

MACQUARIE BANK INTERIM FINANCIAL REPORT

Half year ended 30 September 2020

Macquarie Bank 2021 Interim Financial Report

Inis interim Financial Report has been prepared in accordance with Australian Accounting Standards and the *Corporations Act 2001* (Cth) and does not include all the notes of the type normally included in an annual financial report. Macquarie Bank Limited's (MBL) most recent annual financial report is available at **www.macquarie.com** as part of Macquarie Bank's 2020 Annual Report. MBL has also released information to the Australian Securities Exchange operated by ASX Limited (ASX) in compliance with the continuous disclosure requirements of the ASX Listing Rules. Announcements made by MBL under such rules are available on ASX's internet site **www.asx.com.au** (MBL's ASX code is 'MBL').

The material in this report has been prepared by MBL ABN 46 008 583 542 and is current at the date of this report. It is general background information about Macquarie Bank's (MBL and its subsidiaries, the Consolidated Entity) activities, is provided in summary form in terms of the requirements of AASB 134 *Interim Financial Reporting* and does not purport to be complete. It is not intended to be relied upon as advice to investors or potential investors and does not take into account the investment objectives, financial situation or needs of any particular investor. These should be considered with professional advice when deciding if an investment is appropriate.

The Interim Financial Report was authorised for issue by MBL's Directors on 6 November 2020. The Board of Directors has the power to amend and reissue the Financial Report.

The Macquarie name and Holey Dollar device are registered trade marks of Macquarie Group Limited ACN 122 169 279.

Directors' Report

Directors

For the half year ended 30 September 2020

The Directors of MBL submit their report with the financial report of the Consolidated Entity for the half year ended 30 September 2020.

Directors

At the date of this report, the Directors of MBL are:

Independent Directors P.H. Warne, Chairman

J.R. Broadbent AC

- G.M. Cairns
- P.M. Coffey
- M.J. Coleman
- D.J. Grady AO
- G.R. Stevens AC
- N.M. Wakefield Evans

Executive Voting Directors

M.J. Reemst, Managing Director and Chief Executive Officer

S.R. Wikramanayake

The Directors listed above each held office as a Director of Macquarie Bank throughout the period and until the date of this report. Those Directors listed as Independent Directors have been independent throughout the period of their appointment.

M.J. Hawker AM retired as an Independent Director effective 30 September 2020.

G.R. Banks AO retired as an Independent Director effective 30 July 2020.

Result

The financial report for the half year ended 30 September 2020 and the results herein are prepared in accordance with AASB 134 *Interim Financial Reporting* and the *Corporations Act 2001* (Cth).

The consolidated profit attributable to the ordinary equity holder of Macquarie Bank, in accordance with Australian Accounting Standards, for the period was \$A660 million (half year to 31 March 2020: \$A469 million; half year to 30 September 2019: \$A992 million).

Operating and financial review

For the half year ended 30 September 2020

Review of performance and financial position

Overview

Macquarie Bank's consolidated net profit attributable to the ordinary equity holder of \$A660 million for the half year ended 30 September 2020 decreased 33% from \$A992 million in the prior corresponding period⁽¹⁾ and increased 41% from \$A469 million in the prior period⁽²⁾.

	F	IALF YEAR TO		MOVEM	ENT

Profit attributable to the ordinary equity holder	660	469	992	41	(33)

Prior period discontinued operations

On 10 December 2018, the Consolidated Entity disposed of its Corporate and Asset Finance's Principal Finance and Transportation Finance businesses (the businesses) to a related group entity, Macquarie Financial Holdings Pty Limited (MFHPL) and its subsidiaries.

Under terms of the agreement the Consolidated Entity recognises there is an adjustment to the sales consideration in certain situations following a subsequent sale of the transferred businesses by MFHPL and its subsidiaries. A gain of \$A164 million was recognised in the period ended 31 March 2020 as a consequence of this provision.

Operating Group update

During the current period, certain activities of CGM's Cash Equities business, which operated within the Bank Group, were transferred to Macquarie Capital in the Non-Bank Group. The Cash Equities current period result and comparatives have been reclassified into the Corporate segment to reflect the reorganisation from CGM in the Bank Group.

Operating and financial review

For the half year ended 30 September 2020 continued

Operating Groups

Banking and Financial Services (BFS)

\$A315m ↓ 18% on pcp

- Increased credit impairment charges driven by portfolio growth as well as a deterioration in current and expected macroeconomic conditions compared to the prior corresponding period as a result of COVID-19
 - Higher employment expenses including increased headcount to better support clients through the impacts of COVID-19 as well as increased costs associated with investment in technology to support business growth and to meet regulatory requirements.

Partially offset by:

higher net interest and trading income driven by volume growth in BFS deposits and the loan portfolio, partially offset by margin compression on deposits and lower vehicle finance portfolio volumes.

Commodities and Global Markets (CGM)

\$A924m ↓ 19% on pcp

- Reduced client contribution in the commodities sector on a strong prior corresponding period, predominantly due to lower activity in 2Q21⁽¹⁾
- Increased credit and other impairment charges reflecting a deterioration in current and expected macroeconomic conditions compared to the prior corresponding period due to COVID-19, resulting in overlays for regional and industry specific risks as well as impairments taken on a small number of underperforming positions
- Reduced fee and commission income due to decreased demand for commodity risk premia products.

Partially offset by:

- consistent client and trading activity in foreign exchange, interest rate and credit products
- increased net operating lease income driven by higher secondary income from the asset financing portfolio.

Net operating income

Net operating income of \$A2,943 million for the half year ended 30 September 2020 decreased 14% from \$A3,430 million in the prior corresponding period, mainly driven by lower Other operating income and charges as well as higher Credit and Other impairment charges. This was partially offset by higher Net operating lease income.

Operating and financial review

For the half year ended 30 September 2020 continued

Operating expenses

Total operating expenses of \$A2,103 million for the half year ended 30 September 2020 was broadly in line with \$A2,108 million in the prior corresponding period, mainly driven by decreases across Employment expenses and Brokerage, commission and trading-related expenses, predominantly offset by Other operating expenses and Occupancy.

Key drivers included:

Employment expenses

н	ALF YEAR TO		
30 Sep 20 \$Am	31 Mar 20 \$Am	30 Sep 19 \$Am	↓ 13% on prior
643	612	735	corresponding period

Decrease in performance-related profit share expense mainly as a result of lower performance in the Bank Group

 Lower share-based payments expense mainly driven by the non-recurrence of accelerated amortisation of equity awards relating to retiring Key Management Personnel recognised in the prior corresponding period.

Partially offset by:

higher leave provisions due to less holiday entitlements being taken by staff driven by COVID-19.

period

- Increased support services due to increasing compliance and regulatory requirements and higher business activity in the Bank Group
- The recognition of certain transaction related charges in Corporate.

Partially offset by:

 reduced travel and entertainment expenses across the Bank Group driven by COVID-19.

Income tax expense

Income tax expense for the half year ended 30 September 2020 was \$A180 million, a 44% decrease from \$A324 million in the prior corresponding period. The effective tax rate for the half year ended 30 September 2020 was 21.4%, down from 24.5% in the prior corresponding period and 45.7% in the prior period.

The lower effective tax rate compared to the prior corresponding period was mainly driven by the geographic composition and nature of earnings.

8

Statement of financial position

The Consolidated Entity's statement of financial position has been impacted during the period ended 30 September 2020 by changes resulting from business activities, Group Treasury management initiatives, developments with respect to COVID-19 and macroeconomic factors including the appreciation of the Australian dollar against major currencies.

Total assets			Total liabilities	
AS AT			AS AT	
30 Sep 20 \$Am	31 Mar 20 \$Am		30 Sep 20 \$Am	31 Mar 20 \$Am
205,854	226,136	9% on 31 Mar 20	192,011	211,909

In addition to the appreciation of the Australian dollar against major currencies which contributed to the decrease in total assets, the principal drivers for the decrease in the Consolidated Entity's total assets were as follows:

derivative assets of \$A21.6 billion as at 30 September 2020 decreased 52% from \$A44.8 billion as at 31 March 2020 primarily due to a decrease in client trade volumes and mark to market movements in energy markets, interest rate and foreign exchange products in CGM

margin money and settlement assets of \$A9.2 billion as at 30 September 2020 decreased 25% from \$A12.2 billion as at 31 March 2020 primarily due to lower trade volumes resulting in a decrease in margins placed with financial institutions by CGM.

These decreases were partially offset by:

cash collateral on securities borrowed and reverse repurchase agreements of \$A42.9 billion as at 30 September 2020 increased 14% from \$A37.7 billion as at 31 March 2020, primarily driven by an increase in reverse repurchase agreements in CGM and an increase in Group Treasury reverse repurchase agreements following lower Operating Group funding requirements

trading assets of \$A18.5 billion as at 30 September 2020 increased 13% from \$A16.3 billion as at 31 March 2020 primarily due to an increase in oil and precious metals inventories, and trading and equity positions held as hedges in CGM, partially offset by a decrease in certain bond and treasury bills. In addition to the appreciation of the Australian dollar against major currencies which contributed to the decrease in total liabilities, the principal drivers for the decrease in the Consolidated Entity's total liabilities were as follows:

- derivative liabilities of \$A16.1 billion as at 30 September
 2020 decreased 57% from \$A37.8 billion as at 31 March
 2020 primarily due to a decrease in client trade volumes
 and mark to market movements in energy markets, interest
 rate and foreign exchange products in CGM
- debt issued of \$A40.6 billion as at 30 September 2020 decreased 13% from \$A46.9 billion as at 31 March 2020 driven by maturity of debt positions and repayment of notes
- margin money and settlement liabilities of \$A16.7 billion as at 30 September 2020 decreased 13% from \$A19.1 billion as at 31 March 2020 primarily due to lower trade volumes resulting in a decrease in call margins placed by financial institutions with CGM.

These decreases were partially offset by:

- deposits of \$A77.2 billion as at 30 September 2020 increased 15% from \$A67.3 billion as at 31 March 2020 primarily due to an increase in retail and business banking deposits in BFS
- cash collateral on securities lent and repurchase agreements of \$A5 billion as at 30 September 2020 increased significantly from \$A2.3 billion as at 31 March 2020 primarily due to the initial draw down of the new Term Funding Facility from the Reserve Bank of Australia by Group Treasury and increased stock lending agreements in CGM.

Total equity

AS AT		
30 Sep 20 \$Am	31 Mar 20 \$Am	1 20/
13,843	14,227	↓ 3% on 31 Mar 20

The decrease in the Consolidated Entity's equity was attributable to the decrease in the foreign currency translation and net investment hedge reserve of \$A0.6 billion following the appreciation of the Australian dollar against major currencies and redemption of the Macquarie Income Securities of \$A0.4 billion, partially offset by an increase in retained earnings of \$A0.7 billion during the period.

on 31 Mar 20

Operating and financial review

For the half year ended 30 September 2020 continued

Funding

Macquarie Bank's liquidity risk management framework is designed to ensure that it is able to meet its funding requirements as they fall due under a range of market conditions.

Macquarie Bank has diversity of funding by both source and maturity. The weighted average term to maturity of term funding maturing beyond one year⁽¹⁾ was 4.1 years as at 30 September 2020.

vears

The weighted

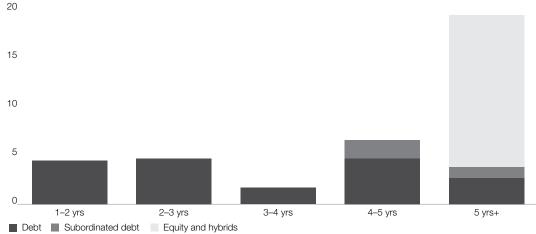

average term to maturity of term

funding maturing

beyond one year at 30 September 2020

Term funding profile

Detail of drawn funding maturing beyond one year

Macquarie Bank has a liability driven approach to balance sheet management, where funding is raised prior to assets being taken on to the balance sheet. Since 1 April 2020, Macquarie Bank has continued to raise term wholesale funding across various products and currencies.

Details of term funding raised between 1 April 2020 and 30 September 2020:

1		Total \$Ab
Issued paper	- Senior and subordinated	1.9
Secured funding	- Term securitisation and other secured finance	1.9
	 – RBA Term Funding Facility⁽²⁾ 	1.7
Hybrids	 Hybrid instruments 	0.6
Total ⁽³⁾		6.1

Macquarie Bank has continued to develop its major funding markets and products during the half year ended 30 September 2020.

Including drawn RBA Term Funding Facility (TFF), excluding equity which is a permanent source of funding, and securitisations. Initial Allowance drawn as at 30 September 2020. MBL has \$A1.3 billion of undrawn TFF Supplementary Allowance. MBL has (1)(2) access to the TFF Additional Allowance, the volume of which will be determined by business lending growth to April 2021. Issuances cover a range of tenors, currencies and product types and are Australian dollar equivalent based on FX rates at the (3) time of issuance and include undrawn facilities (does not include undrawn accessible TFF Allowances).

Capital

Under Basel III rules, APRA requires authorised deposit-taking institutions (ADIs) to have a minimum ratio of Tier 1 capital to risk-weighted assets of 8.5% including the 2.5% capital conservation buffer, with at least 7.0% in the form of Common Equity Tier 1 capital, per APRA ADI Prudential Standard 110⁽¹⁾. In addition, APRA may impose ADI-specific minimum capital ratios which may be higher than these levels. The minimum BCBS Basel III leverage ratio requirement of 3% was effective from 1 January 2018⁽²⁾.

Macquarie Bank is well capitalised, with the following capital adequacy ratios as at 30 September 2020.

Macquarie Bank Basel III ratios as at 30 September 2020	Harmonised Basel III ⁽³⁾	APRA Basel III
Common Equity Tier 1 Capital Ratio	16.8%	13.5%
Tier 1 Capital Ratio	18.9%	15.4%
Leverage Ratio	6.5%	5.9%

F

For further information relating to the capital adequacy of Macquarie Bank, refer to section 6.0 *Capital* of the Management Discussion and Analysis available at **macquarie.com/results**

- 1) Based on materiality, the countercyclical capital buffer (CCyB) of ~1bps has not been included.
- (2) APRA has released draft prudential standards on its implementation of a minimum requirement for the leverage ratio of 3.5% expected to be effective from January 2023.
- (3) 'Harmonised' Basel III estimates are calculated in accordance with the BCBS Basel III framework.

Operating and financial review

Our strategy

Our purpose

Empowering people to innovate and invest for a better future.

What We Stand For

Opportunity

Integrity

The way we fulfil our purpose is defined by these three long held principles that determine how we conduct business and guide what we do every day. Our purpose and principles and what we expect of our staff are set out in our *Code of Conduct*.

The balance between opportunity and accountability, while operating with integrity within a strong risk management framework, is a feature of Macquarie Bank's success and a key factor in our long record of unbroken profitability.

Our business strategy

Consistent with the principles of *What We Stand For*, Macquarie Bank's business strategy is focused on the medium-term with the following key aspects:

Risk management approach

Adopting a conservative approach to risk management underpinned by a sound risk culture. Macquarie Bank's robust risk management framework and risk culture are embedded across all Bank Group entities.

Strong balance sheet

Maintaining a strong and conservative balance sheet.

This is consistent with Macquarie Bank's longstanding policy of holding a level of capital which supports its business and managing its capital base ahead of ordinary business requirements. Macquarie Bank remains well funded, with diversified funding sources, including deposits.

We continue to pursue the strategy of diversifying funding sources by growing our deposit base and accessing different funding markets.

Business mix

Conducting a mix of annuity-style and markets-facing businesses that deliver solid returns in a range of market conditions.

Macquarie Bank has progressively developed its annuity-style businesses, providing steady returns to the business and our stakeholders, and stability to clients.

Diversification

Operating a diversified set of businesses across different locations and service offerings: asset finance, lending, banking, and risk and capital solutions across debt, equity and commodities.

Macquarie Bank offers a range of services to government, institutional, corporate and retail clients. This diversity in services and clients mitigates concentration risk and provides resilience to Macquarie Bank.

Proven expertise

Utilising proven deep expertise has allowed Macquarie Bank to establish leading market positions as a global specialist in sectors including resources and commodities, energy and financial institutions.

Adjacencies

Expanding progressively by pursuing adjacencies through organic opportunities and selective acquisitions.

These include products and geographies adjacent to our established areas of expertise. This results in sustainable evolutionary growth.

Pursuit of growth opportunities

Targeting continued evolution and growth through innovation. We start with knowledge and skill, and we encourage ingenuity and entrepreneurial spirit coupled with accountability.

Ideas for new businesses are typically generated in the Operating Groups. Additionally, there are no specific businesses, markets or regions in which our strategy dictates that we operate. This means we retain operational flexibility and can adapt the portfolio mix to changing market conditions within the boundaries of the Risk Appetite Statement (RAS) approved by the Board.

Events after the reporting date

There were no material events between 30 September 2020 and the date of this report that have not been disclosed elsewhere in the financial statements.

Interim dividend

No dividends were paid during the current period. On 29 October 2020 the directors resolved to pay a dividend of \$A500 million on 2 November 2020.

Rounding of amounts

In accordance with ASIC Corporations (Rounding in Financial/Directors' Reports) Instrument 2016/191, amounts in the Directors' Report and the Interim Financial Report have been rounded off to the nearest million dollars unless otherwise indicated.

This report is made in accordance with a resolution of the Directors.

Auditor's independence declaration

For the half year ended 30 September 2020

As lead auditor for the review of Macquarie Bank Limited for the half-year ended 30 September 2020, I declare that to the best of my knowledge and belief, there have been:

- no contraventions of the auditor independence requirements of the *Corporations Act 2001* (Cth) in relation to the review; and
- no contraventions of any applicable code of professional conduct in relation to the review.

This declaration is in respect of Macquarie Bank Limited and the entities it controlled during the period.

Notes to the consolidated financial statements

For the half year ended 30 September 2020

Note 1 Summary of significant accounting policies

(i) Basis of preparation

This general purpose interim set of financial statements for the half year ended 30 September 2020 has been prepared in accordance with Australian Accounting Standard AASB 134 *Interim Financial Reporting* (AASB 134). Compliance with AASB 134 ensures compliance with International Accounting Standard IAS 34 *Interim Financial Reporting* as issued by the International Accounting Standards Board (IASB).

This interim set of financial statements comprises the consolidated financial report of Macquarie Bank Limited (MBL or the Company) and the entities it controlled at the end of, or during the period (the Consolidated Entity).

This interim set of financial statements does not include all the disclosures of the type that are normally included in the Consolidated Entity's annual financial report. Accordingly, this report is to be read in conjunction with the Consolidated Entity's annual financial report for the year ended 31 March 2020 and any public announcements made by the Consolidated Entity during the half year ended 30 September 2020 in accordance with the continuous disclosure requirements.

In accordance with ASIC Corporations (Rounding in Financial/ Directors' Reports) Instrument 2016/191, amounts in the Directors' Report and the interim set of financial statements have been rounded to the nearest million Australian dollars (\$) unless otherwise indicated.

The accounting policies adopted in the preparation of the interim set of financial statements are consistent with those adopted and disclosed in the Consolidated Entity's annual financial report for the year ended 31 March 2020.

Critical accounting estimates and significant judgements

The preparation of this interim set of financial statements in conformity with Australian Accounting Standards requires the use of certain critical accounting estimates. It also requires management to exercise judgement in the process of applying the accounting policies.

Areas of estimation uncertainty and the basis of key judgements applied by management in preparing the interim set of financial statements are consistent with those that were applied and disclosed in the annual financial report for the year ended 31 March 2020.

Estimates and judgements are continually evaluated and are based on historical experience and other factors, including reasonable expectations of future events.

Management believes that the estimates used in preparing the financial report are reasonable. Actual results in the future may differ from those reported and it is therefore reasonably possible, on the basis of existing knowledge, that outcomes within the next financial period that are different from the Consolidated Entity's assumptions and estimates could require an adjustment to the carrying amounts of the reported assets and liabilities.

Coronavirus (COVID-19) impact

Background

The Novel Coronavirus (COVID-19) continues to have an impact on global economies and financial markets. It has also led to material structural shifts in the behaviour of the economy and unprecedented actions by financial markets, governments, and regulators.

The Consolidated Entity's understanding of the impact of COVID-19 continues to evolve and has been incorporated into the determination of its results of operations and measurement of its assets and liabilities at the reporting date. Other than adjusting events that provide evidence of conditions that existed at the end of the reporting period, the impact of events that arise after the reporting period will be accounted for in future reporting periods.

Impact of COVID-19 on the macroeconomic outlook

The Consolidated Entity's outlook towards macroeconomic scenarios at the end of the reporting period remained broadly consistent with the scenarios applied as at 31 March 2020. Individual macroeconomic factors within those scenarios have however been adjusted for published data and applicable reputable guidance, where applicable.

Forward-looking information (FLI), including a detailed explanation of the scenarios and related probabilities considered in determining the Consolidated Entity's forward-looking assumptions for the purposes of its expected credit loss (ECL), has been provided in Note 11 *Expected credit losses*.

Processes applied

Consistent with the approach applied in the preparation of the annual financial statements for the year ended 31 March 2020, management:

- re-evaluated whether there were any additional areas of judgement or estimation uncertainty
- reviewed external market communications to identify COVID-19 related impacts
- reviewed public forecasts and experience from previous downturns
- updated its economic outlook, principally for the purposes of inputs into its ECL models through the application of FLI and as an input into the impairment analysis of non-financial assets
- assessed the impact of market inputs and variables impacted by COVID-19 on the carrying values of its assets and liabilities
- ran stress testing scenarios, which are an integral component of Consolidated Entity's risk management framework and a key input to the capital adequacy assessment process, to assess the potential impacts of COVID-19 on its portfolios to assist in its prudent risk management
- considered the impact of COVID-19 on the Consolidated Entity's financial statements disclosures.

Note 1

Summary of significant accounting policies continued

(i) Basis of preparation continued

Consideration of the impact on the financial statements and related disclosures

Key areas that have been impacted by COVID-19 and that were consistent with those presented in Note 1(i) *Basis of preparation* in the annual financial statements for the year ended 31 March 2020 were as follows:

Trading assets and liabilities

Refer to Note 6, Note 13 and Note 22.

The impact of changes in valuation inputs has been considered in terms of the classification of exposures in the fair value hierarchy, transfers within the fair value hierarchy and the Level 3 sensitivity analysis.

Financial investments

Refer to Note 8.

The determination of the investments' carrying value for unlisted equity investments included a consideration of the impact of COVID-19.

Derivative assets and liabilities

Refer to Note 21.

The Consolidated Entity reviewed the appropriateness of the adjustments used in determining the fair value and the classification within the fair value hierarchy.

Held for sale assets and liabilities

Refer to Note 9 and Note 15.

The appropriateness of the held for sale classification at the reporting date was reassessed and affirmed.

Loan and other assets

Refer to Note 10 and Note 11.

Consistent with the approach at 31 March 2020, the Consolidated Entity monitored its stage II and stage III exposures through its CreditWatch forum which included a consideration of the macroeconomic outlook, customer credit quality, the type of collateral held, exposure at default, and the effect of support measures. The ECL methodology, significant increase in credit risk (SICR) thresholds, and definition of default remained consistent with prior periods. The model inputs, including FLI, scenarios and associated weightings, together with the determination of the staging of exposures were adjusted as appropriate based on latest available information. The continued uncertainty in the economic outlook has resulted in an increased use of post model adjustments (overlays). These overlays to the modelled ECL results reflect the application of judgement.

In March 2020, the Consolidated Entity announced a comprehensive package of support measures to help Macquarie business and personal banking clients affected by COVID-19. In terms of accounting standards, the support measures were modifications of the original terms of the contract and typically accounted for as non-substantial modifications.

Debt issued, loan capital, borrowings and repurchase arrangements

Refer to Note 16 and Note 19(iii).

During the current reporting period, the Consolidated Entity issued new debt arrangements and there were no modifications to existing debt facilities. An assessment of the Consolidated Entity's debt-related covenants concluded that there were no breaches.

During the current reporting period, the Consolidated Entity drew down \$1.7 billion from the Reserve Bank of Australia (RBA) under the Term Funding Facility (TFF). The objective of the TFF is to reduce funding costs of Australian Deposit-taking Institutions (ADIs) and thus assist in reducing interest rates for borrowers, as well as encourage ADIs to support businesses during this period by expanding their lending. The draw down is in the nature of repurchase agreements, is collateralised with issued loan notes in the Consolidated Entity's home loans' structured entity and has a term of three years. For drawdowns under the initial allowance, which closed on 30 September 2020, the TFF attracts an interest rate of 0.25% per annum and for new drawdowns, effective 4 November 2020, is 0.1% per annum.

Hedge accounting

Based on available facts at the reporting date, including announcements from governments and regulators, as well as discussions with our clients, the future cash flows were determined to remain highly probable and hence hedge accounting remains appropriate in accordance with relevant accounting standards.

For the half year ended 30 September 2020 continued

Note 1

Summary of significant accounting policies continued

(i) Basis of preparation continued

Deferred tax assets

Deferred tax assets are recognised to the extent it is probable that taxable profit will be available against which deductible temporary differences can be utilised. A review of deferred tax asset balances has been performed at 30 September 2020 to determine the recoverability of the balances, which included consideration of the COVID-19 environment, asset impairments and timeframe in which those temporary differences can be recovered.

Off balance sheet exposures

Refer to Note 20.

The Consolidated Entity incorporated an assessment of COVID-19 in determining the completeness of its contingent liabilities and commitments.

(a) New Australian Accounting Standards and amendments to Australian Accounting Standards that are effective in the current period

Revised AASB *Conceptual Framework* for Financial Reporting

The revised Australian Accounting Standards Board *Conceptual Framework* (AASB Framework) was effective for the Consolidated Entity's annual financial reporting period beginning on 1 April 2020.

The AASB Framework provides the AASB with a base of consistent concepts upon which future accounting standards will be developed. The AASB Framework will also assist financial report preparers to develop consistent accounting policies when there is no specific or similar standard that addresses an issue.

The AASB Framework includes amendments to the definition and recognition criteria for assets, liabilities, income and expenses, guidance on measurement and derecognition, and other relevant financial reporting concepts. The application of the AASB Framework did not have a material impact on the Consolidated Entity's financial statements.

Other amendments made to existing standards

Other amendments that were mandatorily effective for the annual reporting period beginning on 1 April 2020 did not result in a material impact on the Consolidated Entity's financial statements. (b) New Australian Accounting Standards and amendments to Australian Accounting Standards that are not yet effective for the current period

(i) AASB 17 Insurance Contracts

AASB 17 *Insurance Contracts* amends the accounting for insurance contracts and will replace AASB 4 *Insurance Contracts*, AASB 1023 *General Insurance Contracts* and AASB 1038 *Life Insurance Contracts*. The standard is mandatorily effective for the Consolidated Entity's annual reporting period beginning on 1 April 2023. The Consolidated Entity is assessing the impact of the revised standard.

(ii) AASB 2019-3 Interest Rate Benchmark Reform

IBOR reform: Transition from inter-bank offered rates (IBOR) to alternative reference rates (ARRs)

IBOR are interest rate benchmarks that are used in a wide variety of financial instruments such as derivatives and lending arrangements. Examples of IBOR include 'LIBOR' (the London Inter-bank Offered Rate), 'EURIBOR' (the Euro Inter-bank Offered Rate) and 'BBSW' (the Australian Bank Bill Swap Rate). Historically, each IBOR has been calculated and published daily based on submissions by a panel of banks. Over time, changes in inter-bank funding markets have meant that IBOR panel bank submissions have become less based on observable transactions and more on expert judgement. Financial markets' authorities reviewed what these changes meant for financial stability, culminating in recommendations to reform major interest rate benchmarks. As a result of these recommendations, many IBOR around the world are undergoing reforms.

Some jurisdictions will adopt a multiple rate approach and develop new ARRs alongside IBORs reformed to reference observable transactions. Australia is such an example where the existing IBOR benchmark BBSW has undergone reform and will continue for the foreseeable future with the nominated ARR for AUD which is AONIA. In the case of LIBOR, a multiple rate approach is not possible due to the lack of observable transactions to support robust LIBOR reference rates. A transition away from LIBOR by the end of 2021 is therefore necessary.

Industry working groups are currently working with authorities and consulting with market participants to develop market practices that may be used to transition existing LIBOR-linked contracts for derivatives, loans, bonds and other financial instruments that mature beyond the end of 2021 to ARRs. Amongst the issues to be considered are key differences between LIBOR and ARRs. LIBOR are term rates which are quoted for forward-looking periods (for example, one-, three-, six- or twelve-month periods) at the beginning of that period and includes a credit spread for bank credit risk. ARRs on the other hand are overnight rates with little or no credit risk. To facilitate the transition of contracts from LIBOR to ARRs on an economically equivalent basis, adjustments for term and credit differences will need to be applied.

As a diversified financial services group with a variety of global products and services, IBOR reforms, including the transition from LIBOR to ARRs, are important changes for the Consolidated Entity.

Note 1 Summary of significant accounting policies continued

(i) Basis of preparation continued

The Consolidated Entity's IBOR project

During 2018, the Consolidated Entity initiated a project, which is sponsored by its Chief Financial Officer (CFO), to manage the impacts of IBOR reform, including overseeing the transition from LIBOR to ARRs. A group-wide steering committee was established with its key responsibility being the governance of the project. This committee includes senior executives from the Consolidated Entity's Operating Groups, Financial Management Group (FMG), Risk Management Group (RMG), Corporate Operations Group (COG) and Legal and Governance.

In addition to the project's scoping and assessments outlined in the Consolidated Entity's annual financial report for the year ended 31 March 2020, the project has progressed from the planning phase to implementing plans across businesses in readiness for new ARR products and to manage the transition of existing contracts that reference LIBOR and mature beyond the end of 2021. Industry working groups and authorities have also outlined a range of recommendations and milestones that the industry and the Consolidated Entity are working towards. Whilst the COVID-19 pandemic has led to some delays across the industry and the project, the target completion date of end-2021 remains unchanged.

During the current half year, further measures have been implemented to ensure the key risks of IBOR transition are being appropriately managed. These measures include changes to transaction approval processes, staff training, client communications, system upgrades and the implementation of an IBOR conduct risk management framework.

impacts on financial reporting

AASB 2019-3 Amendments to Australian Accounting Standards – Interest Rate Benchmark Reform, issued in October 2019, amended AASB 7 Financial Instruments: Disclosures (AASB 7) and AASB 9 Financial Instruments (AASB 9), to provide certain relief from applying specific accounting requirements to hedge accounting relationships directly affected by IBOR reform. The relief enables the continuation of hedge accounting for impacted hedge relationships during the period of uncertainty prior to IBOR transition. The Consolidated Entity early adopted these amendments for the year ended 31 March 2020.

In August 2020, AASB 2020-8 Amendments to Australian Accounting Standards – Interest Rate Benchmark Reform Phase 2, amended standards including AASB 7, AASB 9 and AASB 16 Leases (AASB 16) to address accounting issues arising following the transition to ARR. The amendments provide certain relief from applying specific requirements related to hedge accounting and the modification of financial assets and financial liabilities if certain criteria are met.

Where modifications to a contract, or changes in the basis for determining the contractual cash flows under a contract, are necessitated as a result of IBOR reform and the new basis for determining the contractual cash flows is economically equivalent to the previous basis, the relief allows an entity to reset the yield applied to such an exposure on a prospective basis. Thus, at the time of modification, where the relief applies, there is no impact to the income statement. The relief requires continuation of hedge accounting in circumstances when changes to hedged items and hedging instruments arise as a result of changes required by the IBOR reform.

The amendments, which are mandatorily effective for annual reporting periods beginning on or after 1 January 2021, also require additional quantitative and qualitative disclosures. The Consolidated Entity is considering whether it will early adopt the amendments for its annual financial statements for the year ending 31 March 2021.

Other amendments made to existing standards

Other amendments made to existing standards that are not mandatorily effective for the annual reporting period beginning on 1 April 2020 and have not been early adopted, are not likely to result in a material impact on the Consolidated Entity's financial statements in the period of initial application.

(ii) Comparatives

As explained in the Note 1(i) *Basis of preparation* for the Consolidated Entity's annual financial report for the year ended 31 March 2020, the Consolidated Entity revised its accounting policy as it relates to client monies and cash and cash equivalents. As a result of the retrospective application of the revised accounting policy, the Consolidated Entity's statement of financial position at 30 September 2019 has been re-presented to remove client-related margin money deposited with clearing houses as well as excess cash received from certain clients. These amendments had no impact on reserves. As at 30 September 2019, this resulted in an (decrease)/ increase to:

- margin money and settlement assets of (\$5,163 million)
- cash and bank balances of (\$1,222 million)
- due from related body corporate entities of \$43 million
- margin money and settlement liabilities of (\$6,313 million)
- due to related body corporate entities of (\$29 million).

The amendment to these balances impacted the Consolidated Entity's presentation of cash and cash equivalents for the purposes of the statement of cash flows. In addition to re-presenting for this change, and in order to more closely align with the Consolidated Entity's cash and liquid assets portfolio, the Consolidated Entity extended its review of the balances included in the determination of cash and cash equivalents. The impact on the Consolidated Entity's cash and cash equivalents and statement of cash flows for the period ended 30 September 2019 is explained in Note 19 Notes to the consolidated statement of cash flows.

Separately, the Consolidated Entity reclassified several other balances within the statement of financial position's 30 September 2019 comparative financial information in order to better reflect the nature of the underlying asset or liability.

Where necessary, certain other comparative information has been re-presented to conform to changes in presentation in the current period.

Notes to the consolidated financial statements

Note 3 Segment reporting

(i) Operating Segments

AASB 8 *Operating Segments* requires the 'management approach' to disclosing information about the Consolidated Entity's reportable segments. The financial information is reported on the same basis as used internally by senior management for evaluating Operating Segment performance and for deciding how to allocate resources to Operating Segments. Such information may be produced using different measures to that used in preparing the statutory income statement.

For internal reporting, performance measurement and risk management purposes, the Consolidated Entity is divided into two Operating Groups and a Corporate segment (Reportable segments).

During the current period, certain activities of CGM's Cash Equities business which operated within the Bank Group were transferred to Macquarie Capital in the Non-Bank Group. Comparatives have been reclassified to reflect this reorganisation.

The financial information disclosed relates to the Consolidated Entity's continuing operations.

These segments have been set up based on the different core products and services offered. The Operating Groups comprise:

BFS provides a diverse range of personal banking, wealth management, business banking and vehicle finance⁽¹⁾ products and services to retail clients, advisers, brokers and business clients

CGM provides an integrated, end-to-end offering across global markets including equities, fixed income, foreign exchange, commodities and technology, media and telecoms, as well as providing clients with risk and capital solutions across physical and financial markets. CGM also delivers a range of tailored specialised asset finance solutions across a variety of industries and asset classes.

The Corporate segment, which is not considered an Operating Group, comprises head office and central service groups, including Group Treasury. As applicable, the Corporate segment holds certain legacy and strategic investments, assets and businesses that are not allocated to any of the Operating Groups. Consequent to a group internal restructuring, any balances pertaining to an operating segment that are not individually material are also reported as part of the Corporate segment.

Items of income and expense within the Corporate segment include the net result of managing Macquarie Bank's liquidity and funding requirements, earnings on capital and the residual accounting volatility relating to economically hedged positions where hedge accounting is applied, as well as accounting volatility for other economically hedged positions where hedge accounting is not applicable. Central overlays for ECL and impairments representing adjustments to modelled results which are not allocated to specific Operating Groups are presented as part of the Corporate segment. Other items of income and expenses include earnings from investments, unallocated head office costs and costs of central service groups, the Consolidated Entity's performance-related profit share and share-based payments expense, income tax expense and certain distributions attributable to certain non-controlling interests.

Below is a selection of key policies applied in determining the Operating Segment results.

Internal funding arrangements

Group Treasury has the responsibility for managing funding for the Consolidated Entity, and Operating Groups obtain their funding from Group Treasury. The interest rates charged by Group Treasury are determined by the currency and term of the funding. Break costs may be charged to Operating Groups for the early repayment of term funding.

Generally, Operating Groups may only source funding directly from external sources where the funding is secured by the Operating Group's assets. In such cases the Operating Group bears the funding costs directly and Group Treasury may levy additional charges where appropriate.

Deposits are a funding source for the Banking Group. BFS receives a deposit premium from Group Treasury on deposits that it generates. This deposit premium is included within Net interest and trading income for segment reporting purposes.

Transactions between Operating Segments

Operating Segments that enter into arrangements with other Operating Segments must do so on commercial terms or as agreed by the Consolidated Entity's Chief Executive Officer or Chief Financial Officer.

Internal transactions are recognised in each of the relevant categories of income and expense and eliminated on consolidation as appropriate.

Accounting for derivatives that hedge interest rate risk

With respect to businesses that predominantly earn income from lending activities, derivatives that hedge interest rate risk are measured at fair value through profit or loss (FVTPL). Changes in fair value are presented in net trading income and gives rise to income statement volatility unless designated in a hedge accounting relationship, in which case the carrying value of the hedged item is adjusted for changes in fair value attributable to the hedged risk to reduce volatility in the income statement. If designated in a cash flow hedge accounting relationship, the effective portion of the derivative's fair value gains or losses is deferred in the cash flow hedge reserve as part of Other comprehensive income (OCI), and subsequently recognised in the income statement at the time at which the hedged item affects the income statement for the hedged risk. For segment reporting, derivatives are accounted for on an accrual basis in the results of the Operating Groups to the extent that the Corporate segment manages the derivative volatility, either through the application of hedge accounting or where the derivative volatility may offset the volatility of other positions managed within the Corporate segment.

Notes to the consolidated financial statements

For the half year ended 30 September 2020 continued

Note 3 Segment reporting continued

(i) Operating Segments continued

Central service groups

The central service groups provide a range of functions supporting MBL's Operating Groups, ensuring they have the appropriate workplace support and systems to operate effectively and the necessary resources to meet their regulatory, compliance, financial reporting, legal and risk management requirements.

Central service groups recover their costs from Operating Groups generally on either a time and effort allocation basis or a fee for service basis. Central service groups include the Corporate Operations Group (COG), Financial Management Group (FMG), Risk Management Group (RMG), Legal and Governance and Central Executive.

Performance-related profit share and share-based payments

Performance-related profit share and share-based payments expense relating to the Macquarie Group Employee Retained Equity Plan (MEREP) are recognised in the Corporate segment and are not allocated to Operating Groups.

Income tax

Income tax expense and benefits are recognised in the Corporate segment and are not allocated to the Operating Groups. However, to recognise an Operating Group's contribution to permanent income tax differences, the internal management revenue/charge category is used.

This internal management revenue/charge category, which is primarily used for permanent income tax differences generated by the Operating Groups, are offset by an equal and opposite amount recognised in the Corporate segment such that they are eliminated on consolidation.

Reportable segment assets

Segment assets are the external operating assets that are employed by a segment in its operating activities.

Loan assets continue to represent the Consolidated Entity's most significant component of credit exposures on which ECL allowances are carried. The credit quality of the Consolidated Entity's loan assets, which are monitored through its credit policies, at the reporting date, remains broadly consistent with that as disclosed in the Consolidated Entity's annual financial report for the year ended 31 March 2020.

The table above reflects continued growth in the home loans' segment driven by strong demand with a comparatively low ECL due to the underlying collateral, lower loan-to-value ratio and credit enhancements. The carrying value of the exposure in the corporate, commercial and other lending segments reduced over the period as a result of repayments and the impact of the stronger Australian dollar. Repayments, lower drawdowns and the impact of the stronger Australian dollar contributed to the reduction in the asset financing portfolio carrying balance over the period.

Following the impact of COVID-19, the Consolidated Entity continued to work with and support its clients and customers. The provision of six month payment pause for Australian retail customers seeking support represented the largest initiative within the loan assets' category. The majority of the customers have since been contacted and the Consolidated Entity continues to see a growing number of customers resuming payments on their facilities. At 30 September 2020, loans assets with a gross carrying value of \$4,511 million continued to be subject to COVID-19 related payment deferrals after peaking at \$10,088 million during the period, which has continued to reduce post the reporting date as our customers have either resumed payments or have entered into alternate arrangements. Where the Consolidated Entity's customers utilising payment pauses have expressed negative sentiments on their ability to resume payments or have been uncontactable during the period, the loan assets have been recorded as stage II with the ECL allowance at 30 September 2020 reflecting this.

- (1) Includes \$159 million (31 March 2020: \$182 million, 30 September 2019: \$121 million) of fee and commission receivables.
- (2) Certain assets were transferred to an investment platform which is managed by the Consolidated Entity as an asset manager.
- (3) The ECL allowance carried against loan assets measured at FVOCI is not represented in the table as the allowance is included in reserves.
- (4) Includes \$14,810 million (31 March 2020: \$16,402 million; 30 September 2019: \$11,975 million) held by consolidated Structured Entities (SEs), which are available as security to note holders and debt providers.

Note 11 Expected credit losses

Presentation

At the reporting date the Consolidated Entity has presented the ECL allowances in its statement of financial position as follows:

- financial assets measured at amortised cost: Deduction against the gross carrying amount
- debt investments measured at FVOCI: Included in OCI since the asset's carrying value is measured at fair value
- undrawn credit commitments, financial guarantee contracts and letters of credit: Recognised as a provision and included in other liabilities

purchased or originated credit-impaired financial assets: Recognised as part of the net carrying value of the asset on initial recognition.

Determination of expected credit losses

The Consolidated Entity has developed several models to predict the ECL. These models incorporate a range of inputs notably that of Exposure at Default (EAD), Probability of Default (PD) and Loss Given Default (LGD) ('credit inputs') as well as FLI.

The inclusion of FLI assumptions in the models to calculate the ECL impacts the PD, the determination of whether there has been a SICR as well as the LGD (relevant to the determination of the recovery rate on collateral).

The Consolidated Entity applies its professional judgement in determining whether there are any inherent risks in the models' predictive outcomes. COVID-19 has had economic impacts on the markets in which the Consolidated Entity operated during the period. The continued uncertainty in the economic outlook in a number of these markets has resulted in an increased use of post model adjustments (overlays). These overlays to the modelled ECL results reflect the application of judgement.

For the period ended 30 September 2020, overlays were made to address the risk that defaults may emerge over longer periods than historically assumed, models may be overly sensitive to certain economic variables, and to incorporate client and customer information received by the Consolidated Entity in its dealings with retail customers who had elected to participate in certain payment pause arrangements as a consequence of COVID-19. At the reporting date, these overlays supported approximately \$150 million of the ECL provision.

Additional overlays for the risk that underlying credit risk events have occurred but observable modelled inputs are yet to reflect those events, as well as risks that are specific to counterparties or industries which are difficult to account for within the modelled outcomes were made. All overlays are reviewed and approved by both FMG and RMG at each reporting date.

Significant increase in credit risk

The Consolidated Entity periodically assesses exposures to determine whether there has been a SICR, which may be evidenced by either qualitative or quantitative factors.

SICR thresholds, which require judgement, are used to determine whether an exposure's credit risk has increased significantly. The SICR methodology is based on a relative credit risk approach which considers changes in an underlying exposure's credit risk since origination. This may result in exposures being classified in stage II that are of a higher credit quality than other similar exposures that are classified as stage I. Accordingly, while increases in the quantum of stage II exposures will suggest a relative deterioration of credit quality, it should not necessarily be inferred that the assets are of a lower credit quality.

Definition of default

The Consolidated Entity's definition of default determines the reference point for the calculation of the ECL components, and in particular the PD. Default is generally defined as the point when the borrower is unlikely to pay its credit obligations in full, without recourse by the Consolidated Entity to the realisation of collateral, or the borrower is 90 days or more past due.

The Consolidated Entity periodically monitors its exposures for potential indicators of default such as significant financial difficulty of the borrower including breaches of lending covenants; it is probable that the borrower will enter bankruptcy or other financial reorganisation; the disappearance of an active market for that financial asset because of financial difficulties; or the purchase or origination of a financial asset at a deep discount that reflects the incurred credit losses.

Retail and wholesale exposures that are identified as in default can be reclassified from stage III following a pre-defined period over which the exposure demonstrates that it has returned to a performing status and, in the case of wholesale exposures, based on an individual assessment of the exposure.

Forward Looking Information

RMG is responsible for the FLI including the development of scenarios and the range of weights considered for those scenarios. The EADs, PDs and LGDs are determined under each scenario to calculate the ECL for that scenario. The resultant ECL for each scenario is then probability weighted to determine the reported ECL. The scenarios and the assigned probabilities are updated semi-annually or more frequently if a material disruption event was to occur. The scenarios, including the underlying indicators, are developed using a combination of publicly available data, internal forecasts, and third-party information.

The scenarios are refined through consultation with internal specialists and benchmarking to external data from reputable sources. COVID-19 has resulted in significant economic contractions in the markets in which the Consolidated Entity operates. The development of scenarios forecasting the economic outlook for these markets, including the modelling of forecast economic variables, and the assigning of probabilities to these scenarios has required enhanced professional judgement which draws on internal risk and economics' specialist input and comparison to general market outlooks and publicly available market commentary. The scenarios and the associated probabilities are ultimately approved by senior risk and finance executives.

The modelled ECL for each scenario is sensitive to the length of time between a downturn and a recovery, and the period of time to complete recovery steps, as it influences both the probability of default, and the value of collateral that may be utilised. Future economic conditions may differ to the scenarios outlined, the impact of which will be accounted for in future reporting periods.

Note 11 Expected credit losses continued

Scenario		Weighting	Expectation
this scenar result in an total expec loss provis	Baseline A 100% weighting to this scenario would result in an estimated total expected credit loss provision on balance sheet at the		Global: The baseline assumes the economic recovery continues through the second half of 2020 helped by targeted localised health policies replacing broader 'lockdown' containment measures utilised in the early stages of the COVID-19 pandemic. Job retention schemes and other policy measures are expected to ease gradually through the remainder of 2020, leading to increases in official unemployment rates but coinciding with private sector activity returning gradually towards normalised levels. In most developed markets GDP is expected to return to pre-COVID-19 levels by mid-2022.
reporting c ~\$950 milli			Australia: The Australian economy is expected to recover ahead of other economies having experienced a relatively smaller contraction in the first half of 2020. Equity markets are expected to continue to stabilise and return to modest growth but remaining below pre-COVID-19 peaks in 2020.
			With business activity continuing to be impacted, unemployment rates peak at ~9% in early 2021 with a recovery occurring to broadly pre-COVID-19 levels over the next three years. House prices decline ~4% during 2020, before recovering to pre-COVID-19 levels in mid-2022. The RBA maintains the cash rate at its historic lows until 2023.
T			United States (US): The unemployment rate is expected to decline after reaching a high of ~13% in the first half of 2020, but remain above pre-COVID-19 levels, reaching ~6% in early 2023. US GDP contracted by ~10% in the first half of the year and is expected to return to pre-COVID-19 levels by the end of 2022. 10-year government bond yields are expected to recover slightly in late 2020 but remain at historical lows.
			Europe: The GDP is expected to recover to pre-COVID-19 levels by mid-2023, after contracting by ~16%. The unemployment rate is expected to peak at ~9% by the end of 2020 and return to pre-COVID-19 levels of ~7% by 2024. The European Central Bank (ECB) is expected to maintain its policy rate in slightly negative territory.
this scenar result in an total expect loss provis balance sh reporting c	nside Possible 0% weighting to cenario would in an estimated expected credit provision on ce sheet at the ting date of 00 million ⁽¹⁾	Possible	Global: The downside assumes COVID-19 takes longer to contain leading to movement restrictions being maintained and delaying the expected recovery above the baseline scenario. The economic recovery is restrained during the second half of 2020 as rolling lockdowns, more localised than at national levels, are imposed to address rising infections. Weak growth and the length of mobility restrictions are expected to hamper the effectiveness of fiscal support, having an adverse impact on businesses and employment, with developed market unemployment rates peaking in early 2021. In developed markets activity returns to pre-COVID-19 levels in late 2023. Equity markets fall further in late 2020 as it becomes clear that recovery will be shallower and more prolonged.
			Australia: With business activity impacted more severely, unemployment rates rise to ~9.5% in early 2021 before declining to ~6.5% (~1% above pre-COVID-19 levels) over the next three years. By the end of 2020, Australian GDP is expected to contract by ~7% from pre-COVID-19 levels and continues to be slightly below pre-COVID-19 levels until the middle of 2023. House prices decline ~20% from pre-COVID-19 levels by late 2021. The RBA maintains the cash rate at historic lows throughout the forecast period.
			United States: The unemployment rate remains around ~13% through to early 2021 before gradually declining to ~6.5% (~3% above the pre-COVID-19 levels) by 2024. After US GDP contracted by ~10% from pre-COVID-19 levels, the economy commences a very gradual recovery during the 2H20, only returning to pre-COVID-19 levels by end of 2023. 10-year government bond yields remain below 1% for the forecast period.
			Europe: After the GDP contracts by ~16% from pre-COVID-19 levels the economy has a delayed but gradual recovery, with GDP still ~4% below pre-COVID-19 levels at the end of 2021. The unemployment rate rises to ~10% by the end of 2020 and remains slightly above pre-COVID-19 levels at ~8% through to 2025. The ECB maintains interest rates in negative territory for the forecast period.

⁽¹⁾ This number provides comparative ECL provision information as at the reporting date assuming the scenarios outlined. This number reflects neither changes in the credit rating of the counterparty nor changes in post model adjustments that may occur if these scenarios were to occur. Changes in credit rating and post model adjustments may have a material impact on these ECL provisions.

For the half year ended 30 September 2020 continued

Note 11

Expected credit losses continued

Scenario	Weighting	Expectation
Upside	Unlikely	Global: The scenario assumes governments are able to ease restrictions quickly and
A 100% weighting to this scenario would result in an estimated		without reversal. Improved treatments that greatly reduce the virus mortality rate allow a return to pre-COVID lifestyles. In this scenario economic activity is able to recover quickly to pre-pandemic levels.
total expected credit loss provision on balance sheet at the reporting date of ~\$900 million ⁽¹⁾		The growth trajectory is steeper and maintained, requiring less active stimulus from governments and central banks. Global GDP surpasses pre COVID-19 levels in early 2021 facilitating higher employment and stimulating commodity prices. Equity markets reflect the broader economic recovery, varying internationally but generally reaching new highs in late 2020 or early 2021.
		In Australia, GDP surpasses pre COVID-19 levels by mid-2021 and continues to grow at 3–4% annually through to 2024. The uptick in economic activity segues with the withdrawal of job retention schemes, preventing a sharp rise in unemployment levels. House prices respond to this improved outlook and steadily increase.

(1) This number provides comparative ECL provision information as at the reporting date assuming the scenarios outlined. This number reflects neither changes in the credit rating of the counterparty nor changes in post model adjustments that may occur if these scenarios were to occur. Changes in credit rating and post model adjustments may have a material impact on these ECL provisions.

The \$128 million increase in ECL provisions during the half year ended 30 September 2020 was predominantly driven by an impairment charge of \$243 million, reflecting portfolio and specific impairments for counterparties who have experienced a deterioration in relative credit quality together with changes in FLI. This impairment charge was partially offset by the write-off of impairment provisions and the appreciation of the Australian dollar during the period.

- (1) The current period movement represents the revaluation of the Group's unhedged investments in foreign operations primarily driven by the appreciation of the Australian dollar against the United States dollar. It excludes foreign exchange movements of \$1 million attributable to non-controlling interest. Refer to Note 33.3 Market Risk in the annual financial report for the year ended 31 March 2020 for the Consolidated Entity's foreign exchange risk management policy in relation to the alignment of capital supply to capital requirements.
- policy in relation to the alignment of capital supply to capital requirements.
 (2) Half year to 31 March 2020 includes \$12 million related to a previously designated hedge relationship for which the hedged future cash flows are no longer highly probable to occur.

(1) Non-controlling interest represents equity in subsidiaries that is not attributable, directly or indirectly, to the parent company. As such, it is ineligible to absorb losses arising elsewhere within the Consolidated Entity.

Note 19 Notes to the consolidated statement of cash flows

During March 2020, the Consolidated Entity revised its policy for the accounting treatment for client money and cash and cash equivalents. Consistent with the changes reflected in the March 2020 annual financial statements, the cash and cash equivalents and the cash flow statement for the period 30 September 2019 have been re-presented.

The following changes were effected for the half year ended 30 September 2019:

certain reverse repurchase agreements held for liquidity management purposes of \$8,131 million have now been included in cash and cash equivalents

certain trading assets of \$100 million, margin money balances of \$2,654 million, funds received from clients which are segregated from the Consolidated Entity's own funds of \$3,070 million⁽¹⁾ and other balances of \$326 million have been excluded from cash and cash equivalents as these balances are not available to meet the Consolidated Entity's short term cash commitments or does not qualify as cash equivalents

the effect of exchange rate movements of \$363 million on cash and cash equivalents has been disclosed together with other exchange rate movements in the statement of cash flows.

As a result of these changes, cash flows from operating activities decreased by \$3,313 million and the opening and closing cash and cash equivalents increased by \$4,931 million and \$1,981 million respectively for the period ended 30 September 2019. This revision had no impact on the Consolidated Entity's statements of financial position, income statements or reserves.

(i) Reconciliation of cash and cash equivalents

Cash and cash equivalents at the end of the period are reflected in the related items in the consolidated statement of financial position as follows:

	As at 30 Sep 20 \$m	As at 31 Mar 20 \$m	As at 30 Sep 19 \$m
Cash and bank balances ^{(2),(3)}	3,948	5,308	4,089
Cash collateral on securities borrowed and reverse repurchase agreements	17,651	21,469	8,131
Financial investments	460	513	243
Cash and cash equivalents at the end of the period	22,059	27,290	12,463

(1) The amount shown as the impact of the revision includes amounts now removed from the statement of financial position which do not meet the definition of an asset. Refer to Note 1(ii) Comparatives.

(2) Amounts excluded from cash and cash equivalents but presented in the statement of financial position as cash and bank balances primarily relates to \$2,524 million (31 March 2020: \$2,257 million; 30 September 2019: \$1,848 million) of funds received from clients which are segregated from the Consolidated Entity's own funds are not available to meet the Consolidated Entity's short-term cash commitments.

(3) Cash and bank balances includes \$648 million (31 March 2020: \$682 million; 30 September 2019: \$685 million) of balances, held by consolidated SEs that are restricted from use by the Consolidated Entity, balances required to be maintained with central banks and other regulatory authorities held in countries where remittance of cash outside the country is restricted.

⁽¹⁾ On 2 June 2020, the Consolidated entity issued Macquarie Bank Capital Notes (BCN2) amounting to \$641 million. BCN2 is a perpetual security which is eligible for conversion into a variable number of Consolidated Entity's ordinary shares on the scheduled mandatory exchange date (being 21 December 2028), provided the exchange conditions are satisfied, unless redeemed, resold or written of earlier. During the half year ended 30 September 2020, the Consolidated Entity raised \$1,833 million through the issue of Tier 2 Loan capital and redeemed \$740 million of Loan Capital under fixed repayment obligation.

Asset developments	831	891	923
Total commitments	5,644	5,556	8,129
Total contingent liabilities and commitments	8,050	8,318	11,356

The Consolidated Entity operates in a number of regulated markets and is subject to regular regulatory reviews and inquiries. From time to time these may result in litigation, fines or other regulatory enforcement actions. At the reporting date there are no matters of this nature which are expected to result in a material economic outflow of resources for the Consolidated Entity and, consistent with its accounting policies and disclosures in its March 2020 annual financial statements, the Consolidated Entity considers the probability of there being a material adverse effect in respect of litigation or claims that have not been provided for to be remote.

- Includes \$737 million (31 March 2020: \$763 million; 30 September 2019: \$795 million) in favour of related party for which collateral of a similar amount has (1) been received.

It is not practicable to ascertain the timing of any outflow and the possibility of any reimbursement related to these contingent liabilities. Undrawn credit facilities are irrevocably extended to clients. These amounts include fully or partially undrawn commitments that are legally binding and cannot be unconditionally cancelled by the Consolidated Entity. Securities underwriting include firm commitments to underwrite debt securities. Half year ended 30 September 2019 includes a \$2,519 million credit facility granted to MFHPL.

Note 22 Fair values of financial assets and liabilities

Fair value reflects the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date.

Quoted prices or rates are used to determine fair value where an active market exists. If the market for a financial instrument is not active, fair values are estimated using present value or other valuation techniques, using inputs based on market conditions prevailing on the measurement date.

The values derived from applying these techniques are affected by the choice of valuation model used and the underlying assumptions made regarding inputs such as the timing and amounts of future cash flows, discount rates, credit risk, volatility and correlation.

Financial instruments measured at fair value are categorised in their entirety, in accordance with the levels of the fair value hierarchy as outlined below:

Level 1:	unadjusted quoted prices in active markets for identical assets or liabilities
Level 2:	inputs other than quoted prices included within Level 1 that are observable for the asset or liability, either directly (i.e. as prices) or indirectly (i.e. derived from prices)
Level 3:	inputs for the asset or liability that are not based

The appropriate fair value hierarchy level for an instrument is determined on the basis of the lowest level input that is significant to the fair value measurement.

AASB 13 *Fair Value Measurement* requires the use of the price within the bid-offer spread that is most representative of fair value.

Valuation systems will typically generate mid-market prices. The bid-offer adjustment reflects the extent to which bid-offer costs would be incurred if substantially all of the residual net exposure to market risks were closed, on portfolio basis, using available hedging instruments.

The fair values calculated for financial instruments which are carried in the statements of financial position at amortised cost (as disclosed in Note 21 *Measurement categories of financial instruments*) are for disclosure purposes only. The following methods and assumptions applied to derive these fair values can require significant judgement by management and therefore may not necessarily be comparable to other financial institutions nor may it be the price at which the asset is sold for or a liability repurchased in a market-based transaction:

- the fair values of liquid assets and other instruments maturing within three months are approximate to their carrying amounts. This assumption is applied to liquid assets and the short-term portion of all other financial assets and financial liabilities
- the fair value of demand deposits with no fixed maturity approximates to their carrying amount as they are short-term in nature or are payable on demand

- the fair values of variable rate financial instruments, including cash collateral on securities borrowed, cash collateral on securities lent, repurchase agreements approximates their carrying amounts
- the fair value of all loan assets, term deposits and debt liabilities carried at amortised cost, is determined with reference to changes in interest rates and credit spreads
- the fair value of fixed rate loans and debt investments carried at amortised cost is estimated by reference to current market rates offered on similar loans and the creditworthiness of the borrower
- the fair value of debt issued and loan capital, where carried at amortised cost is based on quoted prices in active markets where available. Where quoted prices are not available the fair value is based on discounted cash flows using rates appropriate to the term and incorporates changes in the Consolidated Entity's own credit spread
- substantially all of the Consolidated Entity's commitments to extend credit are at variable rates. As such, there is no significant exposure to fair value fluctuations resulting from interest rate movements relating to these commitments
- the fair value of balances due to/from related body corporate entities approximates the carrying value as interest on the balances is generally payable/receivable at variable rates of interest.

The following methods and significant assumptions have been applied in determining the fair values of financial instruments including balances with related body corporate entities measured at fair value:

- trading assets and liabilities, derivative financial instruments and other transactions undertaken for trading purposes are measured at fair value by reference to quoted prices in active markets where available (for example listed securities). If quoted prices in active markets are not available, then fair values are estimated on the basis of pricing models or other recognised valuation techniques
- repurchase and reverse repurchase agreements, being collateralised financing arrangements, are measured at fair value with reference to the securities which are held or provided as the collateral for the financing agreement
- financial investments classified at FVTPL or FVOCI are measured at fair value by reference to quoted prices in active markets where available (for example listed securities). If quoted prices in active markets are not available, the fair values are estimated on the basis of pricing models or other recognised valuation techniques that maximise the use of market price and observable market inputs. Unrealised gains and losses on FVOCI debt assets, excluding changes in ECL on debt instruments, are recorded in the FVOCI reserve in equity until the asset is sold, collected or otherwise disposed of
- fair values of fixed rate loans classified as FVTPL or FVOCI and issued debt classified as DFVTPL are estimated by reference to current market rates offered on similar loans and issued debt

For the half year ended 30 September 2020 continued

Note 22

Fair values of financial assets and liabilities continued

- for financial assets carried at fair value, in order to measure counterparty credit risk, a Credit Valuation Adjustment (CVA) is incorporated into the valuation. The CVA is calculated at a counterparty level taking into account all exposures to that counterparty
- for financial liabilities carried at fair value, in order to measure the Consolidated Entity's own credit risk, a Debit Valuation Adjustment (DVA) is incorporated into the valuation
- the Consolidated Entity has incorporated market implied funding costs for uncollateralised derivative positions as a Funding Valuation Adjustment (FVA). FVA is determined by calculating the net expected exposures at a counterparty level and applying MBL's internal Treasury lending rates as an input into the calculation. The approach takes into account the PD of each counterparty, as well as any mandatory break clauses.

Where valuation techniques are used to determine fair values, they are validated and periodically reviewed by qualified personnel independent of the area that created them. All models are certified before they are used, and models are calibrated periodically to test that outputs reflect prices from observable current market transactions in the same instrument or other available observable market data.

To the extent possible, models use only observable market data (for example OTC derivatives), however management is required to make assumptions for certain inputs that are not supported by prices from observable current market transactions in the same instrument such as volatility and correlation.

Note 22

Fair values of financial assets and liabilities continued

The following table summarises the levels of the fair value hierarchy for financial instruments, including commodities, measured at fair value:

	Level 1	Level 2	Level 3	Total
	\$m	\$m	\$m	\$m
Assets			AS AT	30 SEP 20

 The derivative financial instruments in the table above are represented on a net basis. On a gross basis, derivative assets are \$380 million (31 March 2020: \$821 million; 30 September 2019: \$565 million) and derivative liabilities are \$268 million (31 March 2020: \$363 million; 30 September 2019: \$256 million).

(2) Assets and liabilities transferred in or out of Level 3 are presented as if those assets or liabilities had been transferred at the beginning of the period.

(3) The Consolidated Entity employs various hedging techniques in order to manage risks including foreign exchange risks in Level 3 positions. Such techniques may include the purchase or sale of financial instruments measured at fair value that are classified as Level 1 or 2 positions or foreign currency financial instruments measured at amortised cost. The fair value movements recognised in the income statement for assets and liabilities in Level 3 presented in the table above also includes foreign exchange differences on such assets and liabilities and do not include the related gains and losses arising on hedging instruments.

Note 22

Fair values of financial assets and liabilities continued

Significant transfers between levels of the fair value hierarchy

During the period, the Consolidated Entity did not have significant transfers between Level 1 and Level 2.

Transfers into Level 3 were due to the lack of observable valuation inputs for certain securities and investments. Transfers out of Level 3 were principally due to valuation inputs becoming observable during the period.

Unrecognised gains

For financial instruments measured at FVTPL, the best evidence of fair value at initial recognition is its transaction price, unless its fair value is evidenced by comparison with other observable current market transactions in the same instrument or based on a valuation technique for which variables include only data from observable markets. Where such alternative evidence exists, the Consolidated Entity recognises profit or loss immediately when the financial instrument is recognised ('day 1 profit or loss'). When significant unobservable inputs are used to determine fair value, the day 1 profit or loss is deferred and is recognised in the income statement over the life of the transaction or when the inputs become observable.

The table below summarises the deferral and recognition of profit or loss where a valuation technique has been applied for which significant unobservable inputs are used:

	Half year to 30 Sep 20 \$m	Half year to 31 Mar 20 \$m	Half year to 30 Sep 19 \$m
Balance at the beginning of the period	168	219	183
Deferral on new transactions	18	9	86
Amounts recognised in the income statement and other changes	(76)	(60)	(50)
Balance at the end of the period	110	168	219

Sensitivity analysis of valuations using unobservable inputs

The table below shows the sensitivity to reasonably possible alternative assumptions for Level 3 financial instruments whose fair values are determined in whole or in part using unobservable inputs and valuation techniques such as discounted cash flows based on assumptions by reference to historical company and industry experience. The impact of the sensitivity of the financial instruments which hedge the Level 3 positions, but are classified as Level 1 or 2, is not included in the table below.

FAVOURABLE CHANGES UNFAVOURABLE CHANGES

Note 22

Fair values of financial assets and liabilities continued

The favourable and unfavourable changes of using reasonably possible alternative assumptions for the valuation of the equity and equity-linked products, commodities and interest rate and other products have been calculated by recalibrating the valuation model using stressed significant unobservable inputs within the Consolidated Entity's range of possible estimates.

Significant unobservable inputs

The following table contains information about the significant unobservable inputs used in Level 3 valuations, and the valuation techniques used to measure fair value. The range of values represent the highest and lowest input used in the valuation techniques. Therefore, the range does not reflect the level of uncertainty regarding a particular input, but rather the different underlying characteristics of the relevant assets and liabilities.

<u>N</u>				Significant unobservable inputs	RANGE OF INPUTS	
	Assets \$m				Minimum value	Maximum value

(1) The range of inputs related to market comparability has not been disclosed as the diverse nature of the underlying investments results in a wide range of inputs.

For the half year ended 30 September 2020 continued

Note 22

Fair values of financial assets and liabilities continued

Correlation

Correlation is a measure of the relationship between the movements of two variables (i.e. how the change in one variable influences a change in the other variable). Correlation is a key input into the valuation of derivatives with more than one underlying and is generally used to value hybrid and exotic instruments.

Volatility

Volatility is a measure of the variability or uncertainty in returns for a given derivative underlying. It represents an estimate of the amount a particular underlying instrument, parameter or index will change in value over time. Volatility is an input in the valuation of derivatives containing optionality. Volatility and skew are impacted by the underlying risk, term and strike price of a derivative.

Correlations and volatilities are derived through the extrapolation of observable volatilities, recent transaction prices, quotes from other market participants, data from consensus pricing services and historical data adjusted for current conditions.

Inputs for unlisted equity securities

Unlisted equity instruments are generally valued by referencing market transactions for comparable companies adjusted as appropriate for current economic conditions. Other significant unobservable inputs may include discount rates, determined using inputs specific to the underlying investment, and forecast cash flows and earning or revenue of investee entities.

Inputs for interest rate products (discount rate)

Loans are generally valued by referencing market transactions for comparable products adjusted as appropriate for current economic conditions. Significant unobservable inputs may include interest rates and credit spreads of counterparties and original issue discounts on primary debt issuances.

Note 23 Discontinued operations

On 10 December 2018, the Consolidated Entity disposed of its Corporate and Asset Finance's Principal Finance and Transportation Finance businesses to a related group entity, Macquarie Financial Holding Pty Limited (MFHPL) and its subsidiaries.

In accordance with the sale agreement, a gain of \$164 million was presented in discontinued operations for the period ended 31 March 2020. The gain consisted of the following:

- \$102 million subsequent adjustment to the sales consideration following the disposal of certain assets by MFHPL to a third party, and
- \$62 million tax benefit transferred by MFHPL to the Consolidated Entity following the subsequent remeasurement of certain tax balances related to the above-mentioned disposal.

Note 24

Acquisitions and disposals of subsidiaries and businesses

Significant entities or businesses acquired or consolidated due to acquisition of control

There were no individually significant entities or businesses where control was acquired during the current and previous period.

Significant disposal of entities or businesses

There were no individually significant entities or businesses where control was lost during the current and previous period.

Note 25 Events after the reporting date

There were no material events between 30 September 2020 and the date of this report that have not been disclosed elsewhere in the financial statements.

Directors' declaration

For the half year ended 30 September 2020

Directors' Report

Financial Report

In the Directors' opinion:

- the financial statements and notes set out on pages 18 to 70 are in accordance with the Corporations Act 2001 (Cth) including:
- complying with the Australian Accounting i. Standards, and
- giving a true and fair view of the Consolidated Entity's ii. financial position as at 30 September 2020 and performance for the half year ended on that date, and
- there are reasonable grounds to believe that Macquarie Bank Limited will be able to pay its debts as and when they become due and payable.

The Directors have been given the declarations by the CEO and CFO required by section 295A of the Corporations Act 2001 (Cth). This declaration is made in accordance with a resolution of the Directors.

Independent auditor's review report

To the members of Macquarie Bank Limited

We have reviewed the accompanying half-year financial report of Macquarie Bank Limited (the Company) and the entities it controlled during the half-year (together the Consolidated Entity), which comprises the consolidated statement of financial position as at 30 September 2020, the consolidated statement of comprehensive income, consolidated statement of changes in equity, consolidated statement of cash flows and consolidated income statement for the half-year ended on that date, selected other explanatory notes and the directors' declaration.

Directors' responsibility for the half-year financial report

The directors of the Company are responsible for the preparation of the half-year financial report that gives a true and fair view in accordance with Australian Accounting Standards and the *Corporations Act 2001* (Cth) and for such internal control as the directors determine is necessary to enable the preparation of the half-year financial report that gives a true and fair view and is free from material misstatement whether due to fraud or error.

Auditor's responsibility

Our responsibility is to express a conclusion on the half-year financial report based on our review. We conducted our review in accordance with Australian Auditing Standard on Review Engagements ASRE 2410 Review of a Financial Report Performed by the Independent Auditor of the Entity, in order to state whether, on the basis of the procedures described, we have become aware of any matter that makes us believe that the half-year financial report is not in accordance with the Corporations Act 2001 (Cth) including giving a true and fair view of the Consolidated Entity's financial position as at 30 September 2020 and its performance for the half-year ended on that date; and complying with Accounting Standard AASB 134 Interim Financial Reporting and the Corporations Regulations 2001 (Cth). As the auditor of Macquarie Bank Limited. ASRE 2410 requires that we comply with the ethical requirements relevant to the audit of the annual financial report.

A review of a half-year financial report consists of making enquiries, primarily of persons responsible for financial and accounting matters, and applying analytical and other review procedures. A review is substantially less in scope than an audit conducted in accordance with Australian Auditing Standards and consequently does not enable us to obtain assurance that we would become aware of all significant matters that might be identified in an audit. Accordingly, we do not express an audit opinion.

Independence

In conducting our review, we have complied with the independence requirements of the *Corporations Act 2001* (Cth).

Conclusion

Based on our review, which is not an audit, we have not become aware of any matter that makes us believe that the half-year financial report of Macquarie Bank Limited is not in accordance with the *Corporations Act 2001* (Cth) including:

- giving a true and fair view of the Consolidated Entity's financial position as at 30 September 2020 and of its performance for the half-year ended on that date;
- 2. complying with Accounting Standard AASB 134 Interim Financial Reporting and the *Corporations Regulations* 2001 (Cth).
