

Transport Solution Secured for Butcherbird Concentrate

- Letter of Intent signed with AK Evans Group Australia for transportation of initial project shipments.
- Haulage for the maiden cargo will be undertaken using agreed terms and rates under the Letter of Intent.
- The Parties are in the process of finalising a long-term contract which includes the introduction of new trucks and trailers throughout the remainder of 2021.
- The haulage task, almost entirely on the sealed Great Northern Highway, is rather unique in the resources industry in the Pilbara.

Element 25 Limited (**E25** or **Company**) (ASX:E25) is pleased to confirm the execution of a Letter of Intent with AK Evans Group Australia (**AK Evans**) for transportation of Manganese concentrate from the Company's 100% owned world class Butcherbird Manganese Project (**Project**) to Utah Point in Port Hedland.

AK Evans is a privately owned construction, civils, heavy and bulk haulage company, founded in Port Hedland, with locations across Western Australia. AK Evans also has a strategic partnership with Kurtarra Pty Limited, an 100% Indigenous owned earthmoving and services company. They also have a longstanding sponsorship agreement with Beyond Blue, a well-known men's mental health program.

The Letter of Intent will cover the initial transport arrangements and the parties are in the process of finalising a long term commercial arrangement which will see the introduction of new quad road trains during the remainder of 2021.

E25 Managing Director Mr Justin Brown commented, "We are excited to be partnering with AK Evans with a view to having new dedicated road trains to transport our manganese to Port Hedland. We are also excited to know we can work with our commercial partners in delivering solutions to fulfill our vision of delivering Zero Carbon Manganese™ for the EV Battery revolution. This is another important milestone for the Project and Company, and we are excited to be heading for our first shipment of Butcherbird's material to our offtake partners."

COMPANY SNAPSHOT

Market Summary

ASX code: E25
 Shares on issue: 149M
 Share price: \$2.40

Board of Directors:

Seamus Cornelius	Chairman
Justin Brown	MD
John Ribbons	NED

Element 25 Limited is developing the world class Butcherbird Manganese Project in Western Australia to produce high quality manganese concentrate and high purity manganese products for traditional and new energy markets.

Project team focus

The Project team will now turn its focus to the next stages of the multi-stage development strategy of the Project including a Stage 2 expansion of the concentrate business followed by a Stage 3 development to convert the concentrate material into high purity manganese sulphate monohydrate (HPMSM) for electric vehicle (EV) batteries to power the global transition away from fossil fuel powered mobility

Manganese is emerging as an increasingly important ingredient for EV batteries, with potential supply constraints for nickel and cobalt forcing battery manufacturers to look to high manganese cathodes to produce the vast amount of cathode material required by the EV industry in coming years.¹

The Project is ideally placed to feed this potential demand, with **advanced flowsheet development** work undertaken in 2019 and 2020 confirming a simple, unique, ambient temperature and atmospheric pressure leach process for E25 ores which, when combined with offsets, will target the world's first **Zero Carbon Manganese™** for EV cathode manufacture².

About the Butcherbird Manganese Project

The Butcherbird Manganese Project is a world class manganese resource with current JORC resources in excess of 263 Mt of manganese ore³. The Company completed a Pre-Feasibility Study (PFS)⁴ with respect to developing the deposit to produce manganese concentrate for export to generate early cashflow with a modest capital requirement⁵. The outstanding economics and low capital hurdle of less than A\$17 million for the first stage of development has allowed the Company to deliver first production from the Project in less than twelve months from the publication of the PFS.

The PFS also highlighted the Project has the potential for significant growth beyond the initial Stage 1 production volumes (the studies examined the potential for a 2X and 3X expansion to Stage 1 within 12 months of initial commissioning) and the Company expects to expedite the expansion of the Project.

In addition to the concentrate export business, the Company has completed extensive research & development and laboratory test work into the production of high purity manganese products including battery grade manganese sulphate (HPMSM) and High Purity Electrolytic Manganese Metal (HPEMM). The work has highlighted that the Butcherbird ores are highly amenable to an ambient temperature, atmospheric pressure leach process, resulting in a very efficient extraction of the manganese into solution, the key requirement for the cost effective and sustainable production of HPMSM and HPEMM.

The Project straddles the Great Northern Highway and the Goldfields Gas Pipeline, providing turnkey logistics and energy solutions. The Company plans to integrate renewable energy into the power solution over time to target a zero-carbon footprint for the Project, which is expected to also reduce energy costs. A cleaner, lower carbon flowsheet and high penetration renewable energy will place Butcherbird at the forefront of sustainable high purity manganese production.

Mineral Resources

Category	Tonnes (Mt)	Mn (%)	Si (%)	Fe (%)	Al (%)
Measured	16	11.6	20.6	11.7	5.7
Indicated	41	10.0	20.9	11.0	5.8
Inferred	206	9.8	20.8	11.4	5.9
Total	263	10.0	20.8	11.4	5.9

Notes:

- Reported at a 7% Mn cut-off for the Measured and Indicated categories and an 8% Mn cut-off for the Inferred categories.
- All figures rounded to reflect the appropriate level of confidence (apparent differences may occur due to rounding)

Mining Reserve

Based on the results of the Pre-Feasibility Study completed in May 2020, E25 has published a Maiden Ore Reserve for the Project of 50.55Mt in the Proved and Probable categories⁶.

Classification	Tonnes (Mt)	Grade (Mn%)	Contained Mn (Mt)	Recovered Mn (Mt)
Proved	14.4	11.5	1.65	1.35
Probable	36.2	9.8	3.56	2.92
Total	50.6	10.3	5.21	4.27

Competent Persons Statement

The company confirms that in the case of estimates of Mineral Resource or Ore Reserves, all material assumptions and technical parameters underpinning the estimates in the market announcements dated 17 April 2019 and 19 May 2020 continue to apply and have not materially changed. The company confirms that the form and context in which the competent person's findings are presented has not been materially modified from the original market announcements.

The information in this report that relates to Exploration Results and Exploration Targets is based on information compiled by Mr Justin Brown who is a member of the Australasian Institute of Mining and Metallurgy. At the time that the Exploration Results and Exploration Targets were compiled, Mr Brown was an employee of Element 25 Limited. Mr Brown is a geologist and has sufficient experience which is relevant to the style of mineralisation and type of deposit under consideration and to the activity which he is undertaking to qualify as a Competent Person as defined in the 2012 edition of the 'Australasian Code for Reporting of Exploration Results, Mineral Resources and Ore Reserves'. Mr Brown consents to the inclusion of this information in the form and context in which it appears in this report.

This announcement is authorised for market release by Element 25 Limited's Board of Directors.
