

## Spectur Limited (ASX:SP3)

ASX Announcement

Tuesday 7 July 2020

### Clarification – CSIRO Contract

Spectur Limited refers to the long-term Collaboration Agreement with CSIRO's Data61 ("Agreement") disclosed in its ASX announcement dated 2 July 2020.

By way of a clarifying announcement Spectur includes the following information:

1. The Project Term is 18 months
2. The Collaboration Agreement forms the foundation for a suite of expanded AI applications that can be deployed on the STA6 (and in some cases the HD5) platform. CSIRO's Data61 will develop a range of AI applications and the modular deployment to the STA6 (for edge applications) and the cloud (for web-based applications).

The Agreement is disclosed to provide information from a product enhancement and sales application potential perspective and is not a revenue contract.

The Board does not consider the Agreement financially material to the Company nor quantifiable in the short term, however over time we expect it to contribute significantly to the capability of Spectur's new STA6 platform, thereby assisting in growing revenues through the expansion of use cases for the product.

This ASX announcement was approved for release by the board of Spectur Limited.

Yours sincerely

Suzie Foreman  
**Company Secretary**

### **About Spectur Limited**

Spectur Limited (ASX:SP3) is an Australian-based developer of security, surveillance and warning solutions powered by solar, IoT [Internet of Things], camera and cloud-based technology. The Company owns the rights to its innovative hardware and disruptive cloud-based systems which are deployed to provide solutions to industries including government and utilities, and the building, construction and civil sector.

Spectur's core products are solar powered deterrence and surveillance systems and associated cloud-based platforms. These systems incorporate cameras, lighting, audible warnings and a hardware IoT platform, remotely accessed and connected via 3G/4G technology to a cloud-based platform. The offering is complemented by a longer distance, 24-hour thermal camera deterrence solution, suitable for customers with long perimeters.

Spectur is used and trusted by small business to multinationals and the Company is currently implementing a strategic growth plan to build market dominance in the Australian government and utilities sector to meet demand for innovative, remote camera and IoT solutions.
