LCK has qualified as a signatory to the United Nations Global Compact, the world's largest corporate sustainability initiative.

Chairman's Letter

It is with great pleasure that I update the shareholders of Leigh Creek Energy, on what has been an exciting, challenging, and transformational year.

The past year has been a milestone year for the company. The Board and management of Leigh Creek Energy have used the past year to reposition the company to become the major urea fertiliser producer in Australia, focussed on domestic urea supply.

All the studies that we have conducted or commissioned have clearly shown that LCK has a unique advantage over others in the manufacturing of urea. We have our own supply of gas, we don't have to transport that gas to a production site, we can sequester CO₂, and we are in the lowest cost quartile. We are not at risk of cost escalation as our competitors are in the vagaries of gas prices, transportation costs, exchange rates, and import logistical problems where it can take up to 24 days to ship urea to Australia at a cost of approximately A\$30/t. This puts us in a unique position compared to any of our competitors.

The renaming of our flagship project, now as the Leigh Creek Urea Project (LCUP) was an important demonstration of that change in focus. The LCUP is progressing at pace. We partnered with the major Korean engineering firm DL E&C to complete the FEED and BFS studies for the project and that process is well underway. I cannot overstate how important it is for our company that we have partnered with a company such as DL E&C. They bring their vast amounts of experience and resources with them. We are rightfully proud of this partnership as it brings our capability to deliver on the LCUP to another level.

The LCUP continues to move closer to commercialisation as we progressed our Petroleum Retention Licence (PRL) to a Petroleum Production Licence (PPL). This is an amazing achievement by the company, and I wish to

thank all our hard-working staff that led to this great achievement. We are the first in Australia and indeed the Western World to be granted a production licence for ISG.

The impacts of Covid-19 continue and resulting restrictions that have been put in place have provided some interesting challenges. Despite these challenges, we have been able to continue to access global markets and have enjoyed the support of international financiers across the year to support our project and company. As the world emerges from the Covid-19 pandemic, I am sure there will be more challenges to overcome. I am certain that we have the team and structures in place to face any of these challenges head on and continue driving the project forward.

Importantly, the company has devoted significant resources into Environmental, Social and Governance (ESG). ESG used to be seen as a "nice to have" where companies either ignored it or paid lip service to its importance. To have the confidence of investors, support of our community to both obtain and keep our social licence to operate now means that ESG is a "must have" and establishes our credentials as a socially conscious responsible company.

With these ambitious goals we have been working tirelessly with industry experts to develop a carbon neutral strategy, where we have focussed on being Carbon neutral by 2022. We undertook initial studies through an independent review to confirm the potential for carbon sequestration at our flagship project to make sure all carbon produced in our processes is captured, reused or stored making it a carbon neutral emission project.

During the year we took the strategic position to diversify our business from solely being an ISG company, to entering into conventional oil and gas activities in the Cooper Basin. We are in a joint venture with Bridgeport Energy Limited and have been granted traditional petroleum and gas licences in the Cooper Basin with more activities planned in the coming year. I am confident that the company is well under way to ensure the successful execution of our diversification strategy.

Our people are our most valuable asset. During the year we have been continuously hiring new people into the company and as we are growing so quickly, I am at risk of missing someone out. I am sure I will get a chance to update you in the coming year. I am proud to say that when we claim to have a diverse range of qualifications and cultures in our company that we can freely demonstrate that this is so

We have seen great growth in the company, and we now employ more than 40 people with 8 women in a male dominated industry and this proportion is increasing. We have fully qualified Mechanical, Electrical, Civil and Chemical

Engineers, qualified Geologists, Hydrogeologists, Environmental Specialists, Lawyers, Accountants, IT specialists, Educators, Safety and People Specialists. They come from, a diverse group of Indigenous Australians, Romania, China, Hungary, South America, Kenya, New Zealand, Egypt, England, Scotland and of course non indigenous Australians. The eldest is 62 and the youngest is 21. We also have three university students and a trade trainee.

When you employ this many new staff there are always IT, technology, logistical and training challenges but all of our staff have hit the ground running and have energised the project and office with their fresh eyes and experience.

I would like to thank all our Employees, the Executive, the Board, Contractors and Suppliers of LCK who continue to work tirelessly in pursuit of our project's success and whom without their dedication and hard work our company could not succeed. Lastly for another year I thank our shareholders for their support and again, I say thank you to each of you for your ongoing commitment to our Company.

Mr Daniel Justyn Peters
Executive Chairman

Managing Director's Report

While the events of 2020 & 2021 have tested us all, I have watched the staff at LCK grow together as a Company to achieve numerous milestones. The achievements of the past financial year have not been without hurdles but to get to where we are as a Company is something that I am extremely proud of. To work with such a resilient, diligent and confident team at LCK assures me that we will rise to any hurdles that are placed in our way.

LCK continues to drive our Environmental Social Governance (ESG) program across all sections of the business. We commenced this program in 2018, its aim was to form a team who would build a strong ethically driven culture that would leave a positive legacy for generations to come. Through the team we have successfully embedded the ESG philosophy into our everyday practices. The achievements of the last 12 months reflect our commitment across our ESG program. The safety of our people remains paramount with a strong focus on Health, Safety & Wellbeing, Our People, Our Communities, Environmental, Governance and Integrity.

Looking back on the past six years since listing, there have been any number of milestones and achievements - the successful conduct of the Pre-Commercial Demonstration and the achievement of reserves classification are just two examples.

However, as I do look back there is one company changing achievement - that was the granting of the Petroleum Production Licence. Everything that came before was leading to this point. It is the final government licence and the independent validation of our commercial assessment.

It has proven to be a watershed moment. Until that point, we were endeavouring to prove the safety, operability and commerciality of our ISG process. That is now behind us and has allowed us to move forward at a rapid pace.

We have now announced the spectacular results of our prefeasibility study. We have progressed to completing the Engineering Procurement Construction Management contract for our upstream operations and followed this with the Final Investment Decision. Subsequent to year end we purchased the first long lead time items - generators to be delivered in the New Year.

The signing of the DL E&C EPC contract was also clearly facilitated by the achievement of the PPL. This is a major step forward. Engaging an EPC contractor of such size and experience reduces our execution risk on building the urea plant. The plant for which we have now engaged NexantECA to complete the final Bankable Feasibility Study due this year.

Whilst all this was being driven forward, we did not drop the ball on sustainability. We have now brought forward our voluntary Carbon Neutral target to 2022 supported by a final positive feasibility study report on our carbon capture and storage plans.

This is no small target and will be a key achievement when we reach this goal.

We will achieve this by employing a carbon management plan centred on carbon capture and storage, carbon farming and revegetation offsets. These plans are already in progress as outlined in our recent announcement on the completion of the positive feasibility study for the underground storage capability.

This is a company priority, of which I am proud and confident that we will reach our carbon neutral goal in 2022.

Some of the enablers for our carbon neutral goal were, becoming a signatory to the United Nations, Global Compact (UNGC) registering with Climate Active and committing to releasing our results through the Taskforce on Climate-Related Financial Disclosures to achieve Climate Active accreditation.

Awarded 2021

PPL

LCK
LEIGH CREEK ENERGY
Growing our future

lcke.com.au

Leigh Creek Urea Project (LCUP)

Leigh Creek Energy (LCK) is an ASX listed company focussed on developing its Leigh Creek Urea Project (LCUP), located 550km north of Adelaide in the state of South Australia. The project is located on Petroleum Exploration Licence 650 (PEL 650) and Petroleum Production Licence 269 (PPL 269), which covers an area of 93 km² over the Leigh Creek Coalfield, and Gas Storage Exploration Licence (GSEL) 662 which covers the same area.

The Leigh Creek Coalfield was identified as a highly favourable location for In-Situ Gasification (ISG) development using criteria that covered geological, environmental, technical and commercial aspects.

The coal resource is technically suitable for ISG, it is well serviced by local infrastructure and most importantly, the site is suitable for undertaking ISG in a manner that is safe and minimises environmental impact.

Other favourable factors that influenced the location of the Leigh Creek Urea Project include:

- high quality existing infrastructure (road, rail, water and power)
- nearby service centre at Leigh Creek township
- strong local community and support potential workforce
- extensive information base for the Leigh Creek Coalfield
- existing disturbed mine site (minimising disturbance footprint)
- distant from environmental and cultural sensitive areas.

The ISG process converts coal from its solid state into a gaseous form, resulting in the production of synthesis gas (syngas) containing methane, hydrogen and carbon monoxide. The syngas can be processed into hydrogen, ammonia or urea.

LCK's pathway to development of the LCUP is entering the third and final stage, the commercial stage. The first two stages have been completed.

Characterisation Phase - Completed

Investigate cultural, environmental, geological, geotechnical, hydrogeological and social characteristics of the site.

Demonstration Phase - Completed

A Pre-Commercial Demonstration Facility (PCD) demonstrated ISG at the Telford Basin of the Leigh Creek Coalfield. The series of controlled tests provided environmental and gas quality data to inform regulators and stakeholders that the process can be managed safely with minimal impact to the environment. The findings have helped to determine the Commercial Project design and feasibility study direction.

Commercial Phase - In Progress

Conduct engineering and feasibility studies to support Demonstration Phase data for the deployment of a commercial operation. LCK's chosen option is the development of a large-scale urea fertiliser plant.

LCK is committed to developing the LCUP using a best practice approach to mitigate the environmental, social, technical and financial project risks.

The information from the PCD is being used in LCK's feasibility studies for the commercial phase of the project.

Leigh Creek Urea Project (LCUP)

The future of fertiliser

2 Million tonnes Urea annual demand

95% Imported*

Benefits

 Carbon Neutral	 Domestic production	 Competitive price	 Australian jobs
---	--	--	--

Target markets for LCUP urea are domestic users, plus international fertiliser traders and distributors

The LCUP has access to gas feedstock and rail, road, airport infrastructure for urea, once produced

Ports accessible from Leigh Creek are central to the main Australian urea markets

It's cheaper, faster and less risky for distributors to buy LCK urea for sale to Australian farmers than to ship it from the Middle East or Asia

The LCUP PFS indicated a nominal operating cost of A\$109 per tonne ex-plant compared with the spot price of A\$480¹ per tonne (February 2021)

LCUP has strong project economics with an

- NPV of \$3.4 billion
- IRR of 30% A\$1.5 billion funding in place

Manageable technical risk, large resource base and globally low cost of production. World class partner in DL E&C

Providing jobs and regional support for the communities in the areas we operate

ESG – Our Shared Approach

In 2018 LCK commenced its ESG program, its aim was to form a team who would build a strong ethically driven culture that would leave a positive legacy for generations to come. Our initial focus was to build a strong team that would embed the ESG philosophy into their everyday practices. The following sections will provide an insight into how the team has worked together to make this entrenched in our working framework and how they continue to reach for excellence during our commercial journey.

Key Achievements

LCK was proud to become a signatory to the United Nations Global Compact (UNGC) and has committed to set strong targets in each of the principled areas.

- *LCK has been accepted as a signatory to the United Nations Global Compact*
- *LCK's commitment to the Compact aligns strongly with LCK's Environmental, Social and Governance (ESG) strategy*

Noreen Byrne, General Manager – Sustainability and People attending the UNGC conference.

Environmental

LCK has a strong environmental record that we are proud of, and we continue to seek to manage our impact on the environment, use resources efficiently and leave positive rehabilitation in the areas where we operate.

Achievements

Voluntary Commitment to be carbon neutral by 2022
by choice, eight years earlier than planned.

Carbon Capture and Undergraound Storage Plan

- ✔ Completion of independent study on the Geology and Engineering for CCUS is technically proven
- ✔ Low emission design for commercial project commenced

Macro and Micro 'Going Green Initiatives'

- ✔ Registered with Climate Active
- ✔ Regeneration of the areas we work within
- ✔ Work with regions to develop arid lands

Carbon Neutral Urea Production

Sustainability delivered

For personal use only

Social

Our company’s foundation is built on our values and our behaviours this is what distinguishes us and guides our actions. We conduct our business in a socially responsible and ethical manner. We respect the law, support universal human rights, protect the environment and will continue to benefit the communities where we work.

Health, safety & wellbeing

We continue to strive to protect the health, safety and wellbeing of our people through looking at programs that focus on the whole person, mental and physical self in the workplace.

Outstanding safety record,

2020 – 2021 Safety Statistics:

- ✔ Zero fatalities
- ✔ Lost time injury frequency rate (LTIFR) = 0
- ✔ Total recordable injury frequency rate (TRIFR) = 0

Staff mental health initiatives

- ✔ Promotion and awareness of positive mental health initiatives for individuals across our workplace especially for those who have been in lockdown interstate.
- ✔ Continued training of Mental Health Officers within the company.
- ✔ Proud supporter of the Black Dog Institute who is a medical research institute and not-for-profit organisation, which is working to prevent suicide and improve mental health outcomes through science, compassion, and action.

Our Communities

We respect human rights, engage meaningfully with stakeholders and look to make a positive difference to the communities where we operate whilst minimising and managing potential impacts.

We achieved this through:

Maintaining positive, enduring stakeholder relationships

- ✔ Sponsorship of local and indigenous programs
- ✔ Promoted and donated to local and national charities
- ✔ Development of traineeship program to continually develop in house regional skills

Community education and sponsorship programs

- ✔ Awarded an engineering scholarship through Unihub, regional educational initiative program
- ✔ Implemented traineeship program for site based personnel

For personal use only

Sponsorship highlights

At Leigh Creek Energy (LCK) we believe that our strong company values not only together as a team, but also as individuals reflects on how together we are all taking small steps towards “Growing our Future”. We believe that by working together as a team we can make small differences which in the long run will make big changes.

This year LCK and its employees made a positive and solid contribution to communities in South Australia and beyond through fundraising, donations and sponsoring.

- Black Dog Institute - \$10,000 donation
- Royal Flying Doctors Service
- 500 Miles of Music
- Inclusive Team CBFC
- Copley and District Gymkhana
- Step it up to breast cancer
- Food Bank
- Leni Newham
- Movember - raising awareness for cancer
- Smith Family
- Flinders Indigenous Cricket Team
- Leigh Creek & Copley Christmas BBQ
- Share the dignity
- Dr Clive Hume
- Helping hand fund
- Copley Cricket Club

500 Miles of Music

LCK was a proud sponsor of the Leigh Creek leg of the 500 Miles of Music festival. While it was a chilly night staff braced the cold under the sparkling stars to witness some great Australian country talent.

As with all events the festival was faced with challenges as the brilliant line up of artist could not attend due to last minute boarder closures. This did not stop the show going ahead. Management managed to gather some amazing acts.

This is one country festival that should not be missed. It brings communities from far and wide together. It’s great to see that a community spirit still lives on in these difficult times.

RFDS “Wings for Life” Gala - Club Cabaret

This year saw LCK staff members frock up, put on their black ties, and polish their shoes to attend the Royal Flying Doctors Service (RFDS) Gala along with 900 other guests at the Entertainment Centre.

Being our first year that we attended we did not know what to expect, and we were not disappointed at all. There was lots of glitz, glamour, and feather boas but behind all this there was one clear message for the night – to raise much needed funds for the RFDS. The auctions, lucky dips and wine wall all proved to be a big hit for the night with a whopping \$300k raised.

Despite Covid, myself and other staff members were still able to attend some events which LCK proudly sponsor. It is a great feeling knowing that the company you work for, and your fellow work mates give so generously to communities, organisations and charities that we know will benefit from this for years to come.

Tammie Salvemini – Sponsorship Coordinator

Leigh Creek Energy social / Sponsorship

Governance

We conduct our business by adhering to the highest standards of corporate governance whilst acting with integrity by being transparent and honouring our commitments.

Current & Future Achievements

Abide by United Nations Global Compact Standards

- ✔ We have aligned our policies, procedures and governance frameworks with the Ten Principles.
- ✔ Mandatory reporting obligations have commenced and will be submitted on an annual basis.

Continue Strict Regulatory Compliance

- ✔ Annual Compliance training
- ✔ Reporting against the ASX Corporate Governance Principles and Recommendations

Develop Sustainable Reporting

Voluntary Reporting Through

- ✔ Supporter of task Force on Climate-related Financial Disclosures (TCFD)
- ✔ Voluntarily committed to releasing auditable climate-related financial disclosure

Development of ethical supply chains

- ✔ Embedded an Inclusion & Diversity leadership team to lead I&D program
- ✔ Modern Slavery Policy implemented and program delivered

Leadership our way

A strong focus for the leadership group was in the area of developing Great Managers and with that the following was critical in our dialogue with the wider teams.

Sexual Harassment, Domestic Violence, Mental Health,

Education session was delivered to the Board and all staff on developing a better perspective on:

- ✔ Sexual harassment training in the workplace,
- ✔ The impact of domestic violence in the society and how it may impact our workers and the broader community
- ✔ Mental health strategies.

Diversified Oil & Gas Activities

In addition to our flagship Leigh Creek Energy Project, the Company has diversified its portfolio into other oil & gas activities, focusing on operations in the Cooper Basin. The Cooper Basin was selected as it provides us with a low cost of entry, low risk and near-term revenue, and a favourable and stable regulator in the South Australian and Queensland governments.

The first year of activity was completed as per the Farm-in Agreement with Bridgeport Energy (QLD) Pty Limited as operator of ATP 2023 and ATP 2024. It included Geological and Geophysical studies with the reprocessing of 147 2D seismic lines. The geophysical interpretation is fundamental to future 3D seismic planning, which is the primary tool in exploration well placement.

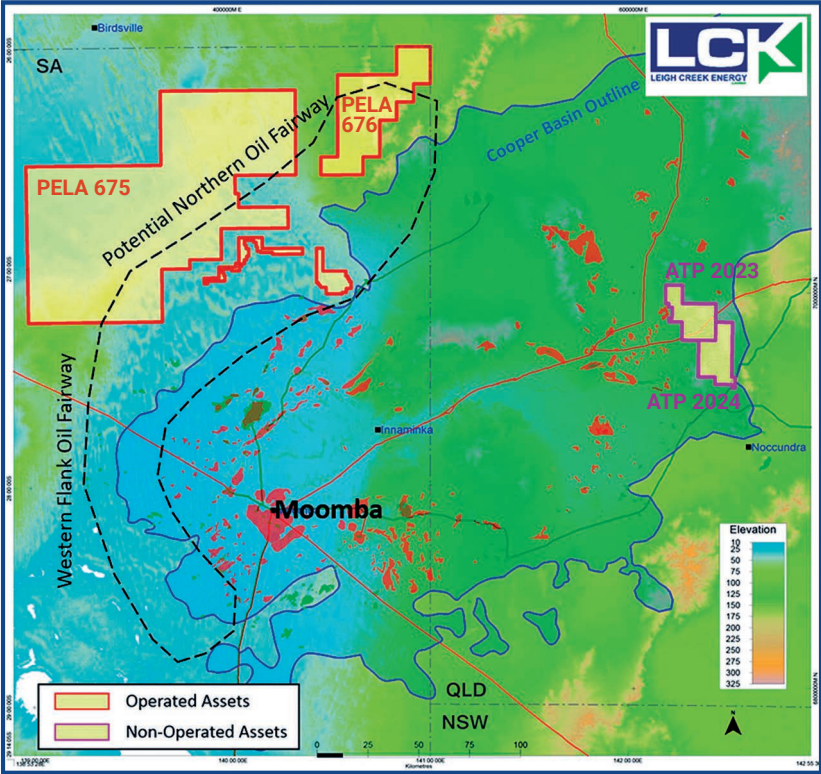

In parallel, work related to Native Title continued throughout the year on PELA 675 and 676. We expect the PELAs to be granted as PELs during 2022 and begin the first Permit year activities, including Geological and Geophysical studies.

PELA 675 and PELA 676 are both proximal to historic hydrocarbon discoveries. Both contain 2D seismic, and the 3D seismic in the southern part of PELA 676 has been used to identify leads in the potential Northern Oil Fairway.

Once we have identified drillable prospects, we will be looking to farm down a portion of the SA permits.

Petroleum Production Licence 269	100%	24 November 2020	Leigh Creek, SA
Gas Storage Exploration Licence 662	100%	5 February 2016	Leigh Creek, SA
Authority to Prospect 2023	0%	8 April 2020	Cooper Basin, SA
Authority to Prospect 2024	0%	8 April 2020	Cooper Basin, SA

In the last 12 month period, LCK has successfully applied for, and been granted, a portion of PEL 650 to be converted into a Petroleum Production Licence (PPL 269) within the Leigh Creek Project area, to progress the work program for the Leigh Creek Project. LCK was also successful for 2 PELA's within the South Australian Cooper Basin following acreage release (PELA 675 and PELA 676).

LCK also entered into a farm-in agreement to look for conventional oil and gas targets in Queensland (ATP 2023 and ATP 2024).

PEL 650 ISG suitable Coal Resource Analysis

Coal and Gas Resources

The Company's total Coal Resource and equivalent Syngas Reserves/Resource as at 30 June 2020, reported in accordance with 2012 Edition of the Australasian Code for Reporting of Exploration Results, Mineral Resources and Ore Reserves (JORC Code) guidelines and the 2018 Society of Petroleum Engineers (SPE) Petroleum Resources Management System (PRMS) guidelines (respectively), remain unchanged since 2019. With the successful conversion of a portion of PEL 650 to PPL 269, the total Coal Resources and total Syngas Reserves/Resources are now divided between PEL 650 and PPL 269. This has not changed the total Resources/Reserves and these are outlined below:

Tenement	Location	Coal Resource Category	Coal Resources (Mt) 2020	Coal Resources (Mt) 2021	Syngas Resource Classification	Syngas Energy (PJ) 2020	Syngas Energy (PJ) 2021

Mineral Resource and Syngas Resource Governance and Disclosures

Mineral Resources estimated in accordance with the requirements of the JORC Code, by qualified competent persons who are consultants to Leigh Creek Energy.

Syngas Resources are estimated in accordance with the requirements of the Petroleum Resources Management System (PRMS) approved by the Society of Petroleum Engineers, by a qualified petroleum reserves and resources evaluator who is a consultant to Leigh Creek Energy.

The Minerals Resources in the 2021 Annual Report is compiled and reviewed by a qualified competent person, as detailed below. The Syngas Resource Statement in the 2021 Annual Report is reviewed by a qualified consultant, who is a qualified petroleum reserves and resource evaluator.

Notes on Coal Resources: For the purposes of ASX Listing Rule 5.23, Leigh Creek Energy confirms that it is not aware of any new information or data that materially affects the information included in the 18 March 2019 Resources Statement and that all material assumptions and technical parameters underpinning the estimates in the Resources Statement continue to apply and have not materially changed.

The coal resources reported herein, insofar as they relate to mineralisation, are based on information compiled from the 18 March 2019 Resource Statement, by Mr John Centofanti. Mr Centofanti is a competent

person and a member of the Australasian Institute of Mining and Metallurgy (AusIMM). Mr Centofanti is a full-time employee of Leigh Creek Energy and has 17 years' relevant experience in coal, which includes 7 years' experience as a competent person for estimating and reporting coal resources. Mr Centofanti consents to the inclusion in the report, of coal resource estimates, based on his compiled information in the form and context in which it appears.

The coal resource is based on, and fairly represents, information and supporting documentation prepared for the 18 March 2019 Resources Statement, which was estimated by Warwick Smyth & Lynne Banwell of GeoConsult Pty Ltd. Mr Smyth is a Member of the Australasian Institute of Mining and Metallurgy and the Australian Institute of Geoscientists, who has more than 25 years' experience in the field of activity being reported. Lynne Banwell is a member of the Australasian Institute of Mining and Metallurgy and the Geological Society of Australia and has over 30 years' experience in this style of mineralisation. Both Mr Smyth and Mrs Banwell have sufficient experience which is relevant to the style of mineralisation and type of deposit under consideration and to the activity they are undertaking to qualify as a Competent Person as defined in the 2012 Edition of the "Australasian Code for Reporting Exploration Results, Mineral Resources and Ore Reserves".

Notes of Gas Resources: For the purposes of ASX Listing Rule 5.43, Leigh Creek Energy confirms that it is not aware of any new information or data that materially affects the information included in the 29 March 2019 PRMS ISG Gas Reserve and Resources Certification and that all material assumptions and technical parameters underpinning the estimates in the PRMS certification continue to apply and have not materially changed.

The Gas Resource estimates stated herein are based on, and fairly represent, information and supporting documentation prepared by Timothy Hower of Sproule International, Denver USA. Mr Hower is a member of the Society of Petroleum Engineers and has consented to the use of the Resource estimates and supporting information contained herein in the form and context in which it appears. All estimates are based on the deterministic method for estimation of petroleum resources.

Directors' Report

Leigh Creek Energy Limited is a public company incorporated and domiciled in Australia and listed on the Australian Securities Exchange.

The directors present their report together with the financial statements of the consolidated entity, being Leigh Creek Energy Limited ("the Company" or "Leigh Creek Energy" or "LCK") and its controlled entities ("the Group") for the year ended 30 June 2021.

Directors

The names of the directors in office at any time during or since the end of the year are:

Director	<i>Appointed</i>
Daniel Justyn Peters	(28 November 2014)
Zheng Xiaojiang	(5 December 2017)
Zhe Wang	(1 July 2017)
Phillip Staveley	(5 December 2017)
Murray Chatfield	(30 June 2016)
Gregory English	(22 September 2015, resigned 22 June 2021)

Directors have been in office since the start of the financial year to the date of this report unless otherwise stated.

Information on continuing directors

Daniel Justyn Peters

LLB, BA (Politics/Jurisprudence) GDLP

Executive Chairman

Audit and Risk Committee Member

Director since 2014

Experience & expertise

■ Mr Peters joined Linc Energy soon after its listing on the ASX when Linc Energy was considered a world leader in underground coal gasification. In his six years at Linc Energy, Mr Peters held the positions of General Manager Environment and Government Relations, General Manager Business Development, Executive General Manager North Asia and finished as Executive General Manager of Investor Relations.

Before joining Linc Energy, Mr Peters was employed as National Property and Environment Manager and head of North Asia for Airservices Australia. Before his time with Airservices Australia, Mr Peters was used at the Queensland Environmental Protection Authority (EPA) as head of Investigations and Compliance and as acting Director of Central and Northern Regions. He managed the integration of the environmental regulation of the Queensland Mining Industry into the EPA. His experience across a broad range of business units from government and private sectors will prove invaluable in developing the Leigh Creek Urea Project.

Other current listed directorships

■ None

Previous listed directorships (last three years)

■ Emperor Energy Ltd – resigned 27 March 2019

Managing Director*Director since 2017***Experience & expertise**

■ Mr Staveley is a qualified Accountant who has 30 years' experience working in the resources sector.

He started his career in the oil and gas sector, working for Schlumberger in London, followed by several years with SAGASCO and SAOG (South Australian Oil and Gas Company). He spent almost ten years with Normandy Mining Ltd, fulfilling many planning, finance, M&A and commercial roles, including establishing a Group Supply Function and three years based in Rio de Janeiro as the CFO of TVX Normandy Americas.

Since 1998 he has been involved in mining and contracting companies in the position of CFO and, more latterly, CEO roles with an emphasis on strategy and corporate finance.

Gregory D English LLB, B.Eng (Mining)

Non-Executive Director

Audit and Risk Committee Member

Director since 2015, resigned 22 June 2021

Experience & expertise

Mr English is an experienced and qualified mining engineer and lawyer with over 25 years of involvement in the resources industry. As a mining engineer, he has worked on underground and open-pit coal mines, including working as a mining engineer at the Leigh Creek Coalfield, where he lived in the Leigh Creek town. As a lawyer, Greg has acted for numerous oil and gas companies and advised on multiple gas marketing, gas transportation and similar transactions.

Greg’s experience in the coal industry, particularly his knowledge of the Leigh Creek Coalfield, and his experience and contacts in the oil and gas industry have been significant assets to the Company.

Jordan Mehrtens LLB/LP, BCom (Fin), GDip (Planning)

Company Secretary

Secretary since 2015

Experience & expertise

Jordan Mehrtens is a qualified lawyer and has qualifications in finance and urban and regional planning. Since its commencement in 2015, she has worked with Leigh Creek Energy, providing regulatory, compliance, and other analytical advice. Jordan is a member of the Governance Institute of Australia and performs the secretarial role in the Company.

Damien Connor is a Chartered Accountant, Graduate of AICD and a member of the Governance Institute of Australia. Damien was appointed joint Company Secretary on April 14 2020, to assist whilst Jordan was on leave until August 2020.

Principal activities

The principal activity of the Group was advancing the development of its Leigh Creek Urea Project (LCUP) and developing conventional oil and gas projects.

Review of operations and financial results

Leigh Creek Urea Project:

The Company continued its progress towards full regulatory approval following the successful operation and decommissioning of the Pre-Commercial Demonstration Facility (PCD) at the LCUP last year.

The Company received the following approvals during the year from the Department for Energy and Mining:

- A Petroleum Production Licence (PPL 269) over part of PEL 650

The Company was also awarded two South Australia Cooper Basin Petroleum Exploration Licence Applications (PELA 675 & PELA 676) in July 2020.

The Company completed and published the Pre-Feasibility Study in November 2020, confirming the positive project economics for developing a urea manufacturing facility at Leigh Creek.

In January 2021, the Company awarded two major commercial contracts. The first was to inGauge Energy Pty Ltd to manage drilling services to develop initial gasification wells to provide the feedstock syngas for a 5MW power plant. The second was awarded to Prudentia Process Consulting Pty Ltd, to manage the selection, engineering, construction, and commissioning of the 5MW gas-fired power plant.

In March 2021, the Board of Directors made the Final Investment Decision (FID) for Stage 1 commercial of the Leigh Creek Urea Project, a 5MW power station.

In May 2021, the Company announced it had entered into a binding head of agreement with DL & EC Co., Ltd (Daelim) for Daelim to lead engineering and construction of ammonia and urea production infrastructure for the LCUP.

In June 2021, the Company awarded the Contract to Daelim. Daelim will manage the LCUP Bankable Feasibility Study (BFS), and Front-End Engineering & Design (FEED) stages ahead of the Final Investment Decision. Once the Final Investment Decision is achieved and all relevant key engineering data and project execution documents are finalised with LCK, Daelim will perform the engineering, procurement, construction and commissioning of the urea production facilities. In addition, Daelim has

secured the support of a major Korean financial institution to fund 70% of the project, being approximately \$1.5b. This is via a letter of support by that institution that is subject to the agreement of commercial terms and a positive FID. The balance of that funding is to be secured by a combination of debt and equity to other parties once FID is reached.

Finance and Corporate:

The consolidated operating loss of the financial year to 30 June 2021 was \$13,574,173 (2020: \$7,154,941). This includes share-based payments expenses of \$4,206,504 (2020: \$1,472,187). Expenditure incurred on the LCUP capitalised as Exploration expenditure, net of 2020/21 R&D tax offset rebates receivable was \$3,602,336 (2020: \$2,195,144).

In December 2020, the Company qualified as a signatory to the United Nations Global Compact after demonstrating and fulfilling the eligibility criteria for human rights, labour, environment, and anti-corruption required for businesses to partake in the world's largest corporate sustainability initiative.

In January 2021, the Company announced it had entered into an Institutional Share Placement agreement with Energy Exploration Capital Partners, LLC (EECP). The financing agreement consists of phased payments of up to \$18m in \$6m tranches. The initial tranche of \$6m was received in January 2021 on the execution of the funding agreement. The Company will determine whether to exercise the Second Investment or the Third Investment, or both, at its sole discretion. LCK issued 4,029,851 shares in satisfaction of a fee payable to the Investor and issued 9.8m options exercisable at \$0.236 (representing a 140% premium over the prevailing market price) to the Investor. The Company made an initial issuance of 6.75m Placement Shares to the Investor at the time of execution of the agreement, towards the ultimate number of Placement Shares to be issued. Alternatively, in lieu of applying these shares towards the aggregate number of the Placement Shares to be issued by LCK, the Investor may make a further payment to the Company equal to the value of these shares determined using the Purchase Price at the time of the payment. The Investor elected to purchase these 6.75m shares in May 2021.

In June 2021, the Company conducted an institutional placement for \$18m before fees, with Evolution Capital Advisors acting as lead manager. The placement shares were issued at \$0.18 per share with an attaching unlisted option exercisable at \$0.28 within the next three years. Issue of the options will require shareholder approval. The placement price represents a 20% discount to the last trading price of \$0.225 prior to the placement

and a 21.6% discount to the 5 day VWAP. Evolution Capital Advisors Pty Ltd ('Evolution') acted as Lead Manager to the Placement. Evolution received a 6% fee on funds raised and will receive 10,000,000 options exercisable at \$0.28 expiring in three years, subject to shareholder approval.

Environment

LCK's activities are subject to state, national and international environmental laws, and regulations. Exploration, development, and production can be potentially environmentally hazardous giving rise to substantial costs for environmental rehabilitation, damage control and losses. LCK has a comprehensive approach to the management of risks associated with environment under its ESG policies which are embedded as a core part of LCK's approach to health, safety, environment, and community. This approach includes standards for asset reliability and integrity, technical and operational competency, and emergency response preparedness. The Board actively monitors compliance with Regulations and operational obligations and at the date of this report is not aware of any material breaches in respect of these Regulations and obligations. No notification of any breach of any environmental regulation has been received regarding any of the Company's exploration activities during the year.

LCK commissioned an independent study by inGauge Energy that examined and confirmed the suitability of the Leigh Creek site for carbon capture and storage (CCS). As a result, we are confident we can reach our target of carbon neutrality through a combination of the usage of CO₂ and sequestration. The urea production process will use approximately 75% of the CO₂ generated at site, and the balance of CO₂ can be dealt with by CCS. Further information regarding the Company's management of Climate Change risk can be seen in the Summary of Major Risk Groups table below.

Risk Management

The Company manages risks in accordance with its risk management policy with the objective of ensuring risks inherent in its activities are identified, measured and then managed to an acceptable level. The Executive Leadership Team perform risk assessments on a regular basis, and a summary is reported to the Audit and Risk Committee.

COVID-19 LCK responded to the COVID-19 pandemic in line with its focus on the safety and welfare of its employees and their families, together with that of contractors, communities where we operate. The COVID-19 pandemic is not considered as being among the Company's key corporate risks. However, it has affected the business indirectly through the impact on supply chains and restrictions on travel.

A summary of other key risks is contained in the below table.

Risk Description

Regulatory Leigh Creek Energy operates in a highly regulated environment and complies with regulatory requirements. There is a risk that regulatory approvals are withheld, take longer than expected, or unforeseen circumstances arise where requirements may not be adequately addressed in the eyes of the regulator, and costs may be incurred to remediate non-compliance and/or obtain approval(s). Changes in personnel, Government, monetary, taxation and other laws in Australia or internationally may impact the Company's operations.

Exploration Exploration is a speculative activity with associated risk to discovery. LCK utilises established methodologies and experienced personnel to evaluate prospects and manage the risk associated with exploration. The Company also ensures all major exploration decisions are subjected to assurance reviews, including external experts and contractors where appropriate.

Reserves Oil and gas reserves are expressions of judgement based on knowledge, experience, and industry practice. These estimates may alter significantly or become uncertain when new information becomes available and/or there are material changes of circumstances that may result in LCK altering its plans, which could positively or negatively affect LCK's operations. Reserves and Contingent Resources estimation is consistent with the definitions and guidelines in the Society of Petroleum Engineers (SPE) 2018 Petroleum Resources Management System (PRMS). The assessment of Reserves and Contingent Resources may also undergo independent review.

Operating There are several risks associated with operating. The occurrence of any event associated with these risks could result in substantial losses to the Company that may have a material adverse effect on the business

of LCK, results of operations and financial condition. To the extent that it is reasonable, LCK mitigates the risk of loss associated with operating events through insurance contracts. LCK operates with a comprehensive range of operating and risk management plans to ensure safe and sustainable operations.

Funding LCK must undertake significant capital expenditures to conduct its development appraisal and exploration activities. Limitations on the access to adequate funding could have a material adverse effect on the business, results from operations, financial conditions, and prospects. LCK's business and development of our large-scale project rely on access to debt and equity funding. There can be no assurance that sufficient debt or equity funding will be available on acceptable terms or at all. LCK endeavours to ensure the best source of funding is obtained to maximise shareholder value, having regard to prudent risk management supported by economic and commercial analysis of all business undertakings.

Community and Social LCK operates in regions with residential, environmental, cultural, and economic significance to local and national communities. Loss of confidence in the Company, in its ability to operate responsibly or opposition to its activities generally within these communities may adversely affect community sentiment towards LCK and impact its capacity to execute its plans. LCK conducts a community engagement programme at multiple levels and forms. The purpose of this programme is to build and maintain awareness, understanding and support of the Company, its operations and plans in the local regions. It serves to build long term positive relationships with local communities together with awareness of the economic benefits to the community and the nation generally.

For personal use only

Elements of the program include:

- sponsorship and donations made to local community organisations.
- engagement and briefing with local office holders and elected representatives of local, state, and federal government.
- engagement with local community groups via town hall meetings and community information sessions, and
- engagement with local media, including the use of social media.

Climate change

LCK recognises that direct physical and indirect non-physical impacts of climate change may affect our operations and the markets into which we operate and intend to operate. Potential risks include those arising from increased severe weather events; longer-term changes in climate patterns; and increased frequency and severity, of bushfires.

Indirect risks arise from a variety of legal, policy, technology, and market responses to the challenges that climate change poses as society transitions to a lower emissions future. These risks may impact the demand for and competitiveness of the Company's products and the Company's appeal as an investment, employer, and community member.

Assessment and response to these risks is undertaken on three fronts:

- 1) understanding, managing, and mitigating the risks presented by direct physical impacts
- 2) understanding, managing, and mitigating the impact of climate change and emissions policy on the demand for the Company's products ("market risk")
- 3) identification of means by which the Company can reduce its direct emissions and lessen its overall emissions impact.

In respect of market risk, the Company's integrated manufacturing investment strategy to produce urea from its gas assets, means its gas assets possess a low exposure to the possibility of demand loss from climate change.

A favourable market for sale of the Company's gas reserves and resources has been confirmed through a Pre-Feasibility Study and is expected to continue given demand and supply forecasts for its chosen market.

LCK syngas production is viewed as a key element supporting society's sustainable energy transition to produce nitrogen-based fertiliser such as urea. With forecasts showing an increasing global demand for urea over the medium to long term.

The focus of the Company's strategy on carbon neutrality via gas sequestration and capture techniques is expected to lessen the risk of possible community or regulatory demand loss for the Companies products.

The Company recently announced its plan for carbon neutrality commencing 2022 as follows:

Year 1: 5MW construction will be carbon neutral through a combination of renewables, purchased offsets and carbon farming programs.

Year 2: FEED, FID and BFS will be carbon neutral through a combination of renewables, purchased offset and carbon farming programs.

Year 2-4: Development, construction and production operations will enable carbon neutrality through renewables, carbon farming and initiating the carbon capture and storage processes (CCUS) programs.

Year 4+: Utilisation of 75% of CO₂ in urea production, the remainder through CCUS.

Dividends

The Directors do not recommend the payment of a dividend, and no amount has been paid or declared since the end of the previous financial year.

Significant changes in state of affairs

No significant change in the state of affairs of the Group occurred during the financial year, other than as already referred to in this report.

Likely developments, prospects and business strategies

The Company continues to progress with its commercialisation plans and is in negotiation with several strategic partners.

After reporting date events

On 21 July 2021, the Company entered into a contract with Drivetrain Australia to purchase four Siemens power generators. These are long lead time items required for the commercial development of the LCUP project.

On 28 July 2021, the Board resolved to issue up to 5,000,000 employee options under the terms of the ESOP to eligible staff as part of an annual reward and recognition process. On 19 August 2021, 4,520,000 of these options were issued.

On 2 August 2021, the Company issued a formal Notice to Proceed to Daelim under its Engineering, Procurement, Construction and Commissioning Contract. Under the terms of the Contract, subsequent to the issue of this Notice, the Company is liable to pay Daelim USD 8,779,500 by 30 September 2021.

Meetings of Directors

During the financial year, the number of meetings held at which a director was eligible to attend and the number attended by each director was:

Director	Board meetings		Audit & Risk Committee	
	Meetings held	Meetings attended	Meetings held	Meetings attended
D J Peters	13	13	5	5
P J Staveley	13	13	-	-
G D English ¹	11	10	5	5
M K Chatfield	13	13	5	5
Z Wang	13	13	-	-
Z Xiaojiang	13	13	-	-

⁽¹⁾ Mr English resigned on 22 June 2021.

Unissued shares under options

Unissued ordinary shares of Leigh Creek Energy Limited under option at the date of this report are:

Grant date	Date of expiry	Exercise price	No. under Option
4 October 2016	10 October 2021	\$0.35	2,000,000
4 October 2016	10 October 2021	\$0.45	2,000,000
16 July 2018	16 July 2022	\$0.25	5,790,000
18 April 2018	17 April 2023	\$0.35	5,000,000
4 July 2018	3 July 2022	\$0.25	5,000,000
1 November 2018	31 October 2021	\$0.20	1,500,000
1 November 2018	31 October 2021	\$0.22	1,500,000
1 November 2018	31 October 2021	\$0.24	1,500,000
1 November 2018	31 October 2021	\$0.26	1,500,000
17 December 2019	12 December 2023	\$0.23	7,600,000
17 March 2020	16 March 2023	\$0.14	5,494,505
17 March 2020	16 March 2023	\$0.18	5,494,505
19 August 2020	18 August 2024	\$0.12	6,650,000
4 November 2020	15 April 2024	\$0.00	799,165
15 January 2021	14 January 2024	\$0.23	9,800,000
15 January 2021	14 January 2024	\$0.23	800,000
21 June 2021	15 June 2026	\$0.00	25,615
1 July 2021	28 June 2026	\$0.00	2,000,000
19 August 2021	17 August 2026	\$0.00	4,520,000
Total			68,973,790

Options forfeited and expired during the period up to and including the date of this report include 800,000 and 12,423,500 options, respectively. Options granted and still on issue during the period and up to and including the date of this report to include 13,995,615, all with different expiry dates listed below. This excludes any options that were forfeited, expired, or exercised during the year and to the date of this report.

Additionally, at the Extraordinary General Meeting on the 12th of August 2021, shareholders approved the issue of 100,000,000 options attaching to the 100,000,000 placement shares issued in the \$18m Evolution Capital Advisors capital raise in June 2021. Shareholders also approved the issue of 10,000,000 options to Evolution as part of their fee for acting as Lead Manager of the Placement. The Prospectus offer for the combined 110,000,000 options was made on the 31st of August 2021.

During the year ended 30 June 2021, and to the date of this report, 25,367,517 shares of Leigh Creek Energy Limited were issued on the exercise of options.

None of the options on issue entitles the holders to participate, by virtue of the options, in any dividend or share issue of the Company.

Indemnities given to, and insurance premiums paid for, officers

During the year, the company paid a premium to insure officers of the Group. The officers of the Group covered by the insurance policy include all Directors. The liabilities insured are legal costs that may be incurred in defending civil or criminal proceedings that may be brought against the officers in their capacity as officers of the Group, and any other payments arising from liabilities incurred by the officers in connection with such proceedings, other than where such liabilities arise out of conduct involving a willful breach of duty by the officers or the improper use by the officers of their position or of information to gain advantage for themselves or someone else to cause detriment to the Group.

Details of the premium paid in respect of insurance policies are not disclosed as such disclosure is prohibited under the terms of the contract.

The Group has not otherwise, during or since the end of the financial year, except to the extent permitted by law, indemnified or agreed to indemnify any current or former officer of the Group against a liability incurred as such by an officer.

Indemnity of auditors

The Group has agreed to indemnify its auditors, Grant Thornton Audit Pty Ltd, to the extent permitted by law, against any claim by a third party arising from the Group's breach of its agreement. The indemnity requires the Group to meet the full amount of any such liabilities including a reasonable amount of legal costs.

Auditor's independence declaration

The Auditor's Independence Declaration for the year ended 30 June 2021 can be found on page 40 and forms part of the Directors' Report.

Proceedings on behalf of the Company

No person has applied to the Court under section 237 of the Corporations Act 2001 for leave to bring proceedings on behalf of the Company, or to intervene in any proceedings to which the Company is a party, for the purpose of taking responsibility on behalf of the Company for all or part of those proceedings.

Remuneration report - audited

1. Principles used to determine the nature and amount of remuneration

The remuneration policy is designed to align the objectives of the Key Management Personnel with shareholder and business objectives by providing a fixed remuneration package to non-executive Directors and time-based remuneration to Executive Directors. The Board of Leigh Creek Energy believes the policy to be appropriate and effective in attracting and retaining the best Directors and Executives to manage and direct the Group and create goal congruence between Directors, Executives, and shareholders.

The Company's policy for determining the nature and amounts of emoluments of board members and other Key Management Personnel is as follows.

The Company's Constitution specifies that the total amount of remuneration of non-executive Directors shall be fixed from time to time by a general meeting. The current maximum aggregate remuneration of non-executive Directors has been set at \$750,000 per annum (as approved by shareholders at an EGM 22 August 2018). Directors may apportion any amount up to this maximum amount amongst the non-executive Directors as they determine. Directors are also entitled to be paid reasonable travelling, accommodation and other expenses incurred in performing their duties.

Non-executive Director remuneration is by way of fees and statutory superannuation contributions. Non-executive Directors do not participate in schemes designed for the remuneration of executives. However, they may receive options or bonus payments subject to shareholder approval and are not provided with retirement benefits other than salary sacrifice and statutory superannuation.

The Company's remuneration structure is based on several factors, including the experience and performance of the individual in meeting key objectives of the Company. The Board is responsible for assessing relevant employment market conditions and achieving the overall, long term objective of maximising shareholder benefits by retaining high-quality personnel.

The Board may approve the payment of cash bonuses from time to time to reward individual executive performance in achieving key objectives as considered appropriate by the Board.

The Company also has an Employee Share Option Plan, approved by shareholders, enabling the Board to offer eligible employees options to acquire ordinary fully paid shares. Under the terms of the Plan, options to acquire ordinary fully paid shares may be offered to the Company's eligible employees at no cost unless otherwise determined by the Board per the terms and conditions of the Plan. The Plan's objective is to align the interests of employees and shareholders by providing employees of the Company with the opportunity to participate in the equity of the Company as an incentive to achieve greater success for the Company and to maximise the company's long-term performance. It can also be used as a reward for performance.

As the Company is developing an energy asset that is not yet in production, in the opinion of the Board, the Company's earnings and the consequences of the Company's performance on shareholder wealth are not related to the Company's remuneration policy.

Voting at 2020 AGM

Of the total valid available votes lodged, Leigh Creek Energy received 97.76% "yes" votes on its remuneration report for the 2020 financial year. The motion was carried unanimously on a show of hands as an ordinary resolution. The Company did not receive any specific feedback at the AGM on its remuneration practices.

Use of remuneration consultants

The Company has not engaged and sought benchmarking advice from remuneration consultants. The *Corporations Act 2001* requires companies to disclose specific details regarding the use of remuneration consultants. The mandatory disclosure requirements only apply to those advisors who provide a "remuneration recommendation" as defined in the *Corporations Act 2001*. The Remuneration Committee did not receive any remuneration recommendations during the reporting period.

2. Details of remuneration

Details of the nature and amount of each element of the remuneration of each Key Management Personnel (KMP) of the Group are shown in the table below:

Year	Short-term benefits				Long term benefits	Post-employment benefits	Share-based payments		Total	Performance based on % of remuneration	
	Directors fees	Salary & wages	Other	Non-monetary benefits ¹	Long service leave	Super contributions	Shares	Options ²

Notes

¹ Non-monetary benefits include benefits provided to the KMP on which Fringe Benefits tax is paid.

² In accordance with the Accounting Standards, remuneration includes a proportion of the fair value of the options granted or proposed during the year. The notional value of options is determined as at the grant date and is progressively allocated over the vesting period. The amount included as remuneration is not indicative of the benefit (if any) that the employee may ultimately realise should the options vest. The notional value of the options as at the issue date has been determined in accordance with the accounting policy Employee Remuneration Note 11. Options proposed for issue during the period represent fees and salary foregone by KMP in response to COVID-19 cash containment strategy and the award of STI performance hurdles.

³ Shares were granted to D Peters and P Staveley in FY20. The remuneration was approved by shareholders on 21 November 2019 at the Annual General Meeting. Under accounting rules, the fair value of proposed shares was expensed in FY19, \$105,095 and \$99,592, respectively, based on the provisional grant date, with the adjusted expense at issue date recognised in FY20 (\$37,292) and (\$35,339).

⁴ Mr Xiaojiang provided consulting services during the year.

⁵ Mr English resigned as a director on 22 June 2021.

3. Service agreements

Remuneration and other terms of employment for the Executive Directors and other Key Management Personnel are formalised in a Service Agreement. The major provisions of the agreement relating to remuneration are set out below:

Employee	Base salary	Term of agreement	Notice period
D J Peters	\$366,750	Ongoing	6 months
P J Staveley	\$419,625	Ongoing	6 months

Note

¹ Service agreements are presented as at 30 June 2021.

4. Share-based remuneration

Unlisted options are granted to Directors and Key Management Personnel as part of their remuneration. Most of the options are granted subject to performance criteria and are issued to the relevant directors and Key Management Personnel of the Group to increase goal congruence between executives, directors, and shareholders. All options refer to options over ordinary shares of the Company, which are

exercisable on a one-for-one basis under the terms of the agreements.

Options were proposed for issue from April to July 2020, which represented fees and salary foregone by KMPs in accordance with the COVID-19 cash containment strategy and were approved by shareholders at the 2020 Annual General Meeting.

Shareholder approval was also given at the 2020 Annual General Meeting under resolutions 13 and 14 to issue zero exercise price unlisted options to D J Peters and P J Staveley, with an expiration date of 4 years from the date of issue. The number of unlisted options to be granted was determined by dividing the % of total fixed annual remuneration as guided by remuneration advice by the VWAP of the Company over the 30 days before 1 July 2020 of \$0.087. The number of unlisted options to be issued under the STIs was calculated as 155% of the Total Fixed Remuneration (excluding superannuation) of D J Peters, \$505,300, and 145% of the Total Fixed Remuneration (excluding superannuation) of P J Staveley, \$540,850. These options were to vest depending on the satisfaction of relevant performance conditions during FY21. These conditions were as follows:

Performance Condition	No. of options to be issued to the Executive Chairman	No. of options to be issued to the Managing Director
	D J Peters	P J Staveley
Completion of studies with final recommendation for the commercial product for the Leigh Creek Urea Project	187,356	428,735
Awarding of Petroleum Production Licence	187,356	428,735
Revenue related hurdle	187,356	214,367
Final Investment Decision related hurdle	187,356	214,367
Site works related hurdle	187,356	428,735
Offtake agreement related hurdle	187,356	428,735
Project Equity funding hurdle	2,248,275	1,714,942
Share price performance hurdle	2,435,633	2,358,068
Total	5,808,044	6,216,684

The options subject to the share price performance conditions were initially valued using a Monte Carlo valuation of \$80,376 for D J Peters and \$77,816 for P J Staveley as at the 4th of November 2020. The rest of the performance conditions were valued using the closing share price at the grant date at \$404,689 for D J Peters and \$463,034 for P J Staveley at the 4th of November 2020.

On the 10th of June 2021, the board resolved to modify existing vesting conditions, replacing the existing performance conditions with the condition that the Engineering, Procurement, Construction, Commissioning and Finance (EPCCF) Contract with Daelim is executed by the 30th of June 2021. At the modification date, the fair value of the options initially relating to the share price performance hurdle was determined to be \$250,870 for D J Peters and \$242,881 for P J Staveley, using a Monte Carlo valuation. At the modification date, the fair value of the options initially relating to all other performance conditions was unchanged.

As at 30 June 2021, as the modified performance condition had been met, 5,808,044 options vested to D J Peters and 6,216,684 options vested to P J Staveley.

5. Other information

Number of Options held by Key Management Personnel

The number of options to acquire ordinary shares in the Company, held during the 2021 reporting period by each of the Group's Key Management Personnel, including their related parties, is set out below:

Name	Balance at start of year	Granted as remuneration	Exercised	Other changes ³	Closing balance	Vested & exercisable at the end of the reporting period	Vested & unexercisable at the end of the reporting period
D J Peters	3,250,000	5,808,044 ²	-	(750,000)	8,308,044	8,308,044	-
P J Staveley	4,500,000	6,898,340 ^{1,2}	(681,656)	(2,000,000)	8,716,684	8,716,684	-
G D English	2,000,000	185,853 ¹	(185,853)	-	2,000,000	2,000,000	-
M Chatfield	2,000,000	185,853 ¹	(185,853)	-	2,000,000	2,000,000	-
Z Wang	2,000,000	185,853 ¹	-	-	2,185,853	2,185,853	-
Z Xiaojiang	2,000,000	613,312 ¹	-	-	2,613,312	2,613,312	-
Total	15,750,000	13,877,255	(1,053,362)	(2,750,000)	25,823,893	25,823,893	-

Notes:

¹ Shareholder approval was given at the 2020 Annual General Meeting to issue options for salary and fees foregone by directors as part of the COVID-19 response from April to July 2020. This resulted in the issue of 185,853 options to G D English, M Chatfield, and Z Wang, 613,312 options to Z Xiaojiang, and 681,656 options to P J Staveley.

² Shareholder approval was also given at the 2020 Annual General Meeting under resolutions 13 and 14 to issue zero exercise price options to D J Peters and P J Staveley. These options were to vest depending on the satisfaction of relevant performance conditions. On 10th June 2021, these conditions were modified and replaced with a different performance condition. As at 30 June 2021, this performance condition had been met, and these options had vested in full (see section 4. Share-based remuneration above for a detailed explanation of these performance conditions).

³ Options lapsed during the period.

Number of Shares held directly and indirectly by Key Management Personnel

Name	Balance at start of year	Granted as remuneration	Received on exercise	Other changes ¹	Held at the end of the reporting period
D J Peters ³	7,531,591	-	-	35,335	7,566,926

Total	40,177,890	-	1,053,362	(150,518)	41,080,734

Notes:

¹ Other changes include purchases or sales during the financial year.

² Z Xiaojiang has an interest in 29,501,347 shares held by Crown Ascent Development Limited due to having a 25% interest in Crown.

³ D Peters' close family members hold a further 7,566,926 shares. Mr Peters does not have any interest in these shares.

⁴ G English resigned as a director on 22 June 2021. This movement represents shares held at resignation.

Loans to Key Management Personnel

At balance date, the Group does not have any outstanding receivables relating to loans to employees or Key Management Personnel.

Related party transactions

During the reporting period:

Piper Alderman lawyers were paid \$231,314 (2020: \$151,912) for legal services rendered to the Group. There was \$177,628 due for payment at the end of the reporting period.

Greg English is a partner at Piper Alderman lawyers and was a Non-Executive Director of the Company during the year.

Investment Company Services Pty Ltd was paid \$550 (2020: \$29,067) to provide investor relations services to the Group. There was no outstanding balance at the end of the reporting period. The party is related to Mr Peters, Executive Chairman of the Company.

Zheng Xiaojiang provided consulting services for \$210,833 and was reimbursed for travel expenses of \$54,833 during the year totalling \$265,666 (2020: \$201,250). There was \$19,167 due for payment at the end of the reporting period. Mr Xiaojiang is a Non-Executive Director of Leigh Creek Energy.

In 2020, a binding heads-of-agreement was entered into between China New Energy and the Company, for the Company to commence ISG in China with a focus on hydrogen and fertiliser production. Mr Zhe Wang is an employee at China New Energy and is a Non-Executive Director of the Company. No amount has been received or incurred in relation to this agreement.

End of Audited Remuneration Report

Auditor's Independence

Grant Thornton Audit Pty Ltd continues in office in accordance with Section 327 of the Corporations Act 2001.

The auditor has not been engaged during the year for any non-audit services which may have impaired the auditor's independence. The auditor's independence declaration for the year ended 30 June 2021 has been received and is included in this report.

Signed in accordance with a resolution of the Board.

D J Peters
Executive Chairman

Dated at Adelaide, South Australia this 28th day of September 2021

Corporate Governance Statement

The Board of Directors (the Board) of Leigh Creek Energy Limited (the Company) is committed to achieving and demonstrating the highest standard of Corporate Governance.

The Board guides the affairs of the Company on behalf of the shareholders by whom they are elected and to whom they are accountable. The Board has responsibility for the overall Corporate Governance of the Company including its strategic direction, establishment of goals for its management and monitoring the achievement of those goals.

The individual Directors recognise that their primary responsibility is to the owners of the Company, its shareholders, while simultaneously having regard for the interests of all stakeholders and the broader community.

The statement outlines the Company's Corporate Governance Practices in place during the financial year. The Company's statement is made based on the ASX Corporate Governance Councils Corporate Governance Principles and Recommendations (4th Edition).

Although the ASX Corporate Governance Council's Recommendations are not mandatory, under listing rule 4.10.3, companies are required to provide a statement disclosing the extent to which they have followed the recommendations in the reporting period, identifying any principles which have not been followed with reasons for not having done so.

The statement of revised principles and the Company's compliance with each principle are set out in the Company's website:

www.lcke.com.au

Directors' declaration

1. In the opinion of the Directors of Leigh Creek Energy Limited:
 - a. The consolidated financial statements and notes of the Company are in accordance with the *Corporations Act 2001*, including:
 - i. Giving a true and fair view of the financial position as at 30 June 2021 and of the performance of the Group for the year ended on that date; and
 - ii. Complying with Australian Accounting Standards (including the Australian Accounting Interpretations) and the *Corporations Regulations 2001*; and
 - b. There are reasonable grounds to believe that the Company will be able to pay its debts as and when they become due and payable.
2. The Directors have been given the declarations required by Section 295A of the *Corporations Act 2001* for the financial year ended 30 June 2021.
3. Note 1 confirms that the consolidated financial statements also comply with International Financial Reporting Standards.

This declaration is made in accordance with a resolution of the Board of Directors.

D J Peters
Executive Chairman

The accompanying notes form part of these financial statements.

1. Summary of significant accounting policies

The principal activity of the Group was pursuing the development of its Leigh Creek Urea Project.

a. General information and statement of compliance

The consolidated general purpose financial statements have been prepared under the *Corporations Act 2001*, Australian Accounting Standards, and other authoritative pronouncements of the Australian Accounting Standards Board (AASB). Compliance with Australian Accounting Standards results in full compliance with the International Financial Reporting Standards (IFRS) issued by the International Accounting Standards Board (IASB). Leigh Creek Energy is a for-profit entity for the purposes of preparing financial statements. The financial report has been presented in Australian dollars.

Leigh Creek Energy Limited is the Group's Ultimate Parent Company. Leigh Creek Energy Limited is a listed public company incorporated and domiciled in Australia. The address of the registered office and its principal place of business is Level 11, 19 Grenfell Street, Adelaide SA 5000.

The consolidated financial statements for the year ended 30 June 2021 were approved and authorised for issue by the Board of Directors on 28th September 2021.

b. Overall considerations

The consolidated financial statements have been prepared on an accruals basis and are based on historical costs modified by the revaluation of selected non-current assets, financial assets, and financial liabilities for which the fair value basis of accounting has been applied.

c. Basis of consolidation

The Group financial statements consolidate those of the Parent Company and its subsidiaries as of 30 June 2021. The Parent controls a subsidiary if it is exposed, or has rights, to variable returns from its involvement with the subsidiary and can affect those returns through its power over the subsidiary. All subsidiaries have a report date of 30 June. The controlled entities are disclosed in Note 19 to the financial statements.

All inter-company balances transactions and balances between Group companies are eliminated on consolidation. Amounts reported in the financial statements of subsidiaries have been adjusted where necessary to ensure consistency with the accounting policies adopted by the Group.

d. Changes in accounting policy

The financial statements have been prepared under the same accounting policies adopted in the Group's last annual financial statements for the year ended 30 June 2020. The accounting policies included in the Group's previous annual financial statements for the year ended 30 June 2020 are the relevant policies for comparatives. There were no new standards adopted as at 1 July 2020.

e. Impairment of assets

At each reporting date, the Group reviews the carrying values of its assets to determine whether there is any indication that assets have been impaired. If such an indication exists, the asset's recoverable amount, being the higher of the asset's fair value less costs to sell and value in use, is compared to the asset's carrying value. Any excess of the asset's carrying value over its recoverable amount is expensed to profit or loss. Where it is impossible to estimate an individual asset's recoverable amount, the Group estimates the recoverable amount of the cash-generating unit to which the asset belongs.

f. Segment reporting

The Board has considered the requirements of AASB 8 Operating Segments and the internal reports reviewed by the chief operating decision-maker (the Board) in allocating resources and has concluded that there are no separately identifiable segments.

1. Summary of significant accounting policies continued

g. Goods and Services Tax (GST)

Revenues, expenses, and assets are recognised net of GST unless the GST incurred is not recoverable from the Australian Tax Office. In these circumstances, GST is recognised as part of the cost of acquiring the asset or as part of an item of the expense.

Receivables and payables in the statement of financial position are shown inclusive of GST. The net amount of GST recoverable from the Australian Tax Office is included with other receivables in the statement of financial position.

Cash flows are presented in the cash flow statement on a GST inclusive basis.

h. Comparative figures

When required by Accounting Standards, comparative figures have been adjusted to conform to changes in presentation for the current financial year.

i. Significant management judgement in applying accounting policies

When preparing the financial statements, management undertakes several judgements, estimates and assumptions about the recognition and measurement of assets, liabilities, income and expenses. The areas involving significant estimates and assumptions are listed below:

1 Exploration and Evaluation Expenditure – Note 8

- Exploration and evaluation costs have been capitalised on the basis that the Group will commence commercial production in the future. From that time, the costs will be amortised in proportion to the depletion of the resources. Key judgements are applied in considering costs to be capitalised which includes determining expenditures directly related to these activities and allocating overheads between expensed and capitalised. In addition, costs are only capitalised that are expected to be recovered either through successful development or sale of the relevant mining interest. Factors that could impact the future commercial production at the mine include the level of reserves and resources, future technology changes, which could impact the cost of mining, future legal changes, and changes in commodity

prices. To the extent that capitalised costs are determined not to be recoverable in the future, they will be written off in the period in which this determination is made.

- Research and development tax incentive income is recognised at fair value when there is reasonable assurance that the income will be received. Income from the R&D tax incentive is recognised against the capitalised exploration expenditure. The expected future R&D tax incentive for qualifying R&D expenditure for the current financial year has been accrued and is recognised against the capitalised exploration expenditure on the statement of financial position. It has been established that the conditions of this future R&D incentive have been met and that the expected amount of the incentive can be reliably measured
- Judgement is required to ensure that the carrying value of Exploration and Evaluation assets does not exceed the recoverable amount. Factors considered in this judgement are:
 - a) the period for which the entity has the right to explore in the specific area has expired or will expire in the near future;
 - b) substantive expenditure on further exploration for and evaluation of mineral resources in the specific area is neither budgeted nor planned;
 - c) exploration for and evaluation of mineral resources in the specific area have not led to the discovery of commercially viable quantities of mineral resources, and the entity has decided to discontinue such activities;
 - d) sufficient data exists to indicate that, although development in the specific area is likely to proceed, the carrying amount of the exploration and evaluation asset is unlikely to be recovered in full from successful development or by sale.

Management has judged that, given these factors, the balance of Exploration and Evaluation assets is not impaired.

1. Summary of significant accounting policies *continued*

i. Significant management judgement in applying accounting policies *continued*

■ Share-based payments – Note 13

The valuation for accounting purposes of Share-Based Payments relies on several factors that cannot be accurately measured. These include:

- a) the volatility of the LCK share value;
- b) the probability that vesting conditions/ milestones will be met;
- c) the probability that the employee will remain employed with the Company until the expiry date of the options;
- d) the probability that the employee will exercise their options.

The Board retains the final judgement about the vesting of the options. Management has assessed each of these factors and made judgements on what factors are used for the calculation.

■ Coronavirus (COVID-19) Pandemic

Judgement has been exercised in considering the impacts that the COVID-19 pandemic has had, or may have, on the Group's operation based on available information. Other than addressed in specific notes, there does not appear to be any significant impact upon the financial statements or any significant uncertainties with respect to events or conditions that may impact the Group unfavourably as at the reporting date or subsequently because of the COVID-19 pandemic.

j. Going concern

The financial statements have been prepared on a going concern basis, which contemplates continuity of normal business activities and the realisation of assets and settlement of liabilities in the ordinary course of business. In 2021, the Group incurred a loss of \$13.6 million, and this brought accumulated losses to \$64.6 million. As at 30 June 2021, the Group's current assets exceeded its current liabilities by \$19.5 million. However, the Group had negative cash operating and investing cashflows of \$7.8 million. The Group had net assets of \$51.3 million.

The financial report has been prepared on a going concern basis on the expectation that the Group can raise additional debt or equity as required. The Directors are aware that additional debt or equity will be required within 12 months to continue as a going concern. The Group's ability to raise equity will rely on investor confidence in the development of the Leigh Creek Urea Project.

The Directors note that the matters outlined above indicate a material uncertainty, which may cast significant doubt on the ability of the Group to continue as a going concern and therefore, it may be unable to realise its assets and discharge its liabilities in the normal course of business. At the date of this report, the Directors believe that the Group has adequate resources to continue to and develop the Group's areas of interest and will ensure the Company has sufficient funds to meet its obligations. Subject to market conditions, the Directors believe there are reasonable grounds to conclude that the Company will be able to raise funds by way of debt and/or equity to fund anticipated activities and meet financial obligations. For the reasons outlined above, the Board has prepared the Financial Report on a going concern basis.

2. Other income and expenses

Accounting policy – income and expenses recognition

Other income is recognised on an accruals basis when the right to receive payment is established.

Other expenses represent costs incurred for the administration of the business. Costs relating to the project have been capitalised to Exploration and Evaluation expenditure (as shown in Note 8).

	2021 \$	2020 \$
a) Other income		
Cash flow boost stimulus grant income	50,000	50,000
Disposal of fixed assets	501	-
Total other income	50,501	50,000
b) Other expenses		
Accounting and audit	119,682	158,578
Communications costs	35,912	47,149
Corporate advisory	453,787	822,345
Software & other	95,578	79,398
Consulting and legal expense	478,311	565,814
Share-based payments to consultants and financiers	2,095,874	550,954
Insurance	171,798	132,301
Investor relations	254,909	101,846
Listing & registry fees	231,968	175,890
Occupancy expense	25,679	186,181
Printing and office supplies	47,903	38,565
Travel and accommodation	78,198	239,466
Other expenses	241,360	190,264
Total other expenses	4,330,959	3,288,751

3. Finance Income and Finance Costs

Accounting policy – Finance income and finance costs

Finance income includes interest revenue recognised on an accruals basis taking into account the interest rates applicable. It is recognised at the time the right to receive payment is established.

Finance costs include interest paid and amortised borrowing costs from financing arrangements. Costs incurred in relation to the arrangement are amortised using the effective interest method over the life of the loan.

	2021	2020
	\$	\$
a) Finance income		
Interest earned	2,559	25,490
Total finance income	2,559	25,490
b) Finance costs		
Interest paid on lease liabilities	8,866	1,850
Amortised borrowing costs	22,580	150,716
Energy Exploration Capital Partners (EECP) Funding ¹	4,687,968	-
Total finance costs	4,719,414	152,566

¹ Includes \$4,687,968 for the fair value measurement of equity issued or owing to Energy Exploration Capital Partners for payment of various fees and consideration for the receipt of \$6,981,735 in funding throughout the year (see note 24).

4. Income Tax

Accounting policy – income taxes

Tax expense recognised in profit or loss comprises deferred tax and current tax not recognised in other comprehensive income or directly in equity.

Calculation of current tax is based on tax rates and tax laws that have been enacted or substantively enacted by the end of the reporting period. Deferred income taxes are calculated using the balance sheet liability method.

Deferred tax is recognised in respect of temporary differences between the carrying amounts of assets and liabilities for financial reporting purposes and the amounts used for taxation purposes.

Deferred tax assets are recognised to the extent that it is probable that the underlying tax loss or deductible temporary difference will be utilised against future taxable income. This probability is assessed based on the Group's forecast of future operating results, adjusted for significant non-taxable income and expenses and specific limits on the use of any unused tax loss or credit.

Tax consolidation

Under Australian taxation law, Leigh Creek Energy Limited and its wholly-owned Australian subsidiaries are a tax consolidated group.

	2021 \$	2020 \$
a) Numerical reconciliation of income tax expense to prima facie tax payable		
Loss before income tax	(13,574,173)	(7,154,941)
Prima facie tax (benefit) on loss before income tax at 26.0% (2020: 27.5%)	(3,529,285)	(1,967,609)
Permanent differences:		
Entertainment non-deductible	9,409	16,603
Share-based payments	1,093,691	404,851
Fair value adjustments	1,218,872	-
Other non-deductible	-	90,423
Movement in unrecognised tax assets and liabilities	(1,162,608)	(1,948,994)
Tax-loss not recognisable	2,388,434	3,404,727
Under/(Over) provided in prior year	(18,513)	-
Aggregate income tax expense	-	-
b) Tax losses		
Unused tax losses for which no deferred tax asset has been recognised		
Revenue losses	20,446,663	19,119,630
Capital losses	192,254	192,254

The carried forward tax losses can only be utilised in the future when taxable income is being generated, if the continuity of ownership test is passed, or failing that, the same business test is passed.

5. Cash Assets

Accounting policy – Cash and cash equivalents

Cash and cash equivalents in the statement of financial position comprise cash at banks and on hand and short-term deposits with an original maturity of three months or less but exclude any cash held in deposit. Cash held in deposit is not available for use by the Group and therefore is not considered highly liquid.

Cash and cash equivalents

	2021 \$	2020 \$
Bank balances	22,797,317	6,799,387
Term deposits ¹	15,044	15,000
Total Current cash and cash equivalents	22,812,361	6,814,387
Other assets ²	565,339	564,804
Total Non-Current other assets	565,339	564,804

¹ Term deposits comprise cash balances with an original maturity of less than three months.

² The Group has \$495,470 in other assets held at local banks due to environmental monitoring and rehabilitation requirements under the Petroleum and Geothermal Energy Act 2000 relating to its Leigh Creek Urea Project. The Group also has \$69,869 in other assets held under its lease contract as lessee to its corporate office in Adelaide. These reserves are not available to finance the Group's day-to-day operations and, therefore, have been excluded from cash and cash equivalents for the statement of cash flows. It has been disclosed as a non-current asset.

6. Trade and other receivables

Accounting policy – Trade and other receivables

Trade and other receivables are recognised initially at fair value. At the balance date, no receivables were outstanding or impaired.

	2021 \$	2020 \$
GST recoverable	102,231	57,608
R&D tax incentive receivable	153,017	493,096
Other debtors	1,956	6,793
Total Trade and other receivables	257,204	557,497

7. Property, Plant and Equipment

Accounting policy – Property, plant, and equipment

Each class of property, plant and equipment is carried at cost, where applicable, less any accumulated depreciation and impairment losses.

i) Plant and equipment

Plant and equipment are shown at historical cost less accumulated depreciation and accumulated impairment. Cost includes expenditure that is directly attributable to the acquisition of the assets.

The carrying amount of plant and equipment is reviewed annually to ensure it is not more than the recoverable amount from these assets. The recoverable amount is assessed based on the expected net cash flows that will be received from the asset's employment and subsequent disposal. The expected net cash flows have been discounted to their present values in determining recoverable amounts.

ii) Depreciation

Depreciation is calculated using the straight-line method to allocate their cost over their estimated useful lives, as follows:

Plant and equipment	5-33%
Office equipment	10-50%
Motor vehicles	15%
Leasehold improvement	45%

The assets residual values and useful lives are reviewed and adjusted, if appropriate, at each reporting date. Gains and losses on disposal of property, plant, and equipment are determined as the difference between the disposal proceeds and the carrying amount of the assets (including impairment provision). They are recognised in profit or loss with Other Income or Other Expenses.

	2021 \$	2020 \$
Cost		
Balance at 1 July 2020	875,730	789,009
Additions	110,526	86,721
Disposals	-	-
Balance at 30 June 2021	986,256	875,730
Accumulated depreciation & impairment		
Balance at 1 July 2020	471,283	376,310
Depreciation	101,998	94,973
Disposals	-	-
Balance at 30 June 2021	573,281	471,283
Carrying amounts		
At 1 July 2020	404,447	412,699
At 30 June 2021	412,975	404,447

8. Exploration and Evaluation Expenditure

Accounting policy – Exploration and evaluation expenditure

Exploration and evaluation expenditure incurred is accumulated in respect of each identifiable area of interest. These costs are only carried forward to the extent that the right of tenure is current, and those costs are expected to be recouped through the successful development of the area (or by its sale). These costs are also carried forward where activities in the area have not yet reached a stage that permits reasonable assessment of the existence of economically recoverable reserves, and operations concerning the area are continuing.

When production commences, the accumulated costs for the relevant area of interest are amortised over the life of the area at the rate of depletion of the economically recoverable reserves.

Accumulated costs concerning an abandoned area are written off in full against profit in the period in which the decision to abandon the area is made.

	2021 \$	2020 \$
Balance at opening	27,221,061	25,025,917
Licence fees	31,088	28,220
Costs capitalised for Joint Operation (Note 14)	243,504	255,643
Costs capitalised for LCUP	3,506,097	2,428,698
Less R&D tax concession rebates	(178,353)	(517,417)
Total exploration and evaluation expenditure	30,823,397	27,221,061

The Company applied for R&D Tax Incentives through AusIndustry for eligible research expenditure incurred during 2020/21 for the Leigh Creek Urea Project.

9. Trade and Other Payables

Trade and other payables consist of the following:

	2021 \$	2020 \$
Trade payables	866,685	236,589
Other payables	56,670	47,701
Accruals	310,357	192,710
Total Trade and other payables	1,233,712	477,000

10. Borrowings

Accounting policy – Borrowings

Borrowings are recognised initially at fair value, less attributable transaction costs.

After initial recognition, borrowings and loans are stated at amortised cost. Any difference between cost and redemption value is recognised in the profit or loss over the loan period on an effective-interest basis. Loans with a determinable payment due less than twelve months from reporting date are classified as current liabilities. Transaction and finance costs include ancillary costs incurred in the arrangement of loans, interest payable and facility line fees payable on the loan.

	2021 \$	2020 \$
Current		
Loan – Motor Vehicle and Insurance Premium Funding	97,324	90,848
R&D working capital facility	-	360,000
Total current borrowings	97,324	450,848
Non-current		
Loan – Motor Vehicle and Insurance Premium Funding	-	102,350
Total borrowings	97,324	553,198
R&D working capital facility		
R&D working capital facility – available	-	750,000
R&D working capital facility – undrawn	-	(390,000)
R&D working capital facility – drawn	-	360,000

The Company had a limited working capital facility with the Commonwealth Bank of Australia (CBA), which was limited to accessing qualifying refundable R&D tax concessions in advance. \$360,000 was drawn under the facility as of 30 June 2020, subsequently repaid and closed in October 2020.

11. Employee Remuneration

Employee Benefits

Accounting policy – Employee benefits

Provision is made for the Group's liability for employee benefits arising from services rendered by employees to the reporting date. These benefits include wages, salaries, and annual leave, and long service leave. Where these benefits are expected to be settled within 12 months of the reporting date, they are measured at the amounts expected to be paid when the liabilities are settled, and the provision has been recognised at the undiscounted amount expected to be paid.

Long service leave payable later than one year has been measured at the present value of the estimated future cash outflows to be made for those benefits, discounted using high-quality corporate bonds. In relation to employee benefits arising for employees directly involved in the exploration project, these indirect costs have been capitalised to the project.

11. Employee Benefits *continued*

Employee benefits expense

	2021 \$	2020 \$
Wages, salaries (inc. on-costs)	1,863,667	2,390,182
Superannuation	234,720	236,472
Share-based payments	2,110,630	921,233
Employee provisions ¹	188,111	163,550
Total employee benefit expense	4,397,128	3,711,437

¹ This is to recognise a provision for long service leave and annual leave.

Under the Company's Accounting for Exploration policy, labour costs relating to the LCUP are capitalised. The total staff cost was \$6,138,063 (2020: \$4,714,769).

	2021 \$	2020 \$
Liability for annual leave	514,247	389,521
Liability for long service leave – current	45,008	-
Liability for long service leave – non-current	105,135	86,758
Total employee benefit liability	664,390	476,279

12. Issued Capital

Accounting policy – Issued capital

Ordinary shares are classified as equity. Incremental costs directly attributable to the issue of new shares are shown in equity as a deduction from the proceeds.

Ordinary shares

Ordinary shares participate in dividends and the proceeds on winding up the parent entity in proportion to the number of shares held. At the shareholders' meeting, each ordinary share is entitled to one vote when a poll is called. Otherwise, each shareholder has one vote on a show of hands. All issued shares are fully paid. All unissued shares are ordinary shares of the Company.

	2021 \$	2020 \$
Total issued capital - Ordinary shares 813,482,798 (2020: 654,662,412)	107,607,468	81,094,167

12. Issued Capital *continued***Ordinary shares** *continued*

Additional shares were issued during the financial year relating to capital raising activities listed below.

Detailed table of capital issued during the year

Type of share issue	Date of issue	Number of ordinary shares on issue	Issue price \$	Share capital \$
Opening balance 1 July 2020		654,662,412		85,448,416

16-March-2023	\$0.182	5,494,505
18-August-2024	\$0.120	6,650,000
15-April-2025	\$0.00	799,165
26-November-2024	\$0.00	12,024,727
13-January-2024	\$0.236	9,800,000
14-January-2025	\$0.230	800,000
15-June-2026	\$0.00	30,738
Total		75,283,640

Options granted under the Employee Share Option Plan will expire on the expiry date, as they are not subject to continued employment. The one exception is under Plan 2 (see Note 13), which will expire on termination or redundancy (unless the employee is a retiring director). Other categories of holders who may be granted options are consultants of the company or financiers of the company, whose options will not be subject to employment conditions.

Listed options

There are nil listed options over shares of the Group at the end of the financial year.

Capital management

Management objectives when managing capital are to ensure the Group's ability to continue as a going concern. The Group manages the capital structure and adjusts it considering the forecast cash requirements of the development programme. To that end, internal capital rationing is complemented by capital raising activities as required to ensure funding for development activities is in place. The Directors are aware that additional debt or equity will be required within 12 months to continue as a going concern. The Group's ability to raise equity will rely on investor confidence in the development of the Leigh Creek Urea Project (see note 1.j).

There are no externally imposed capital requirements.

13. Reserves

Accounting policy – reserves

The share option reserve is used to recognise the fair value of options granted to employees, consultants and financiers but not exercised. Upon exercise of the options, the proceeds are allocated to share capital.

	2021 \$	2020 \$
Share option reserve	8,260,419	4,053,915
Total reserves	8,260,419	4,053,915

A breakdown of the share option reserve is as follows:

	Number of options 2021	2021 \$
Directors	25,823,893	2,488,203
Employees	15,470,738	1,592,727
Former employees	3,655,000	425,278
Other consultants and financiers	30,334,009	3,754,211
Total	75,283,640	8,260,419

Share based payments

Accounting policy – Share based payment plans

The Group operates equity-settled share-based remuneration plans for its employees and some consultants. The Group's plans are not cash-settled.

All goods and services received in exchange for the grant of any share-based payment are measured at their fair values.

Where employees or consultants are rewarded using share-based payments, the fair value is determined indirectly by reference to the fair value of the equity instruments granted. This fair value is appraised at the grant date and excludes the impact of non-market vesting conditions (for example, profitability and sales growth targets and performance conditions).

All share-based remuneration is ultimately recognised as an expense in profit or loss with a corresponding credit to share option reserve. If vesting periods or other vesting conditions apply, the expense is allocated over the vesting period, based on the best available estimate of the number of share options expected to vest.

Non-market conditions are included in assumptions about the number of options that are expected to vest. Estimates are subsequently revised if any indication that the number of share options expected to vest differs from previous estimates. Any adjustment to cumulative share-based compensation resulting from a revision is recognised in the current period. The number of vested options ultimately exercised by holders does not impact the expense recorded in any period.

Grant date might occur after the employees or consultants to whom the equity instruments were granted have begun rendering services, such as grant of equity instruments to key management personnel, subject to shareholder approval. The Company estimates the grant date fair value of the equity instruments (e.g. by estimating the fair value of the equity instruments at the end of the reporting period) to recognise the services received during the period between the service commencement date and grant date. Once the grant date has been established, the Company revises the earlier estimate so that the amounts recognised for services received regarding the grant are ultimately based on the grant date fair value of the equity instruments.

13. Reserves *continued*

Accounting policy – Share based payment plans *continued*

Upon exercise of share options, the proceeds received, net of any directly attributable transaction costs, are allocated to share capital up to the nominal (or par) value of the shares issued, with any excess recorded as share premium. For Plans 5-6, 8-9, and 11-12, the fair value at issue date is calculated using the Black Scholes option pricing model that considers the share price at issue date, the exercise price, the term until expiry, and an implied volatility estimate. For plans 13 and 15, the fair value is calculated using the closing share price at the date of issue. These options are issued at a zero-exercise price. For plans 1-4, 7 and 10, the fair value at issue date is calculated using the Trinomial option pricing model that considers the share price at issue date, the exercise price, the term until expiry, and an estimate of implied volatility.

Plan 14 refers to options issued as STIs to Directors. Zero exercise price unlisted options were issued to D J Peters and P J Staveley, with an expiration date of 4 years from the issue date. The number of unlisted options to be granted was determined by dividing the percentage of total fixed annual remuneration as guided by remuneration advice by the VWAP of the Company over the 30 days before 1 July 2020 of \$0.087. The number of unlisted options to be issued under the STIs was calculated as 155% of the Total Fixed Remuneration (excluding superannuation) of D J Peters, \$505,300, and 145% of the Total Fixed Remuneration (excluding superannuation) of P J Staveley, \$540,850. These options were to vest depending on the satisfaction of relevant performance conditions. These conditions were as follows:

Performance Condition	No. of options to be issued to	No. of options to be issued to
	the Executive Chairman	the Managing Director
	D J Peters	P J Staveley
Completion of studies with final recommendation for the commercial product for the Leigh Creek Urea Project	187,356	428,735
Awarding of Petroleum Production Licence	187,356	428,735
Revenue related hurdle	187,356	214,367
Final Investment Decision related hurdle	187,356	214,367
Site works related hurdle	187,356	428,735
Offtake agreement related hurdle	187,356	428,735
Project Equity funding hurdle	2,248,275	1,714,942
Share price performance hurdle	2,435,633	2,358,068
Total	5,808,044	6,216,684

The options subject to the share price performance conditions were initially valued using a Monte Carlo valuation of \$80,376 for D J Peters and \$77,816 for P J Staveley as at the 4th of November 2020. The rest of the performance conditions were valued using the closing share price at the grant date at \$404,689 for D J Peters and \$463,034 for P J Staveley at the 4th of November 2020.

On the 10th of June 2021, the board resolved to modify existing vesting conditions, replacing the existing performance conditions with the condition that the Engineering, Procurement, Construction, Commissioning and Finance (EPCCF) Contract with Daelim is executed by the 30th of June 2021. At the modification date, the fair value of the options initially relating to the share price performance hurdle was determined to be \$250,870 for D J Peters and \$242,881 for P J Staveley, using a Monte Carlo valuation. At the modification date, the fair value of the options initially relating to all other performance conditions was unchanged.

As at 30 June 2021, as the modified performance condition had been met, 5,808,044 options vested to D J Peters and 6,216,684 options vested to P J Staveley.

13. Reserves *continued*

(i) Number of options granted during the year

	2021	Weighted-average exercise price 2021
Outstanding at beginning of the year	65,039,794	\$0.26
Forfeited	-	\$0.00
Expired	(12,423,500)	\$0.38
Granted	34,005,013	\$0.10
Exercised	(11,337,667)	\$0.08
Outstanding	75,283,640	\$0.20
	2020	Weighted-average exercise price 2020
Outstanding at beginning of the year	42,293,500	\$0.32
Forfeited	(2,250,000)	\$0.30
Expired	(2,030,000)	\$0.26
Granted	27,488,220	\$0.16
Exercised	(461,926)	\$0.30
Outstanding	65,039,794	\$0.26

(ii) Valuation assumptions – employee plans

At each balance sheet date, the Company revises its estimate of the number of options expected to become exercisable. A volatility curve was used for plans 1-12. Options vested on issue date for all plans excluding plan 14. See above for further explanation relating to the valuation of the plan 14 options.

	Plan 1	Plan 2	Plan 3
Grant date	4 October 2016	22 August 2018	22 August 2018

14. Interest in Joint Operations

Accounting policy – joint operations

A joint operation is a joint arrangement whereby the parties that have joint control of the arrangement have rights to the assets, and obligations for the liabilities, relating to the arrangement. The Group has recognised its share of jointly held assets, liabilities, revenues, and expenses of joint operations. These have been incorporated in the financial statements under the appropriate classifications

In FY2020, the Group entered an unincorporated Joint Operation with Bridgeport Energy (QLD) Pty Limited (“Bridgeport”), whose principal activities are Oil and Gas exploration. The Group intends to gain interests in Cooper Basin ATP 2023 and ATP 2024.

The Group has the option to acquire a 20% interest in ATP 2023 and ATP 2024 by funding:

- In the 12 months commencing May 2020, 40% of the costs of seismic re-processing and G & G, \$91,545 and \$155,299 actual costs, respectively.
- In the 12 months commencing May 2021, 40% of the costs of 3D seismic over a 2 x 300km² area, up to \$1,880,000 and \$1,880,000, respectively.
- Additionally, the Group will fund an administrative overhead based on annual expenditure, at an estimated 6% for the first 12 months and 4% for the second 12 months.
- The 20% interest in ATP 2023 and 2024 will be earned after completing the two years of funding obligations in April 2022.
- After the 20% interest is acquired, the work program commitments are estimated at \$2,000,000 for the remaining two years of the program in total.

15. Commitments for Expenditure

Accounting policy – capital commitments

Capital commitments relate to expenditure commitments for the Leigh Creek Urea Project (LCUP) and Joint Operation outstanding at balance date.

	2021 \$	2020 \$
Leigh Creek Urea Project	172,712	90,091
Interest in Joint Operation – Bridgeport – not longer than one year	3,760,000	261,170
Interest in Joint Operation – Bridgeport – longer than one year but less than five years	2,000,000	3,760,000

Under the terms of tenement registration and renewal, tenements have commitments to work requirements. The commitment to work requirements at Leigh Creek is included above. Additionally, there is expenditure required to maintain the joint operation with Bridgeport (Note 14).

There are no other commitments at balance date for expenditure by the Group.

16. Leases

Accounting policy – leases

The Group considers whether a contract is or contains a lease. A lease is defined as “a contract, or part of a contract, that conveys the right to use an asset (the underlying asset) for a period of time in exchange for consideration”. To apply this definition, the Group assesses whether the contract meets three key evaluations, which are whether:

- The contract contains an identified asset, which is either explicitly identified in the contract or implicitly specified by being identified at the time the asset is made available to the Group
- The Group has the right to obtain substantially all the economic benefits from the use of the identified asset throughout the period of use, considering its rights within the defined scope of the contract
- The Group has the right to direct the use of the identified asset throughout the period of use.

The Group assesses whether it has the right to direct ‘how and for what purpose’ the asset is used throughout the period of use.

Measurement and recognition of leases as a lessee

At lease commencement date, the Group recognises a right-of-use asset and a lease liability on the balance sheet. The right-of-use asset is measured at cost, which is made up of the initial measurement of the lease liability, any initial direct costs incurred by the Group, an estimate of any costs to dismantle and remove the asset at the end of the lease, and any lease payments made in advance of the lease commencement date (net of any incentives received).

The Group depreciates the right-of-use assets on a straight-line basis from the lease commencement date to the earlier of the end of the useful life of the right-of-use asset or the end of the lease term.

The Group also assesses the right-of-use asset for impairment when such indicators exist. At the commencement date, the Group measures the lease liability at the present value of the lease payments unpaid at that date, discounted using the interest rate implicit in the lease if that rate is readily available or the Group’s incremental borrowing rate.

Lease payments included in the measurement of the lease liability are made up of fixed payments (including in-substance fixed), variable payments based on an index or rate, amounts expected to be payable under a residual value guarantee and payments arising from options reasonably certain to be exercised.

After the initial measurement, the liability will be reduced for payments made and increased for interest. It is remeasured to reflect any reassessment or modification or if there are changes in in-substance fixed payments.

When the lease liability is remeasured, the corresponding adjustment is reflected in the right-of-use asset or profit and loss if the right-of-use asset is already reduced to zero.

The Group has elected to account for short-term leases and leases of low-value assets using the practical expedients. Instead of recognising a right-of-use asset and lease liability, the payments in relation to these are recognised as an expense in profit or loss on a straight-line basis over the lease term.

16. Leases *continued*

At 30 June 2021, the Group does not have any short-term lease commitment.

17. Financial Assets & Liabilities

Accounting policy – financial assets & liabilities

Financial instruments

Recognition, initial measurement and derecognition

Financial assets and financial liabilities are recognised when the Group becomes a party to the contractual provisions of the financial instrument and are measured initially at fair value adjusted by transactions costs, except for those carried at fair value through profit or loss, which are measured initially at fair value. Subsequent measurement of financial assets and financial liabilities is described below.

Financial assets are derecognised when the contractual rights to the cash flows from the financial asset expire or when the financial asset and all substantial risks and rewards are transferred. A financial liability is derecognised when it is extinguished, discharged, cancelled, or expires.

Classification and subsequent measurement of financial assets

Except for those trade receivables that do not contain a significant financing component and are measured at the transaction price per AASB 15, all financial assets are initially measured at fair value adjusted for transaction costs (where applicable).

For subsequent measurement, financial assets other than those designated and effective as hedging instruments are classified into the following categories upon initial recognition:

- amortised cost
- fair value through profit or loss (FVPL)
- equity instruments at fair value through other comprehensive income (FVOCI)
- debt instruments at fair value through other comprehensive income (FVOCI)

All income and expenses relating to financial assets recognised in profit or loss are presented within finance costs, finance income or other financial items, except for impairment of trade receivables presented within other expenses.

Classifications are determined by both:

The entities business model for managing the financial asset

The contractual cash flow characteristics of the financial assets

All income and expenses relating to financial assets recognised in profit or loss are presented within finance costs, finance income or other financial items, except for impairment of trade receivables, which is presented within other expenses.

Financial assets at amortised cost

Financial assets are measured at amortised cost if the assets meet the following conditions (and are not designated as FVPL):

- they are held within a business model whose objective is to hold the financial assets and collect its contractual cash flows
- the contractual terms of the financial assets give rise to cash flows that are solely payments of principal and interest on the principal amount outstanding

After initial recognition, these are measured at amortised cost using the effective interest method. Discounting is omitted where the effect of discounting is immaterial. The Group's cash and cash equivalents, trade and most other receivables fall into this category of financial instruments.

17. Financial Assets & Liabilities *continued**Classification and subsequent measurement of financial assets continued***Impairment of financial assets**

AASB 9's impairment requirements use more forward-looking information to recognise expected credit losses – the 'expected credit losses (ECL) model'. The Group's financial assets include trade and other receivables.

The Group considers a broader range of information when assessing credit risk and measuring expected credit losses, including past events, current conditions, reasonable and supportable forecasts that affect the expected collectability of the future cash flows of the instrument.

In applying this forward-looking approach, a distinction is made between:

- financial instruments that have not deteriorated significantly in credit quality since initial recognition or that have low credit risk (Stage 1) and
- financial instruments that have deteriorated significantly in credit quality since initial recognition and whose credit risk is not low (Stage 2).

Stage 3 would cover financial assets that have objective evidence of impairment at the reporting date.

12-month expected credit losses are recognised for the first category, while lifetime expected credit losses are recognised for the second category.

Measurement of the expected credit losses is determined by a probability-weighted estimate of credit losses over the expected life of the financial instrument.

Classification and measurement of financial liabilities

The Group's financial liabilities include borrowings and trade, and other payables.

Financial liabilities are initially measured at fair value and, where applicable, adjusted for transaction costs unless the Group designated a financial liability at fair value through profit or loss.

Subsequently, financial liabilities are measured at amortised cost using the effective interest method except for derivatives and financial liabilities designated at FVPL, which are carried subsequently at fair value with gains or losses recognised in profit or loss (other than derivative financial instruments that are designated and effective as hedging instruments).

All interest-related charges and, if applicable, changes in an instrument's fair value reported in profit or loss are included within finance costs or finance income.

17. Financial Assets & Liabilities *continued*

Accounting policy – financial assets & liabilities *continued*

Categories of financial assets and liabilities

The carrying amount of financial assets and liabilities in each category are as follows:

Financial assets	Notes	Financial assets at amortised cost 2021	Financial assets at amortised cost 2020
Other assets	5	565,339	564,804
Trade and other receivables	6	1,956	6,793
Cash and cash equivalents	5	22,812,361	6,814,387
		23,379,656	7,385,984
Financial liabilities	Notes	Other liabilities (amortised cost) 2021	Other liabilities (amortised cost) 2020
Current borrowings	10	97,324	450,848

Lease Liabilities – Non-current	16	-	121,006
		1,458,553	1,299,068

The carrying amount of financial liabilities at fair value through profit or loss are as follows:

Financial liabilities	Notes	Other liabilities (FVTPL) 2021	Other liabilities (FVTPL) 2020
Other Financial Liability – Current	24	1,757,143	-
		1,757,143	-

17. Financial Assets & Liabilities *continued***Measurement****Loans and receivables**

Loans and receivables are non-derivative financial assets with fixed or determinable payments that are not quoted in an active market and are stated at amortised cost.

i. Treasury Risk Management

The risk management of treasury functions is managed by the Audit and Risk Committee.

ii. Finance Risks

The Group's financial instruments are exposed to various financial risks, such as Market risk (Interest rate and Price risk), Credit risk and Liquidity risk. The Group operates mainly in Australia and, as such, is not subject to foreign exchange risk at balance date. See Note 23 regarding the implications of the Daelim EPBCF Contract.

Price risk

The Group's exposure to price risk is the risk that equity settled financial liabilities value will fluctuate because of changes in the Company's share price.

Sensitivity: At June 30, 2021, if the Company's share price had changed by +/- 10% from the year-end price with all other variables held constant, post-tax loss, total equity would have been \$175,714 (2020: N/A) more/less because of lower/higher movements through FVPL.

Interest rate risk

The Group's exposure to interest rate risk is the risk that a financial instrument's value will fluctuate because of changes in market interest rates on classes of financial assets and liabilities.

Sensitivity: At June 30, 2021, if interest rates on cash and term deposits had changed by +/- 10 basis points from the year-end rates with all other variables held constant post-tax loss, total equity would have been \$172 (2020: \$1,907) more/less because of lower/higher interest income.

At June 30, 2021, the Group did not have any interest-sensitive borrowings. For comparative, in 2020, if interest rates on borrowings had changed by +/- 10 basis points from the year-end rates with all other variables held constant post-tax loss, total equity would have been \$124 more/less because of lower/higher interest expense.

Credit risk

Exposure to credit risk relating to financial assets arises from the potential non-performance by counterparties of contract obligation that could lead to a financial loss to the Group. The Group's maximum exposure to credit risk is its cash and cash equivalents and receivables, as noted in the table above. The Group manages its credit risk by depositing with reputable licenced banks.

Liquidity risk

Liquidity risk arises from the possibility that the Group might encounter difficulty settling its debts or otherwise meeting its obligations related to financial liabilities. The Group manages liquidity risk by monitoring forecast cash flows and ensuring that adequate funding sources are available.

Maturity: All of the Group's financial liabilities are expected to fall due within one year. For comparison, in 2020, financial liabilities of \$1,075,712 were to fall due within one year, and financial liabilities of \$223,356 were to fall due from one to two years.

18. Notes to the Statement of Cash Flows

(A) Reconciliation of cash

For the statement of cash flows, cash includes cash on hand and in banks and investments in money market instruments. Cash at the end of the financial year, as shown in the statement of cash flows, is reconciled to the related items in the statement of financial position as follows:

	2021 \$	2020 \$
Bank balances and short-term deposits	22,812,361	6,814,387

The weighted average effective interest rate on bank deposits is 0.00% (2020: 0.04%). All deposits are for less than 12 months.

(B) Reconciliation of cash flow from operations with loss after tax

	2021 \$	2020 \$
Loss after income tax	(13,574,173)	(7,154,941)
Cash flows excluded from loss attributable to operating activities:

The parent entity has not entered a deed of cross guarantee, nor are there any contingent liabilities at the year-end.

19. Parent Entity Disclosures *continued*

Accounting policy – capital commitments for parent

Capital commitments relate to expenditure commitments for the Leigh Creek Urea Project (LCUP) outstanding at balance date.

	2021 \$	2020 \$
Leigh Creek Operations Pty Ltd	172,712	90,091

20. **Related Party Transactions**

Transactions with key management personnel compensation

The key management personnel of the Group are the members of the Group's Board of Directors and members of the management team. Key management personnel remuneration includes the following expenses:

	2021 \$	2020 \$
Total short-term employee benefits	1,188,647	996,780
Total post-employment benefits	106,571	116,112
Share-based payments	1,709,719	75,469
Total Remuneration	3,004,937	1,188,371

The amounts disclosed in the table are the amounts recognised as an expense during the reporting year. Detailed disclosure is included within the remuneration report.

Other transactions with key management personnel

Transactions between related parties are on standard commercial terms and conditions no more favourable than those to other parties, unless otherwise stated:

- i) Piper Alderman lawyers were paid \$231,314 (2020: \$151,912) for legal services rendered to the Group. There was \$177,628 due for payment at the end of the reporting period. Greg English is a partner at Piper Alderman lawyers and was a Non-Executive Director of the Company during the year.
- ii) Investment Company Services Pty Ltd was paid \$550 (2020: \$29,067) to provide investor relations services to the Group. There was no outstanding balance at the end of the reporting period. The party is related to Mr Peters, Executive Chairman of the Company.
- iii) Zheng Xiaojiang provided consulting services for \$210,833 and was reimbursed for travel expenses of \$54,833 during the year totalling \$265,666 (2020: \$201,250). There was \$19,167 due for payment at the end of the reporting period. Mr Xiaojiang is a Non-Executive Director of the Company.
- iv) In 2020, a binding heads-of-agreement was entered into between China New Energy and the Company, for the Company to commence ISG in China with a focus on hydrogen and fertiliser production. Mr Zhe Wang is an employee at China New Energy and is a Non-Executive Director of the Company. No amount has been received or incurred in relation to this agreement.

21. Auditor's Remuneration

During the year, the following fees were paid or payable for services provided by the Auditor of the Group:

	2021 \$	2020 \$
Auditing and review services	50,777	49,370

During the year, Grant Thornton Audit Pty Ltd, the Company's auditors, did not undertake any additional services to their statutory audit duties.

22. Earnings per Share

Accounting policy – Earnings per Share

i) Basic earnings per share

Basic earnings per share are calculated by dividing the profit (loss) attributable to equity holders, excluding any costs of servicing equity other than ordinary shares, by the weighted average number of ordinary shares outstanding during the year.

ii) Diluted earnings per share

The Diluted earnings-per-share calculation adjusts the figures used to determine basic earnings per share to consider the weighted average number of shares assuming conversion of all dilutive potential ordinary shares.

The basic earnings per share calculation at 30 June 2021 was based on the loss attributable to ordinary equity holders of \$13,574,173 (2020: \$7,154,941) and a weighted average number of ordinary shares outstanding during the 12 months of 658,342,014 (2020: 567,407,752).

The diluted loss per share calculation at 30 June 2021 is the same as the basic diluted loss per share. Per AASB 133 Earning per share, as potential ordinary shares may result in a situation where their conversion decreases the loss per share, no dilutive effect has been considered. There were no dilutive potential ordinary shares in existence during the year (2020: none) as the Company's share options were anti-dilutive.

	2021 \$	2020 \$
Loss used to calculate basic EPS	(13,574,173)	(7,154,941)
	Cents	Cents
Basic earnings per share – cents per share	(2.06)	(1.26)
Diluted earnings per share – cents per share	(2.06)	(1.26)
Weighted average number of shares used as denominator		
Weighted average number of ordinary shares outstanding during the year used in calculating basic and diluted EPS	658,342,014	567,407,752

23. EPCCF Contract between the Company and DL E&C Co. Ltd (Daelim)

In June 2021, the Company entered into an Engineering, Procurement, Construction, Commissioning and Finance (EPCCF) contract for a 1Mtpa urea production plant to South Korean engineering and construction company, DL E&C Co. Ltd (Daelim).

Daelim will manage the LCUP Bankable Feasibility Study (BFS), and Front End Engineering & Design (FEED) stages ahead of a Final Investment Decision (FID). Once FID is achieved and all relevant key engineering data and project execution documents are finalised with LCK, Daelim will perform the engineering, procurement, construction, and commissioning of the urea production facilities.

In addition, Daelim has secured the support of a major Korean financial institution to fund 70% of the project, being approximately \$1.5b. This is via a letter of support by that institution that is subject to the agreement of commercial terms and a positive FID. The balance of that funding is to be secured by a combination of debt and equity to other parties once FID is reached. As at 30 June 2021, milestone one of the contract had not been achieved, the issue of a Notice to Proceed from the Company to Daelim, and, as such, the Company had no obligations in regards to service fees or other payables at this date.

Services provided under the contract require a fixed sum payment of USD 29,265,000 to Daelim, payable in four milestones. As at 30 June 2021, these milestones have not been met but are payable as follows:

- 1) the first instalment being 30% of the Services Fee to be invoiced on or after the Company gives Daelim the Notice to Proceed (see Note 25).
- 2) the second instalment being 30% of the Services Fee to be invoiced on or after the first date on which the process design packages for both the ammonia (including sulphur recovery) plant and the urea plant comprised in the Works have been delivered to Daelim by the relevant Licensor.
- 3) the third instalment being 15% of the Services Fee to be invoiced on or after the date Services Completion occurs; and
- 4) the fourth instalment being 25% of the Services Fee to be invoiced on or after the date that the Company's board of directors makes a FID on the LCUP Fertiliser Project.

24. Energy Exploration Capital Partners, LLC (EECP) Funding agreement

In January 2021, the Company announced it had entered into an Institutional Share Placement agreement with Energy Exploration Capital Partners, LLC (EECP). The financing agreement consists of phased payments of up to \$18m in \$6m tranches. The initial tranche of \$6m less fees was received in January 2021 on the execution of the funding agreement. On execution, the Company recognised a Financial Liability of \$6,540,000 for the fair value of shares to be issued. The initial Placement Price of these shares was determined as 90% of the average of five daily VWAPs per share (selected by EECP) during the 20 trading days before payment, the 4th of January 2021, and that the Company would be required to issue 48,805,970 Placement Shares in settlement of this Financial Liability. Until these shares have been issued in full, the Company carries a Financial Liability, with the movements in the Fair Value of the shares moving through Fair Value Through Profit or Loss (FVTPL).

The Company made an initial issuance of 6.75m Placement Shares to the Investor at the time of execution of the agreement, towards the ultimate number of Placement Shares to be issued. However, in lieu of applying these shares towards the aggregate number of the Placement Shares to be issued by LCK, the Investor elected to make a further payment to the Company equal to the value of these shares determined using the Purchase Price at the time of the payment. The Investor elected to purchase these 6.75m shares in May 2021 instead of applying these shares towards the aggregate number of Placement Shares. In May 2021, the Company issued 35m shares to EECP in partial settlement of the Placement Shares. The Placement Price of these shares was calculated as \$4,900,000. However, the fair value at the date of issue was \$8,050,000, with the difference being carried through FVTPL.

24. Energy Exploration Capital Partners, LLC (EECP) Funding agreement *continued*

The incremental fair value of the tranche one placement shares unissued at 30 June 2021 was recognised, increasing the financial liability at balance date from \$1,640,000 to 1,757,143. The remaining tranche one placement shares are to be issued within 24 months, at the election of EECP, calculated as the average of five single-day VWAPs per share during the 20 consecutive trading days immediately before LCK receives notice from EECP.

Description	Funds received \$	Expense/ FVTPL \$	Other Financial Liability movement \$	Other Financial Liability balance \$
Financial Liability recognition – Jan 2021	6,000,000	540,000 ¹	(6,540,000)	(6,540,000)
Commencement Fee – Jan 2021	-	685,075 ²	-	(6,540,000)
Receipt for the initial placement shares – May 2021	951,750	195,750 ³	-	(6,540,000)
Issue of shares in partial settlement – May 2021	-	3,150,000 ⁴	4,900,000	(1,654,000)
Incremental FV of Financial Liability at 30 June 2021	-	117,143 ⁵	(117,143)	(1,757,143)
Year ended 30 June 2021	6,951,750	4,687,968	-	(1,757,143)

¹ The expense of the difference in the initial subscription amount (\$6,540,000) to be settled by issue of shares and the funds received upfront (\$6,000,000)

² Measurement through FVTPL of the difference between the issue price of shares issued to settle the commencement fee of \$540,000 and the share issue price at the issue date (6th January 2021), i.e. $(4,029,851 * \$0.17) - \$540,000 = \$145,075$

³ Measurement through FVTPL of the difference between the share price per the VWAP formula and the share issue price at the issue date (6th January 2021), i.e. $6,750,000 * (\$0.17 - \$0.14) = \$195,750$

⁴ Measurement through FVTPL of the difference between the share price per the VWAP formula and the share issue price at the issue date (5th May 2021), i.e. $35,000,000 * (\$0.23 - \$0.14) = \$3,150,000$

⁵ Measurement through FVTPL of the difference between the share price per the VWAP formula and the balance date (30th June 2021), i.e. $11,714,286 * (\$0.15 - \$0.14) = \$117,143$

LCK issued 4,029,851 shares in satisfaction of a commencement fee payable to the Investor. LCK also issued 9.8m options to the investor exercisable at \$0.236 (representing a 140% premium over 20-day VWAP to the 4th of January) valued at \$726,586 under the Black Scholes model that considers the share price at issue date, the exercise price, the term until expiry, and an implied volatility estimate (see note 13).

LCK can progress with tranches 2 and 3 of the placement at its absolute discretion. As at 30 June 2021, the Company has not elected to draw on tranches 2 or 3 under this agreement. Tranches 2 and 3 must be settled no later than 12 and 18 months, respectively, after the receipt of the funding under the first tranche (January 2021).

25. Matters Subsequent to the End of the Year

On 21 July 2021, the Company entered into a contract with Drivetrain Australia to purchase four Siemens power generators. These are long lead time items required for the commercial development of the LCUP project.

On 28 July 2021, the Board resolved to issue up to 5,000,000 employee options under the terms of the ESOP to eligible staff as part of an annual reward and recognition process. On 19 August 2021, 4,520,000 of these options were issued.

On 2 August 2021, the Company issued a formal Notice to Proceed to Daelim under its Engineering, Procurement, Construction and Commissioning Contract. Under the terms of the Contract, subsequent to the issue of this Notice, the Company is liable to pay Daelim USD 8,779,500 by 30 September 2021.

Independent Auditor's Report

To the Members of Leigh Creek Energy Limited

Report on the audit of the financial report

Opinion

We have audited the financial report of Leigh Creek Energy Limited (the Company) and its subsidiaries (the Group), which comprises the consolidated statement of financial position as at 30 June 2021, the consolidated statement of profit or loss and other comprehensive income, consolidated statement of changes in equity and consolidated statement of cash flows for the year then ended, and notes to the consolidated financial statements, including a summary of significant accounting policies, and the Directors' declaration.

In our opinion, the accompanying financial report of the Group is in accordance with the *Corporations Act 2001*, including:

- a giving a true and fair view of the Group's financial position as at 30 June 2021 and of its performance for the year ended on that date; and
- b complying with Australian Accounting Standards and the *Corporations Regulations 2001*.

Basis for opinion

We conducted our audit in accordance with Australian Auditing Standards. Our responsibilities under those standards are further described in the *Auditor's Responsibilities for the Audit of the Financial Report* section of our report. We are independent of the Group in accordance with the auditor independence requirements of the *Corporations Act 2001* and the ethical requirements of the Accounting Professional and Ethical Standards Board's APES 110 *Code of Ethics for Professional Accountants (including Independence Standards)* (the Code) that are relevant to our audit of the financial report in Australia. We have also fulfilled our other ethical responsibilities in accordance with the Code.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Grant Thornton Audit Pty Ltd ACN 130 913 594

'Grant Thornton' refers to the brand under which the Grant Thornton member firms provide assurance, tax and advisory services to their clients and/or refers to one or more member firms, as the context requires. Grant Thornton Australia Ltd is a member firm of Grant Thornton International Ltd (GTIL). GTIL and the member firms are not a worldwide partnership. GTIL and each member firm is a separate legal entity. Services are delivered by the member firms. GTIL does not provide services to clients. GTIL and its member firms are not agents of, and do not obligate one another and are not liable for one another's acts or omissions. In the Australian context only, the use of the term 'Grant Thornton' may refer to Grant Thornton Australia Limited ABN 41 127 556 389 and its Australian subsidiaries and related entities. GTIL is not an Australian related entity to Grant Thornton Australia Limited.

Liability limited by a scheme approved under Professional Standards Legislation.

Independent Audit Report

Material uncertainty related to going concern

We draw attention to Note 1(j) in the financial statements, which indicates that the Group incurred a net loss of \$13,574,173 during the year ended 30 June 2021, with negative operating and investing cashflows of \$7,752,166. As stated in Note 1(j), these events or conditions, along with other matters as set forth in Note 1(j), indicate that a material uncertainty exists that may cast doubt on the Group's ability to continue as a going concern. Our opinion is not modified in respect of this matter.

Key audit matters

Key audit matters are those matters that, in our professional judgement, were of most significance in our audit of the financial report of the current period. These matters were addressed in the context of our audit of the financial report as a whole, and in forming our opinion thereon, and we do not provide a separate opinion on these matters.

In addition to the matter described in the *Material uncertainty related to going concern* section, we have determined the matters described below to be the key audit matters to be communicated in our report.

Key audit matter	How our audit addressed the key audit matter
<p>Exploration and evaluation assets - Note 8</p> <p>At 30 June 2021 the carrying value of exploration and evaluation assets was \$30,823,397.</p> <p>In accordance with AASB 6 <i>Exploration for and Evaluation of Mineral Resources</i>, the Group is required to assess at each reporting date if there are any triggers for impairment which may suggest the carrying value is in excess of the recoverable value.</p> <p>The process undertaken by management to assess whether there are any impairment triggers in each area of interest involves an element of management judgement.</p> <p>This area is a key audit matter due to the significant judgement involved in determining the existence of impairment triggers.</p>	<p>Our procedures included, amongst others:</p> <ul style="list-style-type: none"> obtaining the management reconciliation of capitalised exploration and evaluation expenditure and agreeing to the general ledger; reviewing management's area of interest considerations against AASB 6; conducting a detailed review of management's assessment of trigger events prepared in accordance with AASB 6 including; tracing projects to statutory registers, exploration licenses and third party confirmations to determine whether a right of tenure existed; enquiry of management regarding their intentions to carry out exploration and evaluation activity in the relevant exploration area, including review of management's budgeted expenditure; understanding whether any data exists to suggest that the carrying value of these exploration and evaluation assets are unlikely to be recovered through development or sale; evaluating the competence, capabilities and objectivity of management's experts in the evaluation of potential impairment triggers; and assessing the appropriateness of the related financial statement disclosures.

Independent Audit Report

Key audit matter

How our audit addressed the key audit matter

Energy Exploration Capital Partners, LLC (“EECP”) Funding agreement – Note 24

On 5 January 2021, the Company entered into a Subscription Agreement for a private placement of shares with EECP.

Under the agreement, EECP has agreed to invest an aggregate amount up to \$18 million to subscribe for shares, and the Company agreed to issue shares to EECP from time to time for an aggregate subscription price of up to \$19.35 million where the per share value is determined by application of formula detailed in the Subscription Agreement.

The \$18 million was separated into 3 tranches of \$6 million, the first of which was drawn down on execution of the Subscription Agreement prior to 30 June 2021.

Given the amount of the funding received and the complexity of the Subscription Agreement with EECP we have assessed this arrangement as a Key audit matter.

Our procedures included, amongst others:

- obtaining a copy of Subscription Agreement relating to the private placement of shares to understand the key contract terms and conditions;
- reviewing technical accounting advice prepared by Managements Experts relating to the application of the EECP Subscription Agreement;
- Assessing managements experts qualifications, experience and independence;
- Utilising our internal experts to assess the technical accounting advice prepared by Managements expert;
- assessing the mathematical accuracy of the computations prepared by management in relation to the EECP share placement transaction; and
- assessing the adequacy of the financial statement disclosures in respect of the EECP share placement and Subscription Agreement.

Share based payment – Note 13

During the financial year, the Group has incurred share based payments through the issue of unlisted options totalling \$4,206,504 to employees, key management personnel, contractors and financiers as remuneration for services rendered.

The Unlisted Options issued to key management personnel included multiple vesting conditions including market and non-market performance conditions.

In addition to the above and subsequent to their initial issue, the Board waived all existing market and non-market vesting conditions for key management personnel and replaced them with a single, non-market vesting condition.

Share based payments are considered to be a key audit matter due to:

- the value of the transactions;
- impacts on key management personnel remuneration;
- the complexity around modifications undertaken after initial recognition and the accounting implications;
- the complexities involved in the recognition and measurement of these instruments; and
- the judgements involved in determining the inputs used in the valuations.

Our procedures included, amongst others:

- analysing agreements and all board resolutions relating to the issuance of share-based payments to identify the key terms and relevant vesting conditions in accordance with AASB 2 *Share Based Payments*;
- obtaining all board resolutions relating to the modification of vesting conditions of the share-based payments;
- evaluating managements experts accounting advice relating to the impacts for the modification of vesting conditions of share-based payment to key management personnel;
- Assessing managements experts qualifications, experience and independence;
- Utilising our internal experts to assess the technical accounting advice prepared by Managements expert;
- evaluating managements valuation models and assessing the assumptions and inputs used;
- assessing the amount recognised during the year in accordance with the vesting conditions of the agreements; and
- assessing the adequacy of the financial statements’ disclosures with respect to the share-based payments including modification.

Independent Audit Report

Information other than the financial report and auditor's report thereon

The Directors are responsible for the other information. The other information comprises the information included in the Group's annual report for the year ended 30 June 2021, but does not include the financial report and our auditor's report thereon.

Our opinion on the financial report does not cover the other information and we do not express any form of assurance conclusion thereon.

In connection with our audit of the financial report, our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the financial report or our knowledge obtained in the audit or otherwise appears to be materially misstated.

If, based on the work we have performed, we conclude that there is a material misstatement of this other information, we are required to report that fact. We have nothing to report in this regard.

Responsibilities of the Directors for the financial report

The Directors of the Company are responsible for the preparation of the financial report that gives a true and fair view in accordance with Australian Accounting Standards and the *Corporations Act 2001* and for such internal control as the Directors determine is necessary to enable the preparation of the financial report that gives a true and fair view and is free from material misstatement, whether due to fraud or error.

In preparing the financial report, the Directors are responsible for assessing the Company's/Group's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless the Directors either intend to liquidate the Company/Group or to cease operations, or have no realistic alternative but to do so.

Auditor's responsibilities for the audit of the financial report

Our objectives are to obtain reasonable assurance about whether the financial report as a whole is free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with the Australian Auditing Standards will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of this financial report.

A further description of our responsibilities for the audit of the financial report is located at the Auditing and Assurance Standards Board website at: http://www.auasb.gov.au/auditors_responsibilities/ar1_2020.pdf. This description forms part of our auditor's report.

Report on the remuneration report

Opinion on the remuneration report

We have audited the Remuneration Report included in the Directors' report for the year ended 30 June 2021.

In our opinion, the Remuneration Report of Leigh Creek Energy Limited, for the year ended 30 June 2021 complies with section 300A of the *Corporations Act 2001*.
