

8common partners with Syphnt to harness Artificial Intelligence for expense8 and CardHero platforms

- 8common will leverage Syphnt's AI-driven optical character recognition (OCR) solution
- The expense8 platform will be implementing Syphnt's new document intelligence capabilities for the Federal Treasury in Q2 FY21
- The partnership will see 8common continue its track record of innovative technologies to simplify business for its customers

8common Limited (ASX: 8CO, the **Company**) announces that it has partnered with BPAY Group and BCG Digital Ventures-owned document intelligence company Syphnt Pty Ltd, to further harness artificial intelligence and machine learning to turn documents into data, insights and action. The integration of Syphnt will enable 8common to enhance the quick and accurate extraction of key information from receipts for direct upload to the expense8 platform.

8common has confirmed that the expense8 platform will be implementing Syphnt's new document intelligence capabilities for the Federal Treasury in Q2 FY21. 8common will also leverage Syphnt's document intelligence capabilities in its recently announced CardHero program, which leverages the expense8 platform.

Andrew Bond, 8common's CEO said, "Syphnt's OCR technology will continually learn how to extract and interpret key information from receipts, which in turn continues to improve accuracy and allows for further automation of transaction entry and reconciliation. As a product led company, 8common is continuously driving innovation and committed to delivering great customer experience."

Syphnt CEO, Mr Warren Billington said, "There is a strong focus for many enterprises to accelerate their digital transformation journeys and documents are still a major impediment to realising the benefits of that transformation. Manual processing of documents is time consuming, error prone and delivers a poor customer experience."

This release has been approved by the Board of 8common.
