Strategy and Outlook

NUIX FY21 RESULTS

Reinvesting for growth

Continuing the Nuix SaaS journey

- Capitalise on macro trend of data moving to the cloud
- SaaS Discovery already offered
- Engine as a Service – horizontally scalable processing in the cloud

Building on a strong product foundation

- eDiscovery
- Investigations
- Core Data Processing

Delivering value-added solutions

- Governance, Risk and Compliance (GRC)
- Compliance Scanner
- eComms Surveillance

Renewed focus on strategic acquisitions

- Accelerate SaaS and Solutions

Access to more data with Unified Collections platform

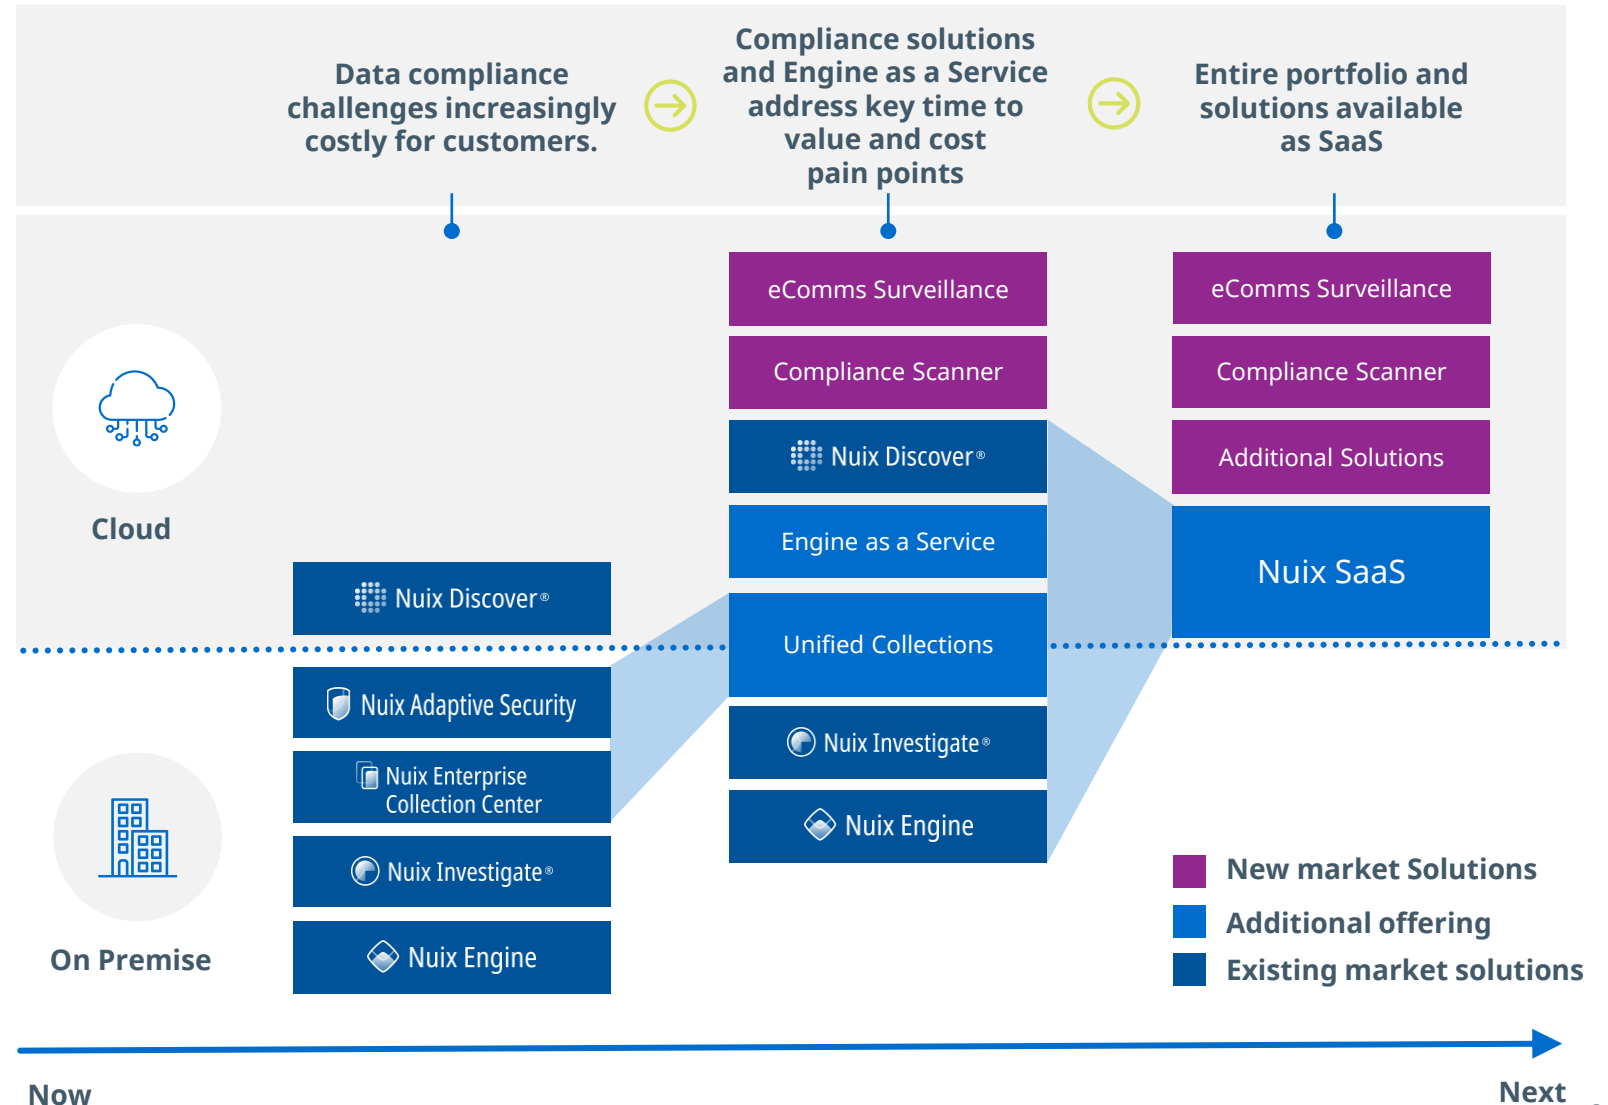

- Single platform supporting data acquisitions from data aggregation points

ersonal use only

Embracing the Cloud – SaaS and Solutions

Demand Drivers of SaaS migration

- GRC is a key issue for our customers
- Data proliferation to the cloud complicates GRC mandates
- Cost, Time to Value, and Speed of Resolution are critical customer requirements
- Collection and processing of new and emerging communication channels is critical

Nuix's Growth Path

WIN NEW CUSTOMERS

1

Expand across geographies and in targeted industries by winning new customers and gaining market share in \$27bn¹ total addressable market (TAM)

"LAND AND EXPAND" STRATEGY

2

Expand across key industry verticals. This involves driving new customer acquisition and upsell and renewal of existing customers

INVESTMENT TO EXTEND THE NUIX PLATFORM

3

Extend the functionality of the Nuix software platform by creating products which attract new customers, drive upsell or create renewal activity

OPERATING EFFICIENCY

4

Extract benefits of scale as the business grows; continue to drive improvements in operating margin

PARTNER CONSIDERATIONS

5

Build a network of strategic partners who can provide complementary delivery and market expansion capabilities to drive future revenue sources

VALUE ACCRETIVE M&A

6

Assess opportunities based on strategic fit, relevance and synergies and target the acquisition of capabilities rather than revenue alone

Note:

1. Refer to page 28 of the Appendix for more details on TAM

Nuix Software Platform

Nuix produces software to extract knowledge from unstructured data. Its applications include digital forensic investigation, financial crime, litigation support, employee and insider investigations, data protection and privacy, data governance, eDiscovery and regulatory compliance

The Nuix platform

- comprises:
 - the Nuix Engine, that processes, normalises, indexes, enriches and analyses data at speed and scale
 - software applications which provide visualisation, analytics and relationship-mapping tools for customers
- has evolved over time, with 23 major releases and 157 minor releases of the Nuix Engine since 2008
- is integrated into the workflows for many of the world's major advisory firms, law firms, corporations, law enforcement and other government agencies

Industry Overview

Nuix is a leading player in the US\$4 billion eDiscovery and Digital forensics software markets and an emerging player in the US\$23 billion GRC and Endpoint security software markets. Together these markets make up the investigative analytics and intelligence software market.

Glossary

- 1) **Annualised Contract Value (ACV)** is an adjusted, non-IFRS measure and does not represent Total Revenue in accordance with AAS or Nuix's accounting policies or cash receipts from customers. ACV is used by Nuix to assess the total contract value of its software contracts on an annualised basis (removing fluctuations from Multi-Year Deal contracts in Nuix's Total Revenue which results from its revenue recognition policies). The calculation of ACV at the end of the relevant financial period adjusts Total Revenue to account for: A) Revenue generated from Subscription Licences with a term of 12 months or more, as well as Consumption Licences which exists at the end of the relevant financial period as if those contracts' revenues were generated (and recognised) in each financial year on a straight-line basis over the relevant contract period, expressed on an annualised basis B) last 12 month contribution from short term Software Licences (including Perpetual Licences) or other Software Licences with a term of less than 12 months, excluding Consumption Licences; and C) the last 12 month contribution of services and third party software sales.
- 2) **Net Dollar Retention (NDR)**, expressed as a percentage, represents the ACV from the sale of Subscription Licences (excluding short-term Software Licences, or licences with a term of less than 12 months, but including Consumption Licences) from a constant set of customers (the "NDR Constant Customer Set") across comparable periods (i.e. it excludes the impact of new customers acquired in the subsequent (i.e. more recent period), taking into account the impact of Upsell, Downsell and Churn (as described in note 4) between these two periods.
- 3) **Churn**, expressed as a percentage, reflects the lost customer ACV from Subscription Licences (excluding short-term Software Licences, or licences with a term of less than 12 months, but including Consumption Licences) in respect of a twelve-month period which are terminated or not renewed (a contract will not count towards Churn if it was renewed or recommenced within three months of the end of the given period), as a proportion of ACV from Subscription Licences (excluding short-term Software Licences, or licences with a term of less than 12 months, but including Consumption Licences) at the start of that period.
- 4) **Subscription ACV** reflects revenue generated from Subscription Licences with a term of 12 months and Consumption Licences which exists at the end of the relevant financial period as if those contracts' revenues were generated (and recognised) in each financial year on a straight-line basis over the relevant contract period, expressed on an annualised basis. Subscription ACV excludes short term Software Licences (including Perpetual Licences) or other Software Licences with a term of less than 12 months, but includes Consumption Licences.
- 5) **Other ACV** reflects the last twelve-month contribution of Perpetual Licence sales, services and third-party software and short-term Software Licences, or licences with a term of less than 12 months but excluding Consumption Licences.
- 6) **Consumption ACV** is a sub-component of Subscription ACV and reflects the monthly contribution generated relating to gigabytes processed or under management relating to SaaS Consumption ACV and Non-SaaS Consumption ACV at the end of the relevant period, expressed on an annualised basis.
- 7) **SaaS Consumption ACV** is a sub-component of Consumption ACV and reflects monthly contribution generated relating to gigabytes processed or under management hosted in Nuix's cloud environments, expressed on an annualised basis.
- 8) **Non-SaaS Consumption ACV** is a sub-component of Consumption ACV and reflects monthly contribution generated relating to gigabytes processed or under management that is not hosted in Nuix's cloud environments, expressed on an annualised basis.

Constant Currency and Pro forma Adjustments

Constant Currency has been calculated using the below methodology:

1. Constant currency rates are calculated by dividing the total FY20 consolidated AUD revenue associated with a currency by the total FY20 transaction currency revenue of the same currency, providing a weighted average exchange rate based on statutory revenue transactions in FY20. This is then checked against the average daily rate provided by the RBA for appropriateness.
2. This modified rate is then applied at a transaction level across FY21 data to ensure that all metrics (region, domain, P&L department etc.) are re-weighted appropriately.
3. Where there is a cost transaction in a currency where there is no revenue transaction, the average RBA rate for FY20 is used.
4. Exchange rates used for constant currency calculations:
 - USD 1.4975
 - EUR 1.6505
 - GBP 1.8832
 - CAD 1.0931

Pro forma adjustments

- This presentation includes pro forma numbers for FY21 and the comparative period prepared on the same basis as presented in the Prospectus dated 18 November 2020.
- The pro forma adjustments in FY21 remove the impact of offer costs, non-recurring transaction costs related to a sale process explored by Nuix as an alternative to the offer, and share-based payment expenses in respect of existing options that were cancelled on completion. The pro forma adjustments for FY21 also provide for a full year of listed company costs and the relevant tax impact of the pro forma adjustments.
