Mining

Raleigh

Production that commenced in December 2004 at the Raleigh Underground Mine was placed on care and maintenance due to seismic activity in April 2020. A full review of the mine plan was initiated by the JV Manager and will result in rescheduling the mining of remaining reserves to a later date.

There was no capital or operating development for the half-year. The depth of the decline is approximately 743 metres ("m") below the surface. The top of the Sadler incline remains at 356m below the surface and the bottom of the Sadler Decline is approximately 401 m below the surface.

There was no mine production at Raleigh during the half-year.

Rubicon/Hornet/Pegasus

Production at the Rubicon Underground Mine that commenced in August 2011 continues.

Rubicon, Pegasus and Hornet Ore Bodies

Capital development for the half-year totalled 516 m including 88 m of decline development. Operating development for the half-year totalled 1,256 m; including 323 m in waste, 757 m in ore and 176 m through paste fill.

Mine production during the half-year totalled 226,003 tonnes ('t') grading 4.0 grams per tonne ("g/t") containing 29,056 ounces ("oz") of gold, based on grade control estimates. Tribune's entitlement to mined ore tonnes in the half-year was 83,056 t for 10,678 oz.

Processing

During the half-year, treatment campaigns at the Kanowna Belle Plant processed 19,550 t of EKJV ore from the Rubicon mine. Treatment campaigns at the Lakewood Mill processed 138,761 t of R&T ore from the Rubicon mine and a campaign at the Mungari processing plant treated 29,495 t of ore from Rubicon mine.

A 31,198 t low grade parcel of Rand and Tribune ore was sold and treated through Evolution Mining's Mungari mill during the half-year, with Tribune's share equating to 23,448 t.

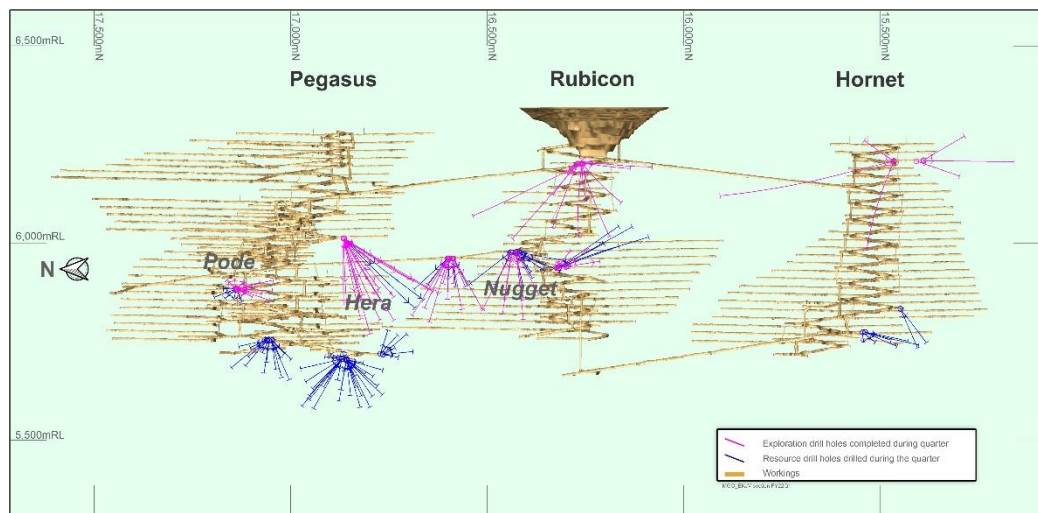

A total of 21,032 oz of gold were credited to the Rand and Tribune Bullion Accounts. Tribunes share of gold bullion was 15,774 oz.

Exploration

EKJV

Drilling activity at EKJV was undertaken by two underground diamond drill rigs for a total of 171 completed holes with 25,896 m of drilling. Drilling focused on confirming grade continuity on the main mineralised K2 structure below current development at Rubicon and between the declines in the area connecting Rubicon and Pegasus. Drilling continued to define ore body continuity and delineate extensions of mineralisation at Pode, Nugget and Hera which are each situated in the hanging wall of the K2 structure. Several holes intercepted mineralisation outside the Pode and Hera wireframes keeping open the possibility of modest resource expansion down-dip on both structures.

Details of all EKJV exploration activities are contained in the September and December Quarterly EKJV Exploration Reports released to the market on 27 October 2021 and 24 January 2022.

Seven Mile Hill (Tribune's Interest 50%)

A drilling program was conducted at Seven Mile Hill during the period including RC and diamond drill holes. A total of 60 RC holes for 6,426 m were completed.

Many of these were pre-collars for the diamond holes. A diamond drilling program was conducted with a single hole drilled at White Lake, and 7 holes completed at Kopai Ridge. The total diamond drill metres drilled during the period was 828.5m.

West Kundana Joint Venture (Tribune's Interest 24.5%)

No exploration activity was undertaken within the WKJV.

Tribune Resources Ghana Limited (Tribune's Interest 100%)

Japa Concession (Tribune's Interest 80%)

The Company continued the major reverse circulation (RC) and diamond core (DC) drilling campaign at the 1.81 million-ounce Adiembra Resource during the period. The focus of this program is infill and extensional drilling of the defined Resource to elevate the classification of inferred and unclassified mineralisation to a minimum indicated category for future reserve estimation. In addition to drilling at Adiembra, reconnaissance traverses across proposed infrastructure areas within the Mining Lease have commenced, with other conceptual targets and extensions to the Japa-Dadieso trend also scheduled in this phase of work.

A total of 6,078 metres combined RC and DC were drilled in 51 holes during the period. The drilling was accomplished utilising one RC rig and two DC rigs. The second DC rig commenced in April to complete diamond tails of prematurely suspended RC holes. Planned Adiembra infill drilling was completed during the quarter, awaiting resource estimation.

Results received to date are consistent with expectations in terms of mineralisation orientation, thickness and grade and have also yielded robust intersections for both the infill and extensional components of the campaign, especially at the eastern end of the deposit and at depth both on the Central and Western lodes.

The diamond drilling component of the Adiembra resource definition program and the reconnaissance program testing conceptual targets within the mining lease was completed on the 24th of September 2021. Work is ongoing to update the existing mine resource estimation for Adiembra.

Diwalwal Gold Project (Philippines)

Resource definition drilling of Balite Vein was terminated by first week of July 2021 due to limited underground drill caddy positions to intersect eastern vein extension at an optimal angle.

Underground mapping and sampling returned appreciable results in West Drift and L-585 areas indicating additional gold resource and extending nearest grade shells to more than 50m. Follow-up work was carried out via underground mapping.

Surface exploration in Simulao prospect completed a regional campaign over an area of 1,300 hectares composed of stream sediment sampling of first to second order streams, ridge-and-spur soil sampling, geologic mapping and rock sampling.

Corporate

The Company operated a share buy-back during the year; however, no shares were bought back during the period.

The Company held its Annual General Meeting on 26 November 2021. All resolutions were passed at the meeting.

A fully franked dividend of 20 cents per ordinary share was paid to the shareholders of Tribune Resources Limited on 5 November 2021.

A fully franked dividend of 10 cents per ordinary share was paid to the shareholders of Rand Mining Limited on 5 November 2021.

The EKJV litigation, as previously announced by the Company, remains ongoing. The matter was heard in the Supreme Court in mid-October 2020. The Company is awaiting the court's decision.

Significant changes in the state of affairs

There were no other significant changes in the state of affairs of the Group during the half- year.

Matters subsequent to the end of the half-year

The Group announced an extension to the on-market share buy-back on 1 February 2022. The buy-back up to a maximum of 5,246,807 shares was extended to 21 February 2023.

Level 2: Inputs other than quoted prices included within Level 1 that are observable for the asset or liability, either directly or indirectly

Level 3: Unobservable inputs for the asset or liability

Valuation techniques for fair value measurements categorised within level 2 and level 3

On 31 May 2021, the consolidated entity, revalued its office building in East Legon. The fair value used represents the amount for which the asset could be exchanged between knowledgeable parties in an arm's length transaction, based on current prices in an active market for similar properties in the same location and condition. The valuation was performed by an independent valuation company which is also a member of the Ghana Institute of Surveyors. The directors do not believe that there has been a material movement in fair value since the revaluation date.
