

Important notices

Nature of Document. This presentation has been prepared and issued by Anova Metals Limited (Company) to provide general information about the Company. The information in this document is in summary form and should not be relied upon as a complete and accurate representation of any matters that a reader should consider in evaluating the Company. While management has taken every effort to ensure the accuracy of the material in this presentation, the Company and its advisers have not verified the accuracy or completeness of the material contained in this presentation.

Not an offer. This presentation and its contents are not an invitation, offer, solicitation or recommendation with respect to the purchase or sale of any securities in the Company in any jurisdiction and must not be distributed, transmitted, or viewed by any person in any jurisdiction where the distribution, transmission or viewing of this document would be unlawful under the securities or other laws of that or any other jurisdiction. This presentation is not a prospectus or any other offering document under Australian law (and will not be lodged with the Australian Securities and Investments Commission) or any other law.

Not financial product advice. Neither the Company nor any of its related bodies corporate is licensed to provide financial product advice in respect of the Company's securities or any other financial products. You should not act and refrain from acting in reliance on this presentation. Nothing contained in this presentation constitutes investment, legal, tax or other advice. This presentation does not take into account the individual investment objectives, financial situation and particular needs of Company shareholders. Before making a decision to invest in the Company at any time, you should conduct, with the assistance of your broker or other financial or professional adviser, your own investigation in light of your particular investment needs, objectives and financial circumstances and perform your own analysis of the Company before making any investment decision.

International offer restrictions. This presentation does not constitute an invitation or offer of securities for subscription, purchase or sale in the United States or any other jurisdiction in which such an offer would be illegal. The securities referred to in this presentation have not been, and will not be, registered under the U.S. Securities Act of 1933 as amended (the "Securities Act") or the securities laws of any state or other jurisdiction of the United States and may not be offered or sold in the United States unless the securities have been registered under the Securities Act (which the Company has no obligation to do or procure) or are offered and sold in a transaction exempt from, or not subject to, the registration requirements of the Securities Act and any other applicable securities laws. The distribution of this presentation in jurisdictions outside Australia may be restricted by law and you should observe any such restrictions. Persons who come into possession of this presentation who are not in Australia should observe any such restrictions. Any non-compliance with such restrictions may contravene applicable securities laws.

Disclaimer. No representation or warranty, express or implied, is made by the Company that the material contained in this presentation will be achieved or proved correct. Except for statutory liability which cannot be excluded, each of the Company, its directors, officers, employees, advisors and agents expressly disclaims any responsibility for the accuracy, fairness, sufficiency or completeness of the material contained in this presentation and excludes all liability whatsoever (including in negligence) for any loss or damage which may be suffered by any person as a consequence of any information in this presentation or any effort or omission therefrom. The Company will not update or keep current the information contained in this presentation or to correct any inaccuracy or omission which may become apparent, or to furnish any person with any further information. Any opinions expressed in the presentation are subject to change without notice.

Big Springs Project – Competent Person Statement. The information in this report that relates to Exploration Result for the Big Springs Project is based on information compiled by Dr. Geoffrey Xue. Dr. Xue is a full time employee of Anova and a member of the Australasian Institute of Mining and Metallurgy and has sufficient experience of relevance to the styles of mineralisation and types of deposits under consideration, and to the activities undertaken to qualify as Competent Persons as defined in the 2012 Edition of the Joint Ore Reserves Committee (JORC) Australasian Code for Reporting of Exploration Results, Mineral Resources and Ore Reserves. Dr. Xue consents to the inclusion in this report of the matters based on his information in the form and context in which they appear. The information in this report that relates to Mineral Resources for the Big Springs Project is based on information compiled by Mr Lauritz Barnes, Principal Consultant Geologist – Trepanier Pty Ltd. Mr Barnes is a shareholder of Anova. Mr Barnes is a member of the Australian Institute of Geoscientists and has sufficient experience of relevance to the styles of mineralisation and types of deposits under consideration, and to the activities undertaken to qualify as Competent Persons as defined in the 2012 Edition of the Joint Ore Reserves Committee (JORC) Australasian Code for Reporting of Exploration Results, Mineral Resources and Ore Reserves. Mr Barnes consents to the inclusion in this report of the matters based on his information in the form and context in which they appear.

Authorised for Release

This announcement was authorised for release by Dr. Mingyan Wang, Managing Director.

Gold exploration underway

High conviction target drilling & exploration underway at Big Springs

EXPOSURE TO PROLIFIC US GOLD PROVINCE

Big Springs is in Nevada, the most prolific gold province of the United States, 20km north of the Jerritt Canyon Gold Mine (+10Moz historical production) that was recently acquired by First Majestic Silver Corp (TSX:FR)

2

SIGNIFICANT EXISTING RESOURCE

Big Springs Mineral Resource estimate of 16 million tonnes @ 2.0g/t for 1.03 million ounces1

COMPREHENSIVE TARGETING STUDY COMPLETE

Detailed targeting study completed by world-renowned experts leads to generation of 18 near mine targets and 41 district targets (19 high potential district targets)

PRIMING FOR AGGRESSIVE 2022 DRILLING

Four high potential district targets within current Plan of Operations (**POO**) area. Expanded POO application will allow for drilling on a further 14 high potential district targets, with full permit anticipated to be received Q2 2022

NEAR TERM NEWS FLOW FROM 2021 DRILLING

5,100m RC program commenced October 2021 on six near mine targets and four district targets within current POO. Visuals encouraging with Carlin-style mineralisation identified in previously undrilled targets. First assays expected Q4 2021

WELL FUNDED

Strong cash position of approximately A\$6.3M (30 September 2021)

Board of Directors

Eddie Rigg Non-Executiv Chairman	/e

- Investment banker with over 30 years experience focused on natural resources companies
- Co-Founder, Executive Chairman and Head of ECM at Argonaut

Dr Mingyan Wang Managing Director

- Geologist with over 20 years' experience in the mining and resources industry specialising in identifying projects, exploration, management and business development
- Extensive experience in management of listed and unlisted resources companies in Australia, China and Peru

John Davis Non-Executive Director

- Geologist with more than 30 years' experience in exploration and development in Australia and Southern Africa
- Extensive experience in the gold sector, from regional exploration, resource development to production

Dr. Amanda Buckingham Non-Executive Director

- More than 25 years' experience in mineral exploration
- Founded Fathom Geophysics in 2007, an industry leading geophysical group that has developed worlds best technology for targeting under cover and significantly increasing the chances of discovery

Recent corporate activity

Board changes and Company funded for high conviction exploration at Big Springs

)	Board Change	 Dr. Amanda Buckingham was appointed as a non-executive director (refer AWV announcement dated 14 October 2021). Dr Buckingham has been involved in mineral exploration for more than 25 years, founded Fathom Geophysics in 2007, an industry leading geophysical group that has developed worlds best technology for targeting under cover and significantly increasing the chances of discoveries. Dr. Buckingham was one of the founders of Cygnus Gold Ltd and Desert Metals Ltd Mr. John Davis has advised the Board that he will resign as a non-executive Director of Anova with effect at the conclusion of this Meeting. John has been a valued member of the board since the merger between Anova and Exterra Resources Ltd in 2017, since making considerable contributions to the Company
)	Early Payment of Deferred Consideration	 Anova received A\$3.5 million as consideration for discharging LGA's obligation to pay deferred consideration of A\$4 million on the sale of the Second Fortune Gold Mine
)	Strong Financial Position	 A\$6.3 million cash and no debt (30 September 2021)

Big Springs Gold Project (100% Anova) overview

A prolific gold province

Tier 1 mining jurisdiction and primary gold production centre in the US

Why Nevada?

- World-class gold endowment
- Highly established mining district responsible for more than two thirds of the gold production in the United States
 - Tier 1 operating jurisdiction and domicile
 - Attractive fiscal regime

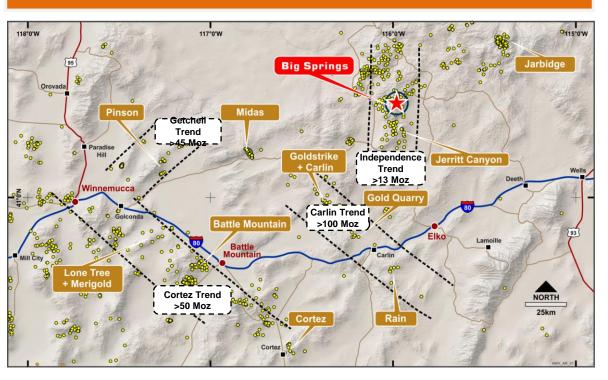

Why Big Springs?

- Big Springs is a Carlin-style deposit, located in proximity to similar deposits with significant historical production
- Limited exploration conducted since 2007
- 20km north of the Jerritt Canyon Gold Mine (**JC**) along the Independence Trend. JC has produced over 10Moz since 1981 with a remaining Resource of 1.2Moz¹
- JC recently acquired by First Majestic (TSX:FR)^{2,3}

Why the renewed exploration focus?

- Big Springs had not previously benefited from modern, systematic evaluation approach to exploration prior to the commencement of Anova's 2020 exploration program
- This approach has led to a clear pipeline of attractive drill targets
- Exploration previously limited to Sammy's Creek Area

A PROLIFIC GOLD PROVINCE

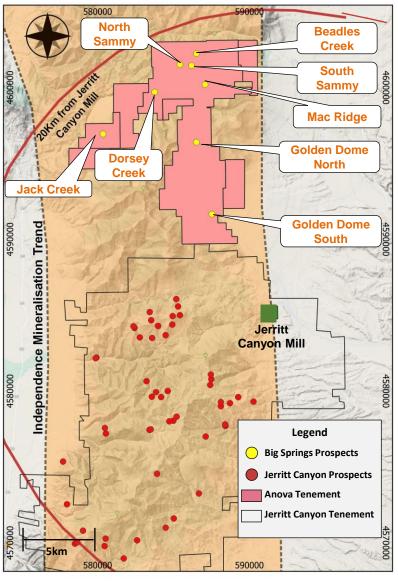

North-East Nevada Carlin Deposit Project Map with Gold Endowments of Major Trends

- 1. First Majestic Silver Corp (TSX:FR) NI 43-101 Technical report, dated 30 April 2021.
- See AWV announcement dated 15 March 2021.
- The Jerritt Canyon processing plant has a capacity of 4,000 tpd and expects to achieve mill throughput of 2,500 tpd in 2021 (see First Majestic Corporate Presentation updated 8 November 2021).

Big Springs snapshot

LOCATION	 80km north of Elko in north-east Nevada, USA, and 20km north of the 1.5Mtpa Jerritt Canyon Gold Mine
RESOURCE	 16Mt at 2.0g/t Au for 1.03Moz (at 1 g/t cut-off)¹ 3.1Mt @ 4.2 g/t for 415Koz (at 2.5 g/t cut-off)¹
HISTORY	 386Koz produced between 1987 and 1993 Production ceased due to low gold prices In 2017, Stage 1 mining operation was fully permitted for South Sammy
OPPORTUNITY	 Limited systematic exploration completed since 2007 Numerous high-quality near mine and district targets First extensive, modern geophysical surveys completed last year, covering entire tenement package High potential, high priority drill targets refined through comprehensive targeting study for aggressive testing now underway

2021 Exploration Overview & Strategy

Anova primed for aggressive resource expansion and new target drilling

- Comprehensive targeting study identified 18 near mine targets and 41 district targets (19 high potential)
- Led by world renowned experts Dr Steve Garwin and Dr Amanda Buckingham

- Approximately 5,500 samples collected across three key areas: Mac Ridge North, Jacks Creek and Golden Dome South.
- Improves understanding of targets identified in targeting study

Surface geology mapping also now completed at Crusher Zone and Beadles Creek with encouraging indicators of gold mineralisation observed

240 new mining claims pegged bringing total prospecting land package at Big Springs Gold Project to 81 km²

Exploration Overview

- ✓ High conviction targets generated
- ✓ Geological understanding of Big Springs further enhanced through mapping & soil sampling
- ✓ Tenure expanded via pegging of new claims. New claim areas chosen based on targeting study outcomes

- RC drilling program for 2021 commenced in October for approximately 5,100 metres focusing on 6 near mine targets & 4 district targets
- Encouraging visuals demonstrates Carlin-style mineralisation

- Key studies being finalised for the **expanded Plan of Operation (POO)** application
- Expanded POO permit anticipated by end Q2 2022
- Expanded POO to allow for aggressive drilling and other exploration programs on
 14 additional high potential district targets

Drilling Strategy

- ✓ Drilling within current POO area underway
- ✓ Expanded POO to allow for broader district target drilling
- ✓ Drilling designed to expand Mineral Resources & test for new discoveries

1 Targeting Study

 Study led by world renowned experts Dr Steve Garwin and Dr Amanda Buckingham

18 Near mine targets

- Near-mine targets (key structural intersections) show potential to expand existing Mineral Resources and delineate ore shoots with >5g/t gold and zones of structural intersection
- Six near mine targets to be tested in 2021, including North Shoot at North Sammy and 401 deposit at South Sammy

41 District targets

- District targets were identified as areas of anomalous gravity response, favourable geology for carlin style mineralisation and historical geochemistry anomalies
- Nineteen high potential district targets prioritised for surface exploration and drilling activities to commence following receipt of expanded POO
- See Anova Investor Presentation dated 27 May 2021 for detailed overview of Targeting Study

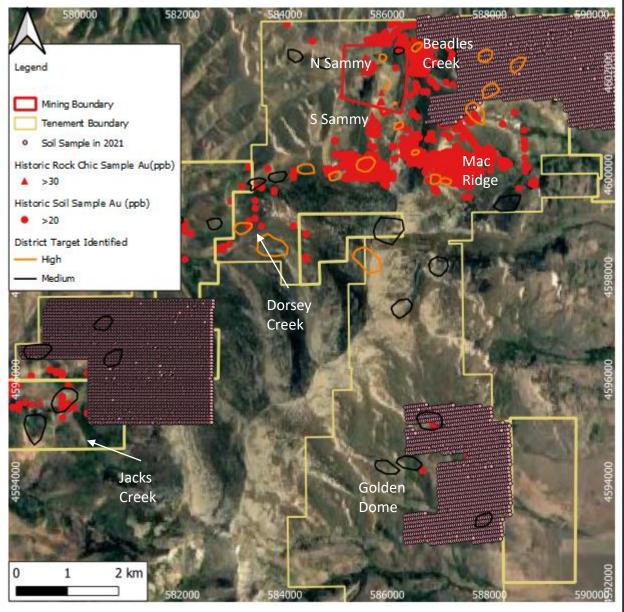

Eighteen near mine targets identified (Six to be tested in the 2021 drilling program)

Soil Sampling

Approximately 5,500 samples collected over an area of approximately 17 km²

- The purpose of the 2021 soil sampling program is to:
 - extend and refine the current anomalism identified from historical soil and rock chip sampling programs; and
 - provide more information to support design of drilling program & other exploration activities for 2022
- The key areas that were explored across this soil sampling program were Mac Ridge North,
 Golden Dome South, and the areas connecting newly acquired tenure between Jacks Creek and Dorsey Creek
 - Assay results from soil samples anticipated Q4 2021

Plan View of Soil samples at Mac Ridge North

Surface Mapping

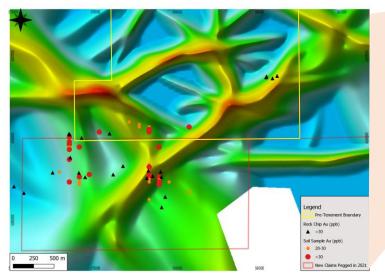

Surface Geology Mapping: Identification of strong FeOx alteration with jarosite and silicification developed along fault south of Crusher Zone

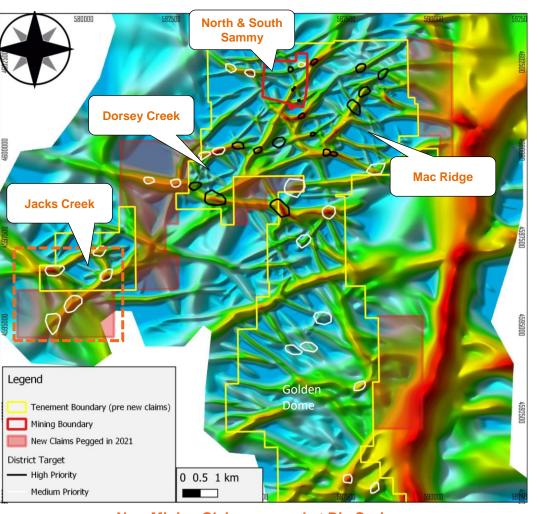

- Surface geology mapping completed at Crusher Zone and Beadles Creek North
- The purpose of the mapping activities was to refine Anova's understanding of the district targets identified in the targeting study
- Signals of Carlin-style gold mineralisation were identified, particularly to the south of Crusher Zone, a high potential district target being tested in the 2021 drilling program
- Mineralisation at Beadles Creek has been interpreted to extend further north as a result of the mapping observations

4 New Claims Pegged

- 240 mining claims pegged in areas surrounding the existing land package. Big Springs tenement area expanded to 81km²
- Historical soil samples and rock chip samples have picked up strong gold anomalies west of Dorsey Creek and also south of Jacks Creek
- 2021 surface mapping has identified alteration within the new claims west of Dorsey Creek, which is consistent with the anomalies identified from historic soil samples

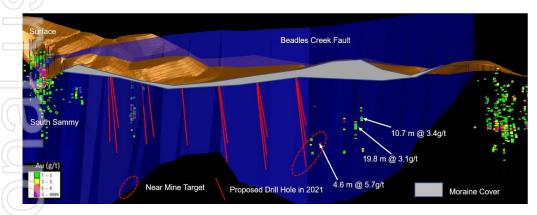

Strong Au anomalies identified from historic soil and rock chip sampling in new claims at Jack's Creek

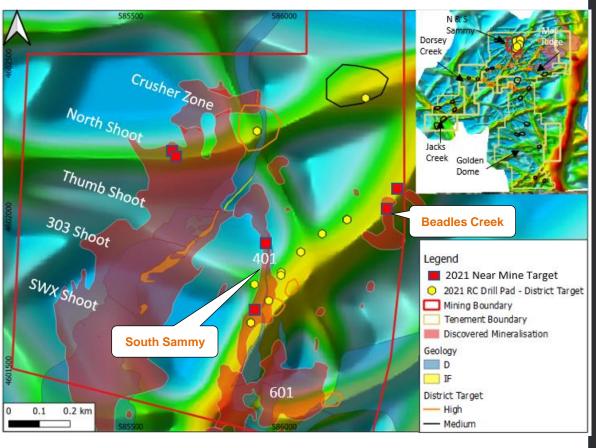

New Mining Claims pegged at Big Springs

5 2021 Drilling Program

- RC drilling 5,100 metres (~26 holes planned)
- Purpose is to test six near mine & four district targets from the targeting study and to test potential mineralisation extensions from the 2020 drilling program
- All drilling is within current permitted POO area
- 1,300m of program completed (8 holes) to date across two district targets:
 - 1) a target south of Crusher Zone; and
 - 2) the connection between Beadles Creek and South Sammy

Proposed drill holes in connection between Beadles Creek and South Sammy

Plan View of 2021 Drilling Program

5 2021 Drilling Program – Crusher Zone South

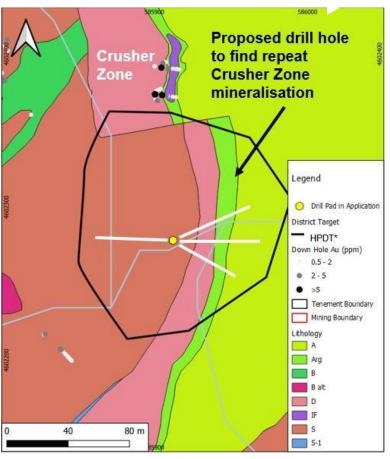

- Drilling south of Crusher Zone is targeting the mineralisation at Unit D and the intersection between the Argillic Fault and E-W fault
- Visual interpretation suggests Carlin style mineralisation through the display of silicification, argillic alteration intense fractures & sulphide alteration and quartz sulphide veins in 3 out of 5 holes drilled south of Crusher Zone
- This visual interpretation is consistent with 2021 surface geology mapping
- Assays are pending, and expected to be released to market in December 2021

Drilling at Big Springs

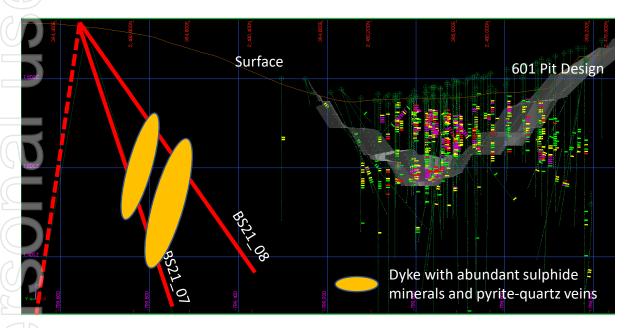

Intense sulphide alteration discovered south of Crusher Zone

Proposed drilling program in 2021 to test advanced targets between Briens Fault Zone and Crusher Zone

5 2021 Drilling Program – Beadles Creek

- 15 holes along the Beadles Creek target area were planned to investigate gold mineralisation between Beadles Creek and South Sammy
- Two holes have been completed to date at the southern end of South Sammy's 601 deposit, being BS21-07 and BS21-08
- Two parallel intermediate intrusive dykes with strong sulphide alteration and bleached argillic alteration have been observed through the visual interpretation of BS21-07 and BS21-08. Fine grain pyrite can be up to 10% in the dyke, either in the form of disseminated or veins, which is consistent with high grade gold mineralisation at North Sammy
- These holes represent a new discovery that is proximate to the fully permitted 601 open pit & underground deposit, which has the potential to add gold ounces to the mining inventory at the 601 operation

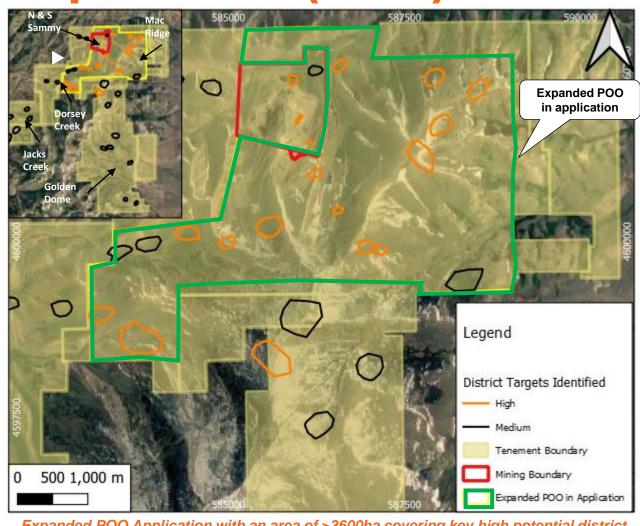

16

6 Expanded Plan of Operations (POO)

- Anova to submit application for expanded Plan of Operations area
 (Expanded POO) to Forrest Services
- Expanded POO will permit Anova to commence drilling and other extensive exploration on a further 14 high potential district targets in addition to the 4 within the current Plan of Operations area
- Key studies required for application currently being finalised
- Application aimed for submission by endQ4 CY2021
- Approval for Extended POO anticipatedby end Q2 CY2022

Expanded POO Application with an area of >3600ha covering key high potential district targets

Anova: A well funded gold explorer

A valuable position in a Tier 1 gold province

Established 1Moz Au Mineral Resource with clear growth potential

High priority targets identified from comprehensive study

Aggressive exploration programs commenced for resource extension and testing new targets

Well funded with strong major shareholder support

New and highly motivated Board & Management team

BIG SPRINGS GOLD PROJECT JORC (2012) MINERAL RESOURCE SUMMARY¹
