About Cirralto

Cirralto Limited (ASX:CRO) is a transaction services business supplying industries with a broad range of B2B payment services, digital trading software and integrated solutions. Our goal is to convert eft payments to card payments utilising the BPSP engagement coupled with our payments collaboration framework. Our competitive advantages deliver customers end-to-end e-invoicing integration, rapid ordering, digital trust and automated reconciliation.

Cirralto supplies its customers a recipe of integrated software to create a vertical market standard operating environment (SOE) that enable the effective and seamless transfer of data from multiple, disparate software systems in one standardised technology solution, such as SpendRetail. Cirralto has licensing

agreements with third party software vendors that enable it to provide integrated SOE solutions to its customers.

For investors seeking information on the Company's activities that relate to marketing, customer events and other acknowledgement of customer activities, this information will be posted to the Company's news section of the website and on social media channels with the handle #getSpenda, active on Twitter, LinkedIn, Instagram and FaceBook.

About Spenda

The Spenda solution is a family of products designed to support businesses in all their day-to-day activities. Unlike other software platforms that offer part of the solution, the Spenda suite improves efficiency and productivity in every area of business and has payments and finance baked into its core functionalities.

The Spenda suite is built on a framework of strong integrations at its core. The backend powerhouse that drives Spenda is an open-auth integration platform that enables customers to sync data across their cloud app ecosystem into their accounting and ERP software.

This engine can push and pull business data such as debtors, creditors, inventory and transactions (purchase orders, invoices, credit notes etc) in real-time or based on user-driven events. With Spenda businesses can connect to their customers and their catalogues to quickly and easily share data.

The Spenda product suite includes software to support; Point of sale, Inventory management, Procurement, Service management, Debt collection, Payment services, eCommerce and Catalogue sharing.

Spenda removes business inefficiencies allowing businesses to do the job once, with no double data entry and removes manual, paper-based processes that are time-consuming and prone to errors. On top of that, the product is mobile, with modules accessible on tablets and phones as well as desktop.
