CEO UPDATE

Zip Managing Director and Global CEO, Larry Diamond said:

“Another very strong set of numbers for Q1 as momentum for the global Zip business continues, with more than 8 million users now on the platform. The quarter saw the successful completion of the global rebrand, which now sees Zip unified under a single payments brand at checkout globally. In support of the rebrand, we are running a major brand campaign across the US to increase awareness and acquisition. I was excited see the Zip brand take centre stage in Times Square as we launched the campaign earlier this month.

Q2 has started strong led by the resurgence instore, Zip’s ubiquitous payments technology and the lead up to the strongest seasonal quarter of the year with Black Friday, Cyber Monday and Christmas promotional sales in November and December.

The continued growth of the business across all key metrics in the face of significant external challenges, yet again proves the resilience of the Zip business, and demonstrates the significant size, and early stage of the global BNPL opportunity. Zip is well on its way to becoming the first payment choice everywhere and everyday”.
