

22 FEBRUARY 2021

ASX ANNOUNCEMENT

Suvo's Pittong Operations on Track to Achieve \$2.1M EBITDA in 2021 with \$265,000 recorded in First Month of Ownership

- Production of 2,200t of hydrous kaolin in January 2021 returning to pre-COVID levels with strong demand from both domestic and export markets
- Strong profit generation in January augurs well for the remainder of calendar 2021
- On Track to achieve \$2.1M EBITDA

Australian kaolin producer and silica sand exploration company, **Suvo Strategic Minerals Limited** ('Suvo or the Company'), is pleased to provide this operational update on its wholly owned subsidiary, Suvo Minerals Australia Pty Ltd's Pittong hydrous kaolin operations that it acquired on 1 January 2021. Highlights include:

- Production of 2,200 tonnes of hydrous kaolin products restoring to pre-COVID levels;
- On track to achieve expected \$2.1M EBITDA in calendar 2021;
- Strong demand for orders from both domestic and export customers;
- Branding of products to White Knight Kaolin in progress; and
- Transition to Suvo's ownership as an Australian enterprise was well received by employees, customers, suppliers and other stakeholders.

22 FEBRUARY 2021

ASX ANNOUNCEMENT

Commenting on the first month of operation under Suvo's ownership, Suvo's COO/CFO, Len Troncone said:

"the transition of the Pittong operations under Suvo's ownership has been flawless with operational management, customers and suppliers pleased to be associated with a 100% Australian owned and operated business. Pittong is experiencing strong demand for its high quality hydrous kaolin products, both domestically and across the Asia Pacific region. 2,200 tonnes of kaolin products were manufactured in January generating a strong EBITDA of \$0.265 million, ahead of expectations when we were negotiating to acquire this business. We remain excited about the future prospects of the Pittong operations as we look to draw on the expertise of operational management at Australia's only hydrous kaolin operation and apply it to our very promising White Cloud kaolin project in Gabbin, Western Australia".

Suvo Minerals Australia Pty Ltd's expected EBITDA for calendar year 2021 from the Pittong operations is approximately \$2.1 million. This is based on:

- Pittong's EBITDA of \$2.1 million for calendar year 2019 when 24,685 tonnes of hydrous kaolin products were sold;
- Pittong's EBITDA of \$2.0 million for calendar year 2020, when 22,392 tonnes of hydrous kaolin products were sold, noting that demand softened during that year due to the COVID-19 pandemic, but the levels of kaolin production have now largely returned to the pre-COVID-19 levels;
- EBITDA in January 2021 of approximately \$265,000, and smooth transition of ownership to date;
- substantive and strong demand for near term production; and
- Suvo's assumption that long term demand, price, operating capacity and efficiency will remain at or close to current levels for the remainder of the calendar year.

Suvo cautions investors that while it has reasonable grounds for the above forward looking statements, forward-looking statements are necessarily subject to risks, uncertainties and other factors, many of which are outside the control of the Company, which could cause actual results to differ materially from such statements.

This announcement has been approved for release by the Board of Directors.
