1 Details of the Offer

1.1 *Overview and background to the Offer*

Under this Prospectus, Funtastic Limited (**Company**) is offering the opportunity to subscribe for up to 100 new ordinary shares in the capital of the Company (**New Shares**) at a price of \$0.112 per New Share (**Offer**) to raise \$11.20 (before the costs of the Offer).

The Offer is being extended to unrelated parties who are invited by the Company to subscribe for New Shares and is not open to the general public. Application Forms will only be provided to those parties.

All of the New Shares issued under the Offer will be fully paid ordinary shares in the capital of the Company. New Shares offered under the Offer will rank equally in all respects with existing Shares on issue as at the Lodgement Date. A summary of the rights and liabilities attaching to the Shares is set out in Section 3.

1.2 *Purpose of the Offer and its objectives*

The Company is seeking to raise only a nominal amount of \$11.20 under this Prospectus and, accordingly, the purpose of this Prospectus is not to raise capital.

The Company will issue certain Shares pursuant to the Transactions described below. The Company wishes to ensure that any Shares issued in connection with the Transactions or otherwise issued prior to the Closing Date are not subject to the secondary sale restrictions in the Corporations Act.

As its Shares have been suspended from trading on ASX for more than five days in the last 12 months, the Company is presently unable to issue a cleansing notice under section 708A of the Corporations Act.

Accordingly, the purpose of this Prospectus is to facilitate secondary trading of any Shares that may be issued by the Company before the Closing Date, which is currently expected to be 5:00pm (Melbourne time) on 1 December 2020.

1.3 *The Transactions*

On 23 October 2020, the Company announced that it had entered into a series of important transactions (**Transactions**) as follows:

(a) **Acquisition of HWG and issue of Shares**

An acquisition of all of the issued share capital of Mittoni Pty Ltd, Hobby Warehouse Pty Ltd and Toys R Us Licensee Pty Ltd (**Hobby Warehouse Group** or **HWG**) (**Acquisition**) pursuant to a Share Sale Deed (**SSD**) under which the Company agreed to acquire Hobby Warehouse Group and in return for that acquisition, the Company agreed to issue 291,205,818 Shares (**Consideration Shares**) to nominees of the holders of the issued shares of HWG.

(b) **Placement**

A fully underwritten placement of 258,928,571 Shares (**Placement Shares**) at \$0.112 per Share to sophisticated investors to raise approximately \$29 million (**Placement**).

Canaccord Genuity (Australia) Limited (the **Underwriter**) has successfully entered into agreements in connection with the Placement for the entire amount to be raised under the Placement.

(c) **Repayment of the indebtedness**

A Loan Conversion and Repayment Agreement (**Conversion and Repayment Agreement**) under which the Company agreed to:

- (i) issue 53,571,429 Shares (**Conversion Shares**) to Jaszac Investments Pty Ltd (**Jaszac**) at \$0.112 per Share in return for Jaszac releasing the Company from \$6 million of the outstanding indebtedness of the Company under or in connection with Loan Agreement between the Company and Jaszac; and
- (ii) repay the balance of the outstanding indebtedness under the Loan Agreement (being approximately \$3 million) in cash using funds raised by the Placement.)

(d) **TRUK Licence Agreement**

An agreement with TRUK to amend the Licence Agreement under which HWG licences the rights relating to www.toysrus.com.au and www.babiesrus.com.au, with the taking effect of those changes being subject to completion occurring under the SSD.

In consideration for TRUK's entry into the Amended Licence Agreement, the Company agreed to issue 1,223,092 Shares (**TRUK Shares**) to TRUK.

The Transactions were subject to the passing of various resolutions in respect of the Transactions at the Company's 2020 AGM (**Transaction Resolutions**). Each of the Transaction Resolutions were approved by Shareholders on 23 November 2020.

Completion under each of the Transactions (**Completion**) and, relevantly, the issue of the Placement Shares, the Conversion Shares, Consideration Shares and TRUK Shares (together the **Transaction Shares**) will occur prior to the Closing Date of the Offer.

All Transaction Shares will be issued to "Sophisticated Investors" or "Professional Investors" within the meaning of sections 708(8) and 708(11) of the Corporations Act.

In addition, separately from the Transactions, prior to the Closing Date, the Company will issue 454,545 Shares (**Abbey Shares**) to Mr Howard Abbey in relation to his remuneration and incentive package for the 2019 financial year, who is a senior manager of the Company within the meaning of section 708(12) of the Corporation Act.

The primary purpose of this Prospectus is to remove any secondary trading restrictions that would otherwise attach to the Transaction Shares and any other Shares issued by the Company before the Closing Date.

By the Company complying with section 708A(11) of the Corporations Act, the investors who receive any Transaction Shares or any other Shares issued by the Company prior to the Closing Date can on-sell those Shares within the next 12 months without the issue of a prospectus or other disclosure document.

1.4 **Issued Shares**

If securities are issued to an investor without a disclosure document then the on-sale of those securities is generally restricted pursuant to the Corporations Act, unless an exemption applies

(such as those under section 708A of the Corporations Act). If the Company does not fall within one of these exemptions, any securities issued to an exempt investor in accordance with section 708 of the Corporations Act may be restricted from on-sale for the first 12 months from the date of issue unless the investor (to whom the securities may be on-sold) also falls within one of the exemptions.

As the Company's Shares have been suspended from trading on ASX for more than 5 days during the 12 months preceding the Lodgement Date, the Company is precluded from relying on lodging a cleansing notice under section 708A(5) of the Corporations Act to remove any such trading restrictions which would otherwise apply in respect of the Transaction Shares or any other Shares issued by the Company prior to the Closing Date.

However, section 708A(11) of the Corporations Act provides that a sale offer does not need disclosure (and therefore would be exempt from the on-sale provisions) if:

- (a) the relevant securities are in a class of securities that are quoted securities of the body;
- (b) either:
 - (i) a prospectus is lodged with the ASIC on or after the day on which the relevant securities were issued but before the day on which the sale offer is made; or
 - (ii) a prospectus is lodged with ASIC before the day on which the relevant securities are issued and offers of securities that have been made under the prospectus are still open for acceptance on the day on which the relevant securities were issued; and
- (c) the prospectus is for an offer of securities issued by the body that are in the same class of securities as the relevant securities.

In light of the above, this Prospectus has been lodged prior to the issue of the Transaction Shares and the Abbey Shares by the Company. The offer of New Shares under this Prospectus will still be open for acceptances at the time the Transaction Shares and the Abbey Shares are issued. Accordingly, upon issue, the Transaction Shares and the Abbey Shares (and any other Shares issued by the Company prior to the Closing Date) will be exempt from the on-sale provisions (see paragraph (b)(ii) above).

2 Effect of the Offer

2.1 Use of proceeds

The Company is seeking to raise an amount of \$11.20 (before the costs of the Offer) under this Prospectus and, accordingly, the purpose of this Prospectus is not to raise capital.

All expenses of the Offer will be met from the funds raised by the Offer and the Company's existing cash reserves (including the proceeds of the Placement). Refer to Section 6.17 of this Prospectus for further details relating to the estimated expenses of the Offer.

2.2 Capital structure as at the Lodgement Date, at Completion of the Transactions and immediately after the Offer

The following table shows the capital structure of the Company on the Lodgement Date, at completion of the Transactions and at completion of the Offer.

Type of securities	Lodgement Date ¹	At Completion of the Transactions ²	Completion of the Offer
Shares ^{3, 4}	240,404,075	845,787,530	845,787,630
Options	NIL	10,149,450	10,149,450
SARs	480,000	480,000	480,000
Deferred Share Awards	NIL	Deferred Share Awards with a grant value of \$20,000	Deferred Share Awards with a grant value of \$20,000

Notes:

1. The capital structure on the Lodgement Date refers to capital structure immediately after the 2020 AGM and includes the grant of the "Tranche 1" SARs to Ms Anderson and Mr Tripodi on 23 November 2020 as approved at the 2020 AGM. For more information, see the Notice of Meeting for the 2020 AGM dated 23 October 2020 (**Notice of Meeting**).
2. This includes the issue of the Transaction Shares, the Abbey Shares and the issue of the "Tranche 1" Options to Mr Mittoni and Mr Moore as approved at the 2020 AGM. For more information, see the Notice of Meeting.
3. The number of Shares at Completion of the Transactions and completion of the Offer does not include the Shares to be issued to Mr Moore on the vesting of the "Tranche 1" Deferred Share Awards with a grant value of \$20,000 as the number of Shares to be issued will depend on the market price of Shares on the date of Completion. For more information, see the Notice of Meeting.
4. The rights and liabilities attaching to the Shares are summarised in Section 3.

If all of the New Shares are issued, the number of Shares on issue will increase by 100 from 845,787,530 to 845,787,630. The Offer will not have an effect on the Company's other securities on issue.

2.3 Financial effect of the Offer

After expenses of the Offer of approximately \$23,206, there will be no proceeds from the Offer. The expenses of the Offer (exceeding \$11.20) will be met from the Company's cash reserves and funds raised under the Placement.

As such, the Offer will have an effect on the Company's financial position, being receipt of funds of \$11.20 less costs of preparing the Prospectus of approximately \$23,206.

2.4 Effect on Control

Given the nominal amount raised under the Offer, the New Shares issued under the Offer will not have a material impact upon the Control of the Company.

2.5 Dilution risk

Given the nominal amount raised under the Offer, there will be minimal dilution impact to existing Shareholders. Each Shareholder's voting power in the Company will be diluted by a negligible amount.

For personal use only

3 Rights and liabilities attaching to Shares

The New Shares will be of the same class and will, once issued, rank equally in all respects with the existing Shares. The rights and liabilities attached the New Shares are identical in all respects to the terms of all existing Shares.

The following is a summary of the more significant rights and liabilities attaching to Shares in the Company including the New Shares being offered pursuant to this Prospectus. This summary is not exhaustive and does not constitute a definitive statement of the rights and liabilities of Shareholders. To obtain such a statement, persons should seek independent legal advice.

Full details of the rights and liabilities attaching to Shares are set out in the Constitution, a copy of which is available for inspection at the Company's registered office during normal business hours.

3.1 *General meeting*

Shareholders are entitled to be present in person (which includes attendance in a virtual or hybrid meeting), or by proxy, attorney or representative to attend and vote at general meetings of the Company. Shareholders may requisition meetings in accordance with section 249D of the Corporations Act and the Constitution of the Company.

3.2 *Voting rights*

Subject to any rights or restrictions for the time being attached to any class or classes of shares, at general meetings of Shareholders or classes of Shareholders:

- (a) each Shareholder entitled to vote may vote in person or by proxy, attorney or representative;
- (b) on a show of hands, every person present who is a Shareholder or a proxy, attorney or representative of a Shareholder has one vote; and
- (c) on a poll, every person present who is a Shareholder or a proxy, attorney or representative of a Shareholder shall, in respect of each fully paid Share held by them, or in respect of which he is appointed a proxy, attorney or representative, have one vote for each Share held, but in respect of partly paid shares shall have such number of votes as bears the same proportion to the total of such Shares registered in the Shareholder's name as the amount paid (not credited) bears to the total amounts paid and payable (excluding amounts credited).

If a person present at a general meeting represents personally or by proxy, attorney or representative more than one Shareholder, on a show of hands the person is entitled to one vote only, even though he or she represents more than one Shareholder.

3.3 *Dividends and interim dividends*

The Directors may pay any interim and final dividends.

3.4 *Dividend reinvestment plan*

Subject to the ASX Listing Rules and the Corporations Act, the Directors of the Company may on terms they decide, implement a dividend reinvestment plan. No such plan exists as at the date of this Prospectus.

3.5 Winding-up

If the Company is wound up, the liquidator may, with the authority of a special resolution of Shareholders, divide among the Shareholders the whole or any part of the property of the Company and may determine how the division is to be carried out as between the Shareholders or different classes of Shareholders.

3.6 Shareholder liability to forfeiture of Shares

As the New Shares under the Prospectus are fully paid ordinary shares, they will not be subject to any calls for money by the Directors and will therefore not become liable for forfeiture.

3.7 Transfer of Shares

Generally, Shares in the Company are freely transferable, subject to formal requirements, the registration of the transfer not resulting in a contravention of or failure to observe the provisions of a law of Australia and the transfer not being in breach of the Corporations Act or the ASX Listing Rules.

3.8 Future increase in capital

Subject to the Constitution, the Directors may issue new Shares and preference shares from time to time.

There is a non-dilution clause in the SSD under which the Company has undertaken not to issue new Shares until after 31 July 2021 (other than where the Directors consider it would be consistent their duties as Directors to issue Shares, the issue is made under the Company's placement capacity under ASX Listing Rules 7.1 and 7.1A or the issue is made under the Company's Employee Incentive Plan).

3.9 Variation of rights

Under Section 246B of the Corporations Act, the Company may, with the sanction of a special resolution passed at a meeting of Shareholders vary or abrogate the rights attaching to Shares. If at any time the share capital is divided into different classes of shares, the rights attached to any class (unless otherwise provided by the terms of issue of the shares of that class) may be varied or abrogated with the consent in writing of the holders of three quarters of the issued shares of that class, or if authorised by a special resolution passed at a separate meeting of the holders of the shares of that class.

3.10 Alteration of Constitution

In accordance with the Corporations Act, the Constitution can only be amended by a special resolution at a general meeting passed by at least three quarters of votes validly cast for Shares at the general meeting. In addition, at least 28 days' written notice specifying the intention to propose the resolution as a special resolution must be given.

4 Risk factors

4.1 Introduction

The business, assets and operations of the Company are subject to certain risk factors that have the potential to influence the operating and financial performance of the Company in the future. These risk factors can impact the value of an investment in the New Shares being offered under this Prospectus. The New Shares comprise a speculative investment.

The Company aims to manage these risks by carefully planning its activities and implementing risk control measures. Some of the risks are, however, highly unpredictable and the extent to which the Company can effectively manage them is limited.

Based on the information available as at the date of this Prospectus, set out below is a list of specific risks relating to an investment in New Shares. These risks are the specific risks that the Company is exposed to or will be exposed to on completion of the Acquisition of HWG. References to “the Group” in this Section include HWG, which will be a subsidiary of the Company after completion of the Transactions and at the time the New Shares are issued.

The summary of risks that follows is not intended to be exhaustive and this Prospectus does not take into account the personal circumstances, financial position or investment requirements of any particular person. There may be additional risks and uncertainties that the Company is unaware of or that the Company currently considers to be immaterial, which may affect the Company and their related entities.

Every investor should:

- (a) rely on their own knowledge of the Company;
- (b) refer to disclosures made by the Company on ASX; and
- (c) consult their professional advisers before deciding whether to apply for New Shares under the Offer.

4.2 Risks specific to the Company's business

An investment in Shares involves a high degree of risk. This section sets out the key risks which are specific to the Company's business. You should carefully read the following risks, along with the other information included in this Prospectus. If any of the following risks occurs, the Company's business, results of operations, financial condition, and cash flow could be materially impaired. The price of Shares could decline due to any of these risks, and you could lose all or part of your investment.

4.2.1 COVID-19

Events related to COVID-19 have resulted in significant market volatility. There is continuing uncertainty as to the ongoing and future impact of COVID-19 including in relation to the nature, timing and duration of the responses of governments and authorities globally as well as the duration and severity of the negative impact on Australian and global economic conditions. Given the high degree of uncertainty surrounding the extent and duration of the COVID-19 pandemic, the full impact of COVID-19 on consumer behaviour, suppliers, employees and the Company is not fully known. A number of aspects of the Company's business have or may be directly or indirectly affected by COVID-19 including disruptions to supply chains, reductions in purchases by bricks and mortar retailers, reductions in consumer discretionary spending and consumer confidence due the economic downturn. The current response to the pandemic and the separation by water of Australia combined with the quality of tracing alleviate some of these risks. The Company's acquisition of HWG does play well for the online sales which have

risen during the pandemic, but ongoing retail and consumer impact is still uncertain. Given this, the impacts of COVID-19 may have a material adverse effect on the Company's financial and operational performance. Further, any government or industry measures may adversely affect the Company's operations and are likely beyond the control of the Company. In compliance with its continuous disclosure obligations, the Company will continue to update the market in regard to any material impact of COVID-19 on the Company's business.

4.2.2 Market conditions

There are general risks associated with investments in equity capital. The trading price of Shares in the Company may fluctuate with movements in equity capital markets in Australia and internationally. This may result in the market price for the New Shares issued under the Offer being less or more than \$0.112.

Generally applicable factors which may affect the market price of shares include: the number of potential buyers or sellers of Shares on the ASX at any given time; recommendations by brokers and analysts; general movements in Australian and international equity capital markets; investor sentiment and perceptions; Australian and international economic conditions and outlook (including as a result of the impact of COVID-19); changes in interest rates and the rate of inflation; changes in government regulation and policies; announcements of new technologies; and geo-political instability (including international hostilities and acts of terrorism, state of emergency declarations, outbreaks of pandemics, diseases or war). No assurances can be given that the New Shares issued under the Offer will trade at or above \$0.112. Neither the Company, its Board nor any other person guarantees the market performance of the Shares.

4.2.3 Australian retail environment

Many of the Group's products are discretionary goods and, as a result, sales levels are sensitive to consumer sentiment, the Group's offering of products, and in turn its financial and operational performance, may be affected by changes in consumers' disposable incomes or their preferences as to the utilisation of their disposable incomes. Any reduction in the disposable incomes of the Group's customers as a result of changes to factors such as economic outlook, interest rates, unemployment levels (which has been heightened by COVID-19) and taxation may decrease consumer confidence and consumer demand, which may subsequently result in lower levels of revenue and profitability.

4.2.4 eCommerce

There is no guarantee that the Australian eCommerce sector will continue to grow into the future at all, or as currently forecast. Growth in the Australian eCommerce sector is expected to be driven partly by the migration of customers from traditional retail formats to online retail platforms. This factor is in part outside the control of online retailers, including the Group. There is no guarantee that the migration of customers observed in recent years will continue in the future. If online penetration of the Australian eCommerce sector does not increase in line with the Company's expectations, the Company may not be able to acquire new customers or engage existing customers, and its business, financial condition and operating results may suffer. Further, the Australian eCommerce sector is influenced by changing technologies. The Company may be impacted by its ability to maintain and update its technology platforms. Maintaining and updating its technology could involve a significant cost and no assurance can be given that the Company will have the capital required to develop or acquire new technologies required to maintain competitive advantage or market share in the future. Factors such as parallel importing and lack of access to international sales may add to the risk.

4.2.5 Supply chain

The Group relies on third party suppliers to supply the majority of the products it sells to customers and relies on third party logistics providers to distribute those products to customers, which carries the risk of delay and disruption. In addition, the spread of COVID-19 could adversely impact on the Group's supply chains if, for example, the ability to transport products between countries is disrupted, the Group's key suppliers are negatively affected or the Group is otherwise unable to efficiently distribute products to customers. In the event that the supply chain of the Group is disrupted for any reason, this may have a material adverse effect on the Company's operating performance and earnings. In addition, geo-political tensions and industrial disputes add to this risk

4.2.6 Information technology

The Company relies on various information technology systems including, websites, databases, IT and management systems and security systems (**Systems**) for its business operations and to maximise efficiency. There is a risk that if the Systems do not function properly, there could be disruptions, corruption in databases or other electronic information, delays in sales events, delays in transaction processing, website slowdown or unavailability, loss of data or the inability to accept and fulfil customer orders which, if sustained or regular, could materially adversely affect the Company's financial and operational performance. Any sustained or unplanned downtime of these Systems, could directly damage the reputation and brand of the relevant platform and could reduce visitors to the affected websites or Apps, directly influencing sales to customers. The integration of the HWG Systems with the Company's Systems will add further complication and risk in continuity of customer supply, ordering and financial management. The Group's Systems are and will be all hosted on servers owned by third party providers and are therefore subject to the disaster planning contingencies of those third-party providers to deal with events that may be beyond their control. A catastrophic failure in the systems of a third party provider is likely to have a material impact on the systems and operations of the Group and consequently the Company's reputation and financial performance.

4.2.7 Market or technological change

Key suppliers to the Group, such as Mattel, Hasbro and LEGO, may struggle to keep pace with technological changes and advancements and fail to produce sufficiently profitable products for the toy industry and Toys R Us Australia. In the past, there have been cultural shifts and toy trend changes that have significantly affected all toy companies, and this may re-occur in the future (for example, general toy theme popularity shifts, movie flops, cultural change, technology changes in robotics and 3D printing). This may impact the Company's ability to grow sales and may have a material adverse effect on its financial and operational performance.

4.2.8 Counterparty risk

The Group has a large number of domestic and international suppliers and service providers, from which it sources a broad range of products and services. There is a risk that the Group may be unable to continue to source products or services from existing suppliers or service providers, and in the future, may be unable to source products from new suppliers or services from new service providers, at favourable prices, on favourable terms, in a timely manner or in sufficient volume or quality. This risk has been further heightened as a result of COVID-19. The interruption or termination of the Group's supply agreements may have a material adverse impact on the Group's financial and operational performance in the future. The Company cannot guarantee that its existing arrangements with key suppliers or service providers will be renewed, or, if renewed, will be renewed on terms similar to their current terms. The loss or deterioration of relationships with these suppliers or service providers, an inability to renew

informal or contractual arrangements with such parties, or an inability to negotiate agreements with new parties on terms which are not materially less favourable than existing arrangements, may have a material adverse effect on the Company's financial and operational performance.

4.2.9 Competitor behaviour and landscape changes

After Completion, the Group will have several competitors in the baby and toy retail spaces, including physical stores and online. Competition may alter significantly or intensify, competitors may merge and form alliances with established companies, or established companies within other industries may enter the Group's industry. The failure of a large competitor could influence industry performance, depressing market prices for a period and cause excess inventory to exist within the marketplace. In addition, international sellers can access the Australian market with enhanced supply chain removing barriers to entry. Such international companies can have better prices and enhanced ranges.

4.2.10 Customer preferences and trends

The toy, hobby and family entertainment industries are highly influenced by current trends and consumer preferences. There is a risk that the Company may fail to anticipate and adapt to changing consumer preferences and trends in a timely manner. The Company's financial performance depends on its ability to identify and respond to retail product trends, as well as to anticipate, gauge and react to changing consumer preferences in a timely manner. A large number of products sold by the Group are manufactured internationally, which means that any significant delay between ordering and delivery further exposes the Group to the risk that customer preferences may change between the time products are ordered and the time they are available for purchase. Following Completion, the Group may explore different sales categories but there can be no guarantee that such categories will be accepted by the Group's existing and prospective customers or address their preferences. If the Company misjudges customer preferences or fails to convert market trends into appealing product offerings on a timely basis, these may result in lower revenue and margins and could adversely impact the Company's financial and operational performance. In addition, any change in customer preferences may lead to increased obsolete inventory risk.

4.2.11 International risk

The Group companies source a large proportion of their products from foreign providers. As such, the Group is exposed to risks including foreign exchange and hedging risk, political instability (including as a result of pandemics such as COVID-19), increased security requirements for foreign goods, costs and delays in international shipping arrangements, imposition of taxes and other charges and restrictions on imports. The Company is also exposed to risks related to labour practices, environmental matters, disruptions to production and ability to supply, and other issues in the foreign jurisdictions where suppliers and service providers operate. Any of these risks, individually or collectively, could materially adversely affect the Company's financial and operational performance.

4.2.12 Reputational risk

Customer complaints or negative publicity about any of the Group's businesses, websites, products, product delivery times, customer data handling and security practices or customer support, especially on blogs and social media websites could rapidly and severely diminish website traffic and consumer and supplier confidence in the Group. There is a risk that this could result in harm to the Company's reputation and could adversely affect the Company's financial performance.

4.2.13 Trade disputes or production interruptions

Significant trade disputes that lead to increased prices, manufacturer labour shortages, large increases in cost of production or significant trade or alliance changes could impact forecast projections. The Group's suppliers and service providers are also subject to various risks which could limit their ability to provide the Company with sufficient, or any, products or services. Some of these risks include raw material costs, inflation, labour disputes, union activities, boycotts, financial liquidity, product merchantability, safety issues, natural disasters, disruption in exports, trade restrictions, currency fluctuations and general economic and political conditions.

4.2.14 Seasonality of business

The Group conducts a disproportionate amount of retail sales during the last quarter of the calendar year. Failure to stock or restock popular products in sufficient amounts such that customer demand cannot be met could significantly affect revenue and future growth. This period can be impacted by social, political and economic factors such as strikes, weather or changes in interest rates. Conversely an overstock of inventory may result in significant inventory markdowns or write-offs and commitment costs to be incurred, which could materially reduce profitability.

4.2.15 Personal information and data loss

The databases of customers, suppliers and data analytics held by the Group are valuable assets for their continued success. However, such databases are subject to various risks including computer viruses, electronic theft, physical terminal theft, physical damage resulting in a loss or corruption of data, operating system failures, third party provider failures and similar disruptions. This could render the websites unavailable for a period of time while data is restored. Although processes are in place to combat such risks (including firewalls, encryption of client data, a privacy policy and policies to restrict unauthorised access), these processes might not be successful and there is a risk that a data breach may occur, or a third party may gain access to the confidential information of customers or the Group's internal systems and databases. A failure to maintain the confidentiality of this information (in particular, the Company's customer database) could result in a breach of law and cause significant operational, reputational, legal and cost ramifications, any of which could adversely affect the Company's future financial performance.

4.2.16 Regulatory risk

The Company is subject to, and must comply with, a variety of laws and regulations in the ordinary course of its business. These laws and regulations include those that relate to fair trading and consumer protection, product safety, employment, property, taxation (including goods and services taxes (GST) and stamp duty) and customs and tariffs. Failure to comply with, or changes to, laws and regulations may adversely affect the Company, including by increasing its costs either directly or indirectly (for example, by increasing the cost to the business of complying with legal requirements). Any such adverse effect may impact the Company's future financial performance. In particular, there is a risk that laws or regulations may be introduced that restrict the Group's use of its customer database and customer's personal information and/or otherwise restrict its interactions with consumers, sales tactics and market campaign efforts.

4.2.17 Tax and GST

Changes in local indirect tax, such as GST, and duty treatment of any of the markets in which the Group's operates, could have an impact on the sales of imported brands. Given that many of the products sold by the Group are discretionary goods, and that the customers for such

products tend to be price sensitive, the imposition of taxes (such as GST or equivalent taxes) on the sale of imported goods at lower than current value thresholds in any of the jurisdictions in which the Group operates could reduce the attractiveness of the Group's products and have a material adverse effect on the Company's financial condition and financial results.

4.2.18 Product liability risk

Products sold by the Group could expose the Company to product liability or food safety claims relating to personal injury or illness, death, or environmental or property damage, and can require product recalls or other actions. Third parties who sell the Group's products increase the Company's exposure to product liability claims, such as when these sellers do not have sufficient protection from such claims. Although the Company maintains liability insurance and may be able to assign liability to suppliers, there is no certainty that this coverage is adequate for liabilities actually incurred or that insurance will continue to be available on economically reasonable terms, or at all.

4.2.19 Litigation

The Group is subject to the usual business risk that disputes or litigation may arise from time to time in the course of its business activities. Such litigation risk accelerates with the merger of the Company with HWG as the improvement in the Company's financial position as a result of the Acquisition may increase the likelihood of parties pursuing potential claims against the Group. These may include claims and disputes involving competitors, customers, consumers, suppliers, employees, governmental agencies/authorities, regulators or other third parties. There is a risk that any material or costly dispute could have a material adverse effect on the Company's reputation, financial performance and profitability.

4.2.20 Insurance

The Company maintains insurance coverage in relation to various aspects of its business. However, there is no guarantee that such insurance will be available in the future on a commercially reasonable basis (including as to the pricing of premiums) or that the Company will have adequate insurance cover against claims made from time to time. If the Company incurs uninsured losses or liabilities, or if its insurance cover does not adequately protect it against relevant claims, its assets, profits and prospects may be materially adversely affected.

4.2.21 Non-renewal of key contracts

The Groups business activities and financial performance are reliant on contracts and relationships with key existing suppliers and service providers. There can be no guarantee that these contracts and relationships will continue or, if they do continue, that they will remain successful. Some of the Company's suppliers and service providers are engaged on a short-term basis and/or their contracts are due for renewal soon. There is a risk that such contracts will not be renewed or will be renewed on less favourable terms. Any adverse changes to, or loss of, arrangements or relationships with the Group's suppliers or service providers may adversely impact the Company's financial and operational performance.

4.2.22 Retailer view of the Acquisition

The combination of the Company and HWG provide a direct to customer and a direct to retailer service. Some retailers (despite also providing similar optionality in their supply of stock) may adversely see the channel management as a conflict and no longer see Company as a wholesale supply line.

4.2.23 Risks associated with the Acquisition

There are a number of additional transaction specific risks that arise out of the Acquisition including the following:

- (a) There are risks associated with all transactions, including but not limited to the integration of financial, operational and managerial resources. If the assets or businesses are not successfully integrated, this may have a material adverse effect on the Company's financial and operational performance. In addition, while the Company has conducted extensive due diligence in relation to the Acquisition, there is no assurance that the merged Group will perform as forecast once fully integrated, or successfully achieve the desired objectives, including, where applicable, any synergies.
- (b) The terms of the Amended Licence Agreement, which will come into effect on completion under the SSD, grant various approval and observer rights in relation to the Board of the Company to TRUK including:
 - (i) if a person is appointed as Managing Director/CEO or Chair of the Company without TRUK's prior written approval, then the fees payable under the Amended Licence Agreement may be increased by 30% until a person that is approved by TRUK is appointed to those roles;
 - (ii) if the Company has more than four people on its Board, then the fees payable under the Amended Licence Agreement may be increased by 30% until the number of Directors returns to four; and
 - (iii) TRUK is permitted to appoint an observer who is entitled to attend Board meetings in an observer capacity and receive all Board papers. Failure by the Company to permit such an appointment may result in fees payable under the Amended Licence Agreement being increased by 30% until the observer role is fulfilled.

Relevantly, in relation to the rights referred to in paragraphs (b)(i) and (ii) above, the Chairperson of the Board has a casting vote where decisions of the Board are tied.

- (c) Associates of Mr Louis Mittoni will be issued 34.43% of the Shares in the Company as consideration for Acquisition. In addition, Mr Mittoni will be issued three tranches of options. Each tranche equates to 1% of the issued Shares in the Company. If all tranches are exercised before the relevant expiry date, Mr Mittoni and his Associates will hold 36.15% of the Shares in the Company.
- (d) Following the Acquisition, sales of the merged Group will be reliant on the maintenance of the Amended Licence Agreement. The Amended Licence Agreement includes a number of termination rights including for a material breach of the agreement that is not remedied within 45 days of notice and late payments that are not cured within the applicable notice period. In addition TRUK can terminate the Licence Agreement where there is a change of control of the Company without TRUK's approval.
- (e) There is a non-dilution clause in the SSD under which the Company has undertaken not to issue new Shares in the Company until after 31 July 2021 (other than where the directors consider it would be consistent their duties as directors to issue shares, the issue is made under the Company's placement capacity under ASX Listing Rules 7.1 and 7.1A or the issue is made under the Company's Employee Incentive Plan).

- (f) HWG is reliant on the continued involvement of Mr Mittoni in the business. On completion of the Acquisition, the Company will rely on the expertise, experience and strategic direction provided by Mr Mittoni and Mr Kevin Moore to integrate the HWG businesses with the Company's existing businesses. The Company's success following the Acquisition depends to a significant extent on Mr Mittoni and Mr Moore.

4.3 *Investment speculative*

The above list of risk factors ought not to be taken as exhaustive of the risks faced by the Company or by investors in the Company. The above factors, and others not specifically referred to above may materially affect the financial performance of the Company and the value of the Company's Shares.
