Part 14 – Commentary to Financial Results

Overview of results

For the year ended 30 June 2021 sales revenue increased by \$2,774,748 and gross profit increased by \$682,183, while the group realised a \$650,093 loss from continuing operations [30 June 2020: (\$209,333)]. The increase of sales revenue and gross profit are mainly contributed by the promoted sales of inventory. Due to large one-time amortisation of a capitalised VAT receivable (\$241,824) and an increased promotional cost in Australian market, the group realised an increase to prior year loss by \$440,760. As the development of Australian market is slower than expected, the management has reviewed the group's operational costs with a view to finding new strategies to explore the Australian market.

The group foresees that the online education market in Australia will remain prosperous in the coming years. The group will continue to explore organic and inorganic growth opportunities. The management will continue to protect the company's cash flow and allocate capital expenditure to projects with high assurance and stability. The group recorded \$1,179,633 cash or cash equivalents position at the end of financial period (30 June 2020: \$396,810). The management anticipates its cash flow will remain in a healthy state. Judgement has been exercised in considering the impacts that the Coronavirus (COVID-19) pandemic has had, or may have, on the group based on known information.
