The Securities offered by this Prospectus should be considered as highly speculative.

IMPORTANT NOTICE

This Prospectus is dated 6 December 2021 and was lodged with the ASIC on that date. The ASIC, ASX and their respective officers take no responsibility for the contents of this Prospectus or the merits of the investment to which this Prospectus relates.

No Securities may be issued on the basis of this Prospectus later than 13 months after the date of this Prospectus.

No person is authorised to give information or to make any representation in connection with this Prospectus, which is not contained in this Prospectus. Any information or representation not so contained may not be relied on as having been authorised by the Company in connection with this Prospectus.

It is important that investors read this Prospectus in its entirety and seek professional advice where necessary. The Securities offered by this Prospectus should be considered as highly speculative.

Applications for Securities offered pursuant to this Prospectus can only be made by an original Entitlement and Acceptance Form or Shortfall Application Form.

This Prospectus is a transaction specific prospectus for an offer of continuously quoted securities (as defined in the Corporations Act) and has been prepared in accordance with section 713 of the Corporations Act. It does not contain the same level of disclosure as an initial public offering prospectus and is only required to contain information in relation to the effect of the issue of securities on a company and the rights attaching to the securities. It is not necessary to include general information in relation to all of the assets and liabilities, financial position, profits and losses or prospects of the issuing company.

Representations contained in this Prospectus are made taking into account that the Company is a disclosing entity for the purposes of the Corporations Act and certain matters are publicly available information or may reasonably be expected to be known to investors and professional advisers whom prospective investors may consult.

No Investment Advice

The information contained in this Prospectus is not financial product advice or investment advice and does not take into account your

financial or investment objectives, financial situation or particular needs (including financial or taxation issues). You should seek professional advice from your accountant, financial adviser, stockbroker, lawyer or other professional adviser before deciding to subscribe for Securities under this Prospectus to determine whether it meets your objectives, financial situation and needs.

Forward-looking statements

This Prospectus contains forward-looking statements which are identified by words such as 'may', 'could', 'believes', 'estimates', 'targets', 'expects', or 'intends' and other similar words that involve risks and uncertainties.

These statements are based on an assessment of present economic and operating conditions, and on a number of assumptions regarding future events and actions that, as at the date of this Prospectus, are expected to take place.

Such forward-looking statements are not guarantees of future performance and involve known and unknown risks, uncertainties, assumptions and other important factors, many of which are beyond the control of the Company, the Directors and the Company's management.

The Company cannot and does not give any assurance that the results, performance or achievements expressed or implied by the forward-looking statements contained in this Prospectus will actually occur and investors are cautioned not to place undue reliance on these forward-looking statements.

The Company has no intention to update or revise forward-looking statements, or to publish prospective financial information in the future, regardless of whether new information, future events or any other factors affect the information contained in this Prospectus, except where required by law.

These forward-looking statements are subject to various risk factors that could cause the Company's actual results to differ materially from the results expressed or anticipated in these statements. These risk factors are set out in Section 5.

Overseas shareholders

This Offer does not, and is not intended to, constitute an offer in any place or jurisdiction in which, or

to any person to whom, it would not be lawful to make such an offer or to issue this Prospectus.

It is not practicable for the Company to comply with the securities laws of overseas jurisdictions having regard to the number of overseas Shareholders, the number and value of Shares these Shareholders would be offered and the cost of complying with regulatory requirements in each relevant jurisdiction. Accordingly, the Offer is not being extended and Securities will not be issued to Shareholders with a registered address which is outside Australia or New Zealand.

For further information on overseas Shareholders please refer to Section 2.10.

Continuous disclosure obligations

The Company is a "disclosing entity" (as defined in section 111AC of the Corporations Act) for the purposes of section 713 of the Corporations Act and, as such, is subject to regular reporting and disclosure obligations. Specifically, like all listed companies, the Company is required to continuously disclose any information it has to the market which a reasonable person would expect to have a material effect on the price or the value of the Securities.

This Prospectus is intended to be read in conjunction with the publicly available information in relation to the Company which has been notified to ASX and does not include all of the information that would be included in a prospectus for an initial public offering of securities in an entity that is not already listed on a stock exchange. Investors should therefore have regard to the other publicly available information in relation to the Company before making a decision whether or not to invest.

Having taken such precautions and having made such enquires as are reasonable, the Company believes that it has complied with the general and specific requirements of ASX as applicable from time to time throughout the three months before the issue of this Prospectus which required the Company to notify ASX of information about specified events or matters as they arise for the purpose of ASX making that information available to the stock market conducted by ASX.

Please refer to Section 6.2 for further details.

Electronic Prospectus

A copy of this Prospectus can be downloaded from the website of the Company at <https://solutions.openlearning.com/>. If you are accessing the electronic version of this Prospectus for the purpose of making an investment in the Company, you must be an Australian or New Zealand resident and must only access this Prospectus from within Australia or New Zealand.

The Corporations Act prohibits any person passing onto another person an Application Form unless it is attached to a hard copy of this Prospectus, or it accompanies the complete and unaltered version of this Prospectus. The Company reserves the right not to accept an Application Form from a person if it has reason to believe that when that person was given access to the electronic Application Form, it was not provided together with the electronic Prospectus and any relevant supplementary or replacement prospectus or any of those documents were incomplete or altered.

Company Website

No documents or other information available on the Company's website is incorporated into this Prospectus by reference.

Financial forecasts

The Directors have considered the matters set out in ASIC Regulatory Guide 170 and believe that they do not have a reasonable basis to forecast future earnings on the basis that the operations of the Company are inherently uncertain. Accordingly, any forecast or projection information would contain such a broad range of potential outcomes and possibilities that it is not possible to prepare a reliable best estimate forecast or projection.

Clearing House Electronic Sub-Register System (CHES) and Issuer Sponsorship

The Company will apply to participate in CHES, for those investors who have, or wish to have, a sponsoring stockbroker. Investors who do not wish to participate through CHES will be issuer sponsored by the Company.

Electronic sub-registers mean that the Company will not be issuing

certificates to investors. Instead, investors will be provided with statements (similar to a bank account statement) that set out the number of Securities issued to them under this Prospectus. The notice will also advise holders of their Holder Identification Number or Security Holder Reference Number and explain, for future reference, the sale and purchase procedures under CHES and issuer sponsorship.

Electronic sub-registers also mean ownership of securities can be transferred without having to rely upon paper documentation. Further monthly statements will be provided to holders if there have been any changes in their security holding in the Company during the preceding month.

Photographs and Diagrams

Photographs used in this Prospectus which do not have descriptions are for illustration only and should not be interpreted to mean that any person shown endorses the Prospectus or its contents or that the assets shown in them are owned by the Company. Diagrams used in this Prospectus are illustrative only and may not be drawn to scale.

1.3 Key Risk Factors

Prospective investors should be aware that subscribing for Securities involves a number of risks and an investment in the Company should be considered as highly speculative. The future performance of the Company and the value of the Securities may be influenced by a range of factors, many of which are largely beyond the control of the Company and the Directors. The key risks associated with the Company's business, the industry in which it operates and general risks applicable to all investments in listed securities and financial markets generally are set out in Section 5.

1.4 Directors' Interests in Securities

While Ben Shields is a director of Alchemy Tribridge, he does not exercise control of Alchemy Tribridge and therefore does not hold a relevant interest in Securities held by it.

The Board advises that Mr Barry and Mr Buckingham intend to take up their full Entitlements and Mr Brimo intends to take up at least \$20,000 of his entitlement.

1.5 Details of Substantial Holders

Based on publicly available information as at the Record Date, those persons which (together with their associates) have a relevant interest in 5% or more of the Shares on issue are set out below:

Shareholder	Shares	%
Alchemy Tribridge Sapphire Pty Ltd	31,182,796	15.80%
Magna Intelligent Sdn Bhd	11,030,058	5.59%

In the event all Entitlements are accepted there will be no change to the substantial holders on completion of the Offer.

1.6 Effect on Control

Based on current shareholding and Entitlements of Shareholders (including substantial Shareholders) as at the date of this Prospectus, regardless of the amount raised under the Offer, no Shareholder will increase their holding, to an amount in excess of 19.9% through applying for their Entitlements. In this regard, as set out in the announcement of 26 November 2021, Alchemy Tribridge has agreed with the Company that it will not acquire a Relevant Interest in excess of 19.9% as a result of participation in the Offer.

Further, as set out in Section 2.6, on the basis of the allocation policy, no person will acquire, through participation in the Shortfall Offer a holding of Shares of, or increase their holding to, an amount in excess of 19.9% of all the Shares on issue on completion of the Offer, including Alchemy Tribridge.

1.7 Potential dilution on non-participating Shareholders

In addition to potential control impacts set out in Section 1.6, Shareholders should note that if they do not participate in the Offer, their holdings are likely to be diluted by approximately 16.67% (as compared to their holdings and number of Shares on issue as at the date of this Prospectus).

For illustrative purposes, the table below shows how the dilution may impact the holdings of Shareholders:

Holder	Holding as at Record date	% at Record Date	Entitlements under the Offer	Holdings if Offer not taken Up	% post Offer
Shareholder 1	10,000,000	5.07%	1,666,667	10,000,000	4.34%
Shareholder 2	5,000,000	2.53%	833,333	5,000,000	2.17%
Shareholder 3	1,500,000	0.76%	250,000	1,500,000	0.65%
Shareholder 4	400,000	0.20%	66,667	400,000	0.17%
Shareholder 5	50,000	0.03%	8,333	50,000	0.02%

Notes:

1. This is based on a share capital of 197,358,300 Shares as at the Record Date and assumes no Options currently on issue or Performance Rights are exercised.
2. The dilutionary effect shown in the table is the maximum percentage on the assumption that those Entitlements not accepted by Eligible Shareholders are placed under the Shortfall Offer. In the event all Entitlements are not accepted and some or all of the resulting Shortfall was not subsequently placed, the dilution effect for each Shareholder not accepting their Entitlement would be a lesser percentage.

2.3 Payment options

(a) **By BPAY®**

For payment by BPAY®, please follow the instructions on the Entitlement and Acceptance Form. You can only make a payment via BPAY® if you are the holder of an account with an Australian financial institution

that supports BPAY® transactions. Please note that should you choose to pay by BPAY®:

- (i) you do not need to submit the Entitlement and Acceptance Form but are taken to have made the declarations on that Entitlement and Acceptance Form;
- (ii) if you do not pay for your Entitlement in full, you are deemed to have taken up your Entitlement in respect of such whole number of Shares which is covered in full by your Application monies; and
- (iii) if you pay more than is required to subscribe for your Entitlement, you will be taken to have applied for Shortfall Shares (if any) under the Shortfall Offer, to the extent of the excess.

You should be aware that your own financial institution may implement earlier cut-off times with regard to electronic payment, and you should therefore take this into consideration when making payment. **It is your responsibility to ensure that funds submitted through BPAY® are received by 5:00 PM (AEDT) on the Closing Date. The Company shall not be responsible for any delay in the receipt of the BPAY® payment.**

Guidance where you have more than one CRN (Shareholding of Shares)

If you have more than one shareholding of Shares and consequently receive more than one Entitlement and Acceptance Form, when taking up your Entitlement in respect of one of those Shareholdings only use the CRN specific to that Shareholding as set out in the applicable Entitlement and Acceptance Form. **Do not use the same CRN for more than one of your Shareholdings.** This can result in your Application monies being applied to your Entitlement in respect of only one of your Shareholdings (with the result that any Application in respect of your remaining Shareholdings will not be valid).

(b) By Electronic Funds Transfer (overseas applicants)

For payment by Electronic Funds Transfer (**EFT**) for overseas Eligible Shareholders, please follow the instructions on the Entitlement and Acceptance Form. You can only make a payment via EFT if you are the holder of an account that supports EFT transactions to an Australian bank account. Please note that should you choose to pay by EFT:

- (i) you do not need to submit the Entitlement and Acceptance Form but are taken to have made the declarations on that Entitlement and Acceptance Form;
- (ii) if you do not pay for your Entitlement in full, you are deemed to have taken up your Entitlement in respect of such whole number of Shares which is covered in full by your Application monies; and
- (iii) if you pay more than is required to subscribe for your Entitlement, you will be taken to have applied for Shortfall Shares (if any) under the Shortfall Offer, to the extent of the excess.

(c) **By Cheque**

Payment by cheque or cash will not be accepted.

2.4 Implications of an acceptance

Returning a completed Entitlement and Acceptance Form or paying any Application monies by BPAY® or EFT will be taken to constitute a representation by you that:

- (a) you have received a copy of this Prospectus and the accompanying Entitlement and Acceptance Form, and read them both in their entirety;
- (b) you acknowledge that once the Entitlement and Acceptance Form is returned, or a BPAY® or EFT payment instruction is given in relation to any Application monies, the application may not be varied or withdrawn except as required by law.

2.5 Minimum subscription

There is no minimum subscription.

2.6 Shortfall Offer

Any Entitlement not taken up pursuant to the Offer will form the Shortfall Offer (**Shortfall Shares**). The Shortfall Offer is a separate offer made pursuant to this Prospectus and will remain open for up to three months following the Closing Date. The issue price for each Share to be issued under the Shortfall Offer shall be \$0.093 being the price at which Shares have been offered under the Offer.

If you do not wish to take up any part of your Entitlement you are not required to take any action. That part of your Entitlement not taken up will form part of the Shortfall Offer and potentially be allocated to other Eligible Shareholders or other third parties as part of the Shortfall Offer. The Shortfall Offer will only be available where there is a Shortfall between applications received from Eligible Shareholders and the number of Shares proposed to be issued under the Offer.

Eligible Shareholders who wish to subscribe for Securities above their Entitlement are invited to apply for Shortfall Shares under the Shortfall Offer by completing the appropriate section on their Entitlement and Acceptance Form or by making payment for such Shortfall Shares in accordance with Sections 2.3.

The Board presently intends to allocate Shortfall Shares as follows:

- (a) to Eligible Shareholders who apply for an excess of their full Entitlement, so long as the issue of Shortfall Shares to that Eligible Shareholder would not take their voting power to in excess of 19.99%; and
- (b) to other parties identified by the Directors, which may include parties who are not currently Shareholders.

No Shares will be issued to a party under the Shortfall Offer if the effect would be to increase that party's voting power in the Company to an amount greater than 19.99%.

While it is intended that priority will be given to Eligible Shareholders when allocating Shortfall Shares, the Company reserves the right to issue an Eligible Shareholder a lesser number of Shortfall Shares than applied for or no Shortfall

Shares at all. Any decision with respect to allocation of Shortfall Shares will be based on the following:

- (a) the number of Shortfall Shares applied for by particular applicants;
- (b) the timeliness of the application for Shortfall Shares;
- (c) the overall level of demand under the Shortfall Offer;
- (d) the Company's desire to establish a wide spread of investors, including institutional investors, and for an active trading market following its listing on ASX; and
- (e) any other factors that the Company determines.

All decisions regarding the allocation of Shortfall Shares will be made by the Directors and will be final and binding on all applicants under the Shortfall Offer; as such there is no guarantee that any Shortfall Shares applied for will be issued to Eligible Shareholders.

4.1 Rights and liabilities attaching to Shares

The following is a summary of the more significant rights and liabilities attaching to the Shares being offered pursuant to this Prospectus. This summary is not exhaustive and does not constitute a definitive statement of the rights and liabilities of Shareholders. To obtain such a statement, persons should seek independent legal advice.

Full details of the rights and liabilities attaching to Shares are set out in the Constitution, a copy of which is available for inspection at the Company's registered office during normal business hours.

(a) General meetings

Shareholders are entitled to be present in person, or by proxy, attorney or representative to attend and vote at general meetings of the Company.

Shareholders may requisition meetings in accordance with section 249D of the Corporations Act and the Constitution of the Company.

(b) Voting rights

Subject to any rights or restrictions for the time being attached to any class or classes of shares, at general meetings of shareholders or classes of shareholders:

- (i) each Shareholder entitled to vote may vote in person or by proxy, attorney or representative;
- (ii) on a show of hands, every person present who is a Shareholder or a proxy, attorney or representative of a Shareholder has one vote; and
- (iii) on a poll, every person present who is a Shareholder or a proxy, attorney or representative of a Shareholder shall, in respect of each fully paid Share held by him, or in respect of which he is appointed a proxy, attorney or representative, have one vote for each Share held, but in respect of partly paid shares shall have such number of votes as bears the same proportion to the total of such Shares registered in the Shareholder's name as the amount paid (not credited) bears to the total amounts paid and payable (excluding amounts credited).

(c) Dividend rights

Subject to the rights of any preference Shareholders and to the rights of the holders of any shares created or raised under any special arrangement as to dividend, the Directors may from time to time declare a dividend to be paid to the Shareholders entitled to the dividend which shall be payable on all Shares according to the proportion that the amount paid (not credited) is of the total amounts

paid and payable (excluding amounts credited) in respect of such Shares.

The Directors may from time to time pay to the Shareholders any interim dividends as they may determine. No dividend shall carry interest as against the Company. The Directors may set aside out of the profits of the Company any amounts that they may determine as reserves, to be applied at the discretion of the Directors, for any purpose for which the profits of the Company may be properly applied.

Subject to the ASX Listing Rules and the Corporations Act, the Company may, by resolution of the Directors, implement a dividend reinvestment plan on such terms and conditions as the Directors think fit and which provides for any dividend which the Directors may declare from time to time payable on Shares which are participating Shares in the dividend reinvestment plan, less any amount which the Company shall either pursuant to the Constitution or any law be entitled or obliged to retain, be applied by the Company to the payment of the subscription price of Shares.

(d) **Winding-up**

If the Company is wound up, the liquidator may, with the authority of a special resolution, divide among the Shareholders in kind the whole or any part of the property of the Company, and may for that purpose set such value as he considers fair upon any property to be so divided, and may determine how the division is to be carried out as between the Shareholders or different classes of Shareholders.

The liquidator may, with the authority of a special resolution, vest the whole or any part of any such property in trustees upon such trusts for the benefit of the contributories as the liquidator thinks fit, but so that no Shareholder is compelled to accept any shares or other securities in respect of which there is any liability.

(e) **Shareholder liability**

As the Shares issued will be fully paid shares, they will not be subject to any calls for money by the Directors and will therefore not become liable for forfeiture.

(f) **Transfer of shares**

Generally, shares in the Company are freely transferable, subject to formal requirements, the registration of the transfer not resulting in a contravention of or failure to observe the provisions of a law of Australia and the transfer not being in breach of the Corporations Act and the ASX Listing Rules.

(g) **Future increase in capital**

The issue of any new Shares is under the control of the Directors of the Company. Subject to restrictions on the issue or grant of securities contained in the ASX Listing Rules, the Constitution and the Corporations Act (and without affecting any special right previously conferred on the holder of an existing share or class of shares), the Directors may issue Shares as they shall, in their absolute discretion, determine.

(h) **Variation of rights**

5. RISK FACTORS

5.1 Introduction

The Shares offered under this Prospectus should be considered as highly speculative and an investment in the Company is not risk free.

The Directors strongly recommend that prospective investors consider the risk factors set out in this Section 5, together with all other information contained in this Prospectus.

The future performance of the Company and the value of the Securities may be influenced by a range of factors, many of which are largely beyond the control of the Company and the Directors. The key risks associated with the Company's business, the industry in which it operates and general risks applicable to all investments in listed securities and financial markets generally are described below.

The risks factors set out in this Section 5, or other risk factors not specifically referred to, may have a materially adverse impact on the performance of the Company and the value of the Shares. This Section 5 is not intended to provide an exhaustive list of the risk factors to which the Company is exposed.

Before determining whether to invest in the Company you should ensure that you have a sufficient understanding of the risks described in this Section 5 and all of the other information set out in this Prospectus and consider whether an investment in the Company is suitable for you, taking into account your objectives, financial situation and needs.

If you do not understand any matters contained in this Prospectus or have any queries about whether to invest in the Company, you should consult your accountant, financial adviser, stockbroker, lawyer or other professional adviser.

5.2 Company specific

(a) Potential for dilution

Upon implementation of the Offer, assuming all Entitlements are accepted, no other Shares are issued including Options or Performance Rights are exercised prior to the Record Date the number of Shares in the Company will increase from 197,358,300 as at the Record Date to 230,251,350. This means that immediately after the Offer each Share will represent a lower proportion of the ownership of the Company.

It is not possible to predict what the value of the Company, a Share will be following the completion of the Offer being implemented and the Directors do not make any representation as to such matters.

The last trading price of Shares on ASX prior to the Prospectus being lodged of \$0.10 is not a reliable indicator as to the potential trading price of Shares after implementation of the Offer.

(b) Additional requirements for capital

The Company's capital requirements depend on numerous factors. Depending on the Company's ability to generate income from its operations, the Company may require further financing in addition to amounts raised under the Offer. Any additional equity financing will

dilute shareholdings, and debt financing, if available, may involve restrictions on financing and operating activities. If the Company is unable to obtain additional financing as needed, it may be required to reduce the scope of its operations and scale back its exploration programmes as the case may be. There is however no guarantee that the Company will be able to secure any additional funding or be able to secure funding on terms favourable to the Company.

(c) **Climate Risk**

There are a number of climate-related factors that may affect the operations and proposed activities of the Company. The climate change risks particularly attributable to the Company include:

- (i) the emergence of new or expanded regulations associated with the transitioning to a lower-carbon economy and market changes related to climate change mitigation. The Company may be impacted by changes to local or international compliance regulations related to climate change mitigation efforts, or by specific taxation or penalties for carbon emissions or environmental damage. These examples sit amongst an array of possible restraints on industry that may further impact the Company and its profitability. While the Company will endeavour to manage these risks and limit any consequential impacts, there can be no guarantee that the Company will not be impacted by these occurrences; and
- (ii) climate change may cause certain physical and environmental risks that cannot be predicted by the Company, including events such as increased severity of weather patterns and incidence of extreme weather events and longer-term physical risks such as shifting climate patterns. All these risks associated with climate change may significantly change the industry in which the Company operates.

(d) **Coronavirus (COVID-19)**

The outbreak of the coronavirus disease (**COVID-19**) is impacting global economic markets. The nature and extent of the effect of the outbreak on the performance of the Company remains unknown. The Company's Share price may be adversely affected in the short to medium term by the economic uncertainty caused by COVID-19. Further, any governmental or industry measures taken in response to COVID-19 may adversely impact the Company's operations and are likely to be beyond the control of the Company.

The COVID-19 pandemic may also give rise to issues, delays or restrictions in product processing and packaging and the Company's ability to deliver products to customers, which may result in cost increases or adverse impacts on sales. In addition, the effects of COVID-19 on the Company's Share price and global financial markets generally may also affect the Company's ability to raise equity or debt or require the Company to issue capital at a discount, which may in turn cause dilution to Shareholders or the COVID-19 pandemic may also give rise to issues, delays or restrictions in relation to land access and the Company's ability to freely move people and equipment to and from exploration projects may cause delays or cost increases. The effects of COVID -19 on the Company's Share price and global financial markets

generally may also affect the Company's ability to raise equity or debt or require the Company to issue capital at a discount, which may in turn cause dilution to Shareholders.

The Directors are monitoring the situation closely and have considered the impact of COVID-19 on the Company's business and financial performance. However, the situation is continually evolving, and the consequences are therefore inevitably uncertain. In compliance with its continuous disclosure obligations, the Company will continue to update the market in regard to the impact of COVID-19 on its revenue channels and any adverse impact on the Company. If any of these impacts appear material prior to close of the Offer, the Company will notify investors under a supplementary prospectus.

(e) **Going Concern Risk**

The Company's financial statements for the half-year ended 30 June 2021 (**Financial Statements**) have been prepared on a going concern basis, which contemplates the continuity of normal business activity and the realization and the settlement of liabilities in the ordinary course of business. The Company incurred a net loss for the half-year of \$3,037,234 and net operating cash outflows of \$2,403,795. As at 30 June 2021, the Company had accumulated losses of \$28,074,939, net current assets of \$3,856,665 and cash and cash equivalents of \$5,743,782.

The Company has prepared a cashflow forecast for the next 12 months that indicates a risk that the Company may not meet all its payment obligations. However, the Directors believe that it was appropriate for the Financial Statements to be prepared on a going concern basis after consideration of the following factors:

- (i) Increasing traction in revenue growth of the OL Platform subscription and delivery segments with increasing cash inflow anticipated from these segments;
- (ii) active management of the discretionary expenditure in line with funds availability; and
- (iii) raising of additional working capital through the issuance of securities and/or other funding (including the subscription by Alchemy Tribridge and funds raised under the Offer).

Accordingly, the Directors believe that the Company will be able to continue as a going concern and that it is appropriate to adopt the going concern basis in the preparation of the Financial Statements. If the Company is unsuccessful in implementing the above stated objectives, a material uncertainty exists, that may cast significant doubt on the Company's ability to continue operate as a going concern and its ability to recover assets and discharge liabilities in the normal course of business and at the amount shown in the Financial Statements.

Given the Company's recent capital raising activities, the Board does not consider that this is a material short-term risk. However, the Board will continue to monitor its financial position with a view to managing financial risk and seeking to ensure that the Company continues to operate as a going concern.

(f) **UNSW Transition Program Online**

A growing proportion of the Company's revenue is derived through the UNSW Transition Program Online (refer to ASX announcement dated 28 October 2020 for further details). This program is exposed to the international student market (particularly students in China, Indonesia, India and other Asian countries) and travel restrictions in Australia, as international students in the program may participate on the expectation of attending a university in person following completion of the program. In the event that the planned opening of Australia's borders to international arrivals is delayed or cancelled, the Company is exposed to a risk of reducing numbers of students electing to take up the program, which would impact the Company's future revenues.

Further, as this is an academic program, the Company is exposed to additional risks pertaining to delivery of academic programs, including ensuring that the Company meets minimum quality standards for delivery of the program, risks associated with reputational damage should the program not operate effectively and risks associated with identifying and engaging suitably qualified staff for delivery of the program.

(g) **Platform Agreement Risk**

To continue to grow the Company's business, it is important that existing education providers (**Providers**) renew their subscriptions when existing contracts expire and that the Company expands its relationships with existing customers. Providers have no obligation to renew their subscriptions and may decide not to renew their subscriptions with a similar contract period, at the same prices and terms, or at all.

The Company's ability to retain providers and expand deployments with them may decline or fluctuate as a result of a number of factors, including providers' satisfaction with the Company's learning platform (the **OL Platform**), the Company's customer support, prices, competitor prices and new feature releases. If Providers do not offer additional Courses or renew their existing subscriptions, renew on less favourable terms, or fail to continue to expand their engagement with the OL Platform, the Company's revenue may decline or grow less quickly than anticipated, which would harm its results of operations.

The Company's growth strategy is largely dependent upon increasing the number of Providers that use the OL Platform, in particular at institution and enterprise levels. As the Company seeks to increase its sales, it may face upfront sales costs and longer sales cycles, higher customer acquisition costs, more complex customer requirements, and volume discount requirements.

The Company may be required to enter into customised contractual arrangements with certain Providers, particularly large enterprises, in which the Company offers more favourable pricing terms in exchange for larger total contract values that accompany large deployments. As the Company continues to expand its sales efforts to institutional and enterprise Providers, it will need to continue to increase the investments it makes in sales and marketing, and there is no guarantee that investments will succeed and contribute to additional Provider acquisition and revenue growth. If the Company is unable to increase

sales to these Providers, its business, financial condition, and results of operations may suffer.

(h) **Demand for Cloud Based Learning**

The Company's future success will depend in part on the growth, if any, in the demand for cloud-based technology learning solutions. The widespread adoption of the OL Platform depends not only on strong demand for new forms of technology learning, but also for solutions delivered through a SaaS business model in particular.

The market for cloud-based learning solutions is less mature than the market for in-person learning, which many Providers currently utilise and Providers may be slow or unwilling to migrate from these legacy approaches. As such, it is difficult to predict Provider demand for the OL Platform, Provider adoption and renewal, the rate at which existing Providers expand their engagement with the OL Platform, the size and growth rate of the market for the OL platform, the entry of competitive products into the market, or the success of existing competitive products.

Even if Providers want to adopt a cloud-based technology learning solution, it may take them a long time to fully transition to this type of learning solution or they could be delayed due to budget constraints, weakening economic conditions, or other factors.

Even if market demand for cloud-based technology learning solutions generally increases, the Company cannot guarantee that adoption of the OL Platform will also increase. If the market for cloud-based technology learning solutions does not grow as the Company's expects or the OL Platform does not achieve widespread adoption, it could result in reduced course sign-ups, Provider attrition and decreased revenue, any of which would adversely affect the Company's business and results of operations.

(i) **OL Platform Risk**

The Company will need to ensure that the OL Platform continues to be updated to add new features as new technologies are developed. The success of any enhancement or new feature depends on several factors, including the Company's understanding of market demand, timely execution, successful introduction, and market acceptance. The Company may not successfully develop new content and features or enhance the OL Platform to meet customer needs or new content and features and enhancements may not achieve adequate acceptance in the market.

A prolonged service disruption affecting the OL Platform could damage the Company's reputation, expose the Company to liability, cause the Company to lose customers, or otherwise harm the Company's business. While alternative services are available, the Company may incur significant costs and delays if it is required to transition to a new service provider, and using alternative cloud infrastructure providers may provide services on terms less favourable to those currently offered.

Errors, failures, vulnerabilities, or bugs may occur in the OL platform, especially when updates are deployed or new features are rolled out. In addition, utilisation of the OL Platform in complicated, large-scale

customer environments may expose errors, failures, vulnerabilities or bugs. Any such errors, failures, vulnerabilities or bugs may not be found until after they are deployed. As a provider of technology learning solutions, the Company's brand and reputation is particularly sensitive to such errors, failures, vulnerabilities, or bugs, due to the fact that Providers' proprietary information will be available through the OL Platform. Any unauthorised access of course content by third parties could expose the Company to significant liability.

Real or perceived errors, failures, vulnerabilities, or bugs in the OL Platform could result in negative publicity, loss of competitive position, loss of customer data, loss of or delay in market acceptance, or claims by Providers for losses sustained by them, all of which could harm the Company's business and results of operations.

(j) **SaaS Risk**

The Company relies on hosted SaaS applications from third parties in order to operate critical functions of the OL Platform, including content delivery, enterprise resource planning, customer relationship management, billing, project management, and accounting and financial reporting. If these services become unavailable due to extended outages, interruptions, or because they are no longer available on commercially reasonable terms, the Company's expenses could increase, its ability to manage finances could be interrupted, and its processes for managing sales through the OL Platform and supporting Providers and learners could be impaired until equivalent services, if available, are identified, obtained, and implemented, all of which could adversely affect the Company's business.

(k) **Privacy and Data Collection Risk**

Use of the OL Platform involves the storage, transmission, and processing of data from Providers and learners, including certain personal or individually identifying information. Personal privacy, information security, and data protection are significant issues. The regulatory framework governing the collection, processing, storage, and use of business information, particularly information that includes personal data, is rapidly evolving and any failure or perceived failure to comply with applicable privacy, security, or data protection laws, regulations or contractual obligations may adversely affect the Company's business.

(l) **Reliance on the Internet**

The OL Platform depends on the availability of the internet, and to a lesser extent the quality of users' access to the internet. Certain features of the OL Platform require significant bandwidth and fidelity to work effectively.

Internet access is frequently provided by companies that have significant market power that could take actions that degrade, disrupt, or increase the cost of user access to the OL Platform, which would negatively impact the Company. The Company could incur greater operating expenses and its ability to acquire and retain customers could be negatively impacted if network operators: implement usage-based pricing; discount pricing for competitive products; otherwise materially change their pricing rates or schemes; charge the Company to deliver traffic at certain levels or at all; throttle traffic based on its source or

type; implement bandwidth caps or other usage restrictions; or otherwise try to monetize or control access to their networks.

In addition, there are various laws and regulations that could impede the growth of the internet or other online services, and new laws and regulations may be adopted in the future. These laws and regulations could, in addition to limiting internet neutrality, involve taxation, tariffs, privacy, data protection, information security, content, copyrights, distribution, electronic contracts and other communications, consumer protection, and the characteristics and quality of services, any of which could decrease the demand for, or the usage of, the OL Platform. These changes or increased costs could materially harm the Company's business, results of operations, and financial condition.

(m) **Marketing Risk**

The Company's ability to broaden its Provider base and achieve broader market acceptance of the OL Platform will depend to a significant extent on the ability of its sales and marketing team to work together to drive its sales pipeline and cultivate Provider relationships to drive revenue growth.

The Company has invested in, and plans to continue, expanding its sales and marketing activities. Identifying, recruiting, and training sales personnel will require significant time, expense, and attention. The Company also plans to dedicate significant resources to sales and marketing programs. If the Company is unable to hire, develop, and retain talented sales or marketing personnel, if the Company's new sales or marketing personnel are unable to achieve desired productivity levels in a reasonable period of time, or if the Company's sales and marketing programs are not effective, its ability to broaden our customer base and achieve broader market acceptance of the OL Platform could be harmed. In addition, the investments the Company makes in its sales and marketing team will occur in advance of experiencing benefits from such investments, making it difficult to determine in a timely manner if it is efficiently allocating resources in these areas.

(n) **Competition Risk**

The market for online learning solutions is highly competitive, rapidly evolving, and fragmented, and the Company expects competition to continue to increase in the future. A significant number of companies have developed, or are developing, products and services that currently, or in the future may, compete with the Company's offerings. There are also existing competitors operating in jurisdictions outside of the Company's Primary Markets. This competition, or a movement of competitors into the Company's primary markets, could result in decreased revenue, increased pricing pressure, increased sales and marketing expenses, and loss of market share, any of which could adversely affect the Company's business, results of operations, and financial condition.

Many of the Company's competitors and potential competitors are larger and have greater brand name recognition, longer operating histories, larger marketing budgets and established customer relationships, access to larger customer bases and significantly greater resources for the development of their solutions. In addition, the Company face potential competition from participants in adjacent

markets that may enter its markets by leveraging related technologies and partnering with or acquiring other companies or providing alternative approaches to provide similar results.

(o) **Reliance on key management**

The responsibility of overseeing the day-to-day operations and the strategic management of the Company depends substantially on its senior management and its key personnel. There can be no assurance given that there will be no detrimental impact on the Company if one or more of these employees cease their employment.

(p) **International operations**

The Company operates primarily in Australia, Singapore and Malaysia, as well as other international jurisdictions, which may increase at a later date.

The Company's operations could therefore be subject to a number of risks inherent in global operations, including political and economic instability in foreign markets, inconsistent product regulation by foreign agencies or governments, imposition of product tariffs and burdens, cost of complying with a wide variety of international regulatory requirements, risks stemming from the Company's lack of local business experience in specific foreign countries, foreign currency fluctuations, difficulty in enforcing intellectual property rights, foreign taxes, and language and other cultural barriers.

Additionally, operating an international business with a sales force managed from Australia, Singapore and Malaysia and with distributorships and sales in a number of legal jurisdictions will necessarily require substantial input from a variety of legal counsel and expose the Company to legal costs that may be disproportionately high relative to its revenues, and will be incurred regardless of whether the Company derives revenues from a given jurisdiction or at all.

(q) **Acquisitions**

The Company's growth strategy may involve finding and consummating acquisitions in areas complimentary to the Company's business, with the Board considering potential acquisition opportunities on an ongoing basis. The Company may not be successful in identifying and acquiring suitable acquisition targets at acceptable cost. Further, acquisitions may require additional funding on acceptable terms, which may or may not be available at the relevant time. The Company will experience competition in making acquisitions from larger companies with significantly greater resources.

(r) **Protection of Intellectual Property Rights**

The commercial value of the Company's intellectual property assets is dependent on any relevant legal protections. These legal mechanisms, however, do not guarantee that the intellectual property will be protected or that the Company's competitive position will be maintained. No assurance can be given that employees or third parties will not breach confidentiality agreements, infringe or misappropriate the Company's intellectual property or commercially sensitive information, or that competitors will not be able to produce non-infringing competitive products. Competition in retaining and sustaining protection of technologies and the complex nature of technologies can

lead to expensive and lengthy disputes for which there can be no guaranteed outcome. There can be no assurance that any intellectual property which the Company (or entities it deals with) may have an interest in now or in the future will afford the Company commercially significant protection of technologies, or that any of the projects that may arise from technologies will have commercial applications.

It is possible that third parties may assert intellectual property infringement, unfair competition or like claims against the Company under copyright, trade secret, patent, or other laws. While the Company is not aware of any claims of this nature in relation to any of the intellectual property rights in which it has or will acquire an interest, such claims, if made, may harm, directly or indirectly, the Company's business. If the Company is forced to defend claims of intellectual property infringement, whether they are with or without merit or are determined in the Company's favour, the costs of such litigation may be potentially significant and may divert management's attention from normal commercial operations.

(s) **Rapid growth risk**

The Company aims to experience rapid growth in the scope of its operating activities which may expand operations in new jurisdictions. This growth is anticipated to result in an increased level of responsibility where if unable to be managed, will result in not being able to take advantage of market opportunities and execute its business plan or respond to competitive pressure.

(t) **Strategies**

There are no limits on strategies that the Company may pursue. The Company's strategy may evolve over time due to, among other things, market developments and trends, technical challenges, the emergence of new or enhanced technology, changing regulation and/or industry practice. As a result, the strategy, approaches, markets and products undertaken to date may not reflect the strategies, approaches, markets and products relevant to, or pursued by, the Company at a later date.

5.3 Industry specific

(a) **Product liability**

As with all products, there is no assurance that unforeseen adverse events or defects will not arise in the Company's products. Adverse events could expose the Company to product liability claims or litigation, resulting in the removal of regulatory approval for the relevant products and/or monetary damages being awarded against the Company. In such event, the Company's liability may exceed the Company's insurance coverage, if any.

(b) **Disputes**

The activities of the Company may result in disputes with third parties, including, without limitation, the Company's investors, competitors, regulators, partners, distributors, customers, directors, officers and employees, and service providers. The Company may incur substantial costs in connection with such disputes.

Further, a change in strategy may involve material and as yet unanticipated risks, as well as a high degree of risk, including a higher

degree of risk than the Company's strategy in place as of the date hereof.

(c) **Loss of Customers**

The Company has established important relationships through development of its business to date. The loss of one or more customers through termination or expiry of contracts may adversely affect the operating results of the Company.

(d) **Litigation**

The Company is exposed to possible litigation risks including, but not limited to, intellectual property ownership disputes, contractual claims, environmental claims, occupational health and safety claims and employee claims. Further, the Company may be involved in disputes with other parties in the future which may result in litigation. Any such claim or dispute if proven, may impact adversely on the Company's operations, financial performance and financial position. The Company is not currently engaged in any litigation.

(e) **Data loss, theft or corruption**

The Company will store data in its own systems and networks and also with a variety of third party service providers. Exploitation or hacking of any of the Company's systems or networks could lead to corruption, theft or loss of the data which could have a material adverse effect on the Company's business, financial condition and results. Further, if the Company's systems, networks or technology are subject to any type of 'cyber' crime, its technology may be perceived as unsecure which may lead to a decrease in the number of customers.

The Company has not been hacked, but it is possible that the Company may experience negative publicity if their systems are able to be hacked at some point in the future.

(f) **Foreign exchange**

The Company will be operating in a variety of jurisdictions, including Australia, Singapore and Malaysia, and as such, expects to generate revenue and incur costs and expenses in AUD, USD, SGD and MYR. Consequently, movements in currency exchange rates may adversely or beneficially affect the Company's results or operations and cash flows. For example, the appreciation or depreciation of the US dollar relative to the Australian dollar would result in a foreign currency loss or gain. Any depreciation of currencies in foreign jurisdictions in which the Company operates may result in lower than anticipated revenue, profit and earnings of the Company.

(g) **Insurance coverage**

The Company faces various risks in conducting its business and may lack adequate insurance coverage or may not have the relevant insurance coverage. The Company proposes to arrange and maintain insurance coverage for its employees, as well as directors and officers liability insurance, however it does not currently propose to arrange and maintain business interruption insurance or insurance against claims for certain property damage. The Company will need to review its insurance requirements periodically. If the Company incurs substantial losses or liabilities and its insurance coverage is unavailable or inadequate to cover such losses or liabilities, the Company's financial position and financial performance may be adversely affected.

The Company considers that it has sufficient insurance policies in place in respect of its business and assets. However, the occurrence of an event that is not covered or fully covered by insurance could have a material adverse effect on the business, financial condition and results of the Company.

(h) **Additional requirements for capital**

The Company's capital requirements depend on numerous factors. Depending on the Company's ability to generate income from its operations, the Company may require further financing in addition to amounts raised under the Offer. Any additional equity financing will dilute shareholdings, and debt financing, if available, may involve restrictions on financing and operating activities. If the Company is unable to obtain additional financing as needed, it may be required to reduce the scope of its operations and scale back its development and research programmes as the case may be. There is however no guarantee that the Company will be able to secure any additional funding or be able to secure funding on terms favourable to the Company.

5.4 **General risks**

(a) **Economic conditions and other global or national issues**

General economic conditions, laws relating to taxation, new legislation, trade barriers, movements in interest and inflation rates, currency exchange controls and rates, national and international political circumstances (including wars, terrorist acts, sabotage, subversive activities, security operations, labour unrest, civil disorder, and states of emergency), natural disasters (including fires, earthquakes and floods), and quarantine restrictions, epidemics and pandemics, may have an adverse effect on the Company's operations.

(b) **Market conditions**

Share market conditions may affect the value of the Company's quoted securities regardless of the Company's operating performance. Share market conditions are affected by many factors such as:

- (i) general economic outlook;
- (ii) introduction of tax reform or other new legislation;
- (iii) interest rates and inflation rates;
- (iv) changes in investor sentiment toward particular market sectors;
- (v) the demand for, and supply of, capital; and
- (vi) terrorism or other hostilities.

The market price of securities can fall as well as rise and may be subject to varied and unpredictable influences on the market for equities in general and technology or defence stocks in particular. Neither the Company nor the Directors warrant the future performance of the Company or any return on an investment in the Company.

Further, the value of the Shares may fluctuate more sharply than that of other securities, given the low per Share pricing of the Shares under the

Prospectus, and the fact that investment in the Company is highly speculative.

(c) **Price of Shares**

As a publicly-listed company on ASX, the Company will be subject to general market risk that is inherent in all securities listed on a stock exchange. This may result in fluctuations in its Share price. The price at which Shares are quoted on ASX may increase or decrease due to a number of factors. These factors may cause the Shares to trade at prices below the Public Offer price. There is no assurance that the price of the Shares will increase or not decrease following the commencement of quotation on ASX, even if the Company's earnings increase.

(d) **Taxation risk**

The acquisition and disposal of Shares will have tax consequences for investors, which will vary depending on the individual financial affairs of each investor. All potential investors in the Company are urged to obtain independent professional taxation and financial advice about the consequences of acquiring and disposing of Securities from a taxation viewpoint and generally.

5.5 **Speculative investment**

The risk factors described above, and other risks factors not specifically referred to, may have a materially adverse impact on the performance of the Company and the value of the Shares.

Prospective investors should consider that an investment in the Company is highly speculative.

There is no guarantee that the Shares offered under this Prospectus will provide a return on capital, payment of dividends or increases in the market value of those Shares.

Before deciding whether to subscribe for Shares under this Prospectus you should read this Prospectus in its entirety and consider all factors, taking into account your objectives, financial situation and needs.

The determination of non-executive Directors' remuneration within that maximum will be made by the Board having regard to the inputs and value to the Company of the respective contributions by each non-executive Director. The current amount has been set at an amount not to exceed \$400,000 per annum.
