

# ZEUS RESOURCES LIMITED

## Interim Report For the half-year Ended 31 December 2021

The information contained in this report is to be read in conjunction  
with Zeus Resources Limited's 2021 Annual Report and  
announcements released to the market during the half-year period  
ended 31 December 2021

## CORPORATE DIRECTORY

### Directors

Mr Dongfeng Zhang - Chairperson  
Mr Jiangang Zhao - Acting CEO and Executive Director  
Mr Jian Liu – General Manager - Geology & Exploration and Executive Director  
Mr Yicheng Zhang – Non-executive Director (appointed 28 October 2021)  
Mr Colin Mackay - Non-executive Director (appointed 6 December 2021)  
Mr Gregory Clifton Hall - Non-executive Director (resigned 6 December 2021)  
Mr Yong Zhang - Non-executive Director (resigned 28 October 2021)

### Company Secretary

Mr Jian Liu

### Principal registered office

## DIRECTORS' REPORT

The Directors present their report together with the financial statements of the Company for the financial half-year period ended 31<sup>st</sup> December 2021.

### Directors

The Directors in office during the half-year and as at the date of this report are:

Mr Dongfeng Zhang - Chairperson

Mr Jiangang Zhao - Acting CEO and Executive Director

Mr Jian Liu - General Manager - Geology & Exploration and Executive Director

Mr Yicheng Zhang - Non-executive Director (appointed 28 October 2021)

Mr Colin Mackay - Non-executive Director (appointed 6 December 2021)

Mr Gregory Clifton Hall - Non-executive Director (resigned 6 December 2021)

Mr Yong Zhang - Non-executive Director (resigned 28 October 2021)

Directors have been in office since the start of the financial year (1 July 2021) to date of this report unless otherwise stated.

### Highlights

During the period, half year ended 31<sup>st</sup> December 2021, a field work program was instigated at the Mortimer Hills Project (E09/2147) in the Gascoyne District. The program comprises of reverse circulation (RC) drilling (22 holes for 1,598m) at the Reid Well base metal prospect and continued field mapping and rock chip sampling targeting outcropping Lithium-Caesium-Tantalum (LCT) pegmatites. Zeus considers the identification of prospective pegmatites at Pegmatite Creek, a short distance along strike from a known Lithium-Caesium-Tantalum (LCT) pegmatite mineral system to be highly encouraging.

Exploration instigated at the Wiluna Project E53/1603 & ELA 53/2197) comprises of a ground gravity survey to define the centre of the palaeochannel and locate a position for a hydrological pump test drill hole.

Exploration and evaluation of potential tenements in Laos and other regions globally have not been pursued due to the COVID19 pandemic. The consequent risk to staff being exposed to the COVID19 virus in the SE Asia remains very high and therefore the Company is not expecting to conduct any travel to these areas before the end of 2022.

The Company is still under suspension by ASX. Zeus is doing its utmost to comply with the ASX listing rules and keep updating ASX for the progresses.

### Corporate and Financial

- Half-year administrative and other operational expenditures are within budget.
- Zeus issued to Cloud Securities' designated nominees 12 million unquoted non-transferable options which allowed the option holder to have issued to them one Share in the Company per option at an exercise price of \$0.03 per option and an exercise period of 6 months from the issue of the options (**Contractor Options**). 100% of the Contractor Options were fully exercised on 13 August 2022, and the Company has received \$360,000, which will support the plans on the existing WA tenements exploration work and project generation.
- The Company has appointed Mr Yicheng Zhang as a Non-Executive Director of the Company on 28<sup>th</sup> October.
- The Company has appointed Mr Colin Robert Mackay as a Non-Executive Director of the Company on 6 December 2021.
- The 2021 AGM had been held on 14<sup>th</sup> January 2022; all resolutions, including the Remuneration Report, have been carried at the AGM.

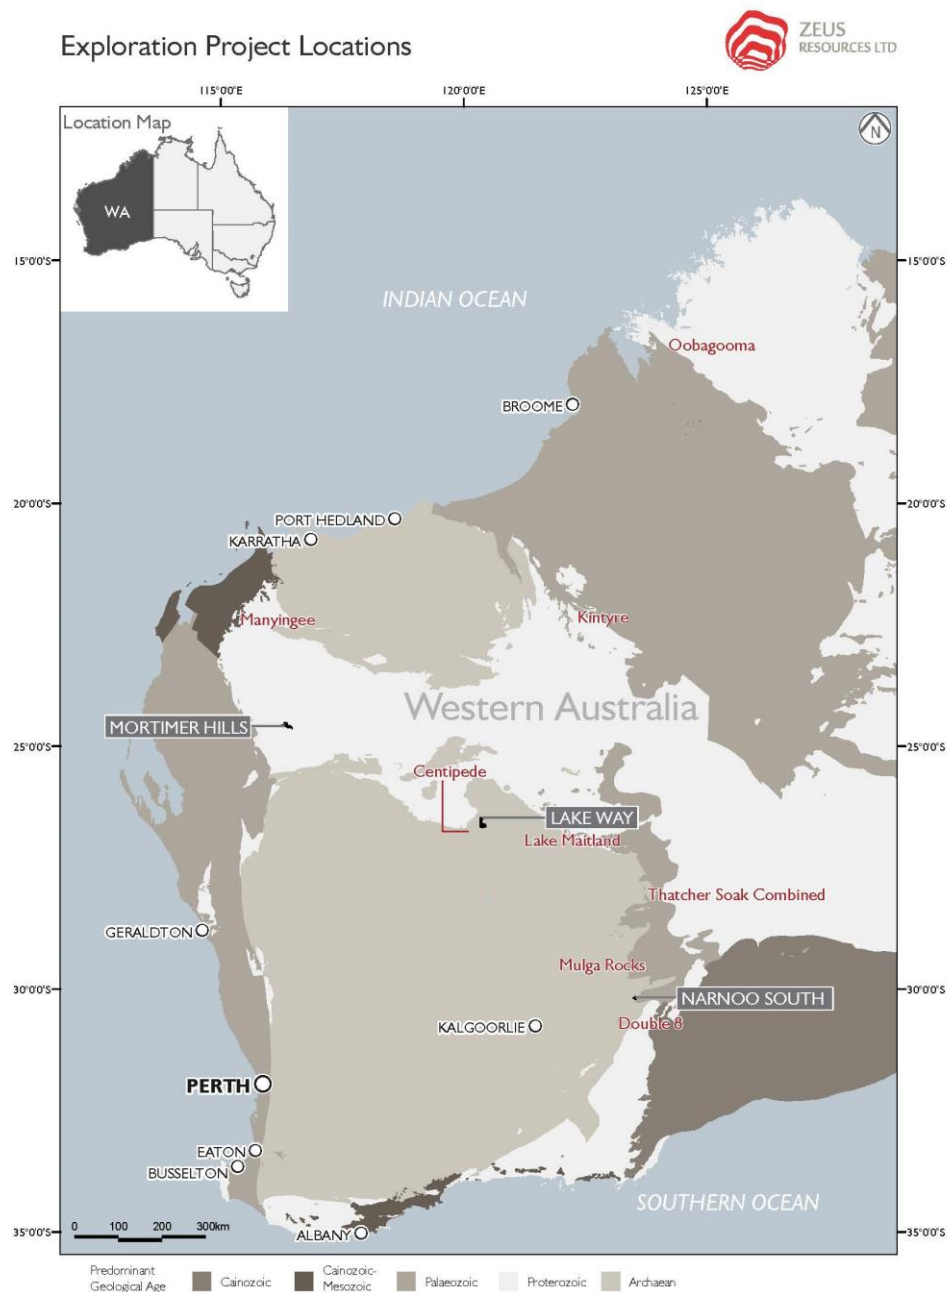

## DIRECTORS' REPORT

## Exploration Report

During the half year ended 31 December 2021, the Company applied for a new exploration licence – E53/2197 at the Wiluna Project. There were no other changes to Zeus' granted tenement holdings during the period. Tenements are shown in Figure 1 and detailed in Table 1.

Figure 1. Zeus Resources Tenement Location Map

## DIRECTORS' REPORT

Region	Project	Tenement	Status	Holder	Operator	Comments

### Exploration Program

During the period, half year ended 31<sup>st</sup> December 2021, a field work program was completed at the Mortimer Hills Project (E09/2147) in the Gascoyne District. The program comprised reverse circulation (RC) drilling (22 holes for 1,598m) at the Reid Well base metal prospect and continued field mapping and rock chip sampling targeting outcropping Lithium-Caesium-Tantalum (LCT) pegmatites. Exploration at the Wiluna Project E53/1603 & ELA 53/2197) comprised a ground gravity survey to define the centre of the palaeochannel and locate a position for a hydrological pump test drill hole. No fieldwork was completed during the period on the other tenements managed by Zeus Resources Ltd. The Board continues reviewing all the Company's projects and updating the exploration plans accordingly. The Company hopes to launch further exploration work on the Western Australia projects during the March Quarter 2022 subject to permitting and approvals and drill rig availability.

### Gascoyne Project

The Gascoyne Project comprises one exploration licence, Mortimer Hills E09/2147 (see Figure 2.). The Extension of Term for E09/2147 has been granted for a further period of 5 years by the Department of Mines, Industry Regulation and Safety of WA on 22 November 2021, the expiry date is 14 September 2026.

During September 2021 a field reconnaissance trip was undertaken to investigate the potential of the tenement for base metals, gold, and pegmatite hosted lithium mineralisation. **(See Zeus ASX announcements dated 1<sup>st</sup> October 2021 and 1<sup>st</sup> November 2021)**

The field work focused on identifying drill pad locations for subsequent RC exploration drilling at the Reid Well Base Metal Prospect (completed in early December 2021 - see Figure 3 and 4) and reconnaissance mapping to investigate the potential of the tenement for pegmatite-hosted lithium mineralisation similar to Arrow Minerals' Malinda Li Deposit of on the adjoining tenement.

Figure 3. Gascoyne Project- Mortimer Hills E09/2147 Prospect Locations.

## DIRECTORS' REPORT

Figure 4. Drilling operations at the Reid Well Base Metals Prospect

**1. Reid Well Base Metal Prospect**

Barite-copper-galena mineralisation at Reid Well was first recognised by AGIP Nucleare Australia Pty Ltd ("AGIP") during the 1974 to 1977 period. AGIP conducted rock chip sampling, limited trenching, and shallow percussion drilling. Zeus relocated the historical occurrence in 2015 and has subsequently conducted follow up mapping and sampling with assay results up to 13% Cu, 2.95% Pb & 128ppm Ag (**See Zeus ASX Announcement dated 20 June 2015 and 29 November 2021**).

Reconnaissance mapping indicates mineralisation forms an elongate exhalative lens some 2-3m thick (see Figure 5) within a quartz-biotite-chlorite-sericite schist +/- garnet, tourmaline, and magnetite zone within the Morrissey Metamorphic Suite. Disseminated copper mineralisation, in the form of malachite, azurite and chalcocite (see Figure 6) extends for over ~100m along strike length before disappearing under alluvium. Selected previous 2021 assay results from the Reid Well Base-Metals Prospect are detailed in Table 2.

Sample #	GDA94_E	GDA94_N	Description	Cu (%)	Pb (%)	Zn (ppm)	Ag (ppm)	BaO (%)
<b>ZEU004</b>	432,593	7,286,562	Subcropping Cu-barite lens rubble. Westernmost extent of lens.	10.90	6.04	150	195.0	41.81

Table 2. Reid Well Base-Metals Prospect Assay Results 2021

## DIRECTORS' REPORT

Figure 5. Reid Well VMS base-metal target; exhalative malachite, chalcocite, and galena-bearing barite lens. (Sample# ZEU016).

Prior to drilling, detailed mapping conducted on site defined a further four exhalative barite lenses showing indications of copper mineralisation, extending the known strike length to over 300m. Mapping indicates the deposit is highly sheared with more competent barite lenses forming elongate lobes, stringers, and pods. A further 18 rock chip samples were taken along the mapped lenses.

Figure 6. Detail of mineralised outcrop. (Sample# ZEU016 = 1.4% Cu, 0.19% Pb, 125 ppm Zn & 18.4 ppm Ag)

A total of 22 RC drillholes were completed for 1,598m during early December 2021 targeting the Reid Well Base Metal Prospect (see Figure 7, Table 3). **(See Zeus ASX Announcement dated 17 December 2021)**

The drill hole logging indicates the copper-bearing barite lens(es) mapped at surface continue in the subsurface and dip ~ 45 degrees to the south. Minor to moderate indications of Cu mineralisation were consistently observed in RC drill chips within the barite zones and a total of 491 samples are submitted for geochemical assay.

# DIRECTORS' REPORT

Table 3. Reid Well Base Metal Prospect, Drill Collar Locations

Figure 7. Reid Well Base Metal Prospect - Drillhole locations

## DIRECTORS' REPORT

## 2. Thirty-Three Supersuite Lithium-Caesium-Tantalum (LCT) Pegmatite Prospectivity

Previous work by Arrow immediately to the east of Zeus' E09/2147 tenement has identified the Thirty-Three Supersuite as a fertile parent granite with the potential to generate LCT Pegmatite swarms.

Geochemical sampling by Arrow observed distinct Niobium/Tantalum fractionation trends extending outwards from the parent granite intrusion. Rock chip sampling returned results up to 3.77% Li<sub>2</sub>O and subsequent exploration drilling at the Malinda Lithium Prospect (~2-3 kms west of Zeus' tenement boundary) intersected up to 2.0% Li<sub>2</sub>O and >800ppm Ta<sub>2</sub>O<sub>5</sub> with high-grade mineralisation confirmed as Li-bearing spodumene. Lepidolite was also identified within two proximal drill holes at the T-Bone prospect (**See Segue Resources ASX Announcement, 09 October 2017**).

The Thirty-Three Supersuite extends ESE along strike along the southern margin of Zeus' tenement. Zeus considers the tenement has substantial potential to host related LCT Pegmatite mineralisation. Extensive tourmaline alteration of the country rock also suggests the granitoids of the Thirty-Three Supersuite are highly fractionated and have the potential to generate LCT Pegmatites. Subcropping deformed pegmatites, similar in character to those encountered further west at Arrow's Malinda Lithium Prospect, have been previously identified on Zeus' E09/2147 tenement (**See Zeus ASX Announcement, 1 October 2021**).

Further continued mapping and prospecting. (**See Zeus ASX Announcement, 17 December 2021**), was undertaken by Zeus during the period, along the prospective zone extending outwards from the intrusive contact of the Thirty-Three Supersuite with the host country rock

Figure 8. Extensive quartz sheetwash blanket covering the metamorphosed contact between the vegetated Thirty-Three Supersuite granitoids (RHS) and metasedimentary country rock. Arrow pointing to the location of the Pegmatite Creek prospect (see Figure 3 for prospect location).

The prospective zone extending outwards from the margins of the prospective granites into the host metasediments is largely obscured by an extensive blanket of quartz sheetwash (see Figure 8) derived from weathering of the granitoid. Further reconnaissance mapping by Zeus has identified a zone of extensive outcropping pegmatites along a creek line; now referred to as 'Pegmatite Creek' (see Figure 3), where the sheetwash blanket has been removed by erosion (see Figure 9).

## DIRECTORS' REPORT

Figure 9. Pale-coloured pegmatite intruding reddish brown pegmatitic granite.

Importantly, the contact between the granites and the host rock is exposed in the creek and together with evidence of contact metamorphism of the host metasediments, confirms their intrusive nature (see Figure 10).

A total of 30 rock samples were collected to determine the geochemical signature of the pegmatites and their parent granite.

Figure 10. Pale-coloured pegmatite intruding greenish grey chloritic schists on the margins of the Thirty-Three Supersuite.

Zeus considers the identification of prospective pegmatites at Pegmatite Creek, a short distance along strike from a known a Lithium-Caesium-Tantalum (LCT) pegmatite mineral system to be highly encouraging. Follow up airborne and ground surveying is being planned for early 2022 to target the the lithium 'sweet spot' lying between 500 to 3,000m out from the contact of the parent granitoid.

## DIRECTORS' REPORT

### Wiluna Project (E53/1603)

The Wiluna Project comprises one exploration licence, E53/1603 and one new exploration licence application (E53/2197) covering part of the Kukkuburra Palaeochannel, developed in granite and greenstone basement. During the period, Zeus commenced a three-phase exploration program to target the Archean lode gold potential of the underlying greenstones. **(See Zeus ASX announcement dated 6 September 2021)**

The Company has engaged Western Geophysics Pty Ltd in WA to undertake the Phase 1 geophysical compilation and interpretation. Based on the results desktop-based work and the advice from professionals, the project is being repositioned as a Muriate of Potash project replacing the former uranium focus. **(See Zeus ASX announcement dated 1 November 2021).**

Muriate of Potash projects require at least 15km of defined palaeochannel as Trigg Mining Ltd, Kalium Lakes Ltd and Australian Potash Ltd tenement holdings demonstrate. On 27 October 2021, Zeus lodged an Exploration Licence Application (E53/2197) for 60 blocks (approximately 184km<sup>2</sup>) covering the northern extension of the Kukkuburra Palaeochannel. The likely total channel length within this combined area is about 25km comprising 6km within the granted E53/1603 and a likely 19 further kilometres in the E53/2197L application. The palaeochannel at Wiluna has had its brine tested previously at Lake Way by Salt Lake Potash Ltd. **(See Zeus ASX announcement dated 1 November 2021).**

During November the Company engaged Atlas Geophysics to complete a gravity survey, including gravity acquisition and processing (192 new gravity stations at 200m spacing on one-kilometre spaced lines) to cover the southern part of the Wiluna Project and the Kukkuburra Palaeochannel. The gravity survey commenced on 14 November and lasted 4 days. (see Figure 11). **(See Zeus ASX announcement dated 1 December 2021).**

The gravity data was acquired using Scintrex CG5 digital gravity meters and Hi Target differential GNSS receivers. Expected accuracy of this gravity survey would be better than 0.02 mGal with recorded elevations accurate to better than 2cm.

Figure 12 shows residual bouger gravity (gravity minus the calculated regional gravity trend). The blue line is an interpretation of the Kukkuburra Palaeochannel axis which is approximately the deepest part of the channel. The paleochannel extends southeast into the application area resulting in 8 km lying within Zeus tenure. This work will help to define the location for the hydrological pump test drill holes.

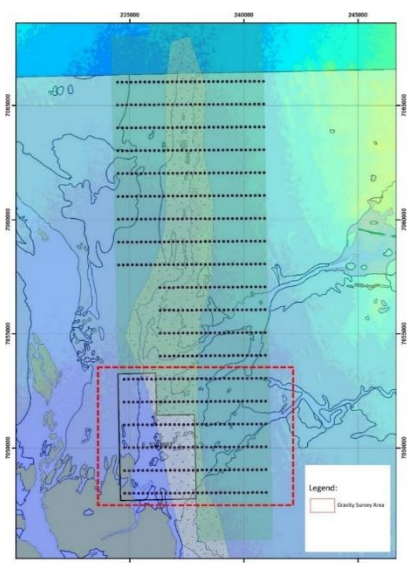

Figure 11. Wiluna Project gravity survey stations completed (within the red box)

Figure 12. Residual Bouger gravity anomaly image. The blue colour is indicative of low density values interpreted to be due to the paleochannel. The interpreted deepest part of the paleochannel is represented by the thin green line.

## DIRECTORS' REPORT

Western Geophysics Pty Ltd currently is collecting additional data and defining the locations of the proposed drill holes. The next phase of exploration program will be drilling and a hydrological pump test within the granted tenement (E53/1603).

**Narnoo Project (E28/2097)**

The Narnoo Project comprises one exploration Licence, E28/2097. The Extension of Term Application for E28/2097 has been granted on 18 November 2021 and the tenement now expires on 8 May 2023.

Based on the recommendations from the Company's tenement manager with regards to latest changes in the legislation, the Company is not able to actively explore for uranium without certain Federal Government approval. The Board is reconsidering the exploration plan for the Narnoo Project (E28/2097), and no immediate exploration work has been planned.

**Wandagee Project (E09/2499)**

In July 2021, the Company entered into an exclusivity agreement with Westoz to conduct due diligence on the Wandagee Project (exploration licence application – E09/2499 ("Tenement")) ("Exclusivity Agreement") to explore the potential acquisition of the Tenement from Westoz if it was granted (**See Zeus ASX announcement dated 30 July 2021**).

The Company appointed HSG Australia Pty Ltd in WA to carry out a site visit, which included mapping and sampling. The site visit commenced on 9 September 2021 and lasted for 3 days.

The Company did not reach an agreement for the acquisition with Westoz, and the Exclusivity Agreement was terminated by both parties on 29 October 2021.

## DIRECTORS' REPORT

**Competent Person Statement:**

Information in this release that relates to Exploration Results and rock chip sampling program at the Mortimer Hills Project and the RC drilling program at the Reid Well Base Metal Prospect is based on information compiled by Mr Jonathan Higgins, who is a Member of the Australian Institute of Geologists (AIG). Mr Higgins is engaged by Zeus Resources Limited as an independent consultant. Mr Higgins has sufficient experience which is relevant to the style of mineralisation and type of deposit under consideration and to the activity being undertaken to qualify as a Competent Person as defined in the 2012 Edition of the 'Australasian Code for Reporting of Exploration Results, Mineral Resources and Ore Reserves'. Mr Higgins consents to the inclusion in this release of the matters based on his information in the form and context in which it appears.

**Competent Person Statement:**

Information in this release that relates to Exploration Results relating to the Wiluna Project is based on information compiled by Mr Steve Massey, who is a Member of the Australian Institute of Geologists (AIG). Mr Massey is engaged by Zeus Resources Limited as an independent consultant. Mr Massey has sufficient experience which is relevant to the style of mineralisation and type of deposit under consideration and to the activity being undertaken to qualify as a Competent Person as defined in the 2012 Edition of the 'Australasian Code for Reporting of Exploration Results, Mineral Resources and Ore Reserves'. Mr Massey consents to the inclusion in this release of the matters based on his information in the form and context in which it appears.

For personal use only

## JORC Code, 2012 Edition – Table 1 Report

### Section 2 Reporting of Exploration Results.

(Criteria in this section apply to all succeeding sections.)

Criteria	JORC 2012 Code Explanation	Commentary
Mineral tenement and land tenure status	<ul style="list-style-type: none"> <li>Type, reference name/number, location and ownership including agreements or material issues with third parties such as joint ventures, partnerships, overriding royalties, native title interests, historical sites, wilderness or national park and environmental settings.</li> </ul>	<ul style="list-style-type: none"> <li>Zeus Resources holds one granted exploration tenement (E09/2147) within the Gascoyne Gascoyne Project. An extension of term has recently been granted until 14/09/2026.</li> <li>Zeus holds one granted exploration tenements (E53/1603) and one exploration Licence application (E53/2197) within the Wiluna Project</li> <li>Zeus holds one granted exploration licence (E28/2097) within the Narnoo Project.</li> <li>Zeus holds a 100% interest in these tenements.</li> </ul>
	<ul style="list-style-type: none"> <li>The security of the tenure held at the time of reporting along with any known impediments to obtaining a licence to operate in the area.</li> </ul>	<ul style="list-style-type: none"> <li>All tenements are in currently in good standing and no impediments to operating are currently known to exist.</li> </ul>
Exploration done by other parties	<ul style="list-style-type: none"> <li>Acknowledgment and appraisal of exploration by other parties.</li> </ul>	<ul style="list-style-type: none"> <li>Exploration efforts have been conducted following review of publicly available historical exploration data from the WA Department of Mines &amp; Petroleum "WAMEX" dataset.</li> <li>Mortimer Hills (Gascoyne Project)</li> <li>Soil sampling, trenching and limited non-JORC compliant drilling was previously conducted in the tenement by by AGIP Nucleare Ltd in the 1970's. No data from this work is available.</li> </ul>
Geology	<ul style="list-style-type: none"> <li>Deposit type, geological setting and style of mineralisation.</li> </ul>	<ul style="list-style-type: none"> <li>Mortimer Hills (Gascoyne Project)</li> <li>The Reid Well deposit is considered to be an exhalative volcanic massive sulphide type (VMS) deposit.</li> <li>Mineralisation at Reid Well is hosted within qtz-biotite-chlorite-sericite schist (+/- garnet &amp; tourmaline) of the Morrisey Metamorphic Suite.</li> <li>Pegmatite &amp; pegmatitic granite type intervals referred to are interpreted to conform to the Lithium-Caesium-Tantalum (LCT) pegmatite-hosted mineralisation style.</li> <li>Wiluna Project</li> <li>The deposit is covering the northern extent of the Kukkuburra Palaeochannel as a Muriate of Potash deposit.</li> </ul>

# DIRECTORS' REPORT

Drill hole Information	<ul style="list-style-type: none"> <li>A summary of all information material to the understanding of the exploration results including a tabulation of the following information for all Material drill holes:</li> <li>easting and northing of the drill hole collar</li> <li>elevation or RL (Reduced Level – elevation above sea level in metres) of the drill hole collar</li> <li>dip and azimuth of the hole</li> <li>down hole length and interception depth</li> <li>hole length.</li> <li>If the exclusion of this information is justified on the basis that the information is not Material and this exclusion does not detract from the understanding of the report, the Competent Person should clearly explain why this is the case</li> </ul>	<p>Mortimer Hills (Gascoyne Project)</p> <ul style="list-style-type: none"> <li>All drillholes are reported within the drillhole details Table.</li> </ul> <p>Wiluna Project</p> <p>No drilling has been undertaken by Zeus at this time.</p>
Data aggregation methods	<ul style="list-style-type: none"> <li>In reporting Exploration Results, weighting averaging techniques, maximum and/or minimum grade truncations (eg cutting of high grades) and cut-off grades are usually Material and should be stated.</li> </ul>	<p>Mortimer Hills (Gascoyne Project)</p> <ul style="list-style-type: none"> <li>Assay results have not yet been received at the time of writing.</li> </ul> <p>Wiluna Project</p> <ul style="list-style-type: none"> <li>Gravity data have been processed to derive the Bouguer anomaly. Further processing included the calculation of residual gravity. These data have been imaged and are interpreted as indicating a paleochannel that may be prospective for the target commodity.</li> </ul>
	<ul style="list-style-type: none"> <li>Where aggregate intercepts incorporate short lengths of high grade results and longer lengths of low grade results, the procedure used for such aggregation should be stated and some typical examples of such aggregations should be shown in detail.</li> </ul>	<ul style="list-style-type: none"> <li>N/A</li> </ul>
	<ul style="list-style-type: none"> <li>The assumptions used for any reporting of metal equivalent values should be clearly stated.</li> </ul>	<p>Mortimer Hills (Gascoyne Project)</p> <ul style="list-style-type: none"> <li>Assay results have not yet been received at the time of writing.</li> </ul>
Relationship between mineralisation widths and intercept lengths	<ul style="list-style-type: none"> <li>These relationships are particularly important in the reporting of Exploration Results.</li> </ul>	<p>Mortimer Hills (Gascoyne Project)</p> <ul style="list-style-type: none"> <li>Assay results have not yet been received at the time of writing.</li> </ul>
	<ul style="list-style-type: none"> <li>If the geometry of the mineralisation with respect to the drill hole angle is known, its nature should be reported.</li> </ul>	<p>Mortimer Hills (Gascoyne Project)</p> <ul style="list-style-type: none"> <li>Surface outcrop of the main mineralised zone forms an elongate lens 2-4m thick and approximately 100m in strike length.</li> <li>Additional related lenses were located by mapping and cover a strike length of ~300m.</li> </ul>
	<ul style="list-style-type: none"> <li>If it is not known and only the down hole lengths are reported, there should be a clear statement to this effect (eg 'down hole length, true width not known').</li> </ul>	<p>Mortimer Hills (Gascoyne Project)</p> <ul style="list-style-type: none"> <li>Downhole intervals have not been reported as assay results have not yet been received at the time of writing.</li> </ul>

## DIRECTORS' REPORT

Diagrams	<ul style="list-style-type: none"> <li>Appropriate maps and sections (with scales) and tabulations of intercepts should be included for any significant discovery being reported. These should include, but not be limited to a plan view of drill hole collar locations and appropriate sectional views.</li> </ul>	<ul style="list-style-type: none"> <li>Mortimer Hills (Gascoyne Project) Refer to location maps.</li> </ul>
Balanced reporting	<ul style="list-style-type: none"> <li>Where comprehensive reporting of all Exploration Results is not practicable, representative reporting of both low and high grades and/or widths should be practiced to avoid misleading reporting of Exploration Results.</li> </ul>	<ul style="list-style-type: none"> <li>Mortimer Hills (Gascoyne Project) Assay results have not yet been received at the time of writing.</li> <li>Wiluna Project Exploration results are preliminary at this point and are subject to confirmation by drilling.</li> </ul>
Other substantive exploration data	<ul style="list-style-type: none"> <li>Other exploration data, if meaningful and material, should be reported including (but not limited to): geological observations; geophysical survey results; geochemical survey results; bulk samples – size and method of treatment; metallurgical test results; bulk density, groundwater, geotechnical and rock characteristics; potential deleterious or contaminating substances.</li> </ul>	<ul style="list-style-type: none"> <li>Mortimer Hills (Gascoyne Project) Geological observations have been accurately reported.</li> <li>Assay results have not yet been received at the time of writing.</li> </ul>
Further work	<ul style="list-style-type: none"> <li>The nature and scale of planned further work (eg tests for lateral extensions or depth extensions or large-scale step-out drilling).</li> </ul>	<ul style="list-style-type: none"> <li>Planned further work is dependent upon drilling results and likely encompasses follow RC and potentially DD drilling.</li> </ul>
	<ul style="list-style-type: none"> <li>Diagrams clearly highlighting the areas of possible extensions, including the main geological interpretations and future drilling areas, provided this information is not commercially sensitive.</li> </ul>	<ul style="list-style-type: none"> <li>Mortimer Hills (Gascoyne Project) Refer to drillhole location maps for current drilling areas.</li> </ul>

## DIRECTORS' REPORT

**Results of Operations**

For the half-year ended 31<sup>st</sup> December 2021 the Company recorded a loss of \$143,170 (31 December 2020: Loss \$121,681).

Total exploration expenses for the half-year were \$144,030 (31 December 2020: \$64,816), \$116,684 of the exploration expenses were capitalised to current exploration assets (31 December 2020: \$63,375).

**Significant changes in state of affairs**

There were no significant changes in the state of the affairs of the Company.

**Principal activities**

The principal activities of the Company during the year was the exploration for uranium and other base metals and research and analysis of investment opportunities in the mining and exploration sector.

**Dividends**

No dividends have been declared in respect of the half-year ended 31<sup>st</sup> December 2021 (31 December 2020: nil).

**Options**

Options were approved to be issued at the General Meeting held 31<sup>st</sup> July 2021:

- Unlisted Options 12,000,000 at 3 cents each expiring 9<sup>th</sup> February 2022
- Unlisted Options 9,000,000 at 10 cents each expiring 9<sup>th</sup> August 2022

The Company received \$360,000 in proceeds from the exercise of 12,000,000 options with an exercise price of \$0.03 each on 13<sup>th</sup> August 2021.

## DIRECTORS' REPORT

**Events subsequent to the end of the reporting period****(a) Annual General Meeting**

The Company held its AGM on 14<sup>th</sup> January 2022 in accordance with section 251AA of the Corporations Act 2001 (Cth). All resolutions were carried by way of a poll.

- Adoption of Remuneration Report Financial Year ended 30 June 2021
- Re-election of Director Mr Dongfeng Zhang
- Re-election of Director Mr Jian Liu
- Re-election of Director Mr Yicheng Zhang
- Re-election of Director Mr Colin MacKay
- Approval of 10% placement facility
- Amendment of Constitution of the Company

**(b) ASX Listing Suspension**

The Company was suspended from the ASX on 3 September 2021, due to a perceived breach of listing rule 12.1. The Company is continuing to work with the ASX to be re-instated by providing demonstrable compliance with listing rule 12.1. The Company has submitted its latest report to the ASX to meet with re-instatement requirements on 7<sup>th</sup> February 2022. The evaluation of the report by ASX Compliance team is currently ongoing. The Company expects to be informed of the results of the evaluation before the end of February 2022.

Other than the above, there are no matters or circumstances that have arisen since 31 December 2021 that have significantly affected or may significantly affect the Company's operations, the results of those operations, or the Company's state of affairs in future financial years.

## DIRECTORS' REPORT

### **Auditor independence declaration**

The lead auditor's independence declaration as required under section 307C of the Corporations Act 2001 for the half-year ended 31 December 2021 has been received and can be found on page 25 of this interim report.

Signed in accordance with a resolution of the Board of Directors.

A handwritten signature in black ink, appearing to read 'Zhang Dongfeng', with a stylized flourish at the end.

Mr. Dongfeng Zhang  
Chairman

Dated this 24<sup>th</sup> February 2022

## Zeus Resources Limited

### Auditor's independence declaration under section 307c of the Corporations Act 2001

I declare that, to the best of my knowledge and belief during the half-year ended 31 December 2021 there have been:

- No contraventions of the auditor independence requirements as set out in the Corporations Act 2001 in relation to the review; and
- No contraventions of any applicable code of professional conduct in relation to the review.

Options exercised 13th August 2021	360,000	-
Net cash used in Financing activities	339,505	(18,738)
Net (decrease) / increase in cash and cash equivalents held	52,442	(184,562)
Cash at beginning of financial year	1,518,885	1,138,805
<b>Cash and Cash Equivalents at end of the period</b>	<b>1,571,327</b>	<b>954,243</b>

The above statement of statement of cash flows should be read in conjunction with the accompanying notes.

## NOTES TO THE FINANCIAL STATEMENTS

**NOTE 1. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES****a. Statement of compliance**

The interim financial report is a general purpose financial report prepared in accordance with the requirements of the Corporations Act 2001, AASB 134 '*Interim Financial Reporting*' and other pronouncements of the Australian Accounting Standards Board ("AASB"). Compliance with AASB 134 ensures compliance with International Financial Reporting Standard IAS34 *Interim Financial Reporting*.

The principal accounting policies adopted are consistent with those of the previous Financial Year ended 30 June 2021 unless otherwise stated.

This interim report does not include all the notes of the type normally included in an annual financial report. Accordingly, this report is to be read in conjunction with the annual report of Zeus Resources Limited for the year ended 30 June 2021 and any public announcements made by Zeus Resources Limited during the interim reporting period in accordance with the continuous disclosure requirements of the *Corporations Act 2001* and the Australian Securities Exchange Listing Rules.

*The financial statements have been approved by the Board on the date of signing.*

**b. Basis of Preparation**

The interim financial statements have been prepared on the basis of historical cost. Cost is based on the fair values of consideration given in exchange for assets. The Company is domiciled in Australia and all amounts are presented in Australian dollars (unless otherwise indicated).

The accounting policies and methods of computation adopted in the preparation of the interim financial report are consistent with those adopted and disclosed in the Company's financial report for the financial year ended 30 June 2021.

**c. New Standards and Interpretations applicable for the half-year ended 31 December 2021**

For the half-year ended 31 December 2021, the Directors have reviewed all the new and revised Standards and interpretations issued by the AASB that are relevant to the Company and effective for the current reporting period.

- AASB 2020-8 Amendments to Australian Accounting Standards – Interest Rate Benchmark Reform – Phase 2
- AASB 2021-3 Amendments to Australian Accounting Standards – Covid-19-Related Rent Concessions beyond 30 June 2021.

Their adoption has not had a material impact on the disclosures and/or amounts reported in these financial statements.

## NOTES TO THE FINANCIAL STATEMENTS

**d. New Standards and Interpretations issued and not yet adopted**

For the half-year ended 31 December 2021, the Directors have also reviewed all the new and revised Standards and interpretations issued by the AASB and not yet adopted that are relevant to the Company. As a result of this review the Directors have determined that the Standards and Interpretations on issue and not yet adopted by the Company will have no material impact on the Company's financial reports and therefore no changes are necessary to the Company's current accounting policies.

**e. Significant Accounting Judgements and Key Estimates.**

The preparation of this interim financial report requires management to make judgments, estimates and assumptions that may affect the application of accounting policies and the reported amounts of assets, liabilities, income and expense. Actual results may differ from these estimates.

In preparing this interim financial report the significant judgments made by management in applying the Company's accounting policies and key sources of estimation uncertainty were the same as those applied in the financial report for the year ended 30 June 2021.

**f. Going Concern**

For the half-year ended 31 December 2021, the Company recorded a loss of \$143,170 (half-year ended 31 December 2020: loss \$121,681), incurred net cash outflows from operating activities of \$170,381 (half-year ended 31 December 2020: outflows \$101,008). Net assets for the half-year ended 31 December 2021 amounted \$2,110,255 (30 June 2021: \$1,893,425) were largely represented by cash and tenement assets.

The Company, since listing, is yet to report profitable operations and management is closely monitoring the remaining tenements held, to control cash outflows arising from existing exploration activity and the funding requirements needed to develop future projects.

These circumstances currently point towards a material uncertainty, and if not addressed, may cast significant doubt about the Company's ability to continue as a going concern.

The financial statements have been prepared on the basis that the Company is a going concern, which contemplates the continuity of normal business activity, realisation of assets and settlements of liabilities in the normal course of business over the next 12 months period for the following reasons: the Board performs continuous assessments on the recoverability of the tenements held at each reporting period; and

- the Board has prepared detailed cash flow forecasts through to June 2024 which reflects the Company's ability to continue to pay its debts as and when they fall due; and
- raising further cash for operations from issue of shares and options; and
- developing existing tenements and other future tenements into productive operations or desirable assets for sale.

Should the Company be unsuccessful in these endeavours, it may not be able to continue as a going concern, and it could be required to realise its assets and discharge its liabilities other than in the ordinary course of business, and at amounts that differ from those stated in these financial statements. This financial report does not include any adjustments relating to the recoverability and classification of recorded asset amounts or liabilities that might be necessary should the Company not continue as a going concern.

## NOTES TO THE FINANCIAL STATEMENTS

## NOTE 10. COMMITMENTS

	31-Dec-21	30-Jun-21
<i>Exploration Projects in Western Australia:<sup>1</sup></i>	\$	\$
Within 1 year <sup>1</sup>	160,417	146,667
More than 1 year but not later than five years <sup>1</sup>	540,825	750,000
More than five years	-	-
Total	<u>701,242</u>	<u>896,667</u>

<sup>1</sup> Based on current commitment requirements set by Department Mining and Petroleum and blocks licenced.

The Company is required to meet minimum committed expenditure requirements to maintain current rights of tenure to exploration licences. These obligations may be subject to re-negotiation, may be farmed-out or may be relinquished and have not been provided for in the statement of financial position. The above table is a summary of aggregate commitments.

## NOTES TO THE FINANCIAL STATEMENTS

## NOTE 11. EVENTS SUBSEQUENT TO REPORTING DATE

**(a) Annual General Meeting**

The Company held its AGM on 14<sup>th</sup> January 2022 in accordance with section 251AA of the Corporations Act 2001 (Cth). All resolutions were carried by way of a poll.

- Adoption of Remuneration Report Financial Year ended 30 June 2021
- Re-election of Director Mr Dongfeng Zhang
- Re-election of Director Mr Jian Liu
- Re-election of Director Mr Yicheng Zhang
- Re-election of Director Mr Colin MacKay
- Approval of 10% placement facility
- Amendment of Constitution of the Company

**(b) ASX Listing Suspension**

The Company was suspended from the ASX on 3 September 2021, due to a perceived breach of listing rule 12.1. The Company is continuing to work with the ASX to be re-instated by providing demonstrable compliance with listing rule 12.1. The Company has submitted its latest report to the ASX to meet with re-instatement requirements on 7<sup>th</sup> February 2022. The evaluation of the report by ASX Compliance team is currently ongoing. The Company expects to be informed of the results of the evaluation before the end of February 2022.

Other than the above, there are no matters or circumstances that have arisen since 31 December 2021 that have significantly affected or may significantly affect the Company's operations, the results of those operations, or the Company's state of affairs in future financial years.

## DIRECTORS' DECLARATION

The Directors of the Company declare that:

- 1 The financial statements and notes, as set out on pages 27 to 37 are in accordance with the *Corporations Act 2001*:
  - 1.a comply with Accounting Standard AASB 134: *Interim Financial Reporting* and Corporations Regulations 2001 and
  - 1.b give a true and fair view of the financial position as at 31 December 2021 and of the performance for the half-year ended on that date of the Company.
- 2 In the Directors' opinion there are reasonable grounds to believe that the Company will be able to pay its debts as and when they become due and payable.

This declaration is made in accordance with a resolution of the Board of Directors and is signed for and on behalf of the directors by:

Mr. Dongfeng Zhang  
Chairman

Dated this 24<sup>th</sup> February 2022

## Zeus Resources Limited

### Independent auditor's review report

## Report on the Review of the Half-Year Financial Report

### Conclusion

We have reviewed the accompanying half-year financial report of Zeus Resources Limited (the Company) which comprises the statement of financial position as at 31 December 2021, the statement of profit or loss and other comprehensive income, statement of changes in equity and statement of cash flows for the half-year ended on that date, a summary of significant accounting policies and other explanatory information, and the directors' declaration.

Based on our review, which is not an audit, we have not become aware of any matter that makes us believe that the half-year financial report of Zeus Resources Limited is not in accordance with the *Corporations Act 2001* including:

- a) giving a true and fair view of the entity's financial position as at 31 December 2021 and of its performance for the half year ended on that date; and
- b) complying with Australian Accounting Standard 134 *Interim Financial Reporting* and the *Corporations Regulations 2001*.

### Material Uncertainty Related to Going Concern

We draw attention to Note 1 in the financial report, which indicates that the Company incurred a net loss of \$143,170 (2020: \$121,681) and incurred net cash outflows from operating activities of \$170,381 (2020: \$101,008 outflows) during the period ended 31 December 2021. As stated in Note 1, these events or conditions, along with other matters as set forth in Note 1, indicate that a material uncertainty exists that may cast significant doubt on the Company's ability to continue as a going concern. Our conclusion is not modified in respect of this matter.

### Basis for Conclusion

We conducted our review in accordance with ASRE 2410 *Review of a Financial Report Performed by the Independent Auditor of the Entity*. Our responsibilities are further described in the *Auditor's Responsibilities for the Review of the Financial Report* section of our report. We are independent of the Company in accordance with the ethical requirements of the Accounting Professional and Ethical Standards Board's APES 110 *Code of Ethics for Professional Accountants (including Independence Standards)* (the Code) that are relevant to our audit of the annual financial report in Australia. We have also fulfilled our other ethical responsibilities in accordance with the Code.

### Responsibility of Management for the Financial Report

The directors of the Zeus Resources Limited are responsible for the preparation of the half-year financial report that gives a true and fair view in accordance with Australian Accounting Standards and the *Corporations Act 2001* and for such internal control as the directors determine is necessary to enable the preparation of the half-year financial report that gives a true and fair view and is free from material misstatement, whether due to fraud or error.

### **Auditor's Responsibilities for the Review of the Financial Report**

Our responsibility is to express a conclusion on the half-year financial report based on our review. ASRE 2410 requires us to conclude whether we have become aware of any matter that makes us believe that the half-year financial report is not in accordance with the *Corporations Act 2001* including giving a true and fair view of the Company's financial position as at 31 December 2021 and its performance for the half-year ended on that date, and complying with Accounting Standard AASB 134 *Interim Financial Reporting* and the *Corporations Regulations 2001*.

A review of a half-year financial report consists of making enquiries, primarily of persons responsible for financial and accounting matters, and applying analytical and other review procedures. A review is substantially less in scope than an audit conducted in accordance with Australian Auditing Standards and consequently does not enable us to obtain assurance that we would become aware of all significant matters that might be identified in an audit. Accordingly, we do not express an audit opinion.
