- > Aggregate Affiliates' funds under management (FUM) of \$93.6 billion at 31 December 2021 (at 100%):
 - up \$4.2 billion or 5% from \$89.4 billion at 30 June 2021¹
 - up \$23.1 billion or 33% from \$70.5 billion at 31 December 2020
- > Aggregate Retail FUM of \$23.8 billion at 31 December 2021 (at 100%):
 - up 17% from \$20.3 billion at 30 June 2021
 - up 43% from \$16.7 billion at 31 December 2020
- > Net outflows for 1H FY22 of \$1.7 billion (net inflows of \$2.2 billion, excluding the \$3.9 billion outflow of the Omega 'passive' mandate on very modest fees during August, which we have previously advised); net retail inflows of \$2.9 billion for 1H FY22
- > Continued Affiliate medium-term outperformance – 77% of 5-Year Affiliate strategies have outperformed as at 31 December 2021
- > Cash and Principal Investments of \$176.4 million at 31 December 2021. \$100m debt facility from CBA – fully drawn down and deployed in liquid funds managed by Affiliates

¹Funds under management (at 100%) increased by \$8.1 billion, or 9%, during the half year, excluding the \$3.9 billion outflow of the Omega 'passive' mandate on very modest fees during August, or by \$7.0 billion or 8% also excluding the \$1.1 billion Five V FUM.

Composition of Group Results

The profit after tax attributable to shareholders for 1H FY22 was \$40.1 million, representing basic earnings per share of 21.5 cents, compared with 17.5 cents per share in the PCP.

We remain confident of future growth, from multiple sources. Record retail net inflows of \$2.9 billion during the half year were our largest in any six month period in our history. Whilst we experienced institutional net outflows, we believe these reflect short-term factors including rebalancing, with the rate of gross inflows broadly consistent with the prior comparative half year - the institutional sales pipeline remains robust. We have continually reminded investors that net institutional flows are 'lumpy' and volatile over reasonably short periods of time, and this was particularly evident during this half-year period. There remains strong inherent operating leverage within the group, notwithstanding continuing substantial 'Horizon 2' investment, both within Affiliates and in Pinnacle.

Revenues in Pinnacle Parent are up 50% on the PCP, driven by strong retail inflows and revenue-sharing fees. Costs are up 19% on the PCP, reflecting additional resourcing added, as foreshadowed, in support of the business's growth ambitions, particularly offshore.

Our results for the half also include net overall gains (including distributions and net realized and unrealized gains/losses) on our Principal Investments of \$2.0m, compared with \$0.8m in the PCP. We continue to hedge the majority of our exposure to equities markets and these gains are net of hedging losses.

Pinnacle's share of net profit after tax from its equity interests in Affiliates was \$39.2m, up 23% from \$31.8 million in the PCP. Five Affiliates earned performance fees totalling \$18.8m (at 100%; which contributed \$6.4m towards Pinnacle's NPAT, after tax) in 1H FY22, compared with a total of \$45.2 million in 1H FY21 (at 100%; Pinnacle share after tax \$11.0m). Base management fee revenues in the Affiliates, at 100%, were up 42% compared with the PCP. Share of net profits from Affiliates includes contribution from Five V from 1st December 2021.

The Board has resolved to pay a fully franked interm dividend of 17.5 cents per share to shareholders recorded on the register on 4 March 2022 and payable on 18 March 2022, which represents a payout ratio of 83% of diluted EPS.

The Dividend Reinvestment Plan (**DRP**) is applicable to this dividend. Outlook

Recent actual and anticipated changes in macroeconomic and geopolitical conditions have resulted in some increased turbulence and volatility in investment markets. Whilst not immune to such conditions, over the past few years we have increased the diversity of both asset classes under management, and sources of revenue (including increasingly diverse performance fee opportunities uncorrelated with equity markets) with the objective of building enhanced resilience throughout the full cycle. As a result, Pinnacle has an excellent platform in place to continue to prosper – driven by growth within existing Affiliates, incubating new Affiliates and strategies, domestically and offshore, as well as careful, but deliberate, acquisitive growth into new asset classes and markets.

We continue to pursue further expansion opportunities, seeking to take advantage of the significant offshore opportunity to evolve into a global multi-affiliate. We note that, historically, times of heightened volatility and turbulence have delivered opportunities to judicious and patient investors and shareholders.

01 Introduction and Highlights

Ian Macoun, Managing Director

1H FY22 - A broadly diversified platform in place to move ahead with sustained growth

1. Ongoing opportunities for growth from multiple sources

- Short term domestic institutional rebalancing offset by continued strength in international and higher margin, sticky retail inflows
- Continued 'Horizon 2' investments driving strategic growth through the cycle
- Continued growth in performance fee FUM – revenue opportunity not correlated to equity market levels
- Improvement in average base rate fees and client diversity
- Benefits of embedded operating leverage clearly emerging, notwithstanding continuing 'Horizon 2' investment both within Affiliates and in Pinnacle

2. Diversified, increasingly international platform generating sustained and resilient performance

- High quality existing Affiliates
- Incubating new Affiliates and strategies
- Enhanced by careful, but deliberate, acquisitive growth into new asset classes and markets

3. Prepared for and seeking attractive inorganic growth – ~\$135m in 'dry powder' available

- Multiple attractive opportunities emerging, but discipline and patience means timing uncertain
- Committed to taking advantage of the significant offshore opportunity to evolve into a global multi-affiliate by 'exporting our model'

4. Resilient to the possibility of further external adversity

Revenue growth delivered by strong retail net inflows, offsetting weaker institutional net flows which reflect short term investor rebalancing/lumpiness; institutional pipeline remains strong

 - Pinnacle to acquire a 5% direct equity interest in Palisade Impact (in addition to the interest it holds indirectly through Palisade)
 - Palisade and Pinnacle have entered into a global distribution agreement, covering all of Palisade’s strategies

18 strategies with the potential to crystallise performance fees in FY22 – delivering uncorrelated opportunities to drive a diverse base of growth

Closing FUM & number of strategies subject to performance fees

- The volume of FUM with performance fee potential continues to increase
- FUM subject to performance fees as at 31 December 2021 is 24% higher than the average during 2H FY21
- The number and diversity of strategies with significant performance fee potential has increased in recent years (improving the annual reliability of overall performance fee revenue)
- Likelihood of performance fee success is not correlated to equity market levels – based on performance relative to individual hurdles
- Likelihood of performance fees is distinct between individual strategies – indeed, some possibility of inverse correlation

Performance fees (at 100%) by Affiliate

- Five Affiliates earned performance fees totalling \$18.8m (at 100%; Pinnacle post-tax share \$6.4m) in 1H FY22. In 1H FY21, four Affiliates earned performance fees totalling \$45.2m (at 100%; Pinnacle share post-tax \$11.0m)
- Performance fees of virtually every strategy are distinct from each other (performance fees are based on individual strategy alpha, not on market gains)
- Of the 18 strategies that currently have the potential to deliver significant performance, 11 crystallize in 1H but all 18 have such potential in 2H (of course, the range of possible outcomes remains large every half, and it is by no means guaranteed that in any particular year 2H will exceed 1H)

Diluted earning per share:			
Total attributable to shareholders	21.0	16.7	26%
Dividends per share:	17.5	11.7	50%

- NPAT attributable to shareholders of \$40.1m (+32% on 1H FY21 (**PCP**))
 - Performance fees earned by Pinnacle Affiliates, post-tax, contributed \$6.4m of Pinnacle's NPAT in 1H FY22 (\$11.0m in 1H FY21)⁴
 - Includes full write-down of Pinnacle's investment in Reminiscent Capital in 1H FY22, of \$1.8m
- Revenue growth driven by strong retail inflows and revenue-sharing fees
- Pinnacle is continuing to add resources to support the growth in existing Affiliates as well as 'Horizon 2' and 'Horizon 3' initiatives, including:
 - Recruitment of additional, senior sales people internationally
 - Increasing the depth of the retail sales team
 - Continuing investments in infrastructure, including offshore
- Pinnacle Parent revenues are generally stronger in 2H, when certain 'success-based' distribution fees crystallize and become payable
- Positive net return on Principal Investments (**PI**) of \$2.0m in 1H FY22 compared with \$0.8m in 1H FY21
- Basic EPS attributable to shareholders of 21.5 cents, +23% from 17.5 cents in PCP
- Diluted EPS attributable to shareholders of 21.0 cents, +26% from 16.7 cents in PCP
- Share of NPAT from Pinnacle Affiliates of \$39.2m, +23% from \$31.8m in PCP
- Fully franked interim dividend per share of 17.5 cents (up 50% from the fully franked 1H FY21 interim dividend of 11.7 cents), payable on 18 March 2022

- Includes dividends and distributions received on PI. These were \$1.9m in 1H FY22, compared with \$1.4m in 1H FY21
- Includes interest cost on the CBA facility of \$1.0m in 1H FY22 (\$0.3m in 1H FY21) and amortization of the PL8 offer costs of \$0.4m in 1H FY22 (\$0.4m in 1H FY21)
- Includes mark-to-market and realized gains/losses on PI, net of hedging. These were total net gains of \$0.1m in 1H FY22 (decreases 'expenses'), compared with total net losses of \$0.6m in 1H FY21 (increases 'expenses'). Adjusting for these, expenses increased by \$3.8m, or 25%
- Affiliate performance fees contributed \$6.4m, post tax, to Pinnacle's NPAT in 1H FY22 (\$11.0m in 1H FY21)

Benefits of embedded operating leverage clearly emerging, notwithstanding continuing 'Horizon 2' investment both within Affiliates and in Pinnacle

Revenue (Pinnacle and Affiliates)¹

- Affiliate NPAT margins continuing to strengthen
- Total Affiliate revenues¹ (at 100%) were \$240.5m in 1H FY22, including \$18.8m (8%) of performance fees; in 1H FY21, total Affiliate revenues (at 100%) were \$201.3m, including \$45.2m (22%) in performance fees
- This represents growth of 19% in total Affiliate revenues (at 100%), or 42% excluding performance fees
- Average base fee rates have increased over 1H FY22 with FUM 'cycled' out of lower fee, domestic institutional and into retail and international

<i>Pinnacle share of Affiliates' NPAT</i>	<i>39.2</i>	<i>31.8</i>	<i>23%</i>

 - Plato – Global Long/Short, Enhanced Low Carbon and Net Zero
 - Palisade – Real Assets and Impact
 - Res Cap – GLI and Real Assets
- Includes losses from early-stage Affiliates, such as Two Trees, Longwave, Riparian, Aikya and Langdon

- Cash and PI of \$176.4m
 - Includes \$147.0m invested in strategies managed by Pinnacle Affiliates
 - Excludes \$11.9m of cash applied for Affiliate equity recycling loans, working capital loans and additional Affiliate equity purchased
- CBA facility of \$100m fully-drawn (up from \$30m – in June 2021) and deployed into liquid funds managed by Affiliates until required
- Excludes impact of interim dividend of 17.5 cents per share payable on 18 March 2022 and dividends received or to be received from Affiliates since 31st December
- Investments in Affiliates represents the 'equity accounted' value, i.e., investment cost, plus Pinnacle's share of profits, less Pinnacle's share of dividends received. The balance is tested for impairment at each reporting period. Pinnacle's share of Affiliate performance fees that crystallized during 1H FY22 are included in Pinnacle's share of profits and increases the carrying value of the investments; any associated dividends will reduce the carrying value when paid
 - Includes \$75m paid to acquire a 25% interest in Five V capital in November 2021
 - Includes \$32.8m paid to acquire an additional 10% interest in Coolabah in October 2021
- Balance sheet strength provides \$135 million of 'dry powder' for future opportunities

03 Market Update – Institutional and International

Andrew Chambers

Institutional and international client base was enlarged and further diversified in 1H FY22

- 260+ individual institutional clients at 31 December 2021
 - ~230 at 30 June 2021
 - ~190 at 31 December 2020
 - ~60 at 30 June 2016
- Top 20 institutional clients by FUM are invested with 5 Affiliates on average
- Pinnacle's largest single institutional client by FUM contributes less than 2% towards Pinnacle's NPAT

1H FY22 Australian gross inflows were higher than PCP however this was offset by portfolio rebalancing away from rallying equity markets and a lumpy, 'passive' FUM loss. Our domestic sales pipeline outlook remains positive

Summary

- 1H FY22 Australian gross inflows were higher than PCP
- This was offset by a lumpy, 'passive' ~\$4bn (low single bps) mandate outflow and tactical portfolio 'rebalancing'
 - Institutions rebalanced away from Australian and global equities in proportion to strengthening equity market returns
 - Several super funds 'reined in' their asset class bets and active manager risk tolerance to align with new regulatory benchmarks
 - Our mandate retention rates remained high but some portfolios were trimmed as a result
 - \$1.4bn domestic institutional net outflows excluding Omega's ~\$4bn 'passive' FUM outflow (or \$5.4bn including it)
- Affiliate consultant ratings remained strong throughout 1H
 - New ratings achieved
 - No downgrades
- Significant institutional search activity and flows into
 - Private credit
 - Alternative public credit
 - Australian and global equity 'decarbonisation'

Outlook

- Australian sales pipeline remains robust across
 - Private credit
 - Alternative public credit
 - Australian equities (decarbonisation mandates; Affiliates with scarce capacity)
 - Global value equities
 - Global emerging market equities
- Strong, broad-based investment consultant ratings that will help underwrite new search activity and flows
- Affiliate asset class diversity, style diversity and product innovation provides us with 'all-weather' relevance as market demand changes through time. For example:
 - Higher inflation – real assets, floating rate private credit and alternative public credit, value equities
 - Nominal bond substitution – private credit, alternative public credit, private infrastructure, liquid alternatives
 - Decarbonisation – many Affiliates 'fit-for-purpose' for the net-zero targets of asset owners (e.g., Plato global net zero, Palisade renewable energy and impact, Firetrail global S3, Metrics sustainability-linked finance, Antipodes decarbonisation, Aikya sustainable emerging markets, ResCap global listed infrastructure)

International inflows maintaining positive momentum in 1H FY22

Summary

- ~\$11bn international FUM
 - 37 countries
- \$850m net inflows in 1H FY22
 - 32 countries
- Largest flows from the US, South Africa, New Zealand, Germany and UK
 - US state pension plans and insurers
 - US, European and South African corporate pension plans
 - European and New Zealand private wealth
- New Global, US and UK consultant ratings achieved in H1
 - No global consultant downgrades
- Continued to expand our global distribution footprint
 - Appointed second AMER distribution executive
 - Appointed third EMEA distribution executive
 - Established several distribution partnerships in Japan
- Local distribution hubs, native products, consultant advocacy and virtual due diligence remain important drivers of flows

Outlook

- International sales pipeline continues to build across
 - Aikya global emerging market equities
 - Antipodes global value equities
 - Hyperion global growth equities
- Approx. two-thirds of gross sales flow opportunities for Aikya, Antipodes and Hyperion global are from international investors
- Select opportunities across Metrics, Coolabah, Palisade, Riparian
- The expanding number of global investment consultant ratings and the volume of current search processes encourages us about potential business growth ahead
- Expecting to hire additional distribution executives in AMER and EMEA in the next 6-12 months
- Speed of hiring will be in proportion to
 - Commitment to international marketing by Affiliates
 - Breadth of native products for local investors
 - Availability of culturally-aligned distribution talent

- Finetuning Engagement and Communications to earn a larger share of voice with increasingly time-poor advisers/investors
 - Development of on-site studio and multimedia production facilities underway along with recruitment of video production specialists

 - Unique access to private asset classes is a key rationale. Demand for Metrics (MXT and MOT) remains strong. MOT raised \$75.7m and MXT raised \$97.2m of new capital in 1H FY22
- Shareholder friendly Scheme exchanging shares in Antipodes LIC (APL) to units in the Antipodes active ETF (AGX1)
 - Permanently removed the NTA discount on APL. Shareholders provided overwhelming support
 - AGX1 increased from \$25m of FUM prior to the Scheme to \$508m of FUM at 31 December 2021, one of the largest active ETFs on the ASX

1- Does not include the total fund size of the Hyperion Global Growth Companies Fund (Managed Fund) (ASX: HYGG) listed on 22 March 2021 or any Affiliate (such as Coolabah) assets raised with third party 'Exchange Traded Products' (ETPs) such as BetaShares Active Australian Hybrids Fund (ASX: HBRD) or The Switzer Higher Yield Fund (Chi-X: SHYF). - Initiatives include growth of internal and external sales teams, LIC/LITs and exchange traded and quoted funds (open & closed ended)
- Significant increase in absolute and % of retail FUM over 1H FY22, with net inflow rate averaging close to \$500m per month over the half year

White Paper Series

Dear {{Recipient.FirstName}},

Revisiting a low growth, low interest rate, low inflation world through COVID-19, is the title of the latest white paper series just published by the Hyperion investment team.

The series provides a thorough and thought-provoking examination on whether inflation is likely to stay at low levels over the next decade. Importantly, it also delves into how future inflation and overall economic growth rates will impact the returns Hyperion's global equity strategy is likely to produce in the long run.

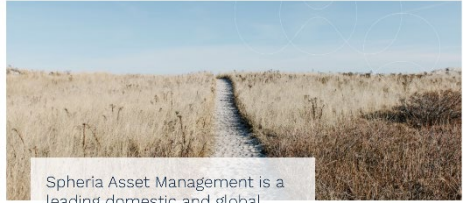

This series is another example of the deep economic and industry analysis that underpins Hyperion's strong track record of growing and protecting client capital.

05 Growth Agenda

Ian Macoun, Managing Director

Prepared for, and seeking, further expansion opportunities – committed to taking advantage of the significant offshore opportunity to evolve into a global multi-affiliate by ‘exporting our model’

- Continue to build Pinnacle by taking a measured approach to growth
- Support the growth of Pinnacle’s current Affiliates with increased investment in distribution channels (e.g., international and listed markets)
- Invest in / seed new Affiliates where management teams have a strong track record and growth potential
- Seeking to diversify into asset classes with substantial growth potential
- Offshore opportunities are becoming compelling – ability to ‘export our model’ – delayed somewhat to date by COVID-19

- Pinnacle is passionate about enabling better lives through investment excellence. This belief is strongly reflected in Pinnacle's commitment – together with Affiliates – to the Pinnacle Charitable Foundation
- The Foundation's focus is on growing the reach and impact of creative and clever Australian not-for-profit organisations, directly linking into the Group's broad commitment to sustainability practices. Charity partners are actively sought out and invited to apply for annual support based around exploring new projects, programs, and services which align closely with UN Sustainable Development Goals (UN SDGs). In each case the aim is to facilitate the delivery of solutions which can be analysed and assessed, scaled and strengthened, with early stage backing often provided
- Financially underpinned by Pinnacle and with access to extensive in-house pro bono services across investment management, portfolio reporting, finance, marketing, compliance and IT, the Foundation operates with low overheads and high impact. Its investment strategy aims to provide capital protection in volatile markets whilst seeking to drive growth over the longer term, and has proven to be highly effective in protecting the corpus during unpredictable environments. Investments are held in a range of Affiliate strategies offering Australian and global equity exposure, franking credits, and monthly income streams, together with holdings in a number of non-equity exposed assets. Affiliates offer donations equivalent to rebates for management fees, and the portfolio is managed on a pro bono basis by the Pinnacle MD
- Total donations by the Foundation in calendar 2021 were \$927,000 (an increase of almost 300% from 2020), with Affiliates providing a further \$330,000 via direct support to several jointly funded charity partners (an increase of 60% from 2020)
- These collective funds of circa \$1.25m were predominantly directed to 14 not-for-profit partners across six identified priority areas, including a new focus on environmental sustainability

Pinnacle Charitable Foundation

- A total of 14 charity partners operating across six core categories are driving long term sustainable, impactful partnerships, with 5 new partnerships initiated in 1H FY22:

Mental wellbeing - together with illness prevention and early intervention

Sexual, domestic and family violence – legal support and advocacy for sufferers

Disadvantaged children and young people – providing education and welfare

Specialised medical research – new treatments for children and the elderly

Current issues – addressing long term social impacts in a COVID-19 world

Environmental sustainability – water resource management, disaster recovery and drought mitigation

* Denotes new partnerships initiated in FY22
