Capital Structure Update – Expiry of Listed Options

Investigator Resources Limited (ASX: IVR, “Investigator” or the “Company”) advises that 200,526,433 of 203,824,478 of the Company’s Listed Options were exercised prior to their expiry on 31 December 2020, raising a total of \$7.02M. The remaining 3,298,045 Listed Options have now lapsed.

Investigator’s Managing Director, Andrew McIlwain said: *“It has been a fantastic outcome to have over 98% of the Listed Options exercised. This strong investor uptake and the additional capital inflow sees Investigator with \$14.1M cash on hand at the start of the year, supporting the Company’s strategy and the completion of the Paris Silver Project’s Pre-Feasibility Study by mid-2021.*

“The geological team are back on site processing the remaining samples from the recently completed infill drilling program that focussed on the resource that underpins the Paris Silver Project (ASX: 16 December 2020). With these final samples being delivered to the laboratory for analysis within the next two weeks, there will be continued news flow for the next 3 months as we receive assay results, and a revised mineral resource estimate is completed”.

Details of the Company’s securities following the expiry of remaining Listed Options are:
