is exposed.

Company specific

Potential for significant dilution

Upon implementation of the Offer, the number of Shares in the Company will increase from 1,140.5 million currently on issue to 1,240.5 million. This means that each Share will represent a lower proportion of the ownership of the Company. It is not possible to predict what the value of the Company or a Share will be following the completion of the Offer being implemented and the Directors do not make any representation as to such matters.

Industry specific

Demand

The Company operates within the consumer goods sector in which demand for its products is subject to changes in consumer preferences and tastes. The nature of the business is such that its revenues are not secured and may fluctuate significantly over time. Any significant decrease in demand, and accordingly in sales volumes, would be likely to have a material adverse effect on the profitability of the Company.

Competition

The Company competes with a wide range of participants in the brewing industry. There can be no assurance that the actions or competitors or changes in consumer preferences will not adversely affect the Company's performance. It is also possible that new competitors will enter the brewing (particularly in the premium brewing segment where there have been a number of recent new entrants) and this also may adversely affect the Company's performance.

Acquisitions, Joint Ventures and Shareholder Dilution

The Company may assess strategic acquisitions and joint ventures as one of its growth strategies. The Company may pursue strategic acquisitions of businesses that complement its existing business. There can be no assurance that the Company will be able to successfully identify and implement such opportunities, acquire or integrate such businesses.

The consideration payable in respect of any such acquisition may consist wholly or partly of new Shares issued to the vendors, in which case the shareholdings of existing Shareholders will be diluted. Further, the Company may seek to raise additional capital, in order to fund acquisitions, or for other purposes, by new issues of Shares. This would also have the effect of diluting the shareholdings of existing Shareholders. The Company may also elect to fund acquisitions using existing or new bank facilities. The Directors will adopt prudent financial practices in assessing the appropriate funding mix.

Intellectual Property

The Company's commercial success depends in part on its ability to protect its intellectual property assets. The commercial value of these assets is dependent on legal protections provided by a combination of copyright, patent, confidentiality, trade mark, trade secrecy laws and other intellectual property rights. These legal mechanisms, however, do not guarantee that the intellectual property will be protected or that the Company's competitive position will be maintained. No assurance can be given that employees or third parties will not breach confidentiality agreements, infringe or misappropriate the Company's intellectual property or that competitors will not be able to produce non-infringing competitive products.

It is possible that third parties may assert intellectual property infringement, unfair competition or like claims against the Company under copyright, trade secret, patent or other laws. While the Company is not aware of any claims of this nature in relation to any of the intellectual property rights in which it has interests, such claims, if made, may harm, directly or indirectly, the Company's business. If the Company is forced to defend claims of intellectual property infringement, whether they are with or without merit or are determined in the Company's favour, the costs of such litigation will be potentially significant and may divert management's attention from normal commercial operations.

Brand Factors

The Company's products and services are sold under a number of brands. The Company's brands and its image are key assets to the Company. Should the brand or image be damaged in any way or lose its market appeal, the Company's business could be adversely impacted.

APPENDIX: KEY RISKS

Damage to facilities and warehouses

The Company owns or leases production, bottling and packaging facilities and warehouses. Damage to or destruction of these facilities could result in the loss of production capability or the loss of stock, adversely impacting the Company's financial results. It cannot be certain that the financial impact of any such event would be mitigated, fully or partially, by insurance.

Adverse change in input costs

The Company's financial performance is subject to a variety of input costs, which may change beyond the Company's control. This includes changes in the pricing of raw materials including malt, hops, bottles and packaging, fluctuations to changes in exchange rates relating to materials purchased in foreign markets and changes in and changes in utility costs such as electricity, gas and waste water services.

General Risks

Economic

General economic conditions, movements in interest and inflation rates and currency exchange rates may have an adverse effect on the Company's exploration, development and production activities, as well as on its ability to fund those activities.

Market conditions

Share market conditions may affect the value of the Company's quoted securities regardless of the Company's operating performance. Share market conditions are affected by many factors such as:

- general economic outlook;
- introduction of tax reform or other new legislation;
- interest rates and inflation rates;
- changes in investor sentiment toward particular market sectors;
- the demand for, and supply of, capital; and
- terrorism or other hostilities.

The market price of securities can fall as well as rise and may be subject to varied and unpredictable influences on the market for equities in general and resource exploration stocks in particular. Neither the Company nor the Directors warrant the future performance of the Company or any return on an investment in the Company.

Additional requirements for capital

The Company's capital requirements depend on numerous factors. Depending on the Company's ability to generate income from its operations, the Company may require further financing in addition to amounts raised under the Offer. Any additional equity financing will dilute shareholdings, and debt financing, if available, may involve restrictions on financing and operating activities. If the Company is unable to obtain additional financing as needed, it may be required to reduce the scope of its operations. There is however no guarantee that the Company will be able to secure any additional funding or be able to secure funding on terms favourable to the Company.

Dividends

Any future determination as to the payment of dividends by the Company will be at the discretion of the Directors and will depend on the financial condition of the Company, future capital requirements and general business and other factors considered relevant by the Directors. No assurance in relation to the payment of dividends or franking credits attaching to dividends can be given by the Company.

Taxation

The acquisition and disposal of Shares will have tax consequences, which will differ depending on the individual financial affairs of each investor. All potential investors in the Company are urged to obtain independent financial advice about the consequences of acquiring Shares from a taxation view point and generally.

To the maximum extent permitted by law, the Company, its officers and each of their respective advisors accept no liability and responsibility with respect to the taxation consequences of subscribing for Shares under this Equity Raising Investor Presentation.

Reliance on key personnel

The responsibility of overseeing the day-to-day operations and the strategic management of the Company depends substantially on its senior management and its key personnel. There can be no assurance given that there will be no detrimental impact on the Company if one or more of these employees cease their employment.

Speculative investment

The above list of risk factors ought not to be taken as exhaustive of the risks faced by the Company or by investors in the Company. The above factors, and others not specifically referred to above, may in the future materially affect the financial performance of the Company and the value of the Shares offered under this Equity Raising Investor Presentation.

Therefore, the Shares to be issued pursuant to this Equity Raising Investor Presentation carry no guarantee with respect to the payment of dividends, returns of capital or the market value of those Shares.

Potential investors should consider that the investment in the Company is speculative and should consult their professional advisers before deciding whether to apply for Shares pursuant to this Equity Raising Investor Presentation.
