

Pure Hydrogen

ASX Announcement

Pure Hydrogen signs Term Sheet for Hydrogen Transport

Sydney: 25 May 2021, Australian East Coast Clean Energy Company, *Pure Hydrogen Corporation Limited* (ASX: PH2 or 'Pure Hydrogen') is pleased to report that it has signed a Term Sheet with Pure Haul Pty Ltd ('Pure Haul') for the Transport of Hydrogen to potentially customers with Pure Haul Pty Ltd. Pure Haul will transport Hydrogen from its hydrogen hubs to customers sites.

The transport and logistic services provided by Pure Haul will form part of Pure Hydrogen's total supply chain which will encompass hydrogen supply, a refuelling network underpinned by established technology and now a transport and logistics offering to potential commercial customers. Compressed hydrogen will be taken from Pure Hydrogen's various production points at pressures of 250 bar or higher into long cylinders, which are stacked in the truck's modified trailers, for haulage to customer sites and refuelling points.

Pure Haul in-house maintenance programs are backed by the Maintenance Management Accreditation issued by the National Heavy Vehicle Regulator (NHVR) which will result in reduced down time but also servicing costs allowing greater returns to the customer through reduced rates for the R&M supply.

Pure Hydrogen's Managing Director Scott Brown commented: *"We are partnering with an experienced and accredited transport and logistics operator that has an established network and fleet in place. Pure Haul have recognised the obvious benefits of forming a dedicated hydrogen transport and logistics business. This is another piece of the infrastructure necessary to provide the Hydrogen economy "*

Pure Hydrogen is targeting supplying Hydrogen in the second half of 2022.
