

QUARTERLY REPORT

For the period ended 30 June 2020

+ Carpentaria Resources is answering the world's call for high grade iron ore.

+ The Company has a majority interest in the Hawsons Iron Project, source of Hawsons Supergrade® product

HIGHLIGHTS

Hawsons Iron Project

+ Discussions with Hawsons joint venture partners' two shareholder groups to consolidate joint venture ownership are progressing. Resolution requires three-way agreement; the Board is doing all it can to reach agreement and is hopeful the remaining issues will be resolved in the near future.

All parties have recognised the potential benefits of ownership restructure and intend to resolve a structure that improves the commercial offering to investors and provide the best platform to move the project forward. It will allow a review of development options.

+ Mitsui agreed to extend further the term of its existing offtake option (ASX Announcement 6th August, 2018) until 31 December 2020. The parties intend to negotiate commercial terms to extend the option beyond that date.

+ The Company has agreed with Asian and MENA region tier one counterparties to pause offtake and funding related discussions until the Hawsons joint venture has been reset.

+ Chinese pellet feed and direct reduction (DRI) markets continue to support Hawsons value and development case as the leading high-quality pellet feed and DRI project development opportunity.

+ Steel industry transitional and long-term emissions reductions initiatives are growing in response to real and forecast customer demands for sustainable steel production.

HAWSONS IRON PROJECT

70%

Iron percentage of Hawsons Supergrade® product.

14.0

Offtake demand for Hawsons Supergrade® product (Mtpa).

201

Total production of Hawsons Iron Project (million tonnes).
As per the PFS release on 28 July 2017.

The Company confirms that all assumptions and technical parameters underpinning the Resource and Reserve estimates and all material assumptions underpinning the production target or the forecast financial information derived therefrom continue to apply and have not materially changed since first reported on 28 July 2017.

Carpentaria Resources Limited (ASX:CAP) announced today its quarterly activities and cashflow report for the period ending 30 June 2020.

The Company is focussed on developing its flagship Hawsons Iron Project near Broken Hill, NSW and continues to strive to improve the commercial offering to attract the necessary investment.

Improved commercial offering and offtake discussions

Whilst Carpentaria has demonstrated the low risk technical and developmental aspects of the Project, the competitive project pre-feasibility study results, high offtake interest and willingness to support the Project post-bankable feasibility study, the joint venture structure remains an impediment to some investors.

Discussions with Hawsons joint venture partners' two shareholder groups to consolidate joint venture ownership are progressing. Resolution requires three-way agreement, and the Board is doing all it can to reach agreement and is hopeful the remaining issues will be resolved in the near future.

All parties have recognised the potential benefits of ownership restructure and intend to resolve a structure that improves the commercial offering to investors and provide the best platform to move the project forward. It will allow more development options.

Given the increased flexibility a more consolidated joint venture ownership may provide, the Company has agreed with Asian and MENA region counterparties to pause offtake and funding-related discussions until the Hawsons joint venture has been reset.

Iron ore market

Chinese pellet feed and direct reduction markets continue to support Hawsons value and development case as the leading high-quality pellet feed and DRI project development opportunity.

Chinese demand and forecast demand for high-grade ore and pellet feed concentrates remains strong, and its domestic supply remains high cost. The technological and environmental trends underpinning these forecasts remain unchanged.

Supply alternatives for direct reduction steelmakers remain very limited, as the cost to upgrade iron ore to the required less than 3% silica plus alumina remains unviable for most mines and selling lower grade material more profitable for others.

The steel industry is increasing efforts to meet demand for sustainable steel, including in Australia.

Gas-based DRI production is the lowest emission, clean iron production method, half as polluting as blast furnace production.

It is a transition step to a leading technology for zero emission steel, hydrogen based DRI. Mitsui, Vale, Kobe Steel and Midrex (DRI plant supplier) intend to explore ways to supply low CO2 metallics and iron-making solutions to the global steel industry (13 July 2020). In Australia, Whyalla steelmaker GFG Alliance plans a DRI plant (10 June 2020); Bluescope supports initiatives to investigate sustainable steel supply chains (27 July 2020) and the Grattan Institute proposed a green steel project (May 2020).

The Hawsons Iron Project is uniquely positioned to support these recent initiatives as its supergrade product can support development of increased DRI plants and materially lower emissions from blast furnace operations. The Company is monitoring and engaging where appropriate with these new initiatives.

Corporate

During the quarter, Mr John Anderson resigned as Non-executive Chairman for personal reasons. Mr Jon Parker subsequently resigned as a Non-executive Director, also for personal reasons. Mr Peter Graham joined the Board as a Non-executive Director on 4 May 2020 and was announced as Chairman the following week. Mr Graham brings to the Board significant knowledge of and experience in the finance industry, including in banking and treasury and corporate advisory. His focus continues to be attempting to consolidate as much of the Hawsons Iron Project ownership as possible in the Company, so as to improve the prospects of attracting significant funding for the project.

*All projects except Hawsons at BFS stage .
Hawsons at PFS stage
*Assumes that Hawsons is in production and the outcomes are as set out in the prefeasibility study announced on 28 July 2017. The Company confirms that all assumptions and technical parameters underpinning the Resource and Reserve estimates and all material assumptions underpinning the production target or the forecast financial information derived therefrom continue to apply and have not materially changed since first reported on 28 July 2017.
*Bubble size represents annual production capacity
*Excludes replacement or expansion projects owned by established miners RIO, BHP, CSN, FMG
*Based on Wood Mackenzie long term price forecasts
Source: Wood Mackenzie (developed from company's stock exchange compliant releases, modified uniformly by Wood Mackenzie by internal long-term price and cost forecasts, Wood Mackenzie is not aware of any material omissions in the data)

Chart 1 – IRR vs product grades for unfinanced projects at PFS stage or later

For personal use only

The Hawsons Iron Project has

High forecast returns: outstanding for the commodity and project type. According to Wood Mackenzie, the leading project of its type (chart 1), (refer to the PFS released 28 July 2017, showing an equity rate of return of 30%)*.

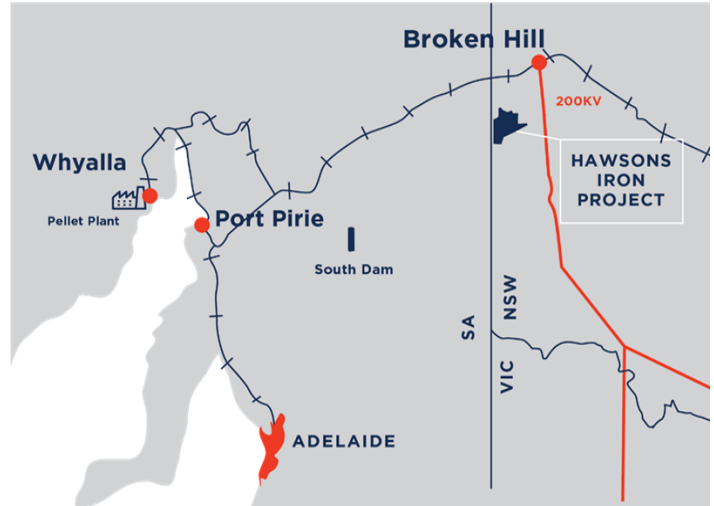

Unmatched product demand: the unique 70%Fe pellet feed product meets the long-term global demand profile for high quality inputs and decarbonisation of steelmaking.

Low risk profile: forecast to be first quartile of the global cost curve (as per the PFS, Hawsons is cash-flow positive at benchmark 62%Fe price <US\$30/tonne).

A clear technical and permitting pathway and an ideal location for operations with existing power, rail and port infrastructure available for a 10Mtpa start-up operation.

A unique soft ore allowing a different and low power approach to mining and processing challenges and simple liberation of a product of rare quality.

* The Company confirms that all assumptions and technical parameters underpinning the Resource and Reserve estimates and all material assumptions underpinning the production target or the forecast financial information derived therefrom continue to apply and have not materially changed since first reported on 28 July 2017.

The Hawsons Iron Project is located 60km south-west of Broken Hill, NSW, an ideal position for mining operations with existing power, rail and port infrastructure available.

-

Note: if any amounts are shown in items 6.1 or 6.2, your quarterly activity report must include a description of, and an explanation for, such payments:

Director wages and fees: \$98,064

Mining exploration entity or oil and gas exploration entity quarterly cash flow report

7. Financing facilities	Total facility amount at quarter end \$A'000	Amount drawn at quarter end \$A'000
<i>Note: the term "facility" includes all forms of financing arrangements available to the entity. Add notes as necessary for an understanding of the sources of finance available to the entity.</i>		
7.1 Loan facilities	-	-
7.2 Credit standby arrangements	-	-
7.3 Other (please specify)	-	-
7.4 Total financing facilities		
7.5 Unused financing facilities available at quarter end		-
7.6 Include in the box below a description of each facility above, including the lender, interest rate, maturity date and whether it is secured or unsecured. If any additional financing facilities have been entered into or are proposed to be entered into after quarter end, include a note providing details of those facilities as well.		

8. Estimated cash available for future operating activities	\$A'000
8.1 Net cash from / (used in) operating activities (Item 1.9)	485
8.2 Capitalised exploration & evaluation (Item 2.1(d))	89
8.3 Total relevant outgoings (Item 8.1 + Item 8.2)	574
8.4 Cash and cash equivalents at quarter end (Item 4.6)	716
8.5 Unused finance facilities available at quarter end (Item 7.5)	-
8.6 Total available funding (Item 8.4 + Item 8.5)	1,290
8.7 Estimated quarters of funding available (Item 8.6 divided by Item 8.3)	1.25
8.8 If Item 8.7 is less than 2 quarters, please provide answers to the following questions:	
1. Does the entity expect that it will continue to have the current level of net operating cash flows for the time being and, if not, why not?	
The Company expects to operate with lower costs for the foreseeable future, due to cost cutting previously announced. This is subject to changes that could be caused by any transaction, should that occur.	
2. Has the entity taken any steps, or does it propose to take any steps, to raise further cash to fund its operations and, if so, what are those steps and how likely does it believe that they will be successful?	
The Company will take steps to raise capital to carry on its business when that becomes necessary.	
3. Does the entity expect to be able to continue its operations and to meet its business objectives and, if so, on what basis?	
The Company had abnormally high expenditure during the last 2 quarters, including staff redundancy, and does not expect such expenditure to be repeated in the coming quarters. The Company does expect to be able to continue its operations.	

Compliance statement

- 1 This statement has been prepared in accordance with accounting standards and policies which comply with Listing Rule 19.11A.
- 2 This statement gives a true and fair view of the matters disclosed.

Date: 31 July 2020

Authorised by: The Board
(Name of body or officer authorising release – see note 4)

Notes

1. This quarterly cash flow report and the accompanying activity report provide a basis for informing the market about the entity's activities for the past quarter, how they have been financed and the effect this has had on its cash position. An entity that wishes to disclose additional information over and above the minimum required under the Listing Rules is encouraged to do so.
2. If this quarterly cash flow report has been prepared in accordance with Australian Accounting Standards, the definitions in, and provisions of, *AASB 6: Exploration for and Evaluation of Mineral Resources* and *AASB 107: Statement of Cash Flows* apply to this report. If this quarterly cash flow report has been prepared in accordance with other accounting standards agreed by ASX pursuant to Listing Rule 19.11A, the corresponding equivalent standards apply to this report.
3. Dividends received may be classified either as cash flows from operating activities or cash flows from investing activities, depending on the accounting policy of the entity.
4. If this report has been authorised for release to the market by your board of directors, you can insert here: "By the board". If it has been authorised for release to the market by a committee of your board of directors, you can insert here: "By the [name of board committee – eg Audit and Risk Committee]". If it has been authorised for release to the market by a disclosure committee, you can insert here: "By the Disclosure Committee".
5. If this report has been authorised for release to the market by your board of directors and you wish to hold yourself out as complying with recommendation 4.2 of the ASX Corporate Governance Council's *Corporate Governance Principles and Recommendations*, the board should have received a declaration from its CEO and CFO that, in their opinion, the financial records of the entity have been properly maintained, that this report complies with the appropriate accounting standards and gives a true and fair view of the cash flows of the entity, and that their opinion has been formed on the basis of a sound system of risk management and internal control which is operating effectively.
