MINERALS

**Three rolls of the dice for a
World Class Discovery in 2021**

A map of Australia with several locations marked by small circles. The locations are labeled as follows:

- Perth HQ
- Arkun
- Doonia
- Broken Hill
- Commonwealth

The Key to Exploration Success: Large Strategic Ground Holdings

Porphyry copper-gold target Drilling in Q1 2021

Commonwealth, NSW (IPT: 100%)

- Home to the giant Cadia copper-gold deposit (>40 Moz Au, >10 Mt Cu)
- Large strategic ground holding of 700 sq km
- Major copper-gold target close to the Boda discovery to be drilled Q1 2021
- Potential for VMS deposits like Eskay Creek (4 M oz Au, 180M oz Ag)

Emerging high grade Ni-Cu-PGM discovery

Broken Hill, New South Wales (IPT 100%)

- Home to the giant Broken Hill silver-lead-zinc deposit (>300 Mt)
- Large strategic ground holding of 815 sq km
- Potential for major nickel-copper-PGM mining camp over a 40 km belt
- Outstanding drill results in 2020 with follow up campaign in Q1-Q2 2021

Other Strategic Holdings

Other Projects (IPT 100%)

- Arkun, WA: Large strategic ground holding of 2,000 sq km in the emerging Ni-Cu-PGE Province near Julimar (Chalice MiningNL). Surrounded by Anglo American Corporation
- Doonia, WA: walk up drill target for gold.
- Blackridge, QLD: 150 sq km covering part of >300,000 ounce gold field

The Jam?

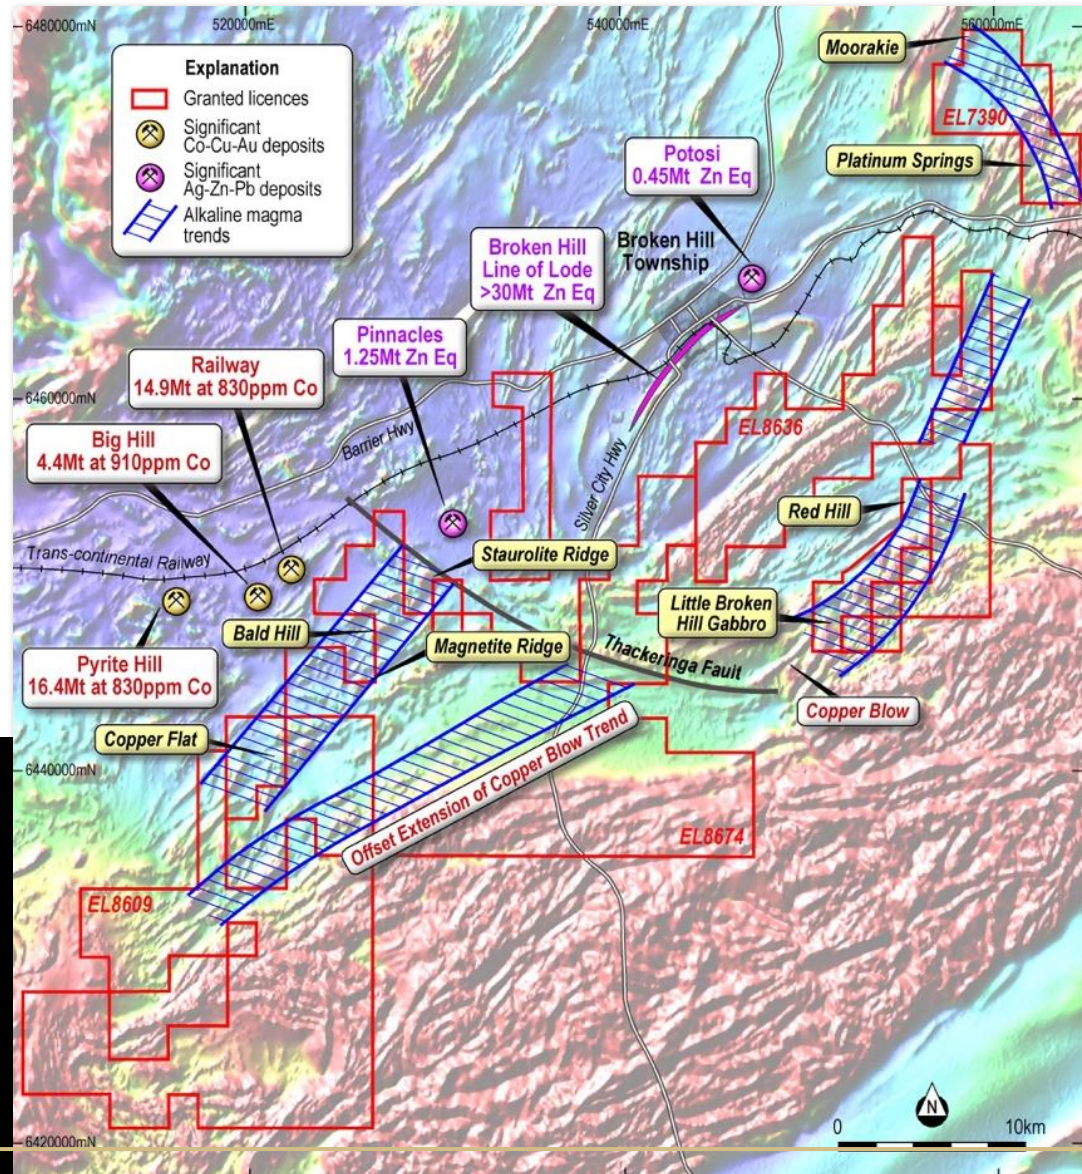

Magnetics: pulling it all together

Broken Hill Project, PGM-Nickel-Copper, New South Wales

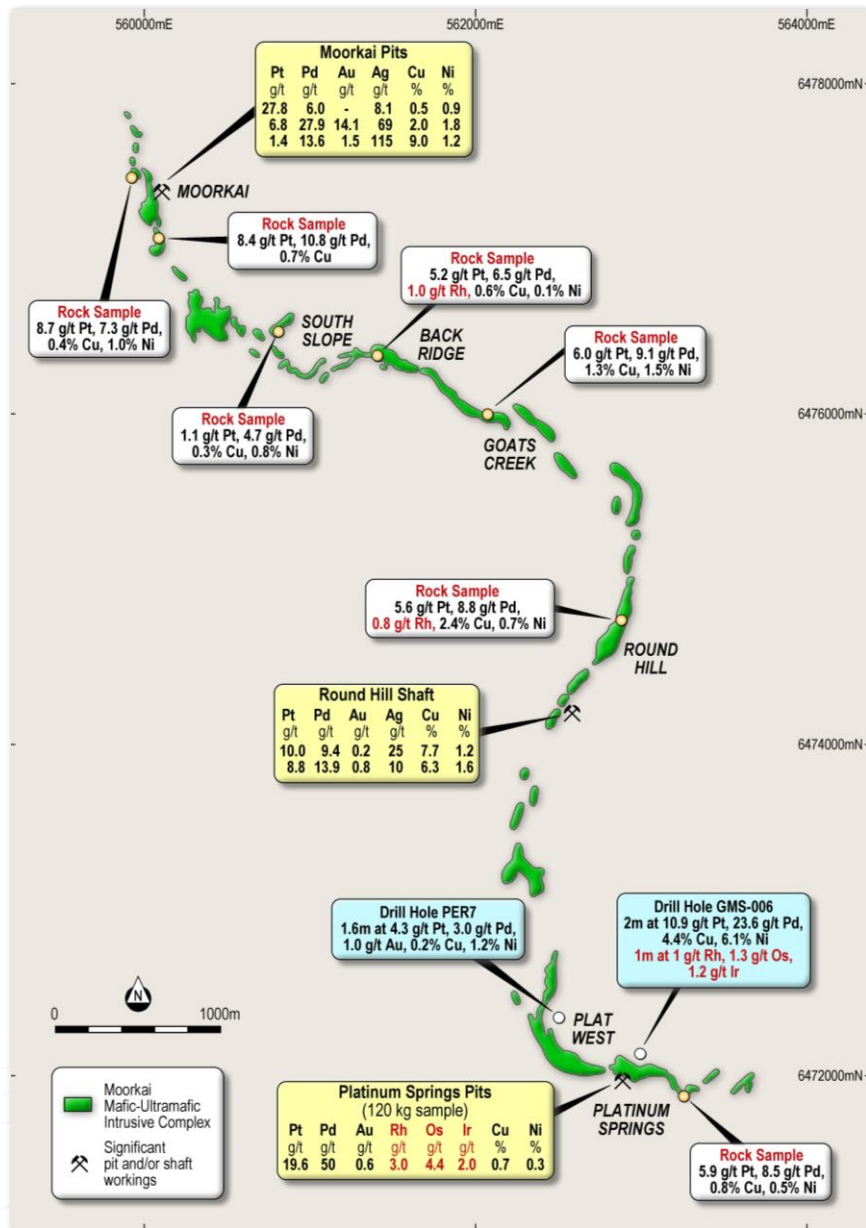

Broken Hill Project Overview

High grades of all six PGM's

1. Major land position of 815 sq km in one of Australia's most prolific mining belts
2. High PGM grades including rare PGM's Rh, Os, Ru and Ir
3. Multiple targets over 25 km for nickel-copper-PGM deposits
 - **Moorkai:** High grade rock chip samples over 9 km trend
 - **Platinum Springs:** high grade magmatic nickel-copper-PGE sulphide
 - **Red Hill:** Impact discovery of very high-grade PGE's
 - **Little Broken Hill:** poorly explored intrusion similar to Jinchuan and Voiseys Bay
4. Potential for million ounce PGM discovery with drilling in progress
5. Significant zinc-lead-silver potential

Magmatic Ni-Cu-PGM sulphides Moorkai-Platinum Springs³

Platinum Springs

- 0.6 metres at 11.5 g/t platinum, 25.6 g/t palladium, 1.4 g/t gold, 7.6% copper, 7.4% nickel and 44.3 g/t silver from 57.1 metres down hole within
- Richest ore in Australia?
- Southern end of the 9 km Moorkai Trend dripping in PGE's

BUT:
How to Focus?

Exploration for PGE's is DIFFICULT

They are impossible to see: so-called **"No see 'um"** zones

Not detectable by hand held XRF because of high detection limits

Conventionally require laboratory assay leading to excessive delays in progressing the exploration programs

18 g/t "No see 'um"
Zone Lac des Iles

Ratios R Us

– A vector to
high grade PGMs?⁴

**Impact breakthrough
geochemical ratio**
that predicts PGE grade
and which can be read
with a hand held XRF
instrument as drilling
progresses

directed during
the programme⁴

**First coherent zone
of mineralization in
40 years of
exploration!**

Ratio discovers a Cu-Ni-PGE Kambalda-style Channel at Plat Central⁵

Kambalda Channels

1-7 m thick, 20-100m wide,
> 1,000 metres long

Little Broken Hill: Similar size and age to Jinchuan. Drilling in progress⁶

820 Ma

Little Broken Hill: Emerging discovery from first ever drill programme⁷

2021 Vision: Next Steps and Strong News Flow

Drilling in Q1 2021

Commonwealth, NSW (IPT: 100%)

- Major porphyry copper-gold target identified in soil geochemistry and IP surveys at Apsley
- 5,000 m RC drill programme to start in Q1 2021

Drilling in Q1-Q2 2021

Broken Hill, NSW (IPT 100%)

- Follow up drilling at Platinum Springs, Red Hill and Little Broken Hill Gabbro
- Programme of 10,000 metres RC and diamond drilling

Target Generation Drilling Q3-4 Other Projects (IPT 100%)

- Arkun and Doonia:

JORC Compliance

The information in this presentation relating to Exploration Results has been extracted from the following reports:

ASX Release Date	Title of ASX Release
1. 10 August 2020	Throwing the porphyry copper-gold text book at Apsley
2. 15 February 2021	On the Charge at Apsley
3. 23 February 2016	Very high grade PGM nickel-copper in massive sulphide at Platinum Springs
4. 26 October 2020	Vectoring in at Platinum Springs, Broken Hill, NSW
5. 2 December 2020	High grade Ni-Cu-PGE at Plat Central, Broken Hill
6. 9 July 2020	The gravity of the situation at Little Broken Hill NSW
7. 22 December 2020	Rockwell Prospect drilling results
8. 10 June 2020	Expansion of the Arkun Ni-Cu-PGE Project east of Perth
9. 17 November 2020	New gold project in the Eastern Goldfields: Doonia, WA

Competent Person Statement and JORC Compliance

Exploration Results: *The review of exploration activities and results contained in this report is based on information compiled by Dr Mike Jones, a Member of the Australian Institute of Geoscientists. He is a director of the company and works for Impact Minerals Limited. He has sufficient experience which is relevant to the style of mineralisation and types of deposits under consideration and to the activity which he is undertaking to qualify as a Competent Person as defined in the 2012 edition of the Australasian Code for Reporting of Exploration Results, Mineral Resources and Ore Reserves (the JORC Code). Mike Jones has consented to the inclusion in the report of the matters based on his information in the form and context in which it appears.*

The ASX Releases referenced below on on the Impact Minerals website at www.impactminerals.com.au. The Company confirms that it is not aware of any new information or data that materially affects the information included in the most recent market announcement for each project, and in the case of Mineral Resources and Ore Reserves, that all material assumptions and technical parameters underpinning the estimates in the relevant market announcement continue to apply and have not materially changed. The Company confirms that the form and context in which the Competent Person's findings are presented have not materially changed from the original market announcement.
