Commenting on the option exercise, director Eric de Mori said: “Over the last 12 months, Thomas and the team have worked aggressively to explore the Strikeline project portfolio and advance the prospects to drill ready status. The recent discovery of high grade, near surface copper in our maiden drilling campaign at the Wyacca prospect (Mt Craig Project) highlights the exciting potential for Taruga moving

forward, as we look to capitalise on a surging copper price with an active drilling program across all projects.”

The consideration payable for the option exercise is the issue of 40,000,000 ordinary shares in the Company to the vendors of Strikeline, and the granting of a 1% NSR over the Strikeline projects (which Taruga can buyback for \$A500k). Additionally, the vendors of Strikeline have 3 performance-based milestones:

1. JORC Indicated Resource (min 150,000t Cu Equivalent);
2. Positive Bankable Feasibility Study; and
3. Commercial production.

The performance milestones, if met, can be satisfied by cash payments or the issue of TAR shares at the election of TAR. Further detail is provided as an Annexure to this ASX release entitled “Summary of Key Terms of Strikeline Acquisition”.

The Company will now proceed to the settlement of the Option with the issue and allotment of the consideration shares being allocated from the Company’s existing Listing Rule 7.1 capacity.

This announcement was approved by the Board of Taruga Minerals Limited.
