NODE AND SPOKE STRATEGY

LEVERAGING THE INVITATION MODEL FOR GROWTH

For personal use only

ENDING PAIN POINTS IN BUSINESS TRANSACTIONS

CURRENT PROCESSES ARE RESOURCE HEAVY AND TIME-CONSUMING TO MANAGE

LATE PAYMENTS

Business payments are typically **11.2 days late**¹, resulting in restricted cash flow.

MANUAL PROCESSES

As many as **89 per cent** of Australian small businesses still issue paper or PDF-based invoices² when trading with business and retail businesses.

SECURITY RISK

Not only are paper-based invoices more expensive to process than e-invoices, it also leaves businesses open to error and an increased risk of fraud and cybersecurity breaches.

POOR CASH FLOW

Late payments often result in restricted cash flow for businesses, impacting their ability to pay their own bills on time, which is perpetuated throughout the entire supply chain.

BENEFITING FROM AN INTEGRATED SOLUTION

INCREASED EFFICIENCIES, FLEXIBLE PAYMENTS AND A BETTER EXPERIENCE

Automating and integrating business payment systems reduces the risk of human error and improves reconciliation and reporting accuracy. Businesses need this accuracy to meet their regular financial commitments, plan larger investments and be prepared to shift gears quickly if needed.

Reduces friction between buyers and sellers.

Improves data quality and record-keeping.

Improved data security for all parties in the transaction.

Reduces costs.

Increases cash flow.

SUPPLY CHAIN POSITIONING AND PROCUREMENT FLOW

Early Settlement Negotiation Platform

SPENDA ECOSYSTEM

At the heart of the Spenda system is a multi tenanted data exchange platform capable for sharing inter-business transactions.

In our near term development, we will release capabilities to negotiate early settlement discounts between buyers and suppliers.

Our view is the ESD needs to be either:

- Buyer originated ESD via Spenda's payables management software Spendapay
- Supplier originated ESD via Spenda's unpaid invoice management software Spendacollect

Further to this the ESD opportunity can be driven by simply processing the early settlement transaction as the merchant on record, however our view is the greatest opportunity exists when the ESD is both processed and funded.

FY21 FINANCIAL RESULTS

Revenue for the Group increased by 157%. These substantial increases were fuelled by website development services and the early-stage implementation of the Spendu products with various customers.

	FY21	FY20	Var.	Var. %
Total Revenue	877,777	341,332	536,455	157%
Average Revenue Per User	68.12	21.27	46.85	220%
Cash Receipts	1,023,406	504,263	519,143	103%
Net assets/(liabilities)	81,308,088	(2,494,271)	83,802,359	3360%

- During the year the Company raised circa \$23.8 million (net of costs) through the issue of capital and \$3.5 million was received from the exercise of listed and unlisted options.
- Operating costs (excluding impairments) have increased from the prior year, which is mainly attributable to an increase in employee related costs. During the year, the Company has bolstered its Executive and Management Team, as well as making a number of key employee appointments across sales, marketing and development as it positions itself and transitions from a pure R&D company to a revenue generative company.
- Closing cash on hand at year end was \$21.3m following the utilisation of \$4.2m for operating activities against collections of \$1m and receipt of funds from placements and exercise of options of \$27.3m (net of costs).

THE AGRI SECTOR AS AN EXAMPLE

Leveraging data to enable working capital, empowering farmers to increase their wealth and food production.

Program Insights:

Cirralto entered into a five year referral agreement with Mastercard and a separate agreement with Fresh Supply Co to enable farmers to get paid when specific milestones are met in the paddock-to-plate supply chain, removing the need to chase late payments.

Combining Trade Finance services on top of Cirralto's established B2B Payment Solutions is an important tool for B2B transactions as it reduces the risk of non-payment and improves efficiency and cash flow for both buyer and seller.

Cirralto will integrate with Mastercard through their Provenance Blockchain solution to trigger irrevocable payments on good-to-pay invoices for standard commerce and inventory sourcing under Trade Finance and payment service licensing agreements.

Strategic Value:

Solving for:

- Leveraging on Mastercard provenance blockchain-enabled supply chain financing platform for **early payment** to farmers.
- Using **operational data** from Fresh Supply Co into Mastercard provenance to help lenders for **credit decisioning**.
- Building a **Digital Profile** for the farmers creating accessibility to credit.

Production:

- Mastercard Provenance
- Early payment via commercial card
- Card-blended financing

Pipeline:

- Cross border multi roll payments

Planned:

- Broadening the partnerships targeting cross border trade flows.
- Export aggregation service.
