About Australian Primary Hemp Ltd

Australian Primary Hemp Limited ("APH") is a vertically integrated business which produces, manufactures, and distributes a range of plant based nutrition brands including hemp products under the Mt Elephant and APH brands, to retail, wholesale, and white label customers in Australia. APH engages across the hemp value chain, encompassing seed selection, farming, processing, packaging as well as distribution and sales of bulk and retail products.

APH is unleashing the power of plant-based nutrition (including hemp) for better health and wellbeing

Strong commercial tailwinds and growing investor proposition for plant-based nutrition

Market embracing Australian sown and grown

Evolution to a branded, value-added health and wellness company

WHAT IS HEMP?

Hemp is not Medicinal Cannabis.

Hemp was legalised for food in Australia in November 2017 and does not contain the same levels of THC found in Medicinal Cannabis.

Hemp seed foods include hulled hemp seed, and foods derived from hemp seed such as oil, beverages, flour and protein powder. Like nuts and other seeds, hemp seed is a superfood that includes:

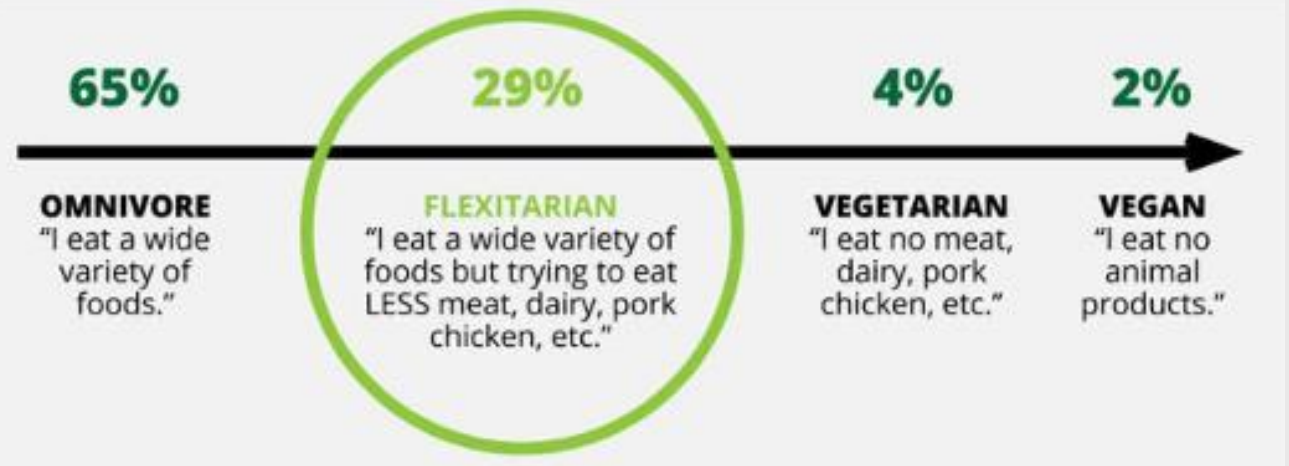

- Protein
- Dietary fibre
- Polyunsaturated (omega-3 + 6) fats
- Magnesium
- Gamma Linoleic acids

Hemp seeds do not contain any psychoactive properties. APH uses only hemp seeds as an ingredient in our products.

A SECULAR SHIFT IN CONSUMER EATING HABITS

- “Flexitarians” are leading the secular shift in consumer eating habits
 - Mostly vegetarian but sometimes eat meat
 - Represent ~29% of US population
 - Largely Millennials and Gen Z
- Vegetarians have historically been driven largely by ethics (i.e., animal welfare) and religion
- Flexitarians are focused on weight, health, and the environment
- Of the ~40% of Americans that consume alternative milks, only 1/3 did so exclusively

Leverages trend to natural products

Defined distribution

Harnesses natural SPF and antioxidant properties

Accessible price points

Emphasis on strong branding & efficacy

Omnichannel distribution strategy allows direct-to-consumer engagement and accesses networks of mass and specialty retailers and e-tailers.

SUPPLY CHAIN AND OPERATIONS UPDATE

Underpinning APH's recent growth, the Company is committed to its provenance and end-to-end supply chain, including organic hemp farming and ingredients processing.

- Direct farmer engagement with APH's contracted agronomist services has ensured best-practices resulting in increased yields, lower costs, and improved hemp quality.
- In Q2 FY21, APH received Organic Certification. This enables APH products to carry Australian Certified Organic BUD Logo.
- Record hemp crops in 2021

FY 2021/2022 OUTLOOK

Increase Supply Security and Operational Flexibility

- Improve quality
- Decrease costs
- Increase crop yield and supply security
- Bring previously outsourced services in house

Evolving from ingredients producer to value-added supplier

- Launched Mt. Elephant** brand
- Launch branded pet nutrition **Field Day** – August 2021
- Launching new beauty and wellness brand – Q4 FY22
- Expand product lines with existing partners; Coles, 7-Eleven and Woolworths

Refocus and expand distribution partners/channels

- Grow distribution in grocery, health food, convenience, specialty retailers and e-tailers
- Win more ingredient supply contracts
- Growing direct-to-consumer online business via APH digital platforms

Enhance brand marketing & consumer engagement

- Investment in digital and traditional marketing programs direct-to-consumer
- Investing with retailers in promotional activity e.g., market, influencer engagement

APPENDIX

DRIVERS OF CONSUMER CHANGE

- **Taste:** Technological improvements have led to improved taste, texture, and appearance
- **Cost:** High commodity feed and energy prices have supported the shift to inexpensive plant proteins. Most of the plant energy consumed goes into developing non-edible parts like hooves and bones. Bypassing the animal for the plant reduces this waste and the associated cost

- **Health:** No cholesterol, usually less fat, more fibre, more vitamins, no antibiotics, no risk of CV disease or animal-derived diseases
- **Environment:** Raising animals for meat, eggs, and dairy produces 15% of global greenhouse gas emissions; 33% of global arable land is used to grow animal feed, 26% of earth's terrestrial surface is used for grazing, and 8% of our water is used for animal production (UN, National Academies, Institute of Food Technologists).

ENVIRONMENTAL IMPACT OF ANIMAL VERSUS PLANT-BASED AGRICULTURE

	Greenhouse-gas emissions kg of CO ₂ equivalent per kg	Freshwater withdrawals litres per kg	Land use m ² per kg
Meat*			
Beef (herd)	99.5	1,451	326
Pork	12.3	1,796	7.8
Chicken	9.9	660	6.7
Beyond Burger	3.5	9.7	2.7
Impossible Burger	3.5	107	2.5
