

ASX Announcement 9 February 2021

Regeneus to be granted new key patent to target pain in Japan

Regeneus Ltd (ASX: RGS) (Regeneus or the Company), a clinical-stage regenerative medicine company, announced today that the Japanese Patent Office has decided to grant the Company a new key patent, covering the use of its lead stem cell technology Progenza™ to treat pain, through to 2032.

Regeneus already holds granted patents for the use of Progenza™ to treat inflammatory conditions, such as osteoarthritis. This new patent expands Regeneus' intellectual property portfolio into the \$85.5Bⁱ global pain market.

Pursuant to the terms of the Company's licence and collaboration agreement with Kyocera Corporation (Kyocera), to commercialise Progenza™ OA in Japan, Kyocera also has first rights to develop Progenza™ for additional indications for the Japanese market. The patent to be granted covering the use of Progenza™ to treat pain is included within this agreement.

Regeneus Chief Executive Officer, Karolis Rosickas, said the patent supports the Company's plan to explore additional licences for Progenza™ to treat other indications.

"Regeneus continues to explore all opportunities to address the gap in the projected \$85.5B global pain management drugs market with our disease modifying stem cell technologies.

"This new key patent will support the Company's efforts by helping us secure new licences for Progenza™ to treat other indications relating to pain."
