Comment

During the financial year, the revenue experienced a decline of 4.5% compared to the previous financial year to AUD\$8.369 million from AUD\$8.768 million. This also resulted in the lower Group's loss after taxation to AUD\$1,065,000 from loss after taxation AUD\$1,834,000.

The decline in revenue is primarily due to the global pandemic COVID-19 which has impact the core business income stream of software activation, license rights and program fee from the sign up of new affiliates. The imposed Movement Control Order (MCO) in countries which the Group is operating in has further affected business activities of training and affiliate events which decreased new affiliates sign up.

During the financial year, a high direct cost was borne by the Group for the development of an all new system for the affiliate program, significant enhancements of its mobile application and system portal, database restructuring, research and development and advertising and promotions campaigns.

Despite the performance observed above, the Group has taken the offensive and introduced an economic stimulus package for key stakeholders of affiliates, advertisers and users. Majority of the business activities have been moved online with automation of processes. This strategy is significant in managing expenses during this uncertain time while continuing to stimulate the market. The Management has been optimistic that the Group's products and services are well-placed for acceptance more than ever and would contribute positively for the time coming.
