THE GLOBAL PROBLEM

“A significant proportion of the technology supporting cross-border payment systems **remains on legacy platforms** built when paper-based payment processes were first migrated to electronic systems¹”.

Bank of England

June 2021

Reporting financial transactions to regulators is a *highly manual process*, using people, spreadsheets and emails

1 Identitii transforms unstructured and incomplete financial information into *one single view of all transactions*

ONE SINGLE VIEW
OF ALL TRANSACTIONS

2 Then automates the processing and submission of complete and *accurate reports to regulators*

Identitii works with ageing legacy technology, to *submit complete and accurate reporting to regulators*

- 1. Our cloud-hosted platform uploads disparate payment data
- 2. Automates the repair of missing or incomplete information
- 3. Builds a complete and auditable view of all transactions
- 4. Reports accurately to regulators

Focus now

Expansion Markets

Diverse go-to-market strategy, focused on direct and indirect sales channels, and acquiring payments industry expertise

Large enterprise sales opportunities will increase, following several global early-adopter customers, further expedited by focus on multiple engagement points, with additional SaaS revenue generating linear income

Hiring payments industry experts

Sales, product and technology people who understand the problem and the buying cycle

Direct focus on enterprise clients

Sales and marketing to global and local banks, their problem owners and their budget holders

SaaS to capture non-enterprise

Large number of smaller non-bank clients increase revenue and cash flow predictability

Partnerships to grow distribution

Complimentary sales and marketing with firms like Deloitte, PwC and Ashurst Risk Advisory

Highly active with industry bodies

Memberships and sponsorship engagements with RegTech Association, ACAMS and more

Leverage fintech challenge wins

Technology recognised by SWIFT, Mastercard, Citi, Deloitte, Accenture, KPMG, Regulation Asia

Our enterprise and SaaS pipelines are growing

Overcoming the long lead-times associated with enterprise sales, by adding a parallel SaaS focus

Twin-track growth focus:

Enterprise, large transaction-volume reporting entities:

- Global banks
- Australian banks

SaaS, smaller transaction-volume reporting entities:

- Credit Unions
- Money Remitters
- Super Funds
- Insurance Funds
- Casinos

Uniquely placed across the competitive landscape

Identitii sits at the intersection of financial crime compliance solutions and internal teams working with legacy technologies

We are uniquely focused on enhancing technology already in-use and reducing manual processes – to automate the preparation and submission of financial transaction reports to AUSTRAC and other country regulators.

Identitii's concept of a globally connected ecosystem *granted US patent*

uspto

Granted in 2021, recognising a globally connected ecosystem for:

- rich, tokenised payments information,
- accessible via enterprise blockchain,
- universally compatible with legacy networks such as SWIFT and ACH,
- and new networks such as RippleNet and Mastercard Cross-Border Services.

WILSON SONSINI

Identitii is progressing an IP strategy written with leading United States IP law firm Wilson Sonsini looking at avenues to:

- commercialise the patent,
- including direct partnerships,
- indirect licensing,
- and the potential for enforcement, including infringement litigation.

Identitii has patent applications live in several other key global markets:

- is progressing the filing of continuation claims,
- to continue to expand the scope of the original patent, as technology,
- regulatory frameworks,
- market demand evolves around the world.

A phased land-and-expand *growth strategy*

Growing customer numbers and selling multiple products, as we work towards longer-term vision of deploying our US patent

Total Addressable Market represents opportunity on the basis that 100% of reporting entities in each market use Identitii's platform. This is calculated by taking the total reporting entities in each market (sourced from 4. and 6. left) segmenting them into the tiers on Identitii's pricing table (see 5. left) and multiplying out potential total addressable market.
