

### **DISCLAIMER**

This presentation prepared by Tietto Minerals Limited ("Company") does not purport to contain all the information that a prospective investor may require in connection with any potential investment in the Company. You should not treat the contents of this presentation, or any information provided in connection with it, as financial advice, financial product advice or advice relating to legal, taxation or investment matters. No representation or warranty, express or implied, is made as to the fairness, accuracy, completeness or correctness of the information, opinions and conclusions contained in this presentation. This presentation is provided expressly on the basis that you will carry out your own independent inquiries into the matters contained in the presentation and make your own independent decisions about the affairs, financial position or prospects of the Company. The Company reserves the right to update, amend or supplement the information at any time in its absolute discretion (without incurring any obligation to do so). To the maximum extent permitted by law, none of the Company its directors, employees or agents, advisers, nor any other person accepts any liability, including, without limitation, any liability arising from fault or negligence on the part of any of them or any other person, for any loss arising from the use of this presentation or its contents or otherwise arising in connection with it. This presentation is not an offer, invitation, solicitation or other recommendation with respect to the subscription for, purchase or sale of any security, and neither this presentation nor anything in it shall form the basis of any contract or commitment whatsoever.

### **FUTURE MATTERS**

This presentation may contain forward looking statements that are subject to risk factors associated with mineral exploration, mining and production businesses. It is believed that the expectations reflected in these statements are reasonable but they may be affected by a variety of variables and changes in underlying assumptions which could cause actual results or trends to differ materially, including but not limited to price fluctuations, actual demand, currency fluctuations, drilling and production results, reserve estimations, loss of market, industry competition, environmental risks, physical risks, legislative, fiscal and regulatory changes, economic and financial market conditions in various countries and regions, political risks, project delay or advancement, approvals and cost estimates.

This presentation also contains reference to certain intentions, expectations, future plans, strategy and prospects of the Company. Those intentions, expectations, future plans, strategy and prospects may or may not be achieved. They are based on certain assumptions, which may not be met or on which views may differ and may be affected by known and unknown risks. In particular, there is a risk that the Company will not be able to expand or upgrade its existing JORC resource. The performance and operations of the Company may be influenced by a number of factors, many of which are outside the control of the Company. No representation or warranty, express or implied, is made by the Company, or any of its directors, officers, employees, advisers or agents that any intentions, expectations or plans will be achieved either totally or partially or that any particular rate of return will be achieved. Given the risks and uncertainties that may cause the Company's actual future results, performance or achievements to be materially different from those expected, planned or intended, recipients should not place undue reliance on these intentions, expectations, future plans, strategy and prospects. The Company does not warrant or represent that the actual results, performance or achievements will be as expected, planned or intended.

### COMPETENT PERSONS STATEMENT

The information in this presentation that relates to Exploration Targets and Exploration Results is based on information compiled by Mr Mark Strizek, a Competent Person who is a Member or The Australasian Institute of Mining and Metallurgy. Mr Strizek is a non-executive director of the Company. Mr Strizek has sufficient experience that is relevant to the style of mineralisation and type of deposit under consideration and to the activity being undertaking to qualify as a Competent Person as defined in the 2012 edition of the "Australasian Code for Reporting of Exploration Results, Mineral Resources and Ore Reserves". Mr Strizek consents to the inclusion in the announcement of the matters based on his information in the form and context in which it appears. Additionally, Mr Strizek confirms that the entity is not aware of any new information or data that materially affects the information contained in the ASX releases referred to in this presentation.

The information in this presentation that relates to Mineral Resources was prepared by RPM Global and released on the ASX platform on 26 October 2020. The Company confirms that it is not aware of any new information or data that materially affects the relating to Minerals Resources in this publication. The Company confirms that all material assumptions and technical parameters underpinning the estimates continue to apply and have not materially changed. The Company confirms that the form and context in which the RPM Global's findings are presented have not been materially modified.

The information in this report that relates to Mineral Resources is based on information evaluated by Mr Jeremy Clark who is a Member of The Australasian Institute of Mining and Metallurgy (MAusIMM) and who has sufficient experience relevant to the style of mineralisation and type of deposit under consideration and to the activity which he is undertaking to qualify as a Competent Person as defined in the 2012 edition of the "Australasian Code for Reporting of Exploration Results, Mineral Resources and Ore Reserves". Mr Clark is an associate of RPM and he consents to the inclusion of the estimates in the report of the Mineral Resource in the form and context in which they appear.

### COMPLIANCE STATEMENT

This report contains information extracted from ASX market announcements reported in accordance with the 2012 edition of the "Australasian Code for Reporting of Exploration Results, Mineral Resources and Ore Reserves" ("2012 JORC Code") and available for viewing at www. tietto.com. Includes results reported previously and published on ASX platform, 16 January 2018, 27 March 2018, 23 April 2018, 8 May 2018, 7 June 2018, 4 October 2018, 1 November 2018, 28 November 2018, 31 January 2019, 26 February 2019, 12 March 2019, 19 March 2019, 9 April 2019, 9 May 2019, 30 May 2019, 9 July 2019, 26 July 2019, 2 October 2019, 24 October 2019, 12 December 2019, 23 January 2020, 20 February 2020, 10 March 2020, 24 March 2020, 2 April 2020, 9 April 2020, 23 April 2020, 3 June 2020, 9 June 2020, 25 June 2020, 2 July 2020, 21 July 2020 20 July 2020, 29 July 2020, 19 August 2020, 9 September 2020, 24 September 2020, 26 October 2020, 11 December 2020, 18 January 2021, 12 February 2021 and 23 February 2021. The Company confirms that it is not aware of any new information or data that materially affects the information included in the previous announcements.

## ## FAST TRACKING DEVELOPMENT OF ABUJAR

- Côte d'Ivoire premier mining investment destination
- Growing 3.02 million ounce gold open pit opportunity
- Feasibility study underway PFS in Q1 2021 and DFS expected Q3 2021
- Clear pathway to development
  - ☐ Environmental Approval secured and Mining licence granted 120.36km²
  - ☐ Matthew Wilcox appointed as Chief Operating Officer ex WAF (Sanbrado)
- Well funded A\$57M in cash as at 31/12/20
- Aggressive exploration continues throughout 2021:
  - Numerous drill ready targets defined "severely unexplored"
  - Artisanal workings dotted along 70km mineralised corridor
  - 6 Company owned diamond drill rigs drilling at US\$35/m

## **WILLOCKING CÔTE D'IVOIRE'S GOLD**

**Increasing Gold Production** 

32.6t of gold produced from 5 mines in 2019

**Extensive Greenstone Belts**  Hosts West Africa's largest share of greenstone belts for prospective gold (~ 34%)

**Strong Government** Support

Tenements granted for 4 years with two 3-year extensions plus 2-year special extension available

**Favorable Fiscal Terms** 

25% corporate tax rate and 5% Gov't Royalty^

**Outstanding** Infrastructure One of Africa's most well-developed nations with outstanding infrastructure

**Mining Activity** Ramping Up

Cote d'Ivoire gold operations include Endeavour's Ity and Agbaou mines, Barrick's Tongon mine & Perseus' Sissingué mine

## ABUJAR GOLD PROJECT

• 3 contiguous tenements totalling 1,114km<sup>2</sup>

Delivering

rapid

resource

growth

- Middle tenement hosts JORC Resource of 81.2Mt at 1.2g/t Au for 3.02Moz
- High-grade core of 1.6Moz at 2.18 g/t Au at AG deposit

JORC 2012 Resource contained within 3 deposits:

AG - 49.6Mt at 1.5 g/t Au for 2.30Moz:

- 24.1Mt at 1.6 g/t Au for 1.24Moz (Indicated)
- 25.6Mt at 1.3 g/t Au for 1.06Moz (Inferred)
- **APG** 31.0Mt at 0.7 g/t Au for 0.70Moz (Inferred)
- SG 0.5Mt at 1.4 g/t Au for 0.02Moz (Inferred)
- 70km strike length, multiple targets, less than 10% explored
- Metallurgical testwork demonstrates high gold recovery (>98%)
- Tietto's fleet of 6 DD rigs achieving low cost drilling @ ~\$35/m
- Completing ~10,000m of diamond drilling at Abujar per month

# RAPIDLY GROWING ABUJAR RESOURCES

## # AG DEPOSIT

- Robust high-grade core of 1.6Moz at 2.18 g/t Au at AG
  - Notable results include:
    - 7m @ 57.79 g/t Au from 76m
    - 7m @ 41.76 g/t Au from 55m
    - **21m** @ **13.02 g/t Au** from 215m
    - 16m @ 16.31 g/t Au from 111m
    - **2m** @ **113.3 g/t Au** from 83m
    - **18m** @ **11.72 g/t Au** from 39m
    - **6m @ 9.35g/t Au** from 317m
    - 5m @ 17.22 g/t Au from 374m
- More drilling planned:
  - Testing depth extent
  - Increase resource confidence

## **AG DEPOSIT**

## APG DEPOSIT

### Satellite mining opportunity

- Inferred JORC 2012 Mineral Resource of 31.0Mt at 0.7 g/t Au for 0.70Moz
- Gold mineralisation intersected over a 5km strike
- Drilling has defined a wide mineralised gold system
- Recent results include:
  - 9m @ 2.32g/t Au from 160m incl. 4.92m @ 3.80g/t Au
  - 14m @ 2.45g/t Au from 50m
  - 28.5m @ 1.04g/t Au from 22m
- Infill drilling targeting higher grade lodes
- Potential for a satellite mining operation

5km south of high-grade AG deposit

### **PIPELINE OF PROSPECTS**

Aggressive drilling programs designed to drive continued resource growth throughout 2021

Tietto's fleet of diamond rigs deliver rapid resource growth with some of the gold sectors lowest costs

Tenement	Resource Definition	Target Testing	Target Definition	Reconnaissance
Middle	1 AG + AG Deeps	6 Mandanou	10 Koflankro	21 Gludehi NW

## **₩ PLANNING OVER 100,000m DD IN 2021**

- **→ 2,500m geotechnical drilling for open pit DFS study Drilled**
- → 28,000m infill for DFS reserve Over 60% complete
- 80,000m to target multiple new and existing prospects on threeparallel corridors to drive further resource growth
  - On the Abujar Middle Tenement
    - 1) West Corridor Koflankro (2.5km strike length)
    - 2) West Corridor Vingt-Deux (1.0km strike length)
    - 3) West Corridor Agokro (1.0km strike length)
    - 4) Central Corridor Selected sections of APG Deposit
    - 5) Central Corridor PGL Prospect between APG and AG
    - 6) Central Corridor AG depth extension
    - 7) Central Corridor SG (South Gamina) Prospect
  - ☐ On the Abujar North Tenement
    - 1) Gamina Prospect

## # TIETTO'S DIAMOND DRILL RIGS - CHANGING THE RULES OF **EXPLORATION**

- **115,000m** of diamond core drilled using our own diamond drill rigs since listing in 2018
- Tietto drills diamond core for US\$35/m compared to typical contract rates of US\$150/m
- Savings to date are in the order of US\$11.7m after allowing for rig purchase costs
- We are planning to drill another 100,000m of diamond with our own drill rigs at Abujar in 2021
  - savings are estimated at US\$11.5m compared to contract rates
- Tietto drills all year round and our man-portable rigs have minimal impact on the environment

### Direct diamond drilling cost - completed and planned

## ## ABUJAR FEASIBILITY STUDY

### **Stand Alone Open Pit Development**

Assessing potential for a 3.5mtpa open pit gold operation

### Simple Metallurgy – High Gold Recoveries and Low Energy Usage

- Free milling high gravity and CIL recoveries (up to 98%-99%)
- Grinding of fresh material uses 30% less energy than typical
- Simple flowsheet single stage crushing then SAG Mill with gravity and CIL for gold recovery

### **Excellent Access to Infrastructure**

- 30km from the major regional city of Daloa in central western Côte D'Ivoire - 18km to major tared highway
- Low cost Hydro grid power (US\$0.12/kWh) 30km from 90kV substation

### **Permitting and Licencing**

- **Environmental Approval secured**
- Mining Licence 120.36km<sup>2</sup> granted in December 2020

## **EXCELLENT METALLURGY**

- Metallurgical testwork on AG samples indicates potential low-cost processing
- Excellent gold recoveries at coarse grind sizes - 96% (180 μm) to 98% (106 μm) for fresh ore
- Optimum grind sizes between 106-150 µm - potential use of simple single-stage crusher with SAG mill circuit (SSAG)
- Coarser grind sizes (>115  $\mu$ m) =
  - Reduced energy use
  - **Greater throughput**
  - Lower operating cost
- PFS due Q1 2021 with DFS due Q3 2021
- 1. ASX release 9 April 2020
- 2. Various NI 43-101 FS 2015 2019 (CDV, PRU, WAF)
- 3. ASX release 14 May 2020 and 9 July 2020

## ## THE RIGHT TEAM TO BUILD ABUJAR

- Matt Wilcox, our Chief Operating Officer is tasked with building our first gold mine at Abujar
- Mr Wilcox most recently was responsible for the development of West African's (ASX: WAF) 2.6Mtpa Sanbrado Gold Mine, which was completed in March 2020, ahead of schedule and under budget
- Prior to this he was:
  - Project Director for the construction of the 12Mtpa Gross Gold Project in Siberia, Russia
  - Project Director for the construction of Nord Gold's 4Mtpa Bissa Gold Project and 8Mtpa Bouly Gold Project, both located in Burkina Faso
  - General Manager of the 6Mtpa LEFA Gold Project in Guinea

## **WORKING WITH LOCAL COMMUNITIES**

## ## 2021 CATALYSTS

## **EMERGING WEST AFRICAN GOLD DEVELOPER**

**Growing 3.02Moz high-grade** open pit gold resource

Aggressive drilling to drive continued resource growth throughout 2021

Funded for 2021 work program, strong shareholder base

Large scale open pit opportunity

**PFS underway - potential** for low cost processing

Continuous news-flow

- 3. Mineral Resources are reported in accordance with the Australasian Code for Reporting of Exploration Results, Mineral Resources and Ore Reserves (The Joint Ore Reserves Committee Code JORC 2012 Edition).
- 4. The Mineral Resources have been reported at a 100% equity stake and not factored for ownership proportions.

<sup>1.</sup> The Mineral Resources has been compiled under the supervision of Mr. Jeremy Clark who is a full-time employee of RPM and a Registered Member of the Australian Institute of Mining and Metallurgy. Mr. Clark has sufficient experience that is relevant to the style of mineralisation and type of deposit under consideration and to the activity that he has undertaken to qualify as a Competent Person as defined in the JORC Code.

<sup>2.</sup> All Mineral Resources figures reported in the table above represent estimates at 21 October, 2020. Mineral Resource estimates are not precise calculations, being dependent on the interpretation of limited information on the location, shape and continuity of the occurrence and on the available sampling results. The totals contained in the above table have been rounded to reflect the relative uncertainty of the estimate. Rounding may cause some computational discrepancies.
