Australian Bond Exchange Holdings Limited (ASX: ABE)

ASX Announcement

28 January 2022

Quarterly Activity Report and Appendix 4C - Quarterly Cash Flow Report

Australian Bond Exchange Holdings Limited (ABE) ("ABE" or "the Company") (ASX: ABE) is an Australian fintech and market disruptor bringing real time transaction capabilities to the corporate bond market in Australia. The Australian Bond Exchange's tech platform is transforming the bond investment market, making it accessible to all.

Bond investment has long been restricted to banks, institutions and large investors who can trade in \$500k parcels. In addition, the lack of familiarity with the bond market, and the focus on equities and property by Australian investors, has meant that our ageing population is overweight in riskier forms of investment and will potentially not have appropriate investments to ensure a safe and secure income in retirement.

ABE advises the following in relation to progress made in a number of the key performance metrics during the first period.

Quarter Financial Highlights

In **Q2 FY22** ABE raised an additional \$7.272m from its IPO which together with the pre-IPO \$8.4m raising in Q1 FY22 brought the total raised in 1H FY22 to \$15.672m.

Costs associated with the IPO and Pre-IPO raising amounted to \$1.841m resulting in a net cash increase of \$13.831m.

Q2 FY22 Private Client Revenue was \$453.5K, up 100% on Q2 FY21 (\$227.1K). The main contributor to the increase was Origination Revenue of \$288.2K in **Q2 FY22**, which is up 155% on Q2 FY21.

New Private Client transactions in **Q2 FY22** were up 88% on Q2 FY21 and up 159% when comparing H1 FY22 and H1 FY21.

Q2 FY22 Revenue (unaudited) of \$491.3K was down 60% on Q2 FY21 due primarily to the decrease in institutional trading activity which historically has been a source of revenue but is not the key focus for the company going forward due to its market related volatility.

Customer Retention remains a strongpoint with over 99% of clients continuing to invest with us.

Cash at the end of the quarter was \$12.786m.

The first period of reporting has been affected by a number of factors including delays in completing the IPO capital raising and ASX listing due to the number of companies seeking listings and the resultant delay in completing onboarding with our global trading partners to facilitate product acquisitions.

COVID-19 has also impacted staff and advisers which has seen approximately 50% of the team affected during the period and has seen our Capital Markets division being affected by travel restrictions including imposed quarantine obligations during the period.

Revenue has also been impacted by our focus on the private client market and reduced interbank activity in the first half year.

While these factors have meant that the first half budget was behind target in terms of timing by approximately 60 days, the team is working diligently to improve the product development and trading timeframes in the second half.

Our top priorities involve focusing on broadening our product offering, building our client base, building our sales and marketing teams and increasing client volumes. The team has built a very strong demand pipeline ready to take up new product once it is ready for distribution.

During the last two months we engaged new marketing and sales personnel and commenced a number of operational initiatives to increase client numbers and volumes whilst also building out the demand pipeline to take up new products as they are introduced.

The company remains well-funded and focused on developing the private client market from which the significant majority of future business is expected to be derived as market volatility increases due to Treasury actions in global economies.
