About Hawsons Iron

ersonal use only

About Hawsons Iron

- ✓ Emerging producer of low-cost, premium-quality iron ore.
- ✓ Custodian of the Hawsons Iron Project – a world-class and large-scale iron ore resource in the Braemar Iron province.
- ✓ Current JORC 2012 Resource of 3.06 Billion tonnes at 13.1 DTR% for 400 Mt of concentrate.
- ✓ Answering the world's call for high-grade products essential to decarbonising the steel industry.
- ✓ During 2021/22, consolidation of Project ownership, board restructure, clear strategic direction, expanded leadership team and appointment of experienced BFS Advisory Committee.
- ✓ Partnering with global mining experts for Hawsons Iron Project Bankable Feasibility Study (BFS).

Board of Directors

✓ **Hawsons Iron Ltd is led by an experienced and dedicated Board of Directors and executive management team**

Mr Bryan Granzien

Executive Chairman

- B. Business
- GAICD – Graduate of the Australian Institute of Company Directors
- Fellow – CEO Institute
- 30+ years experience in resources sector
- ASX experience across mining, agribusiness, information technology and steel manufacturing
- Ex Senior Executive MIM Holdings and Grainco Australia
- Ex GM Neumann Steel and NatSteel Australia
- Ex Director/CEO Tata Steel Resources and Kalimati Coal

Mr Paul Cholakos

Non-executive Director

- Master Business Administration (MBA)
- B. Engineering (Mining)
- 30+ years experience in resources sector
- Ex Executive: Oil Search Limited (ASX:OSH) and Exeter Resources
- Broad international experience in North America, South America and Asia-Pacific
- 20+ years in senior technical and commercial project roles
- Central to Oil Search's transition to an LNG producer, leading key elements of PNG LNG through construction, start up and to steady state operations

Mr Jon Parker

Non-executive Director

- B. Science (Physical Chemistry Hons)
- Grad. Dip Business Admin.
- 40+ years experience in the resources sector
- Ex General Manager of Commercial Iron Ore for Rio Tinto (26 years with Rio)
- Ex Managing Director Felix Resources and Norton Goldfields
- Distinguished record in executive management and value creation across the resources sector for a range of ASX-listed companies, where he has overseen substantial growth in market capitalisation

Hawsons Iron
For personal use only

Executive management team

Mr Greg Khan

Chief Financial Officer | Company Secretary

- B. Business (Accounting), (MIPA), (FGIA), (AFA), (MIMC), JP (Qual)
- ASX CFO with more than 25+ years in financial and management accounting, leadership, strategy, forecasting and financial reporting
- Experienced in corporate governance, financial control, management accounting, financial modelling, operational excellence and supply chain optimisation, across multiple industry sectors
- Member – Institute of Public Accountants
- Fellow – Governance Institute of Australia
- Associate – Institute of Financial Accountants
- Member – Institute of Management Consultants
- Member – Queensland Justices Association

Mr Justin Haines

General Manager – Operations

- B. App. Science (Geology)
- G. Dip. Science (Honours)
- M. Mining Engineering
- Member – Australasian Institute of Mining and Metallurgy
- Member – Australia Institute of Geoscientists
- 25+ years experience in resources industry
- Over 10 years in technical executive roles in listed resource development companies
- Over 10 years in mining and resource consultancies
- Broad commodity experience including 3+ years in iron ore

Mr Glenn Vassallo

Capital Finance Lead

- B. Laws
- B. Commerce
- Member – Law Council of Australia Company Law Committee
- Member – Law Council of Queensland
- 20+ years' experience in equity and debt capital markets
- 10+ years' experience in project finance
- Co-Founder of GRT Lawyers and the GRT Foundation
- Significant ASX experience at Executive and Non-Executive level
- Guest speaker on global topics such as equity and debt raising and impact investing

Ms Kerry Bailey

Corporate Communications Lead

- B. Business (Communication)
- 20+ years' experience managing company reputations, issues, change and stakeholder relations
- Sector experience across renewable energy, mining, agriculture, property, retail, and manufacturing
- Previous leadership roles combining expertise in communications and human resources for Grainco Australia and consultancy Three Plus

Mr Rohan Koenig

Study Manager

- Masters of Engineering Management (Current)
- Grad. Dip Engineering Management
- Grad. Cert Project Management
- Grad. Dip Applied Science (Aquaculture)
- B. Science (Biology)
- Long term role with GHD with project experience for Grange Resources, Bluestone Mining, Hawsons Iron, Harmony Gold, Lottah Mining, Rum Jungle Resources and MMG
- Skills include 3D tunnel mapping, geotech monitoring, photogrammetry and ground penetrating radar.

Mr Peter Brennand

Procurement Manager

- B. Business
- Masters of Business Administration
- MCIPS – Chartered Institute of Procurement and Supply
- Leadership roles in oil & gas, mining, engineering and construction
- Senior roles with Lockheed Martin, Beach energy, UTAS, Clough Engineering, Maersk Oil Qatar, BP Exploration (Iraq), Ausenco & Thiess
- Skills include contract formulation, procurement strategies, transformation, stakeholder engagement and process improvement

BFS Advisory Committee

✓ **Hawsons Iron Ltd has appointed an experienced committee of specialists to ensure the BFS is fit-for-purpose to secure funds to develop the world-class mine and our unique ore body**

Mr Nick Jukes

- Civil engineer with over 35 years' experience
- Chairman of BFS partner JukesTodd
- Senior roles at Sedgman, Thiess and BHP
- Experienced Director at Sedgman, AWE and Australasian Resources

Ms Genevieve Gregor

- More than 30 years' banking and finance experience
- Chair of Noumi Limited
- Co-founding Partner of Colinton Capital
- NED at MoneyTech Group Pty Ltd
- Experienced executive at Goldman Sachs and Citigroup

Mr Dave Woodall

- 50 years' experience in commercial and not-for-profit sector
- Executive experience includes MIM Holdings, Grainco Australia
- Directorships at Ergon Energy, Energex, Tarong Energy, Terra Gas Traders, Starfish Windfarm, TN Power
- Chairman of Environmental Clean Technologies and Queensland Country Bank
- Chief Executive of Abused Child Trust

Mr Richard Robinson

- More than 40 years' experience in the Oil & Gas and Energy industries
- Former CEO of NiuPower Limited
- Former NED and executive at LogiCamms Limited, Kina Petroleum Limited, Fyfe Pty Ltd, and Oil Search Limited
- Experienced consultant to Total E&P, Senex Energy, Horizon Oil, Buru Energy and Strike Energy

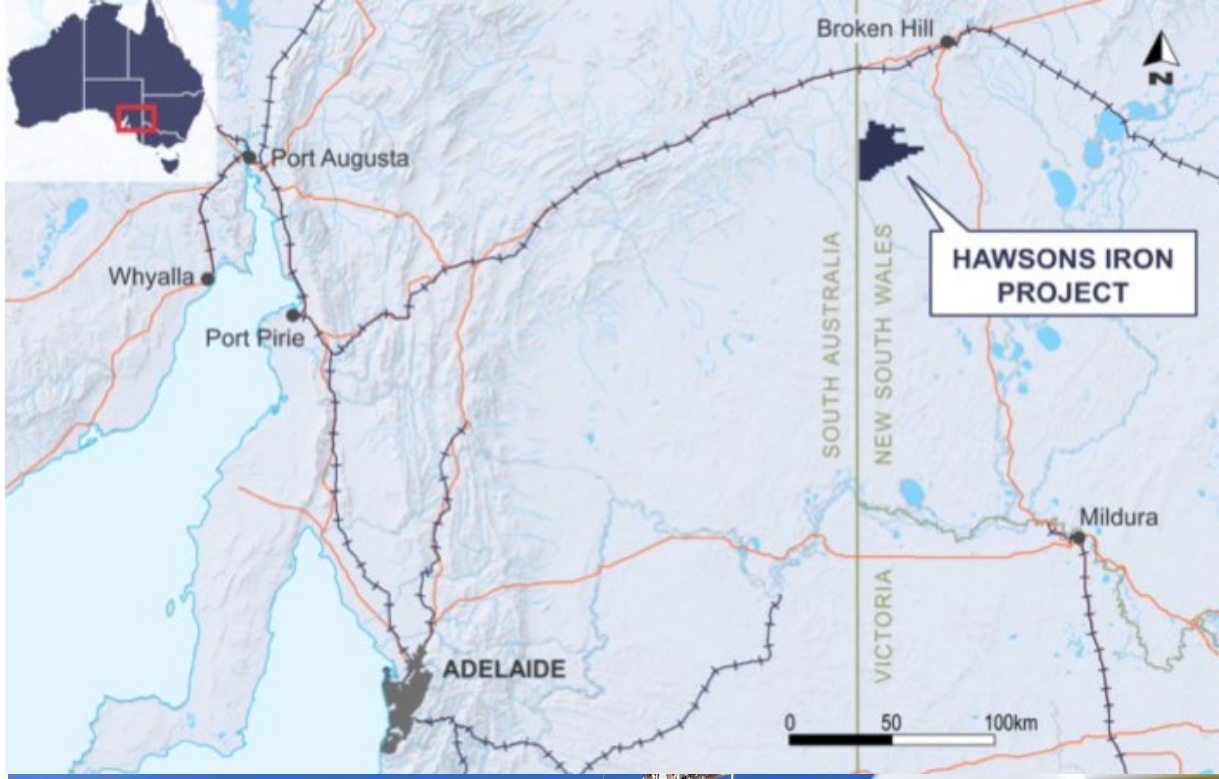
Hawsons Iron Project

For personal use only

Hawsons Iron Project

- ✓ Location: 60km southwest of Broken Hill.
- ✓ Original production target of minimum 10 Mtpa for 20+ year mine life (but upscaling to 20 Mtpa during BFS).
- ✓ Current JORC 2012 Resource of 3.06 Billion tonnes at 13.1 DTR% for 400 Mt of concentrate.
- ✓ Project declared a NSW State Significant Development, pending national Major Projects status and lodged SA Major Project application.
- ✓ Tenements: 3 tenements totalling 511km2 and one mining license application.
- ✓ Stage 1: Prefeasibility Study completed 2017.
- ✓ Stage 2: Bankable Feasibility Study due for completion December 2022.



Personal use only

Hawsons Iron Project benefits

World class mine

70% Fe **Best ore in the world**

Strong market demand

Compelling ESG

Mining heartland

70% Iron percentage of Hawsons Supergrade® product.

12.0 Offtake demand for Hawsons Supergrade® product (Mtpa).

400 Total production of Hawsons Iron Project 400 Mt (million tonnes) per DTR Concentrate: Mineral Resource Upgrade ASX Release 19 October 2021.

personal use only

World class mine

- ✓ Mineral Resource is larger than first identified in the PFS.
- ✓ Announced JORC Mineral Resource Upgrade 19 October 2021
  - ✓ 400 Mt of DTR concentrate
  - ✓ 9% increase in indicated resource to 132 Mt
  - ✓ 18% increase in Inferred resources to 268 Mt.

Best ore in the world

70% Fe

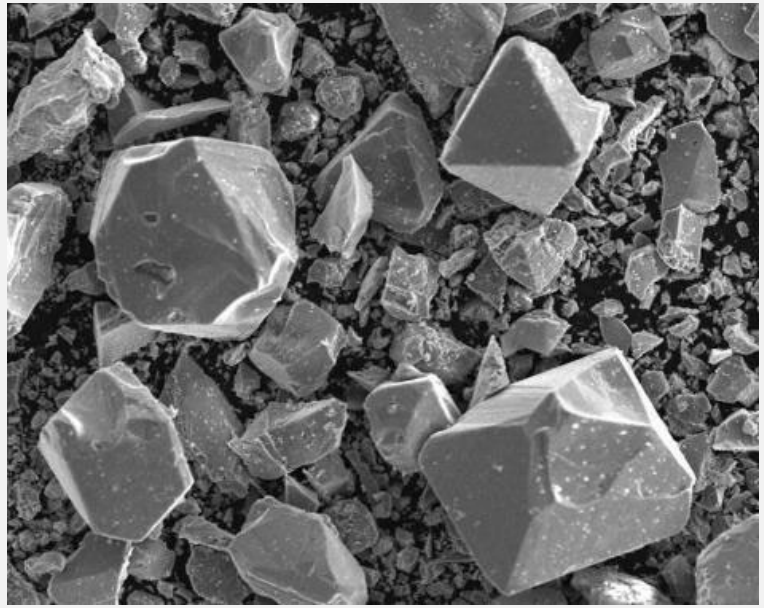
- ✓ HIO ore body deposited in a soft siltstone (a fine-grained silt in a sea).
- ✓ Unlike Pilbara ore bodies deposited in hard silica (a glass-like rock called “chert”).
- ✓ Subjected to low grade metamorphosis (heat and pressure) which converted clays to silicate minerals.
- ✓ Breaks around the grain boundaries, rather than through the magnetite mineral grains.
- ✓ Simple liberation of a high purity concentrate using low energy.
- ✓ Less water consumed during processing due to absence of clay in the ore body.

Not all ores are created equal



When HIO ore is crushed and ground to 40 microns, the magnetite is seen in its crystalline state.

It “liberates” along the grain boundaries and forms as 3-dimensional crystals.

Best ore in the world

70% Fe

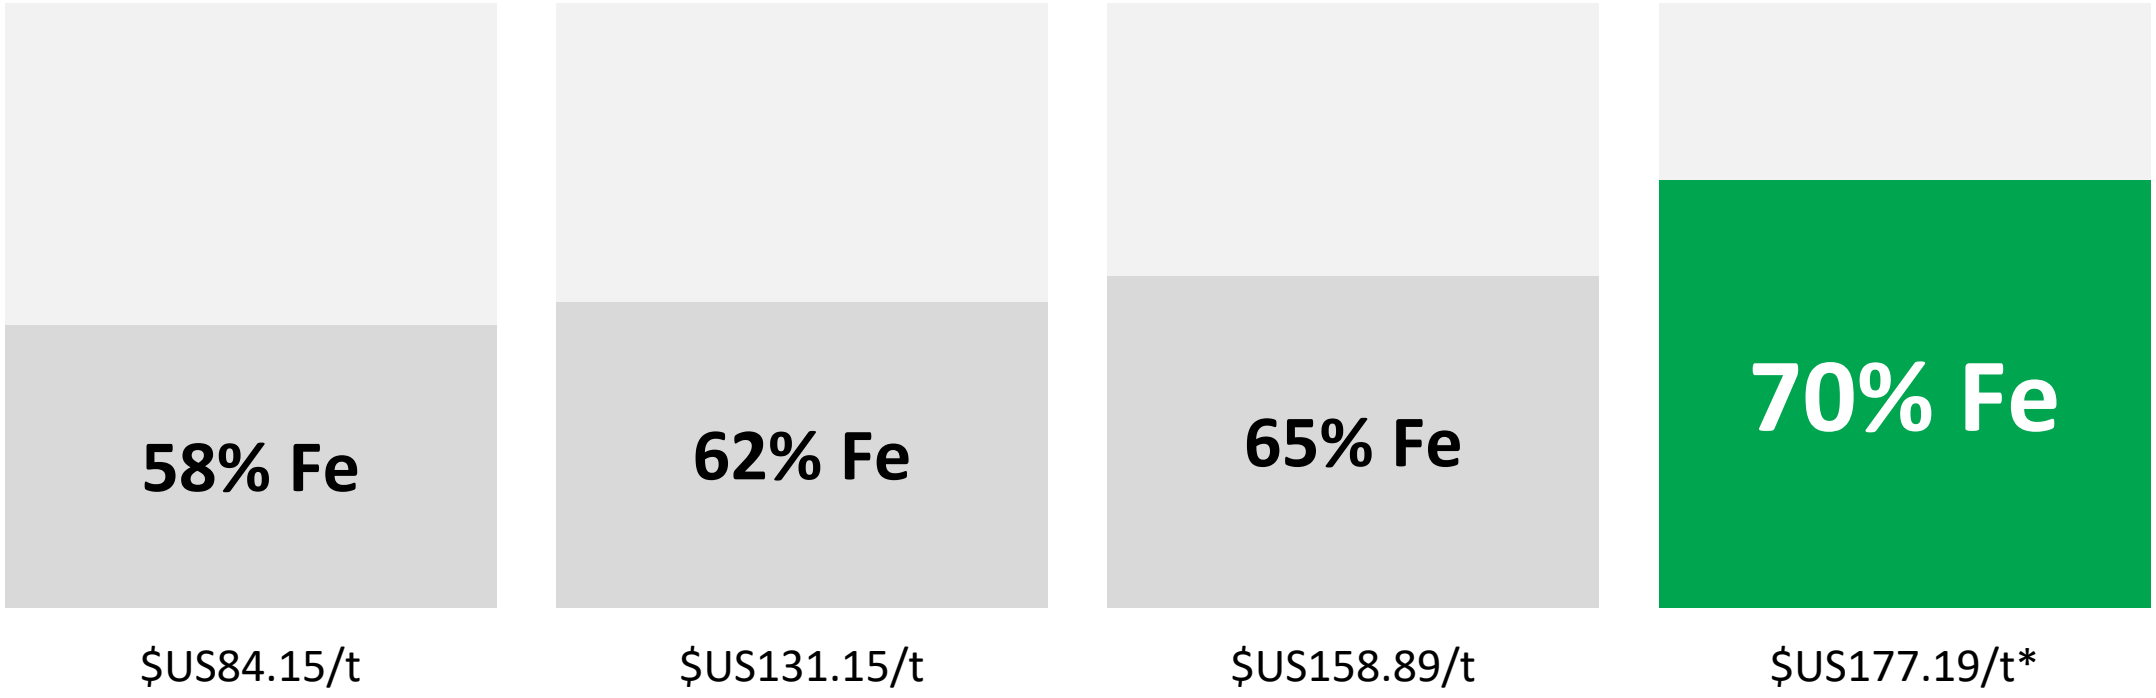
- ✓ Viable at all points of iron ore price cycle.
- ✓ Robust financial model withstands price volatility.
- ✓ First quartile on the global iron ore cost curve, competitive with industry leaders.
- ✓ Structural shift widening in the iron ore market between higher and lower grade ores.
- ✓ Hawsons is perfectly placed to attract premium prices for its high-grade product.

ersonal use only

Best ore in the world

70% Fe

✓ Hawsons Supergrade® (70%) Iron demands price premium



Note: Prices based on CFR North China. Source S&P Global Platts, Steel Raw Materials Monthly, Issue 108 / February 2022.
HIO price calculated based on the following: VIU 1% Fe Differential - $2.16. $2.16 * 5 = $10.80 + $7.50 premium = $18.30 Hawsons Supergrade ® = $158.89 + 18.30 = $177.19.

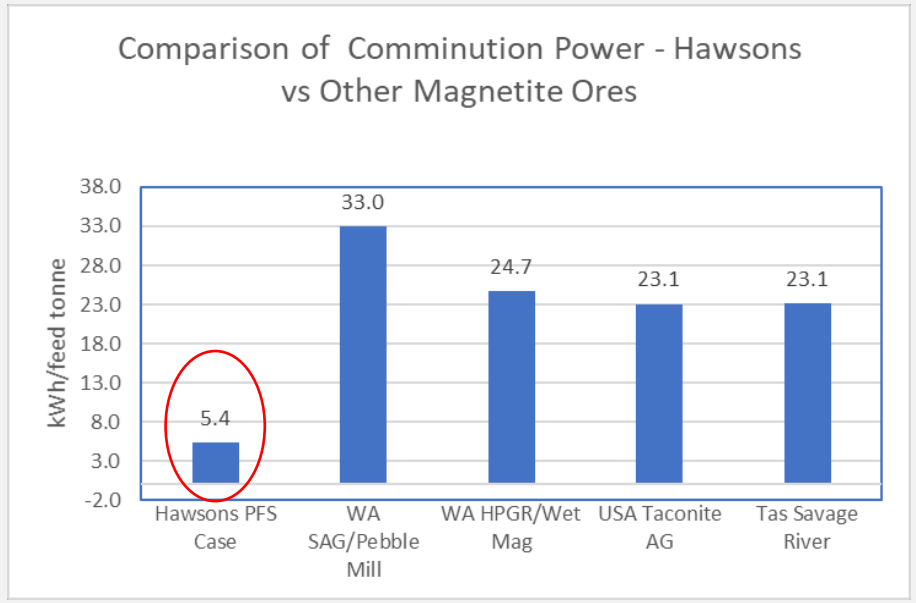
ersonal use only

Personal use only

Compelling ESG story

- ✓ Hawsons Iron Project will lead with low energy usage and CO2 emissions through the value chain
  - ✓ Energy-saving in crushing and grinding
  - ✓ Water-saving processing
  - ✓ Less power per tonne of concentrate produced: confirm during our BFS works - comminution power consumption used to process our iron ore up to 75% less than hard-rock magnetite mines

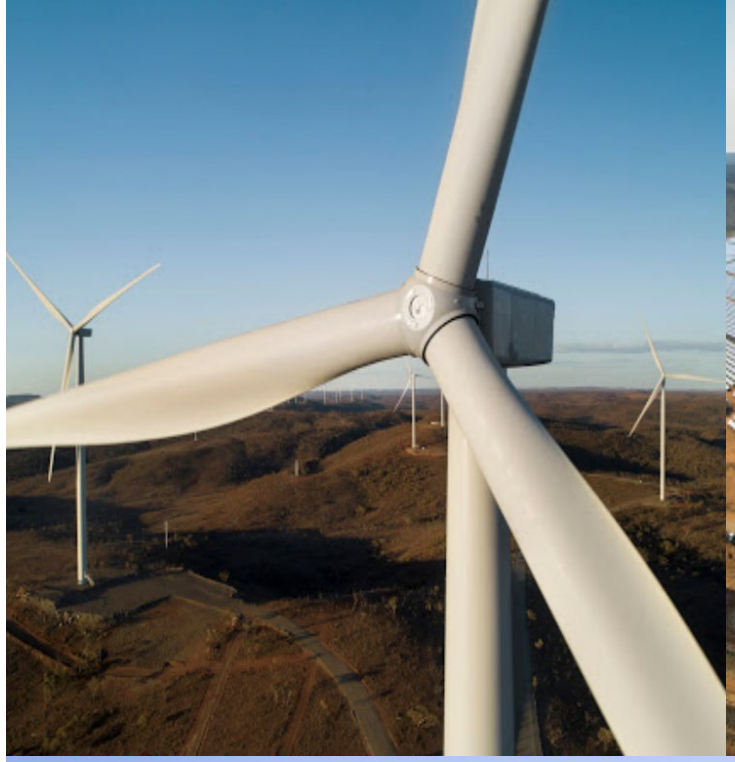
Hawsons Iron will secure a unique position in the carbon-conscious global steel industry



Based on McNabb et al, Iron Ore 2009, Hawsons PFS and Web based Taconite operating data.

Compelling ESG path

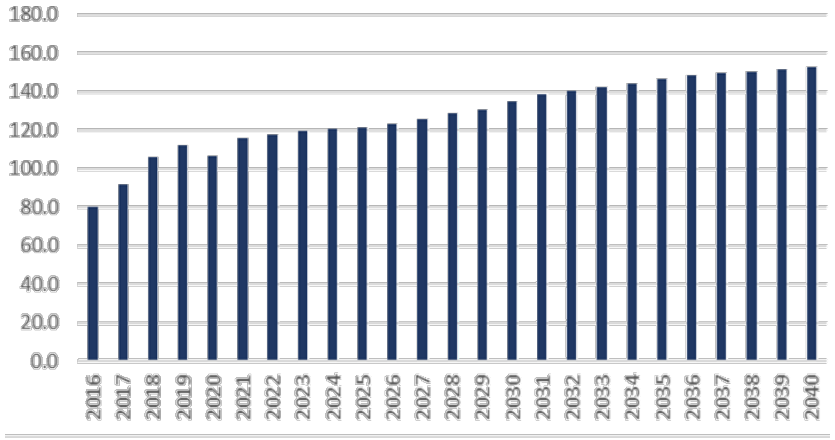
- ✓ Innovative mining and processing operation towards zero emissions footprint for our operations.
- ✓ Vision for Broken Hill renewable energy hub.
- ✓ Run site on solar and wind generation and battery power and storage.
- ✓ Deliver a safe and supportive workplace.
- ✓ Sustainable approach through ESG framework.
- ✓ Jobs creation during construction and operation.



ersonal use only

Hawsons Supergrade®
Strong Market Demand

- ✓ Forecast strong DRI growth to 2040
- ✓ Green steel drive to high-grade



Source: Wood Mackenzie

"The next 10 years are critical for steel production. Government policy and demand for green steel will continue to tip the balance in favor of EAFs. That will bring a hyper-focus on scrap and a specific range of high-grade materials."

Source: Fastmarkets: https://insights.fastmarkets.com/the-true-price-of-green-steel

"Producing green steel from hydrogen and electric furnaces will require massive amounts of clean energy, and a shift to higher grades of iron ore."

Source: https://about.bnef.com/blog/steel-industry-set-to-pivot-to-hydrogen-in-278-billion-green-push/

Personal use only

Hawsons Supergrade®
Strong Market Demand

- ✓ Global steel industry responsible for 7% of global carbon emissions.
- ✓ High product grades allow steel mills to optimise their blast furnace burden, reducing costs and decreasing emissions.
- ✓ Longer term as steel technology adapts to reduce emissions, the market will demand more higher-grade ore.
- ✓ Hawsons Supergrade® product suited to 'green steel' production.
- ✓ Non-binding letters of intent from Asia and the Middle East for the Hawsons Supergrade® product.

> "The LOIs and finance we have in place shows the market understands how strong this opportunity is."

Bryan Granzien,
Executive Chairman

For personal use only

Mining heartland – Broken Hill

- ✓ Broken Hill region has long and proud mining history, supportive of mining.
- ✓ City with generations of skilled mining workers.
- ✓ Low intensity pastoral land.
- ✓ State Significant development status NSW - Mining Concierge team to facilitate.

BFS extended budget and scope

ersonal use only

BFS extended to assess option to increase Hawsons Iron Project capacity

Budget and scope of the Hawsons Iron Project BFS extended to incorporate a 20 million tonne per annum (Mtpa) production option.

Potentially offers significantly lower operating costs, improved Environment, Social and Governance (ESG) outcomes, and increased project value.

Both 10 Mtpa and 20 Mtpa options to be completed through the BFS.

- Mineral Resource upgrade to 400 Mt announced on 19 October 2021, prompted a deeper dive into project optimisation to include a 20 Mtpa project.
- Since 2017 PFS, changed market conditions, emergence of new technologies, ESG considerations and decarbonisation strategies require further attention.
- BFS budget and scope extended to incorporate an option for 20 Mtpa production. Doubling production offers the opportunity to maximise project value.
- Studies to include port options and underground, direct-to-port slurry pipeline. Studies will take 8-10 months to complete and will be incorporated in existing schedules.
- Preliminary studies identified potentially significant mine-to-port transport operating cost savings and ESG benefits, offsetting any higher capital costs.
- The additional studies will cost approximately $12.4 m (estimated $5 m for pipeline and port studies; and $7.4 m on process engineering, EIS, approvals & ESG goals.
- Additional funding available through LDA Capital $200 million equity facility, if required. Agreement signed with LDA Capital in December 2021.

ersonal use only

Personal use only

Transport options to be reviewed as part of the BFS

Rail and trans-ship (PFS base case)

Product from the concentrator directly enters the slurry pipeline and transported to the rail load point

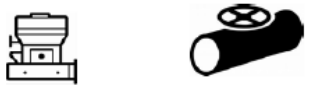
Product is received at the dewatering plant, reducing the moisture level to the desired TML. Product is then stacked to stockpiles for transport by rail

Product is received via a dump station and stacked on stockpiles at the terminal

Product is loaded onto transhippers and transported to the OGV in deeper water

Product is loaded into the OGV from the transhippers

Slurry pipeline to a new port option



Product from the concentrator directly enters the slurry pipeline and transported to the terminal

Product is received at the dewatering plant, reducing the moisture level to the desired TML. Product is then stacked to stockpiles

Product is loaded into the OGV directly from the terminal

Legend: Transportable Moisture Level (TML)
Ocean Going Vessel (OGV)

Transport study – 2017 PFS vs 2022 BFS at a glance

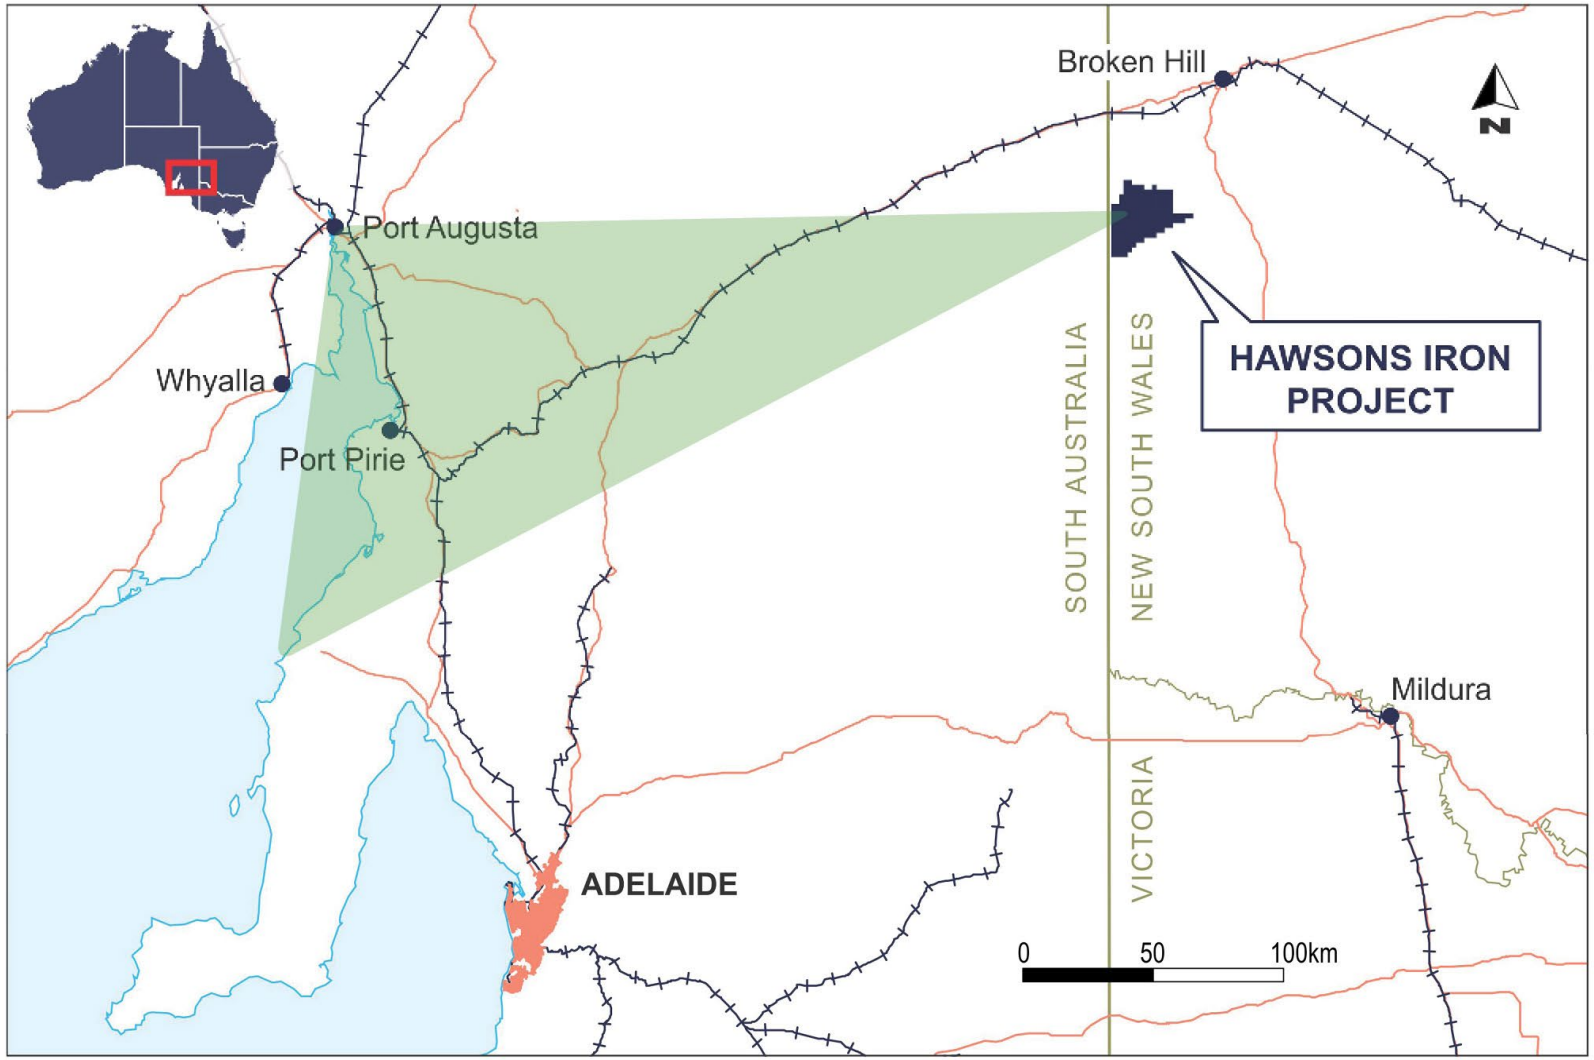
Study area	2017 Prefeasibility Study	2022 Bankable Feasibility Study
Mineral Resource	Study based on a Mineral Resource of 200 Mt	Study will be based on a Mineral Resource of 400 Mt
Project capacity	Based on a 10 Mtpa project	Based on a 20 Mtpa project
Transport options	Slurry pipeline from mine to rail at Broken Hill to port (trans-ship)	Underground slurry pipeline from mine direct to standalone, deep-water port
Transport considerations	Based on constrained rail carrying capacity	Preliminary studies show new transport options could produce significant savings while removing existing rail export route carrying constraints
ESG considerations	Looked at ESG considerations	New ESG imperatives to decarbonise the steel industry & net zero emission mining

Both options and ways to mitigate risk are being assessed

personal use only

Personal use only

Transport study options



Transport corridor study area

Key drivers for assessment

- ✓ PFS trans-shipment case is limited by rail capacity.
- ✓ Scalability – project could reach 20 Mtpa production targets.
- ✓ Holistic solution – new transport and new port combination provides ease of access, but must be viable.
- ✓ New transport and new port combination reduces risk – project would not be competing for access.
- ✓ New transport and new port combination produce best life-of-project ESG outcomes, and potentially opens up the Braemar minerals province to further development.
- ✓ New transport and new port combination produces higher initial capital outlay but potentially significant transport operating cost savings over the long-term – increasing the overall value of the project.

Outlook and overview

ersonal use only

Outlook and overview

- BFS scope and budget extended but on track for completion in December 2022. Partnering with global mining specialists to progress BFS.
- Drilling program to be completed in March 2022. Seven drill rigs on site. Updated resource statement due in Q2 2022.
- Environmental Impact Study (EIS) underway –flora and fauna studies have commenced.

Pre-feasibility results

PFS financials	
Annual profit margin	US $401 m
Equity IRR	29.9%
Equity NPV	US $1,091 m
Tonne of Hawsons Supergrade®	201 m
Mine life / pay back period	20 / 3-4 years
62%, 65% Fe price assumption	US $63, 75 per tonne

PFS cost estimates	
Operating costs – C1 FOB	US $33.08
Operating costs – all in	US $39.74
Operating costs – CFR China	US $48.03
Hawsons Supergrade® price premium over 62% Fe	US $25.00
Revenue per dry metric tonne	US $88.00
Equivalent 62% Fe CFR cost	US $23.03
Capital cost inclusive of contingency	US $1.40 Bn

World leading metrics

- ✓ US $48/t opex. CFR China
- ✓ US $1.4 Bn capital cost pay back in <1 year today
- ✓ Production 10 Mtpa for 20 years, potential to expand and extend
- ✓ Production targeted in 2 years

The Company confirms that all assumptions and technical parameters underpinning the Resource and Reserve estimates and all material assumptions underpinning the production target or the forecast financial information derived therefrom continue to apply and have not materially changed since first reported on 28 July 2017.

LDA Equity Facility – A$200m

- ✓ HIO entered a A$200 million equity financing Put Option Agreement with LDA, a US investment group (December 22, 2021)
- ✓ HIO may access up to A$200m in equity capital over four years if required, at its sole discretion
- ✓ HIO will access up to a further A$50.05m where LDA exercises 71,500,000 unlisted share options
- ✓ The strike price for the LDA options will be the 125% of the 90-day VWAP prior to the 2nd Anniversary of the issue of the Options, but if the HIO share price achieves a price of A$0.55 at any stage prior to the 2nd Anniversary of the issue of the Options, the strike price for the 71.5 million options automatically resets to A$0.70;
- ✓ A A$4 million Option Management Fee, comprising A$2 million in cash, and A$2 million shares priced at the 90 day VWAP prior to the first anniversary of the execution of the agreement - the first anniversary is also the date that the Option Management Fee is due.
- ✓ LDA Capital's support recognises the economic potential of the world-class Hawsons Iron Project asset and Hawsons Supergrade® iron product within the Green Steel supply chain
- ✓ The funding package, secured at low cost, provides:
  - ✓ flexibility in financing;
  - ✓ substantially reduces project financing risk; and
  - ✓ provides HIO a beachhead into the USA and European capital markets.
