

Increased Certification and Merger Benefits

Sydney, Friday 20 November 2020

Increased Certification

Integrated Payment Technologies Limited (ASX: IP1) (InPayTech) is pleased to advise that in addition to the Company's ISO 27001 certification to international standards for our Information Security Management System, InPayTech is now ISAE 3402 SOC2 certified.

SOC2 certification demonstrates the Company's commitment to continuous improvement and we believe it is important to have our broader controls design and controls effectiveness externally audited and verified in order to provide high-service delivery to customers.

Merger

The planned merger between InPayTech and Comply Path Holdings Pty Ltd (Comply Path), subject to shareholder approval during our upcoming AGM on the 21st of January 2021, is designed to deliver benefits across the entire hire to retire ecosystem. Specifically, the merger should enable InPayTech to unlock latent value for existing and new customers where digital payments, engagement or compliance is required.

A short interview with Dean Martin, CEO at InPayTech briefly explains some of the benefits of connecting the ecosystem:

https://assets.ausbiz.live/assets/7bd939f7-0c09-43a7-820f-241e9e2b5f6e/MP4/vimondio_video_1920x1080_10000.mp4

Beyond the hire to retire ecosystem, the merger positions PayVu to provide additional value. With e-invoicing becoming mandatory for government agencies and businesses progressively from July 1 2021, the merger enables PayVu access to Comply Path's e-Invoicing functionality. In turn, this functionality allows business or government agencies to send and receive e-invoices using PEPPOL. PEPPOL is the international standard recently adopted by Australia as the nation's e-invoicing standard.

Follow the below link to see an overview of the problems PayVu is positioned to address:
