ASX RELEASE 30 OCTOBER 2020

for the period ended 30 September 2020

ASX:MLM

### **KEY EVENTS**

The company's Annual General Meeting is being held on Wednesday 18 November 2020 at 11:30am at Level 35, 1 Eagle Street, Brisbane.

A strategic review of the Urquhart Bauxite JV Project was undertaken and this included consideration for a potential sale of the 50% share held by the company.

The remaining balance of \$300,000 (ex GST) for the sale of the Heavy Mineral Sand plant was received on 5 August 2020 and the \$30,000 GST component was received on 10 September 2020. Total proceeds for the sale of the HMS project and plant was \$1,722,203 (excluding GST but including the refund of the environmental bond). Discussions continued with Traditional Landowner groups to finalise access and co-operation for the delineation and development of the Cape Flattery Silica Sands Project.

Management continues to evaluate new opportunities in gold/precious metals-copper.

Approval to drill on existing tracks is currently being finalised with Traditional Land Owner groups for the Cape Flattery Silica Sands Project. This program is planned to commence in early to mid November 2020.

\$2.69 million in cash is available at Quarter end, with no debt.

## **CORPORATE INFORMATION**

As at 30 September 2020

#### CASH BALANCE

As at 30 September 2020, MLM's cash balance was approximately \$2.69m

#### **ISSUED CAPITAL**

324,047,408 Ordinary Shares

11,000,000 Unlisted Options

#### **SHAREHOLDERS**

1,937 **Total Shareholders** 

**Top 20 shareholders** hold 44.8%

#### LARGEST SHAREHOLDERS

John Haley
Company Secretary

## DEVELOPMENT AND EXPLORATION

Metallica Minerals (ASX: MLM) ("Metallica", "the Company") is pleased to present its Quarterly activities report for the period ended 30 September 2020.

### **CAPE FLATTERY**

#### SILICA SANDS MLM INTEREST 100%

The Cape Flattery Silica Sands Project is adjacent to the world class Cape Flattery Silica Sand mining and shipping operation owned by Mitsubishi. During the September 2020 Quarter, the Company continued discussions on progressing access arrangements for the tenement with Traditional Land Owners.

Metallica has previously completed a reconnaissance sampling program that identified three target areas with silica oxide (SiO<sub>2</sub>) percentages of greater than 99%. These target areas form the basis of an Exploration Target of 20-100\* Mt of high purity silica sands, with the insitu quality ranging between 96.9% and 99.6% SiO<sub>2</sub>.

In January 2020, Metallica advised the ASX that a sampling program completed in the last Quarter 2019 at its 100%-owned Cape Flattery Silica Sands project in Far North Queensland has confirmed the presence of high purity silica sands.

The exploration program consisted of hand augering eight (8) holes to a depth of penetration averaging 4.75m on the eastern target area of the tenement, which is located adjacent to Mitsubishi's large and established Cape Flattery Silica Sands mine (Figure 3).

The majority of the eight (8) auger holes returned intervals (1m samples) of >99% SiO<sub>2</sub> with insitu quality averaging between 96.1% and 99.1% SiO<sub>2</sub> (see Table 1) which are comparable with known deposits in the region. Seven (7) of the eight (8) holes ended in high purity silica sand using a 1m sample interval.

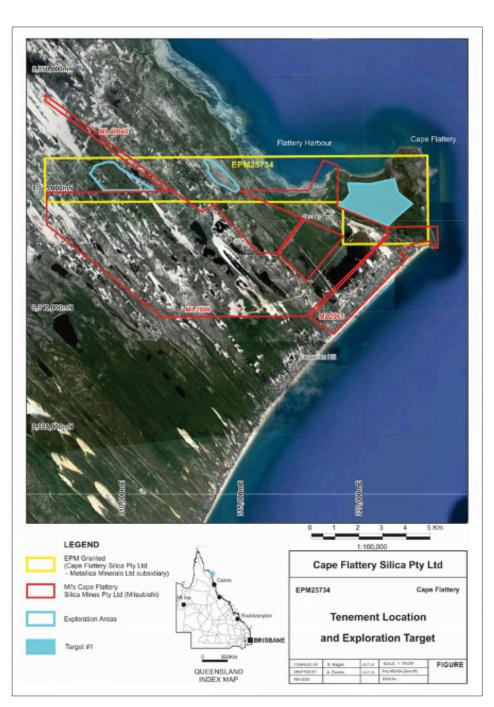

Figure 3: Cape Flattery Silica location

#### \* Exploration Target

Refer ASX Release dated 18 April 2018. Cautionary Statement: An Exploration Target is a statement or estimate of the exploration potential of a mineral deposit in a defined geological setting where the statement or estimate, quoted as a range of tonnes and a range of grade (or quality), relates to mineralisation for which there has been insufficient exploration to estimate a Mineral Resource. The potential quality and grade of the Cape Flattery Silica Sand deposits are conceptual in nature. There is insufficient information at this time to define a mineral resource and there is no certainty that further exploration will result in the determination of a mineral resource in these areas.

## DEVELOPMENT AND EXPLORATION

Table 1: Average of sampling results per auger hole

Hole Number	Average SiO <sub>2</sub> (%)	Average Fe <sub>2</sub> O <sub>3</sub> (%)	Average TiO <sub>2</sub> (%)	Average LOI (%)	Interval Average	Comment
CF191001	98.21	0.17	0.31	0.67	0m - 5.0m	Ended in high purity silica sand
CF191002	98.41	0.13	0.25	0.54	0m - 5.0m	Ended in high purity silica sand
CF191003	98.33	0.29	0.42	0.28	0m - 5.0m	Ended in high purity silica sand
CF191004	98.67	0.17	0.29	0.22	0m - 5.0m	Ended in high purity silica sand
CF191005	99.09	0.03	0.06	0.18	0m - 5.0m	Ended in high purity silica sand
CF191006	98.91	0.07	0.09	0.29	0m - 5.0m	Ended in high purity silica sand
CF191007	96.12	0.38	0.14	1.25	0m - 3.0m	Edge of target area
CF191008	98.81	0.13	0.18	0.32	0m - 5.0m	Ended in high purity silica sand

Meetings were also held with Hopevale Congress who represent the landowners and are the Registered Native Title Body Corporate. Negotiations continue with Hopevale Congress to finalise the Aboriginal Cultural Heritage Agreement and the Conduct and Compensation Agreement.

Meetings have also been held with Walmbaar Aboriginal Corporation in relation to the Dingaal clan's permission to undertaken drilling on existing tracks within the project area.

The Company has also commenced an initial internal high-level options study of the project, including planning works/requirements, to assess what is required to better understand the potential silica sand deposit size and quality, as well as options on how to most efficiently develop the potential white silica sand mine, the associated necessary logistics to deliver the sand to a nearby ship moored at Cape Flattery.

#### The planned activities for the December Quarter are:

- 1. Complete the November 2020 drilling program to establish a maiden silica sand resource;
- 2. Conduct preliminary sized sand quality and recovery test-work; and
- 3. Progress concept work currently underway on an infrastructure solution to load ocean going vessels.

Commenting on these results, Metallica's Executive Chairman, Theo Psaros said:

"We are pleased with the progress of discussions with the Traditional Land Owners. Interest in Cape Flattery silica sand projects is increasing significantly. While our proximity to Mitsubishi's large mine and export operation is positive, we now need to confirm our own resource potential. Achieving permission from the Traditional Land Owners will be another positive step in our advancement of this project."

According to industry research firm IMARC Group, high-purity silica sands are becoming more sought after, with the global market growing at a compound annual growth rate (CAGR) of around 6% between 2010 and 2017. In 2017, a total of 188 Mt of silica sand was produced globally.

This growth has been driven by silica sand's applications across a broad range of industries including glassmaking, foundry casting, water filtration, chemicals and metals, hydraulic fracturing and an increasing number of hi-tech products, including solar panels. For example, in the global glass-making industry, one of the major consumers of high-purity silica has experienced significant growth recently from the construction and automotive industries. IMARC also estimated the global silica sand market could grow from US\$7 billion to US\$20 billion in 2024.

## **DEVELOPMENT AND EXPLORATION**

### URQUHART BAUXITE

## BAUXITE MLM INTEREST 50%

The Urquhart Bauxite Project is located 5km southwest of Weipa on the western coast of the Cape York Peninsula, which is a region renowned for its extensive deposits of high-quality pisolitic bauxite. The project consists of two bauxite plateaux, known as Area A and Area B, that are wholly contained within the lease area. The project is a Joint Venture (JV) between Oresome Australia Pty Ltd (a 100% subsidiary of Metallica Minerals) 50% and Ozore Resources Pty Ltd 50%.

During the Quarter Metallica completed an initial sampling program on the Industrial Sands value-add opportunity. The particle size distribution results were received indicating that the sand sizing was predominately within expectations of between 125-500 micron / 1mm size (fine to medium sand) composed of high levels of quartz. Subject to when the bauxite market improves. Metallica will then undertake low-cost work to discuss the sand market with potential users of industrial sand to gauge if the sand deposits above the bauxite deposit has a likely market or not.

On 15 September 2020,
Metallica announced that it had recommended to the JV that the planned pre-feasibility study be placed on hold until the bauxite market improves. Metallica had undertaken preliminary work to update its concept models on the project. The completion of the concept work is impacted greatly by the current downturn in the bauxite market, as evidenced by the following;

- Reports of recent Chinese alumina refinery production reducing from 2019 levels, partly due to COVID-19 related issues;
- Metallica receiving bauxite market news and verbal reports of Guinea increasing their share of sales of higherquality bauxite into China; and
- Metro Mining (ASX:MMI) shutting down its operations earlier than planned, partly due to the weak sales environment.

Metallica completed its strategic review of its holding in the JV and it is now exploring options of a possible sale of Metallica's interest in the JV and/or UBx project.

#### **URQUHART POINT**

## HEAVY MINERAL SANDS MLM INTEREST 50%

The Urquhart Point HMS project was part of the Cape York JV with Ozore Resources Pty Ltd. In December 2019, both JV parties entered into binding term sheets for the sale of their 50% interest's in the Heavy Mineral Sands plant and tenements (ML20669 and ML20737).

The total proceeds for the sale of Metallica's 50% interest in the Heavy Mineral Sands Plant and Tenements was \$1,722,203 (excluding GST but including the refund of the environmental bond). The HMS plant will be released to the new owner shortly as Ozore Resources have been paid in full.

#### **CAPE YORK**

## REGIONAL EXPLORATION MLM INTEREST 50%

No work was completed on the regional exploration tenements during the Quarter as the main focus was on completing the sale of the HMS tenements and plant. As part of the ongoing review of the tenement holdings, the JV relinquished four tenements which showed low prospectivity. This relinquishment has provided a significant cost saving. The JV will look to further reduce the regional exploration tenements during the Quarter.

#### **ESMERALDA**

#### GOLD & BASE METALS, GRAPHITE MLM INTEREST 100%

The Esmeralda Project consists of 3 EPMs covering 976km<sup>2</sup>.

An internal study for gold and base metal targets on the Esmeralda tenements was completed in the June Quarter 2019. The study comprised of modelling public domain geophysical data over the project tenements and this resulted in a better understanding of the occurrence and distribution of the graphitic granites and the associated intrusives beneath the cover sequence.

A number of copper and coppergold intrusive-related and vein/ lode related target areas have been identified from the study and Metallica is continuing to interpolate the study results and plan an exploration strategy based on these results.

No other exploration work was undertaken on the Esmeralda tenements during the September 2020 Quarter.

Planning for an Inverse Polarisation (IP) program is underway which is expected to assist in identifying any drill targets for the project.

## **CORPORATE**

The Company will hold it's 16<sup>th</sup> Annual General Meeting of Shareholders on Wednesday 18 November at 11:30am at the offices of Colin Biggers Paisley, 1 Eagle Street, Brisbane QLD 4001.

#### COVID-19

The Company continues to follow recommendations from Queensland Health and the Australian Government to provide a COVID-19 safe workplace.

Metallica remains committed to following the guidelines released by the Government which will continue to reduce on ground activities over the December Quarter 2020.

#### FINANCIAL UPDATE

Metallica ended the September 2020 Quarter with \$2.69 million in cash and without any debt.

#### DECEMBER 2020 QUARTER OUTLOOK

Metallica's focus for the December 2020 Quarter is to:

- Complete the November drilling program at the Cape Flattery Silica Sands Project;
- Finalise the Conduct and Compensation Agreement with the Hopevale Congress and the Aboriginal Cultural Heritage Agreements with Hopevale Congress and Walmbaar Aboriginal Corporation;

- Establish a maiden resource for the Silica Sands project;
- Continue to look for opportunities to reduce Urquhart Bauxite JV tenement and project costs;
- Progress the review of several new opportunities in the gold/ precious metals-copper and other mineral commodity sectors - the Company will then update shareholders accordingly; and
- Continue to monitor
   Metallica's involvement in
   the Wagina Project in the
   Solomon Islands.

### NOTICES

#### **COMPETENT PERSON'S STATEMENT**

The information in this report that relates to Exploration Results and Exploration Targets is based on information compiled by John Cameron (a geologist of over 25 years' experience), and a Competent Person who is a Member of the Australasian Institute of Mining and Metallurgy and is a contract consultant to Metallica Minerals Ltd. Mr Cameron has sufficient experience which is relevant to the style of mineralisation and type of deposit under consideration and to the activity being undertaken to qualify as Competent Person as defined in the 2012 Edition of the Australasian Code for Reporting of Exploration Results, Mineral Resources and Ore Reserves. Mr Cameron consents to the inclusion of this information in the form and context in which it appears in this release/report.

#### **CAUTION REGARDING FORWARD-LOOKING STATEMENTS**

Certain statements made in this announcement contain or comprise certain forward-looking statements. Although Metallica believes that the estimates and expectations reflected in such forward-looking statements are reasonable, no assurance can be given that such expectations will prove to have been correct. Accordingly, results could differ materially from those set out in the forward-looking statements as a result of, among other factors, changes in economic and market conditions, success of business and operating initiatives, changes in the regulatory environment and other government actions, fluctuations in commodity prices and exchange rates and business and operational risk management. Metallica undertakes no obligation to update publicly or release any revisions to these forward-looking statements to reflect events or circumstances after today's date or to reflect the occurrence of unanticipated events.

#### **COMPLIANCE STATEMENT**

This statement has been prepared in accordance with accounting standards and policies which comply with Listing Rule 19.11A.

2. This statement gives a true and fair view of the matters disclosed.

Date: 30 October 2020

Authorised by: the Board of Directors

#### NOTES

- 1. This Quarterly cash flow report and the accompanying activity report provide a basis for informing the market about the entity's activities for the past Quarter, how they have been financed and the effect this has had on its cash position. An entity that wishes to disclose additional information over and above the minimum required under the Listing Rules is encouraged to do so.
- 2. If this Quarterly cash flow report has been prepared in accordance with Australian Accounting Standards, the definitions in, and provisions of, AASB 6: Exploration for and Evaluation of Mineral Resources and AASB 107: Statement of Cash Flows apply to this report. If this Quarterly cash flow report has been prepared in accordance with other accounting standards agreed by ASX pursuant to Listing Rule 19.11A, the corresponding equivalent standards apply to this report.
- 3. Dividends received may be classified either as cash flows from operating activities or cash flows from investing activities, depending on the accounting policy of the entity.
- 4. If this report has been authorised for release to the market by your board of directors, you can insert here: "By the board". If it has been authorised for release to the market by a committee of your board of directors, you can insert here: "By the [name of board committee e.g. Audit and Risk Committee]". If it has been authorised for release to the market by a disclosure committee, you can insert here: "By the Disclosure Committee".
- 5. If this report has been authorised for release to the market by your board of directors and you wish to hold yourself out as complying with recommendation 4.2 of the ASX Corporate Governance Council's Corporate Governance Principles and Recommendations, the board should have received a declaration from its CEO and CFO that, in their opinion, the financial records of the entity have been properly maintained, that this report complies with the appropriate accounting standards and gives a true and fair view of the cash flows of the entity, and that their opinion has been formed on the basis of a sound system of risk management and internal control which is operating effectively.
