Applications for Securities offered pursuant to this Prospectus can only be made by an original Application Form.

This Prospectus is a transaction specific prospectus for an offer of continuously quoted securities (as defined in the Corporations Act) and has been prepared in accordance with section 713 of the Corporations Act. It does not contain the same level of disclosure as an initial public offering prospectus and is only required to contain information in relation to the effect of the issue of securities on a company and the rights attaching to the securities. It is not necessary to include general information in relation to all of the assets and liabilities, financial position, profits and losses or prospects of the issuing company.

Representations contained in this Prospectus are made taking into account that the Company is a disclosing entity for the purposes of the Corporations Act and certain matters are publicly available information or may reasonably be expected to be known to investors and professional advisers whom prospective investors may consult.

These statements are based on an assessment of present economic and operating conditions, and on a number of assumptions regarding future events and actions that, as at the date of this Prospectus, are expected to take place.

Such forward-looking statements are not guarantees of future performance and involve known and unknown risks, uncertainties, assumptions and other important factors, many of which are beyond the control of the Company, the Directors and the Company's management.

The Company cannot and does not give any assurance that the results, performance or achievements expressed or implied by the forward-looking statements contained in this Prospectus will actually occur and investors are cautioned not to place undue reliance on these forward-looking statements.

Overseas shareholders

The Offer does not, and are not intended to, constitute an offer in any place or jurisdiction in which, or to any person to whom, it would not be lawful to make such an offer or to issue this Prospectus.

The Offer is not being extended and Securities will not be issued to Shareholders with a registered address which is outside Australia and Israel.

For further information on overseas Shareholders please refer to Section 2.10.

Continuous disclosure obligations

The Company is a "disclosing entity" (as defined in section 111AC of the Corporations Act) for the purposes of section 713 of the Corporations Act and, as such, is subject to regular reporting and disclosure obligations. Specifically, like all listed companies, the Company is required to continuously disclose any information it has to the market which a reasonable person would expect to have a material effect on the price or the value of the Securities.

This Prospectus is intended to be read in conjunction with the publicly available information in relation to the Company which has been notified to ASX and does not include all of the information that would be included in a prospectus for an initial public offering of securities in an entity that is not already listed on a stock exchange. Investors should therefore have regard to the other publicly available information in relation to the Company before making a decision whether or not to invest.

Having taken such precautions and having made such enquires as are reasonable, the Company believes that it has complied with the general and specific requirements of ASX as applicable from time to time throughout the three months before the issue of this Prospectus which required the Company to notify ASX of information about specified events or matters as they arise for the purpose of ASX making that information available to the stock market conducted by ASX.

Please refer to Section 6.3 for further details.

Financial forecasts

The Directors have considered the matters set out in ASIC Regulatory Guide 170 and believe that they do not have a reasonable basis to forecast future earnings on the basis that the operations of the Company are inherently uncertain. Accordingly, any forecast or projection information would contain such a broad range of potential outcomes and possibilities that it is not possible to prepare a reliable best estimate forecast or projection.

Clearing House Electronic Sub-Register System (CHES) and Issuer Sponsorship

The Company will apply to participate in CHES, for those investors who have, or wish to have, a sponsoring stockbroker. Investors who do not wish to participate

through CHES will be issuer sponsored by the Company.

Electronic sub-registers mean that the Company will not be issuing certificates to investors. Instead, investors will be provided with statements (similar to a bank account statement) that set out the number of Securities issued to them under this Prospectus. The notice will also advise holders of their Holder Identification Number or Security Holder Reference Number and explain, for future reference, the sale and purchase procedures under CHES and issuer sponsorship.

Electronic sub-registers also mean ownership of securities can be transferred without having to rely upon paper documentation. Further monthly statements will be provided to holders if there have been any changes in their security holding in the Company during the preceding month.

4. RIGHTS AND LIABILITIES ATTACHING TO SECURITIES

4.1 Certificate of incorporation, Articles and rights attaching to Shares

The Company is incorporated in Israel, and the requirements of Israeli laws that registered shareholders have the right to receive a share certificate does not permit the CHES system of holding uncertificated securities. Accordingly, to enable companies such as the Company to have their securities cleared and settled electronically through CHES, depository instruments called CDIs are issued.

CDIs are electronic depository interests or receipts issued and are units of beneficial ownership in securities registered in the name of CHES Depository Nominees Pty Ltd (**CDN**). CDN is a wholly owned subsidiary of ASX. The main difference between holding CDIs and Shares is that the holder of CDIs has beneficial ownership of the underlying Shares instead of legal title. Legal title to the underlying Shares is held by CDN for the benefit of the CDI Holder. The Shares underlying the CDIs issued pursuant to this Prospectus will be registered in the name of CDN for the benefit of CDI Holders. Each CDI represents one underlying Share.

CDIs represent the beneficial interest in the underlying shares in a foreign company such as the Company and are traded in a manner similar to shares of Australian companies listed on ASX. Each CDI will be equivalent to one Share.

The following is a summary of the Company's securities and provisions of its Certificate of Incorporation and Articles. This summary is not exhaustive and does not constitute a definitive statement of the rights and liabilities of Shareholders. To obtain such a statement, persons should seek independent legal advice.

(a) Voting

Unless otherwise indicated herein or required by applicable law, any Shareholders' resolution shall be deemed adopted if approved by an ordinary majority, including without limitation, a merger of the Company or an amendment to the Company's Articles, to the extent permitted by applicable law.

(b) Dividends

Subject to the Companies Law, the Board may from time to time declare, and cause the Company to pay, such dividend as may appear to the Board of Directors to be appropriate. Subject to the Companies Law, the Board of Directors shall determine the time for payment of such dividends, and the record date for determining the shareholders entitled thereto.

(c) Transfer of Shares

No transfer of Shares shall be registered in the register of Shareholders unless a proper instrument of transfer (in form and substance satisfactory to the Secretary) has been submitted to the Company or its agent, together with any share certificate(s) and such other evidence of title as the secretary may reasonably require, and unless such transfer complies with applicable law and the Company's Articles. Until the transferee has been registered in the register of Shareholders in respect of the shares so transferred, the Company may continue to treat the transferor as the owner thereof. The Board of Directors may, from time to time, prescribe a fee for the registration of a transfer.

(d) **Issue of further Shares**

The unissued shares from time to time shall be under the control of the Board, who shall have the power to issue shares or otherwise dispose of them to such persons, on such terms and conditions (including inter alia terms relating to calls as set forth in Article 11.f of the Company's Articles), and either at par or at a premium, or, subject to the provisions of the Companies Law, at a discount, and at such times, as the Board of Directors may deem fit, and the power to give to any person the option to acquire from the Company any shares, either at par or at a premium, or, subject to the provisions of the Companies Law, at a discount, during such time and for such consideration as the Board may deem fit.

(e) **Winding-up**

Notwithstanding anything to the contrary in the Company's Articles, a Shareholders' resolution approved by a simple majority of the voting shares represented at such meeting in person or by proxy is required to approve the voluntary winding up of the Company.

(f) **Directors – appointment and removal**

The Board of Directors shall consist of up to seven Directors, including two external Directors (if required under the Companies Law) to be appointed and removed by a simple majority vote of the shareholders.

The requirements of the Companies Law applicable to an external Director shall prevail over the provisions of the Company's Articles of Association to the extent that the Articles are inconsistent with the Companies Law, and shall apply to the extent that the Company's Articles of Association are silent. The Directors shall be elected at each annual general meeting and shall serve in office until the close of the next annual general meeting at which one or more Directors are elected, unless their office becomes vacant earlier in accordance with the provisions of the Company's Articles. External Directors are appointed for a three year term; the term can be extended twice, each for three years. Each Director, other than external directors, shall be elected by a Shareholders' resolution at the annual general meeting by the vote of the holders of a simple majority of the voting power represented at such meeting in person or by proxy and voting on such election; provided, however, that external Directors shall be elected by the affirmative vote of at least a majority of the voting power represented at the meeting, provided that either: (i) such majority vote at the meeting shall include at least a majority of the total votes of shareholders who are not controlling shareholders of the Company (as defined in the Companies Law) and do not have a personal interest (as defined in the Companies Law) in the approval of the proposal, participating in the voting at the meeting, without taking abstentions into account; or (ii) the total number of votes of the non-controlling shareholders mentioned in clause (i) above that are voted against such proposal does not exceed two percent (2%) of the total voting rights in the Company. For this purpose, "personal interest" is defined under the Companies Law as: (1) a shareholder's personal interest in the approval of an act or a transaction of the Company, including (i) the personal interest of any of his or her relatives (which includes for these purposes the foregoing shareholder's spouse, siblings, parents, grandparents, descendants, and spouse's descendants, siblings, and parents, and the spouse of any of the foregoing); (ii) a personal interest of a corporation in which a shareholder or any of his/her

aforementioned relatives serve as a director or the Chief Executive Officer, owns at least 5% of its issued share capital or its voting rights or has the right to appoint a director or Chief Executive Officer; and (iii) a personal interest of an individual voting via a power of attorney given by a third party (even if the empowering shareholder has no personal interest), and the vote of an attorney-in-fact shall be considered a personal interest vote if the empowering shareholder has a personal interest, and all with no regard as to whether the attorney-in-fact has voting discretion or not, but (2) excludes a personal interest arising solely from the fact of holding shares in the Company.

The elected Directors shall commence their term immediately upon election, unless a later effective date is stated in the resolution with respect to their election.

Notwithstanding the other provisions of the Company's Articles of Association, one or more Directors may be elected by a Shareholders resolution at an extraordinary general meeting. Any Director appointed or elected in such manner (excluding an external Director) shall serve in office until the next annual general meeting at which one or more Directors are elected, unless his or her office becomes vacant earlier in accordance with the provisions of the Company's Articles.

An elected external Director shall commence his or her term from the date of the resolution of the general meeting at which he or she was elected, and shall serve for a period of three (3) years, unless his or her office becomes vacant earlier in accordance with the provisions of the Companies Law.

A Director may serve for multiple terms, provided, however, that the terms of service of an external Director shall be limited in accordance with applicable law.

(g) **Indemnities**

The Company may indemnify an officeholder therein, retroactively or pursuant to an advance undertaking, to the fullest extent permitted by law. Without derogating from the aforesaid the Company may indemnify an office holder the Company for liability or expense imposed on him or her in consequence of an action made by him in the capacity of his or her position as an office holder in the Company.

On 2 July 2017 the shareholders of the Company adopted a form of indemnification agreement with all current and future members of the Board.

4.2 Terms and Conditions of New Options

(c) **Expiry Date**

Each Option will expire at 5:00 pm (WST) on or before 30 September 2023 (**Expiry Date**). An Option not exercised before the Expiry Date will automatically lapse on the Expiry Date.

(d) **Exercise Period**

The Options are exercisable at any time on or prior to the Expiry Date (**Exercise Period**).

(e) **Notice of Exercise**

The Options may be exercised during the Exercise Period by notice in writing to the Company in the manner specified on the Option certificate (**Notice of Exercise**) and payment of the Exercise Price for each Option being exercised in Australian currency by electronic funds transfer or other means of payment acceptable to the Company.

(f) **Exercise Date**

A Notice of Exercise is only effective on and from the later of the date of receipt of the Notice of Exercise and the date of receipt of the payment of the Exercise Price for each Option being exercised in cleared funds (**Exercise Date**).

(g) **Timing of issue of Shares on exercise**

Within five business days after the Exercise Date, the Company will:

- (i) issue the number of Shares required under these terms and conditions in respect of the number of Options specified in the Notice of Exercise and for which cleared funds have been received by the Company;
- (ii) if required, give ASX a notice that complies with section 708A(5)(e) of the Corporations Act, or, if the Company is unable to issue such a notice, lodge with ASIC a prospectus prepared in accordance with the Corporations Act and do all such things necessary to satisfy section 708A(11) of the Corporations Act to ensure that an offer for sale of the Shares or CDIs does not require disclosure to investors; and
- (iii) if admitted to the official list of ASX at the time, apply for official quotation on ASX of any CDIs issued in respect of Shares issued pursuant to the exercise of the Options.

If a notice delivered under Section 4.2(g)(ii) for any reason is not effective to ensure that an offer for sale of the Shares or CDIs does not require disclosure to investors, the Company must no later than 20 business days after becoming aware of such notice being ineffective, lodge with ASIC a prospectus prepared in accordance with the Corporations Act and do all such things necessary to satisfy section 708A(11) of the Corporations Act to ensure that an offer for sale of the Shares or CDIs does not require disclosure to investors.

(h) **Shares issued on exercise**

Shares issued on exercise of the Options rank equally with the then issued shares of the Company.

(i) **Reconstruction of capital**

If at any time the issued capital of the Company is reconstructed, all rights of an Optionholder are to be changed in a manner consistent with the Companies Law and the Listing Rules at the time of the reconstruction.

(j) **Participation in new issues**

There are no participation rights or entitlements inherent in the Options and holders will not be entitled to participate in new issues of capital offered to Shareholders during the term of the Options without exercising the Options.

(k) **Adjustment for rights issue**

In the event the Company proceeds with a pro rata issue (except a bonus issue) of securities to Shareholders after the date of issue of the Options, an Option does not confer the right to a change in Exercise Price.

(l) **Transferability**

The Options are transferable subject to any restriction or escrow arrangements imposed by ASX, the Companies Law or under applicable Australian securities laws.

5. RISK FACTORS

5.1 Introduction

The Securities offered under this Prospectus are considered highly speculative. An investment in the Company is not risk free and the Directors strongly recommend potential investors to consider the risk factors described below, together with information contained elsewhere in this Prospectus and to consult their professional advisers before deciding whether to apply for Securities pursuant to this Prospectus.

There are specific risks which relate directly to the Company's business. In addition, there are other general risks, many of which are largely beyond the control of the Company and the Directors. The risks identified in this Section, or other risk factors, may have a material impact on the financial performance of the Company and the market price of the Securities.

The following is not intended to be an exhaustive list of the risk factors to which the Company is exposed.

5.2 Company specific

(a) Sovereign risk

The Company is incorporated and based in Israel. Accordingly, economic and military conditions in Israel and the surrounding region, and national, company, consumer and other boycotts, may directly affect the Company's business. Major hostilities involving Israel or the interruption or curtailment of trade within Israel or between Israel and its trading partners, or the mandatory military service obligations of Israeli citizens (and scientific personnel) could materially and adversely affect the Company's business.

(b) Applicability of Israel law

Your rights and responsibilities as a Security holder will be governed by Israeli law which differs in some material respects from the rights and responsibilities of shareholders of Australian companies. It may be difficult to enforce a judgment of an Australian court against the Company, its officers and directors in Israel or elsewhere, to assert Australian securities laws claims in Israel or to serve process on Roots' officers and directors. Provisions of Israeli law and Roots' Articles may delay, prevent or otherwise impede a merger with, or an acquisition of, Roots even when the terms of such a transaction are favourable to Roots and its Security holders.

(c) Going concern

The Company's audited financial report for the half year ended 30 June 2021 (as announced on 31 August 2021) and the Company's financial report for the year ended 31 December 2020 (as announced on 26 February 2021) included a statement that there was material uncertainty that casts significant doubt upon the Group's ability to continue as a going concern. The financial statements were still prepared on a going concern basis which contemplates continuity of normal business activities and the realisation of assets and discharge of liabilities in the normal course of business.

The Company is in its commercialization stage and does not generate significant revenue in this stage and financed its operation up to date mainly by issuance of shares. During the six month period ended 30 June 2021 the Company had incurred negative cash from operations of US\$ 1,144,000 and net losses of US\$834,000. As a result of these matters, there is a material uncertainty that may cast significant doubt on the Company's ability to continue as a going concern.

The financial report noted that the Directors believed that the Company will be able to pay its debts when they fall due, and intended to fund near term anticipated activities based on proceeds from future fund raising in addition to revenues backlog.

At the time of preparation of the financial reports, the Directors were satisfied that it was appropriate to prepare the financial statements on a going concern basis on the basis that the above can be reasonably expected to be accomplished.

The Directors continue to believe that the Company will be able to continue as a going concern on the basis that the above factors still remain true.

However, it is highly likely that further funding will be required to meet the medium term working operating costs of the Company and in the event that the Company is unable to achieve the matters detailed above, it may not be able to continue as a going concern and therefore the Group may not be able to realise its assets and extinguish its liabilities in the ordinary course of operations and at the amounts stated in the financial statements.

Further information in respect of additional requirements for capital are set out in the risk in Section 5.2(d).

(d) **Additional requirements for capital**

The Company's ability to effectively implement its business and operations plans in the future, to take advantage of opportunities for acquisitions, joint ventures or other business opportunities and to meet any unanticipated liabilities or expenses which the Company may incur may depend in part on its ability to raise additional funds.

Depending on the Company's ability to generate income and revenue from its operations, the Company may require further financing in the future.

The Company is confident that it will be able to generate further funding as and when available. Additionally, the Company continuously explores merger and acquisition opportunities with a view to strengthening its existing businesses and/or divesting operations. Further, the Company continuously explores further product offerings and available market opportunities in line with its business strategies and objectives which may enable the Company access additional funding.

Any additional equity financing will dilute shareholdings, and debt financing, if available, may involve restrictions on financing and operating activities. If the Company is unable to obtain additional financing as needed, it may be required to reduce the scope of its operations. There is however no guarantee that the Company will be

able to secure any additional funding or be able to secure funding on terms favourable to the Company.

Further, the Company, in the ordinary course of its operations, is required to issue financial assurances, particularly insurances and bond/bank guarantee instruments to secure commercial arrangements. The Company's ability to provide such assurances is subject to external financial and credit market assessments, and its own financial position.

(e) **Israeli Government Grants**

Roots has received grants for certain research and development activities and may receive additional grants in the future. The terms of those grants, may trigger additional payments to the National Innovation Authority following Roots' decision to manufacture products or transfer its IP outside of Israel, and Roots may be required to pay penalties in such cases or upon sale of IP, under the R&D Law. Roots has received a total amount of US\$770,256, (i.e. A\$1,000,203) from the National Innovation Authority, such amount has to be repaid as 3% to 3.5% of sales of the Company.

In addition to paying any royalty due, Roots must abide by other restrictions associated with receiving such grants under the R&D Law that continue to apply following repayment to the National Innovation Authority. These restrictions may impair Roots' ability to outsource manufacturing, engage in change of control transactions or otherwise transfer Roots' know-how outside of Israel by requiring Roots to obtain the approval of the National Innovation Authority for certain actions and transactions and pay additional royalties and other amounts to the National Innovation Authority. Such amounts may be up to six times the total of the grants actually received, however this is typically reduced by several factors which may be applicable to Roots.

In the event of manufacturing outside of Israel, the maximum repayment can be equal to up to 300% of the grants actually received from the National Innovation Authority (assuming all manufacturing is outside of Israel – if only part of the manufacturing is outside of Israel then the maximum repayment amount may be lower). In addition, if Roots wants to sell its IP to a non-Israeli party the repayment can be between 3-6 times of the total grants received from the National Authority (in general, if most of the Company's employees remain employed in Israel, the maximum repayment amount may be up to three times of the grants received from the National Innovation Authority).

(f) **Reliance on Key Management Personnel**

The responsibility of overseeing the day-to-day operations and the strategic management of the Company depends substantially on its senior management and its key personnel (including the Directors). There can be no assurance given that there will be no detrimental impact on the Company if one or more of these employees cease their employment or if one or more of the Directors cease to be directors of the Company.

Success of the business will depend on the Directors and the officers of the Company to develop the business and manage operations, and on the ability to attract and retain key quality staff and consultants.

The management team is currently comprised of a team of personnel who the Directors consider can cover on a temporary basis for any other member of the team who may leave the Company, until such time as the Company engages a replacement. However, the loss of multiple key persons or the inability to find new key persons (or delays in finding such key persons) could have a material adverse effect on the business.

(g) **Intellectual property**

The Company's interest in its technologies is protected by a portfolio of issued and pending patents. Whilst this provides the Company with protection, there is no guarantee that other companies will not legally challenge the patents or that they might knowingly or unknowingly infringe the Company's patents.

The Company may be forced to litigate, to enforce or defend its intellectual property rights against infringement and unauthorised use by competitors, and to protect its trade secrets. In so doing, the Company's intellectual property may be put at risk of being invalidated, unenforceable, or limited or narrowed in scope. Further, an adverse result in any litigation or defence proceedings may place pending applications at risk of non-issuance. In addition, if any licensor fails to enforce or defend their intellectual property rights, this may adversely affect the Company's ability to develop and commercialise the Company's current and future products (**Products**) and prevent competitors from making, using, and selling competing products. Any such litigation could be very costly and could distract management from focusing on operating the Company's business.

The Company could also be subject to claims by employees and service providers under the Israeli Patent Law, 5727-1967 with respect to intellectual property developed by them.

(h) **Protection of proprietary technology**

The Company's success will depend, in part, on the Company's ability to obtain patents, protect trade secrets and operate without infringing on the proprietary rights of others. If the Company fails to adequately protect its intellectual property, it may face competition from companies who develop a substantially similar product to one of the Products that is not covered by any protection. Many companies have encountered significant problems in protecting and enforcing intellectual property rights in foreign jurisdictions. Proceedings to enforce the Company's patent rights in foreign jurisdictions could result in substantial cost and divert the Company's efforts and attention from other aspects of its business.

(i) **Slow Penetration Rate**

Agriculture is a segment known for slow penetration rates of new technologies. Unless the new technology is disruptive then usually in nature agricultural technology's penetration rates are usually slow, in comparison to high technology or transportation technology. This slow penetration rate needs to be taken into account in the context of Roots' technology.

(j) **Competition**

There is significant competition in the agricultural technology industry generally, more so in greenhouse heating technologies and less in cooling technologies. In particular, Roots is in competition with other drip irrigation companies, particularly in relation to its "Irrigation by Condensation" product. There is no assurance that competitors will not succeed in developing products that are more effective or economic than the products manufactured or developed by Roots, or which would render the products obsolete and/or otherwise uncompetitive.

The Company may be unable to compete successfully against future competitors where aggressive policies are employed to capture market share. Such competition could result in price reductions, reduced gross margins and loss of market share, any of which could materially adversely affect the Company's future business, operating results and financial position.

(k) **New Technology with Limited Testing and Feedback**

A failure to successfully develop and commercialise the Company's technologies could lead to a loss of opportunities and adversely impact on the Company's operating results and financial position.

(l) **Limited Commercial Sales to Date**

Roots started its activity in November 2012 and was admitted to the Official List in 2017. Since then, the Company has installed in Israel, USA, China, Spain and South Korea more than 25 installations from which paid customers are only in China, South Korea, USA and Israel. It takes at least one growing cycle to prove the efficiency of the technology. Sometimes extreme cooler summers or extreme hotter winters can diminish the system effectiveness. Due to restricted resources, Roots has concentrated on several crops such as herbs, leafy vegetables flowers, strawberries cucumbers and cannabis.

(m) **Limited Purchasing Power**

Although Roots has started penetration sales, the quantity of these sales is still small. At this stage, it is more economical to produce a part of Roots' products such as heat exchange probe (**HEP**) and ground source heat coil exchangers and controls in small amounts. Once sales increase, the Company will seek to sign a long-term manufacturing agreement with sub-contractors.

(n) **Cost of technology**

Although Roots will seeks to market its technology into high, mid and low-income countries, the costs of implementing the technologies may prove too expensive for consumers in mid and low income countries. Should this prove to be the case this could result in reduced gross margins and loss of potential market share, either of which could materially adversely affect the Company's future business, operating results and financial position.

(o) **Costs and management time involved in complying with Israeli and Australian laws**

The Company needs to ensure its continuous compliance with the laws of Israel (as an Israeli company) and Australian laws and regulations including the ASX Listing Rules and certain provisions of the Corporations Act (as a result of the Company being listed on the ASX and registered as a foreign company in Australia). To the extent of any inconsistency between the laws of Israel and Australian law and regulations, the Company may need to make changes to its business operations, structure or policies to resolve such inconsistency. If the Company is required to make such changes, this is likely to result in additional demands on management and extra costs.

(p) **Risks of international operations generally**

International sales and operations are subject to a number of risks, including:

- (i) potential difficulties in enforcing agreements (including joint venture agreements) and collecting receivables through foreign legal systems;
- (ii) increases in costs for transportation and shipping; and
- (iii) restrictive governmental actions, such as imposition of trade quotas, tariffs and other taxes.

Any of these factors could materially and adversely affect the Company's business, results of operations and financial condition.

(q) **Joint venture, partnerships or other strategic alliances**

The Company may enter into strategic partnerships or alliances with third parties in order to enhance its business. Additionally, the Company continuously explores merger and acquisition opportunities with a view to strengthening its existing business and/or divesting non-core business operations. Any entry into, or commitment to, such relationship or opportunity will bring additional risks specifically contractual risks. The Company would also be likely to incur transactional costs in evaluating and negotiating such relationships which will need to be incurred regardless of whether the proposed transactions complete or bring benefit to the Company.

(r) **Potential acquisition risk**

As part of its business strategy, the Company continues to engage in the assessment and evaluation of new business and asset acquisition opportunities with a view to increasing the overall value of the Company. The Company may make acquisitions of, or significant investments in businesses and assets that are complementary to the Company's business. Any such future transactions are accompanied by the risks commonly encountered in making acquisitions of businesses and assets, such as integrating cultures and systems of operation, relocating operations, short term strain on working capital requirements, achieving the sales and margins anticipated and retaining key staff and customer and supplier relationships.

If the Company proceeds with such an acquisition, it will also be subject to risks associated with the business or asset being acquired, including, but not limited to legal risks, the risks associated that the negative aspects of the reputation of a business or asset which has been acquired will be applied to or associated with the relevant business of the Company and the regulatory risks associated with the business.

To proceed with a future acquisition, the Company may be required to raise additional funds. There is no guarantee that at that time that the Company will be able to raise those funds on terms that are favourable to the Company, if at all. Alternatively, the Company may be required to issue securities in consideration for the acquisition, which may have a dilutive effect upon existing Shareholders.

5.3 Industry specific

(a) Decreasing energy costs

Roots' technology uses the ground as one of its main resources of energy and high Coefficient of Performance (**CoP**) heat pumps. Compared with systems that use fossil resources, Roots' routine energy costs are very low. Decreased global energy costs, might lower the attractiveness of Roots' technology.

(b) Extreme weather conditions

Roots' technology uses the ground as one of its main sources of energy and temperature exchange to maintain stable water temperature year-round. Roots' technology performs better under extreme cold or hot weather in moderate climates such as Israel, Spain and Australia, China and the USA. After a year of extreme cold winter or hot summer, Roots may sell its systems at relatively higher prices. However, after a year of extreme hot winter or cooler summer, Roots may have to sell its systems at relatively lower prices due to time lapses from last extreme weather crop loss.

(c) Price sensitive market

Prices of agricultural crops are very volatile due to unexpected climatic changes, diseases and global crop availability and deficiency. This effects Roots' target customers. Approaching a farmer after a year with mid and low income from its crops, might lower the chance that they will invest in new technology.

5.4 General risks

(a) Economic

General economic conditions, movements in interest and inflation rates and currency exchange rates may have an adverse effect on the Company's operations, as well as on its ability to fund those activities.

(b) Foreign Exchange Risk

Foreign exchange risk arises when the Company enter into transactions denominated in a currency other than its functional currency. The Company is exposed to currency risk to the extent that there is a mismatch between the currency in which it denominated and the

For personal use only

respective functional currency of the company. The currencies in which some transactions are primarily denominated are US dollars and Australian dollars. The Company's policy is not to enter into any currency hedging transactions.

(c) **Liquidity Risk**

Liquidity risk is the risk that arises when the maturity of assets and the maturity of liabilities do not match. An unmatched position potentially enhances profitability but can also increase the risk of loss. The Company has procedures with the object of minimizing such loss by maintaining sufficient cash and other highly liquid current assets and by having available an adequate amount of committed credit facilities. The Company has no material obligation beyond one year (the liabilities for governmental institutes depends on achieving future revenues) and has a negative working capital and cash in bank to finance its working capital in the near future.

(d) **Credit risk**

Credit risk is the risk that a counterparty will not meet its obligations under a financial instrument or customer contract, leading to a financial loss. The Group is exposed to credit risk from its operating activities (primarily trade receivables) and from deposits with banks and financial institutions and other financial instruments.

(e) **Market conditions**

Share market conditions may affect the value of the Company's quoted securities regardless of the Company's operating performance. Share market conditions are affected by many factors such as:

- (i) general economic outlook;
- (ii) introduction of tax reform or other new legislation;
- (iii) interest rates and inflation rates;
- (iv) changes in investor sentiment toward particular market sectors;
- (v) the demand for, and supply of, capital; and
- (vi) terrorism or other hostilities.

The market price of securities can fall as well as rise and may be subject to varied and unpredictable influences on the market for equities. Neither the Company nor the Directors warrant the future performance of the Company or any return on an investment in the Company.

(f) **Dividends**

Any future determination as to the payment of dividends by the Company will be at the discretion of the Directors and will depend on the financial condition of the Company, future capital requirements and general business and other factors considered relevant by the Directors.

No assurance in relation to the payment of dividends or franking credits attaching to dividends can be given by the Company.

(g) **Taxation**

The acquisition and disposal of Securities will have tax consequences, which will differ depending on the individual financial affairs of each investor. All potential investors in the Company are urged to obtain independent financial advice about the consequences of acquiring Shares from a taxation viewpoint and generally.

To the maximum extent permitted by law, the Company, its officers and each of their respective advisors accept no liability and responsibility with respect to the taxation consequences of subscribing for Securities under this Prospectus.

(h) **Regulatory**

Changes in relevant taxes, legal and administration regimes, accounting practice and government policies may adversely affect the financial performance, financial position and activities of the Company.

(i) **Coronavirus**

The outbreak of the coronavirus disease (**COVID-19**) is impacting global economic markets. The nature and extent of the effect of the outbreak on the performance of the Company remains unknown. The price of the Company's CDs and Listed Options may be adversely affected in the short to medium term by the economic uncertainty caused by COVID-19. Further, any governmental or industry measures taken in response to COVID-19 may adversely impact the Company's operations and are likely to be beyond the control of the Company.

(j) **Climate change risks**

There are a number of climate-related factors that may affect the operations and proposed activities of the Company. The climate change risks particularly attributable to the Company include:

- (i) the emergence of new or expanded regulations associated with the transitioning to a lower-carbon economy and market changes related to climate change mitigation. The Company may be impacted by changes to local or international compliance regulations related to climate change mitigation efforts, or by specific taxation or penalties for carbon emissions or environmental damage. These examples sit amongst an array of possible restraints on industry that may further impact the Company and its profitability. While the Company will endeavour to manage these risks and limit any consequential impacts, there can be no guarantee that the Company will not be impacted by these occurrences; and
- (ii) climate change may cause certain physical and environmental risks that cannot be predicted by the Company, including events such as increased severity of weather patterns and incidence of extreme weather events and longer-term physical risks such as shifting climate patterns. All these risks associated with climate

change may significantly change the industry in which the Company operates.

5.5 Speculative investment

The risk factors described above, and other risks factors not specifically referred to, may have a materially adverse impact on the performance of the Company and the value of the Securities. There is no guarantee that the Securities offered under this Prospectus will provide a return on capital, payment of dividends or increases in the market value of those Securities.

Before deciding whether to subscribe for Securities under this Prospectus you should read this Prospectus in its entirety and consider all factors, taking into account your objectives, financial situation and needs.
