

Red Sky Energy Limited
Quarterly Report Ended
30 September 2020

SUMMARY OF ACTIVITIES

Highlights

- **Planning started for gas well at Innamincka.**
- **Workover planned for Gold Nugget**

Innamincka Dome, Cooper Basin

The Company is pleased to provide an update on the work programme review by Cooper Basin operator Santos Ltd (ASX:STO) in relation to Red Sky's onshore Cooper Basin retention licences. These are PRL 14, 17, 18, 180, 181 and 182 collectively known as the Innamincka Dome Projects.

During the quarter Santos have advised :

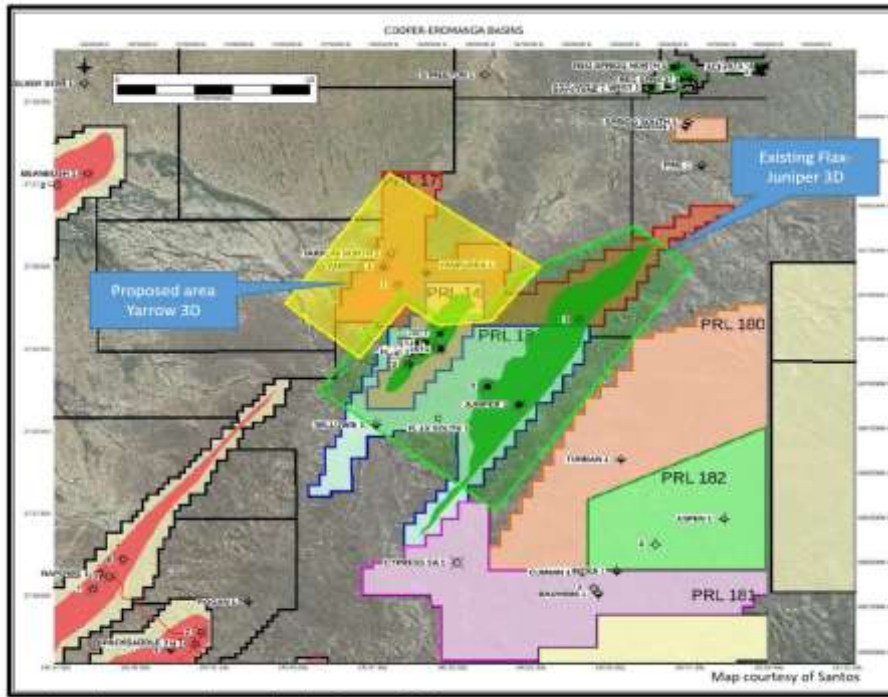

- The existing 2D seismic over the Yarrow gas field (PRL17) is being reprocessed.

This will contribute to finalisation of a drilling location for an appraisal well. ROG anticipates the well will be drilled in 2021.

Santos Farm Out Terms

Santos to earn an 80% interest and operatorship (ROG: 20%) in Red Sky's onshore Cooper Basin retention licences PRL 14, 17, 18, 180, 181 and 182, collectively known as the Innamincka Dome Projects. The terms provide for Santos to:

- Fund 100% of 50km² of 3D seismic over the existing Yarrow gas field in PRL 17, up to a maximum cost of A\$1.0 million.
- Fund 100% of an appraisal well in the Yarrow gas field in PRL 17 up to a maximum gross cost of A\$3.0 million.
- Fund 100% of a horizontal appraisal well in the Flax oil and gas field in PRL 14, up to a maximum gross cost of A\$5 million.
- Subject to satisfactory appraisal outcomes, initially fund 100% of any approved development of the fields, with Santos to be repaid for Red Sky's share of such development expenditure out of Red Sky's share of production.

Location map: Innamincka Dome PRLs.

Gold Nugget Gas Field

Gold Nugget continued to produce intermittently as expected during the quarter. Analysis has led us to the conclusion that in order to maximise production a well intervention is needed. We are currently seeking bids to re-enter the well and perforate above the waterline. Subject to contractor availability, we are driving to have the work completed by the end of November. If the intervention is successful, the well should produce gas through the winter when the pipeline has previously been frozen by excess water in the system.

Corporate

In July 2020, the Company completed a placement of 400,000,000 fully paid ordinary shares in the Company (New Shares) at an issue price of 0.1 cents (\$0.001) to raise \$400,000 (before costs). The Placement was undertaken within the Company's placement capacity under ASX Listing Rule 7.1 (236,381,672 shares) and 7.1A (163,618,328 shares).

In addition, the Company is actively discussing the appointment of a further executive to the management team.

Related party disclosure

In line with its obligations under ASX Listing Rule 5.3.5, Red Sky Energy Limited notes that the only payments to related parties of the Company, as advised in the Appendix 5B for the period ended 30 September 2020, pertain to payments to directors for fees, salary and superannuation.

COVID Update

Due to the current pandemic staff are continuing to work remotely and preserve their ability to move when necessary.

The Company continues to actively review further acquisition opportunities in Australia and overseas.

Andrew Knox, Managing Director

“Red Sky continues to navigate the challenges presented throughout the last six months and has made solid strategic headway in terms of positioning the company for growth.

The Company has responded swiftly to adapt the business to the current environment, and we have maintained a firm focus on cost discipline, successfully reducing G&A expenses. We continue to aggressively pursue business development opportunities in line with our stated growth strategy and believe we are well placed to capitalise on the opportunities that have presented themselves as a result of the current market dynamics. The Company expects to see increased operational activity during the current quarter pending the completion of an acquisition.

Once again the Company thanks shareholders for their continued patience and ongoing support of our strategy to develop into a material full cycle E&P company.”

Released with the authority of the Board.

ENDS

Various statements in this report constitute statements relating to intentions, future acts and events. Such statements are generally classified as forward looking statements and involve unknown risks, expectations, uncertainties and other important factors that could cause those future acts, events and circumstances to differ from the way or manner in which they are expressly or impliedly portrayed herein.

Some of the more important of these risks, expectations and uncertainties are pricing and production levels from the properties in which the Company has interests and the extent of the recoverable reserves at those properties. In addition, the Company has a number of exploration permits. Exploration for oil and gas is expensive, speculative and subject to a wide range of risks. Individual investors should consider these matters in light of the personal circumstances (including financial and taxation affairs) and seek professional advice from their accountant, lawyer or other professional advisor as to the suitability for them of an investment in the Company.
