Zenith holds 15% of the issued capital of Bradda Head, which recently raised £6.2 million through the placement of new ordinary shares at 5.5 pence to fund the phased exploration work programs across its lithium projects, located in the USA.

### About Bradda Head

Bradda Head's strategy is to develop US based lithium projects to supply the domestic North American green energy market. Its assets are in the US states of Nevada and Arizona. These jurisdictions are ranked both 1<sup>st</sup> and 2<sup>nd</sup> in relation to investment attractiveness based upon the Fraser Institute 2020 Annual survey.

Bradda Head have stated that over the forthcoming 18 months it intends to advance its exploration program allocating approximately US\$ 5.4 million to the portfolio. This work is intended to build upon existing drilling, sampling and metallurgical test work over the portfolio. Three projects are planned to be allocated the majority of this spend.

- Wikieup (100%) located in Arizona – will encompass a phase of 30 drill holes, potential resource estimate and metallurgical testwork, spend estimate US\$1.6 million
- Burro Creek East (100%) located in Arizona – will encompass a phase of drilling (10 holes), potential update to the existing JORC resource and metallurgical testwork, spend estimate US\$ 0.3 million
- Burro Creek West (100%) located in Arizona – will encompass permitting, drilling (10 holes), preliminary metallurgical testwork and following that potential for a maiden JORC resource, spend estimate US\$ 0.6m

**Commenting on the Bradda Head AIM listing, Chairman Peter Bird said:** *"we are very pleased that Bradda Head has successfully listed as it provides a definitive valuation for this pure commodity play company, something investors often prefer. Charles FitzRoy and his Bradda Head team have done a great job to execute the admission into AIM. Alternative energy commodities such as lithium should feature prominently in the coming years and a US based potential domestic feed source is a very real opportunity for Bradda Head. We will watch developments at Bradda Head with great supporting interest as we forge ahead with our key activities in the Australian base and precious metals space."*

\* As is customary "insiders" including Zenith Minerals are subject to an escrow period in the first 12 months from admission with a progressive relaxation in the subsequent 12 months. Refer to ZNC ASX Release 18-Feb-21 for background on the Bradda Head transaction.
