

ASX ANNOUNCEMENT
31 August 2021

Extended Reporting and Lodgment Deadline – preliminary final report for year ended 30 June 2021

Papyrus Australia Ltd ("PPY"/"Company"/"Papyrus") a world leading "agricultural waste fibre technology company" advises that:-

In accordance with the class waiver from listing rule 4.5.1 to permit the entity to give its audited annual accounts and the other documents required to be lodged with ASIC under section 319 of the Corporations Act to ASX by the earlier of:

- the date the audited or reviewed annual accounts are ready to be given to ASX; and
- the date the audited or reviewed annual accounts must be given to ASIC under the Amended ASIC Relief,

Subject to the following conditions:

- 1 PPY is not a mining entity or an oil and gas exploration entity, and the appended information set out in Appendix 4E of the listing rules and its unaudited full year accounts have been provided within two months from the end of the relevant accounting period being 30 June 2021.
- 2 In addition, the following information is provided to the market:
 - 2.1 That the entity is relying on the Amended ASIC Relief to extend the lodgment date for its audited annual accounts and the other documents required to be lodged with ASIC under section 319 of the Corporations Act.
 - 2.2 PPY will immediately make a further announcement to the market if it becomes aware that there will be a material difference between the unaudited full year accounts and its audited full year accounts.

On behalf of the Board

Yours sincerely

Vince Rigano

Company Secretary

Basis of Financial Report Preparation

This financial report is for the year ended 30 June 2021 and has been prepared in accordance with the Australian Securities Exchange Listing rules as they relate to Appendix 4E and in accordance with the Corporations Act 2001. The accounting policies adopted with the contents of this report are consistent with those of the previous financial year and corresponding interim reporting period. Comments are for the twelve months ended 30 June 2021 with comparatives for the twelve months ended 30 June 2020. All amounts are measured in Australian Dollars, unless otherwise specified.

During the reporting period, there has been no loss of control over any entity. Effective from the 1 July 2020 the Company has gained control over the Papyrus Egypt joint venture company operating the factory at Sohag Egypt. The Company has a direct and indirect interest in Papyrus Egypt of 68.97%. The contribution of Papyrus Egypt to the Company's loss from ordinary activities for the year was \$113,948 (2020 year: zero)

During the reporting period, The Company gained an interest of 39.7% in Egypt Banana Fibre Company (EBFC), the joint venture partner in Papyrus Egypt. There has been no contribution to the Company's loss from ordinary activities for the year (2020 year: zero)

Audit Status

The financial statements contained within this Appendix 4E are in the process of being audited and, as such, the accounts are presented unaudited.

NOTES TO THE FINANCIAL STATEMENTS

1. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

a. Basis of Preparation

The Preliminary Final Report has been prepared in accordance with ASX Listing Rule 4.3A and has been derived from the unaudited consolidated Annual Financial Report.

The Preliminary Final Report has been prepared in accordance with Australian Accounting Standards (AASB) adopted by the Australian Accounting Standards Board and the Corporations Act 2001. The Financial Report also complies with International Financial Reporting Standards (IFRS) and interpretations adopted by the International Accounting Standards Board. In preparing the Preliminary Financial Report, Papyrus Australia Ltd is a for-profit entity.

The Preliminary Final Report is presented in Australian dollars and has been prepared on the basis of historical cost except where assets and liabilities are stated at their fair values in accordance with relevant accounting policies.

The consolidated Annual Financial Report is in the process of being audited. This report should also be read in conjunction with any publications made by Papyrus during the year in accordance with the continuous disclosure requirements arising under the Corporations Act 2001 and ASX Listing Rules.

b. Basis of consolidation

The consolidated financial statements comprise the financial statements of Papyrus Australia Ltd and its subsidiaries as at 30 June each year (the Group).

The financial statements of the subsidiaries are prepared for the same reporting period as the parent company, using consistent accounting policies.

In preparing the consolidated financial statements, all intercompany balances and transactions, income and expenses and profit and losses resulting from intra-group transactions have been eliminated in full.

Subsidiaries are fully consolidated from the date on which control is transferred to the Group and cease to be consolidated from the date on which control is transferred out of the Group.

c. Business combinations

The acquisition method of accounting is used to account for all business combinations regardless of whether equity instruments or other assets are acquired. Cost is measured as the fair value of the assets given, shares issued or liabilities incurred or assumed at the date of exchange. Costs directly attributable to the combination are expensed as incurred. Where equity instruments are issued in a business combination, the fair value of the instruments is their published market price as at the date of exchange unless, in rare circumstances, it can be demonstrated that the published price at the date of exchange is an unreliable indicator of fair value and that other evidence and valuation methods provide a more reliable measure of fair value. Transaction costs arising on the issue of equity instruments are recognised directly in equity.

Except for non-current assets or disposal groups classified as held for sale (which are measured at fair value less costs to sell), all identifiable assets acquired and liabilities and contingent liabilities assumed in a business combination are measured initially at their fair values at the acquisition date, irrespective of the extent of any minority interest. The excess of the cost of the business combination over the net fair value of the Group's share of the identifiable net assets acquired is recognised as goodwill. If the cost of acquisition is less than the Group's share of the net fair value of the identifiable net assets of the subsidiary, the difference is recognised as a gain in the income statement, but only after a reassessment of the identification and measurement of the net assets acquired.

d. Revenue Recognition

To determine whether to recognise revenue, the Group follows a 5-step process:

1. Identifying the contract with the customer
2. Identifying the performance obligations
3. Determining the transaction price
4. Allocating the transaction price to the performance obligations
5. Recognising revenue when/as performance obligation(s) are satisfied.

The group enters into transactions involving a range of the Group's products and services. In all cases, the total transaction price for the contract is allocated amongst the various performance obligation based on their relative stand-alone selling prices. The transaction price for a contract excludes any amount collected on behalf of third parties.

Revenue is recognised either at a point in time or over time, when (or as) the Group satisfies performance obligations by transferring the promised goods or services to its customers.

The Group recognises contract liabilities for consideration received in respect of unsatisfied performance obligations and reports these amounts as other liabilities in the statement of financial position. Similarly, if the Group satisfies a performance obligation before it receives the consideration, the Group recognises either a contract asset or a receivable in its statement of financial position, depending on whether something other than the passage of time is required before the consideration is due.

e. Government grants

Government grants are recognised when there is reasonable assurance that the grant will be received and all attaching conditions will be complied with.

When the grant relates to an expense item, it is recognised as income over the periods necessary to match the grant on a systematic basis to the costs that it is intended to compensate.

When the grant relates to an asset, the fair value is credited to a deferred income account and is released to the income statement over the expected useful life of the relevant asset by equal annual instalments.

f. Borrowing costs

Borrowing costs are recognised as an expense when incurred.

g. Cash and cash equivalents

Cash and short-term deposits in the balance sheet comprise cash at bank and in hand and short term deposits with an original maturity of 3 months or less.

For the purposes of the Statement of Cash Flows, cash and cash equivalents consist of cash and cash equivalents as defined above.

h. Trade and other receivables

For trade receivables, the Group applies a simplified approach in calculating Expected Credit Losses ('ELCs') as allowed in accordance with AASB 9 Financial Instruments.

Therefore, the Group does not track changes in credit risk, but instead recognises a loss allowance based on lifetime ELCs at each reporting date.

i. Income tax

Income tax expense or benefit for the period is the tax payable on the current period's taxable income based on the notional income tax rate for each jurisdiction adjusted by changes in deferred tax assets and liabilities attributable to temporary differences between the tax bases of assets and liabilities and their carrying amounts in the financial statements, and to unused tax losses. Current and deferred tax expense attributable to amounts recognised directly in equity is also recognised directly in equity.

Current tax assets and liabilities for the current and prior periods are measured at the amount expected to be recovered from or paid to the taxation authorities. The tax rates and tax laws used to compute the amount are those that are enacted or substantively enacted by the balance sheet date.

Deferred income tax is provided on temporary differences at the balance sheet date between the tax bases of assets and liabilities and their carrying amounts for financial reporting purposes.

Deferred income tax liabilities are recognised for all taxable temporary differences except:

when the deferred income tax liability arises from the initial recognition of goodwill or of an asset or liability in a transaction that is not a business combination and that, at the time of the transaction, affects neither the accounting profit nor taxable profit or loss; or

when the taxable temporary difference is associated with investments in subsidiaries, associates or interests in joint ventures, and the timing of the reversal of the temporary difference can be controlled and it is probable that the temporary difference will not reverse in the foreseeable future.

Deferred income tax assets are recognised for all deductible temporary differences, carry-forward of unused tax assets and unused tax losses, to the extent that it is probable that taxable profit will be available against which the deductible temporary differences and the carry-forward of unused tax credits and unused tax losses can be utilised, except:

when the deferred income tax asset relating to the deductible temporary difference arises from the initial recognition of an asset or liability in a transaction that is not a business combination and, at the time of the transaction, affects neither the accounting profit nor taxable profit or loss; or

when the deductible temporary difference is associated with investments in subsidiaries, associates or interests in joint ventures, in which case a deferred tax asset is only recognised to the extent that it is probable that the temporary difference will reverse in the foreseeable future and taxable profit will be available against which the temporary difference can be utilised.

The carrying amount of deferred income tax assets is reviewed at each balance date and reduced to the extent that it is no longer probable that sufficient taxable profit will be available to allow all or part of the deferred income tax asset to be utilised.

Unrecognised deferred income tax assets are reassessed at each balance sheet date and are recognised to the extent that it has become probable that future taxable profit will allow the deferred tax asset to be recovered.

Deferred income tax assets and liabilities are measured at the tax rates that are expected to apply to the year when the asset is realised or the liability is settled, based on tax rates (and tax laws) that have been enacted or substantively enacted at the balance sheet date.

Deferred tax assets and deferred tax liabilities are offset only if a legally enforceable right exists to set off current tax assets against current tax liabilities and the deferred tax assets and liabilities relate to the same taxable entity and the same taxation authority.

j. Goods and Services Tax (GST)

Revenues, expenses and assets are recognised net of the amount of GST except:

when the GST incurred on a purchase of goods and services is not recoverable from the taxation authority, in which case the is recognised as part of the cost of acquisition of the asset or as part of the expense item as applicable; and

receivables and payables, which are stated with the amount of GST included.

The net amount of GST recoverable from, or payable to, the taxation authority is included as part of receivables or payables in the statement of financial position.

Cash flows are included in the Statement of Cash Flows on a gross basis and the GST component of cash flows arising from investing and financing activities, which is recoverable from, or payable to, the taxation authority are classified as operating cash flows.

Commitments and contingencies are disclosed net of the amount of GST recoverable from, or payable to, the taxation authority.

k. Property, plant and equipment

Plant and equipment is stated at cost less accumulated depreciation and any accumulated impairment losses. Such cost includes the cost of replacing parts that are eligible for capitalisation when the cost of replacing the parts is incurred. Similarly, when each major inspection is performed, its cost is recognised in the carrying amount of the plant and equipment as a replacement only if it is eligible for capitalisation.

Depreciation is calculated on a straight-line over the estimated useful life of the assets as follows:

Plant and equipment 2.5 - 10 years

The assets' residual values, useful lives and amortisation methods are reviewed, and adjusted if appropriate, at each financial year end.

Impairment

The carrying values of plant and equipment are reviewed for impairment at each reporting date, with recoverable amount being estimated when events or changes in circumstances indicate that the carrying value may be impaired.

The recoverable amount of plant and equipment is the higher of fair value less costs to sell and value in use. In assessing value in use, the estimated future cash flows are discounted to their present value using a pre-tax discount rate that reflects current market assessments of the time value of money and the risks specific to the asset.

For an asset that does not generate largely independent cash inflows, recoverable amount is determined for the cash-generating unit to which the asset belongs, unless the asset's value in use can be estimated to be close to its fair value.

An impairment exists when the carrying value of an asset or cash-generating units exceeds its estimated recoverable amount. The asset or cash-generating unit is then written down to its recoverable amount.

For plant and equipment, impairment losses are recognised in the profit or loss in a combination of functional expense items.

l. Trade and other payables

Trade payables and other payables are carried at cost and represent liabilities for goods and services provided to the Group prior to the end of the financial year that are unpaid and arise when the Group becomes obliged to make future payments in respect of the purchase of these goods and services.

m. Interest-bearing loans and borrowings

All loans and borrowings are initially recognised at the fair value of the consideration received less directly attributable transaction costs.

n. Share-based payment transactions

The Group provides benefits to employees and consultants of the Group in the form of share-based payments, whereby employees or consultants receive option incentives (equity settled transactions). There is currently one plan in place to provide these benefits, the Employee Share Option Plan (ESOP) which provides benefits to directors and employees.

The cost of these equity-settled transactions with employees is measured by reference to the fair value at the date at which they are granted. The cost is recognised as an expense in the income statement, together with a corresponding increase in the share option reserve, when the options are issued. The fair value is determined using the Black Scholes option pricing model.

Upon the exercise of options, the balance of share based payments reserve relating to those options is transferred to share capital.

o. Contributed equity

Ordinary shares are classified as equity. Incremental costs directly attributable to the issue of new shares or options are shown in equity as a deduction, net of tax, from the proceeds.

p. Earnings per share

Basic earnings per share is calculated as net profit attributable to members of the parent, adjusted to exclude any costs of servicing equity (other than dividends), divided by the weighted average number of ordinary shares, adjusted for any bonus element.

Diluted earnings per share adjusts the figures used in the determination of basic earnings per share to take into account the weighted average number of shares assumed to have been issued for no consideration in relation to dilutive potential ordinary shares.

q. Significant accounting judgements and key estimates

The preparation of financial reports requires management to make judgements, estimates and assumptions that affect the application of accounting policies and the reported amounts of assets, liabilities, income and expense. Actual results may differ from these estimates.

Except as described below, in preparing this report, the significant judgements made by management in applying the Group's accounting policies and the key sources of estimation uncertainty were the same as those that applied to the consolidated financial report for the year ended 30 June 2020.

In the year ended 30 June 2021, management reassessed its estimates in respect of:

Key Estimates — Impairment

The Group assesses impairment at each reporting date by evaluating conditions specific to the group that may lead to an impairment of assets. Where an impairment trigger exists, the recoverable amount of the asset is determined.

Key estimates – Estimation of useful lives and residual value of assets

The Group determine the estimated useful lives, residual values and related depreciation charges for its property, plant and equipment. The useful life and residual values could change significantly as a result of technical innovations or some other events. The depreciation charge will increase where the useful lives are less than previously estimated lives, or technically obsolete or non-strategic assets that have been abandoned or sold will be written off or written down.

2. PROFIT AND LOSS

Consolidated Group		
	30 June 2021 \$	30 June 2020 \$
REVENUE

Share registry and ASX expenses	101,141	52,352
Other expenses	30,216	16,833
	569,369	250,612

3. EARNINGS PER SHARE

Basic earnings per share amounts are calculated by dividing net loss for the year attributable to ordinary equity holders of the parent by the weighted average number of ordinary shares outstanding during the year.

Diluted earnings per share amounts are calculated by dividing the net profit attributable to ordinary equity holders of the parent by the weighted average number of ordinary shares outstanding during the year plus the weighted average number of ordinary shares that would be issued on the conversion of all the dilutive potential ordinary shares into ordinary shares.

The following reflects the income and share data used in the basic and diluted earnings per share computations:

	Consolidated Group	
	2021	2020
	\$	\$
Net loss attributable to ordinary equity holders of the parent	(136,168)	(133,735)
	2021	2020
Weighted average number of ordinary shares for basic earnings per share	428,170,666	258,842,410
Effect of dilution		
Share options	-	-
Weighted average number of ordinary shares adjusted effect of dilution		
for the effect of dilution	428,170,666	258,842,410
Earnings per share:	<i>Cents</i>	<i>Cents</i>
Basic earnings per share	(0.03)	(0.05)
Diluted earnings per share	(0.03)	(0.05)

In accordance with AASB 133 'Earnings per Share', as potential ordinary shares may only result in a situation where their conversion results in an increase in loss per share or decrease in profit per share from continuing operations, no dilutive effect has been taking into account.
