Principal activities

The principal activity of the Company during the period was to explore mineral tenements in Western Australia. The Company is currently focused on gold and base metal exploration across seven projects located in Western Australia. The Company continues to pursue aggressive exploration programs across its projects to determine the potential for economic projects. During the period, the Company also acquired the Geoff Well project with drill ready targets highly prospective for VMS style mineralisation.

Review of operations

The loss for the Group after providing for income tax amounted to \$800,446 (31 December 2020: \$283,252).

As at reporting date the Group has total assets of \$5,417,804 (including exploration and evaluation assets of \$3,015,933 and bank balance of \$2,202,578).

At 31 December 2021, the Company has 57,964,767 shares on issue, 5,000,000 options on issue and 1,500,000 performance rights on issue. Capital raised during the year, totalled \$847,275 (before costs) by way of issue of 7,060,621 shares. A further 500,000 shares were issued as part consideration for a tenement acquisition.

The Company also issued 1,500,000 performance rights.

COVID-19 continues to be a developing situation in the State of Western Australia with the State's hard border being lifted on 3 March 2022. The Company continues to comply with any restrictions imposed by the Western Australian State Government to deal with COVID-19. The Company doesn't foresee ongoing issues with COVID-19 outside of any additional requirement to comply with any new State or Federal requirements.

The Group holds 100% ownership over seven projects in Western Australia, being:

- The Sandstone Projects - Gidgee South and Gidgee North
- The Mt Magnet Projects - Winjangoo and Coolaloo
- The Pilbara Project - Opaline Well
- The Southern Cross Projects - being Mt Finnerty and Parker Dome, which are held under a farm-in/JV agreement with Ramelius Resources Ltd having the right to earn a 75% interest

Sandstone Projects - Gidgee North & Gidgee South

The Company's Sandstone Projects are comprised of two separate projects - Gidgee South (E57/1055, M57/352, P57/1363 and P57/1368) and Gidgee North (E53/1920, E51/2044, and E53-1832-1), covering circa 330 km² and located approximately 640 km northeast of Perth and 700 km north-northwest of Kalgoorlie. The Projects lie within the Gum Creek Greenstone Belt of the Youami Terrane, which forms a lensed, broadly sinusoidal belt measuring some 100km in length and 24km in width.

Gidgee North

In July 2021, the Company announced six conductors had been identified using SkyTEM data. Additional exploration work identified multiple Au, Cu-Zn and coincident Au-Cu-Zn targets which were followed up using ground fixed loop EM (FLEM) in January 2022.

The FLEM identified 9 high priority VMS base-metal targets. The Company is scheduled to commence drilling in the second quarter of 2022. The project remains the highest priority for the Company at present.

Gidgee South

In July 2021, the Company completed its maiden drilling campaign at the Gidgee South project with 56 RC holes drilled for a 4,258m program that was designed to test prospective granite-greenstone contacts as well as structural and geochemical targets. The assays returned from the drilling confirmed mineralisation in a number of holes including 1m @ 7.45g/t Au from 42m in GSRC0051 (ASX: 7 October 2021).

Ongoing exploration includes additional drilling around historical workings, DGPR anomalies and any surface geochemical anomalies.

Mt Magnet Projects – Winjangoo & Coolaloo

The Mount Magnet Projects are comprised of several granted exploration licences; the Winjangoo Project (E58/536) and the Coolaloo Project (E59/2329 & E59/2509), situated in the Murchison Mineral Field and proximal to the historical mining centre of Mount Magnet which has historically produced over six million ounces of gold since the initial discovery in 1891. The Mount Magnet Projects cover approximately 302 km².

Winjangoo

During the period, the Company commenced a RC drilling program at the project to test several high-priority targets based on coincident auger geochemical anomalies, outcropping quartz veins with oxidised pyrite, surface alteration, structurally deformed and sheared granite-greenstone contacts as well as recent prospector activity. A total of 38 RC holes were drilled for a total of 2,980m.

Coolaloo

No significant work was undertaken at Coolaloo during the period.

Pilbara Project - Opaline Well

The Opaline Well project (E 45/4997) is located in the Pilbara, approximately 190km southeast of Port Hedland and 35km west of Nullagine.

In October 2021, the Company announced the commencement of an airborne AEM survey targeting high-value massive sulphide conductors in the underexplored volcano-sedimentary sequence.

Subsequent to the period end, the Company announced that a number of highly prospective conductors were identified with additional ground truthing planned for the next stage of follow up work.

Southern Cross Projects (Ramelius Resources (ASX:RMS) Farm-in/JV)

The Mt Finnerty Project, which forms part of the Southern Cross Assets (E 16/505) is located approximately 430km east-northeast of Perth and 100km northeast of Southern Cross. Located in the Archean Mara-Diemals greenstone belt, previous exploration activity has been extensive.

The Parker Dome Project (E 77/2424) is located approximately 400km east of Perth and 60km south-southeast of Southern Cross. Situated on the western margin of the north-westerly elongated Parker Dome granitoid, the project hosts several broad previously identified gold-in soil anomalies from historic auger drilling with results up to 192ppb Au. Historical RAB drilling has reported results up to 0.52 g/tAu in transported overburden and 0.38 g/t Au in ultramafics.

The Mt Finnerty and Parker Dome Projects are subject to the Flinders and Parker Dome Farm-in and Joint Venture Agreement between Ramelius Resources Ltd and Rouge Resources (a 100% owned subsidiary of Westar Resources Ltd) dated 30 August 2019. Under the terms of the agreement Ramelius may earn up to a 75% interest by spending \$2,000,000 over a three-year period.

In October 2021, the Company announced that Ramelius Resources had commenced a RC program for up to 3,400m of drilling with a focus on targeting structures along the granite-greenstone contacts.

Subsequent to the period end, the Company announced a number of bonanza grades were recorded including 1m at 274g/t Au from 177m (ASX 31 January 2022). All assays have been returned for a total of 3,027m of RC drilling in 16 drill holes at Mt Finnerty, testing a 3km strike extent of the granite-greenstone contact, with assays from a further 2,442m of regional, first pass aircore in 42 holes is yet to be received.

Geoff Well Project

On 18 October 2021, it was announced that the Company had executed a Binding Agreement to earn up to 75% interest in the Geoff Well Project ("Geoff Well") from Shumwari Pty Ltd, Alan Archibald Pellegrini and Glen Alexander Brown (together the "Vendors").

Geoff Well has identified Cu-Zn mineralisation in historical drilling, along with several untested gossans.

Significant changes in the state of affairs

Other than for the issues of shares and rights in period, there were no significant changes in the state of affairs of the Group during the financial half-year.

**INDEPENDENT AUDITOR'S REVIEW REPORT TO THE MEMBERS OF WESTAR RESOURCES
LIMITED (CONTINUED)*****Directors' Responsibility for the Half-Year Financial Report***

The directors of Westar Resources Limited are responsible for the preparation of the half-year financial report that gives a true and fair view in accordance with Australian Accounting Standards and the *Corporations Act 2001* and for such internal control as the directors determine is necessary to enable the preparation of the half-year financial report that gives a true and fair view and is free from material misstatement, whether due to fraud or error.

Auditor's Responsibility

Our responsibility is to express a conclusion on the half-year financial report based on our review. ASRE 2410 requires us to conclude whether we have become aware of any matter that makes us believe that the half-year financial report is not in accordance with the *Corporations Act 2001* including giving a true and fair view of the Company's financial position as at 31 December 2021 and its performance for the half-year ended on that date, and complying with Accounting Standard AASB 134 *Interim Financial Reporting* and the *Corporations Regulations 2001*.

A review of a half-year financial report consists of making enquiries, primarily of persons responsible for financial and accounting matters, and applying analytical and review procedures. A review is substantially less in scope than an audit conducted in accordance with Australian Auditing Standards and consequently does not enable us to obtain assurance that we would become aware of all significant matters that might be identified in an audit. Accordingly, we do not express an audit opinion.
