

**DECEMBER 2021 QUARTERLY ACTIVITY REPORT AND APPENDIX 4C –  
MEMPHASYS LIMITED (ASX: MEM)**

Memphasys Limited ('Memphasys' or the 'Company') is pleased to provide its Appendix 4C cash flow statement for the quarter ended 31 December 2021 ('Q2'), along with the following update.

**Business activities in the December Quarter (Q2)**

Memphasys is focused on reproductive biotechnology and proprietary cell separation technologies. It is developing novel medical devices, diagnostics, and media with application to assisted reproduction technologies in humans and animals.

The Company is commercialising the Felix™ device, which separates high quality sperm for IVF processes. In addition, it has several research and development (R&D) projects being undertaken at the University of Newcastle, Australia.

There was no change in the activities of the Company during Q2. The Company spent 75% more (or \$238k) on R&D projects due to payments of instalments relating to two pre-existing research agreements with the University of Newcastle, and the first instalment for a new research agreement signed for one year with the same university. Staff and consultant costs were similar to the previous quarter. Administration and Corporate costs decreased by 65% (or \$119k) mainly due to the annual renewal of D&O insurance paid in Q1. The Company received an R&D Incentive grant for \$1.36m. The second instalment of the cash reimbursement from Hydrix Ltd amounting to \$125,000 is not included in Q2 as it was received on the first working day of the following quarter.

Administration and Corporate costs include payment of non-executive director fees for a total of \$29k, and salaries of \$87.5k paid to the Executive Chairman reported in staff costs. Director fees are not consistent with the previous quarter/s due to two months of unpaid fees in Q2 to be paid in Q3 when invoices are submitted by one of the directors.

**Material Developments**

During the quarter Memphasys has made material progress on many aspects of the business.

On 3 November 2021, the Company announced that the verification and validation assessments for the Felix™ device was complete for early-access markets with low regulatory requirements.

On 22 November 2021, Memphasys announced the maiden sale of the Felix™ device to Diagens Biotechnology Company Ltd. The sale of devices is to premium reproduction medicine research institutes in China, to be used for research purposes.

On 2 December 2021, Memphasys announced that field data collection using the prototype Samson stallion fertility diagnostic device was successfully completed.

For personal use only

On 20 December 2021, the Company announced that it had reached an important milestone, with the first commercial sale of its Felix™ device (and a batch of single-use cartridges) for clinical IVF use to the Womens Centre in Coimbatore, India.

This announcement was approved by the Board of Memphasys.
