Quarterly Activity Report and Appendix 4C

Roots Sustainable Agricultural Technologies Limited (ASX: ROO, “Roots” or “the Company”) is pleased to provide this update to shareholders for the period ended 30 June 2021 (the ‘quarter’).

Operational Overview:

Proposed transaction:

During the quarter, Roots requested a trading halt and suspension in response to the Company seeking to engage in a new business activity that would involve the sale and distribution of plant and hemp-based food products in the US.

Following extensive discussions and submissions, the ASX determined that it considered the potential transaction would constitute a change in the nature of the Company’s activities and Roots would be required under ASX Listing Rule 11.1.3 to re-comply with the requirements of Chapters 1 and 2 of the Listing Rules before it may complete the potential transaction.

Such compliance was expected to cause further transactional delays and significant costs, which would prevent Roots from being able to complete its other current business endeavours. The Company has, therefore, decided not to proceed with potential transaction which will allow it to continue to focus on the growth of its core business.

Outlook:

Roots will continue to focus on the growth of its core operating business during the current quarter and beyond. The Company is building a strong sales pipeline in Israel, as well as pursuing several parallel sales channels in the United States to drive revenue.

The Company is also progressing IP registration and additional R&D opportunities including pilot trial programs with new customers, as well as new product development initiatives which will allow for the Company’s range of solutions to be used in recreational growing capacities.

Management commentary:

Roots Executive Chairman and CEO, Boaz Wachtel said: *“Root is continuing to witness a number of opportunities that will allow the Company to further commercialise its innovative product suite and drive sales growth. We are building a strong pipeline across Israel, through large scale farm operations, as well as the cannabis industry and we anticipate that a number of sales contracts will materialise over the coming months. The Company is also implementing strategies to drive sales through the US and Europe.*

“Management are also pursuing R&D initiatives that will allow our Root Zone Temperature Optimisation and heat exchange stub products to be embedded into new systems, different growing settings including open fields and on smaller at home operations.

"Food security is a major global issue. Our RZTO technology has shown considerable advantages including shortening grow cycles, increased plant yield, energy savings and enhanced production security, so we are very confident that multiple developments will materialise in the coming months."

About Roots Sustainable Agricultural Technologies Ltd:

Israeli-based, Roots Sustainable Agricultural Technologies Ltd. is developing and commercialising disruptive, modular, cutting-edge technologies to address critical problems faced by agriculture today, including management of plant's root zone temperatures and the shortage of water for irrigation.

Roots has developed proprietary know-how and patents to optimise performance, lower installation costs, and reduce energy consumption to bring maximum benefit to farmers through their two-in-one root zone heating and cooling technology and off the grid irrigation by condensation technology.

Roots is a graduate company of the Office of the Israeli Chief Scientist Technological Incubator program.

About Root Zone Temperature Optimization (RZTO)

Root Zone Temperature Optimization (RZTO) optimises plant physiology for increased growth, productivity and quality by stabilising the plant's root zone temperature. Using Ground source heat exchange (GSHE) installations either alone, or in combination with heat pumps, or with heat pumps alone, ROOTS is able to provide accurate range of root zone temperatures for farmer and the plants to obtain the multiple benefits.

This significantly increases yields, increases growing cycle planting options, improves quality, mitigates extreme heat and cold stress while significantly reducing energy consumption by stabilising and optimising the ROOTS zone temperature.

This announcement was authorised to be given to the ASX by the Roots Executive Directors, Mr Boaz Wachtel and Mr Sharon Devir.
