New Contract – Schrole Develop

This contract validates Schrole's "land and expand" strategy of introducing clients to the Schrole Community. This supports the significant up-sell and cross-sell potential across Schrole's full product suite. ISHCMC is now utilising 2 of Schrole's 4 key products, with an increase in contract value from ~AUD20,000 to ~AUD120,000.

The Diploma of Leadership and Management program will be delivered fully online, utilising Schrole Develop's learning management system. The Diploma is globally scalable, given:

- Schrole's existing community of circa 360 international schools
- Schrole Develop's proven online delivery capability
- Course content contextualised for teachers in international schools

The new contract award represents significant potential for further sales to other schools across the Cognita Group, as well as the broader Schrole community of circa 360 schools.

Schrole has commenced discussions to introduce Schrole's wider platform of 4 products to Cognita's 7,500 employees within 82 schools in Europe, Latin America, Middle East and Asia.

Strong international outlook for Schrole Group

Schrole's pipeline of international sales is strong and growing. A planned sales and marketing drive over the second half of 2021 will further the company's growth across all 4 key products in the international education sector.

MD Commentary

Schrole Group Managing Director, Mr Rob Graham said:

“The delivery of professional development services into international schools is part of Schrole’s strategy to provide a range of HR services to schools including an extended suite of Software as a Service (SaaS) modules and additional high value services such as professional development and training.

“It is very pleasing to have signed this contract with ISHCMC. The program has had enthusiastic take up by teachers, and our contextualised program will help develop well trained leaders who can assist with the ongoing development of the school.

This validates our strategy of increasing the contract value per school and reinforces the ability of Schrole Develop to expand its training services beyond the blue-chip mining companies in Western Australia.”
