Continuing strong portfolio, investment and community outcomes

Arena REIT (Arena) announces a net operating profit for FY21 of \$51.9 million, an increase of 18.5% on the prior year. Key contributors to higher operating income include growth in contracted annual rental growth and market rent reviews, acquisition of operating early learning centre (ELC) properties and development projects completed during FY20 and FY21. The result represents EPS¹ of 15.2 cents, an increase of 4.5% over the prior year. Arena has paid a full-year distribution of 14.8 cents per security, up 6% on the prior year. Statutory net profit for the year was \$165.4 million, an increase of 116% on the prior year.

Arena's total assets increased by 14% to \$1,151.5 million as a result of acquisitions, development capital expenditure and the positive revaluation of the portfolio. The revaluation uplift was the primary contributor to the 15% increase in NAV per security to \$2.56 at 30 June 2021.

Commenting in respect of today's announcement, Arena's Managing Director Mr Rob de Vos said "Despite a challenging external environment, Arena has achieved strong portfolio and investment outcomes in FY21. Our portfolio of social infrastructure property has also facilitated positive outcomes for the Australian communities that access our properties to utilise the essential services provided by our tenant partners."

¹ Earnings per security (EPS) is calculated as net operating profit over weighted average number of securities.

² FY22 distribution guidance is estimated on a status quo basis assuming no new acquisitions or disposals, all developments in progress are completed in line with forecast assumptions, tenants comply with their existing or adjusted lease obligations and is based on Arena's current assessment of the future impact of COVID-19 pandemic (which is subject to a wide range of uncertainties) and assumes ongoing government support of the early learning sector.

- Improve workforce participation, gender equality, women's financial security and economic activity over the medium to long term⁹.

Strong structural demand for services and a record female workforce participation rate continue to drive increased long day care (LDC) participation rates over the medium to long term^{10,11}.

Arena's healthcare portfolio continues to perform well

Strong structural macro-economic drivers continue to support Australian healthcare accommodation, including growing and ageing population and increased prevalence of chronic health conditions. Strong occupancy has been maintained across the specialist disability accommodation portfolio.

Healthcare properties remain strongly sought after, with increased domestic and international interest in Australian healthcare property and increasing interest in social infrastructure property more generally.
