DIRECTORS' REPORT

Your directors submit the financial report of the Group consisting of Gateway Mining Limited (**Gateway** or the **Company**) and its controlled entities (Collectively, the **Group**) for the half-year ended 31 December 2021.

DIRECTORS

The names of directors who held office during the year:

- Mr. Mark Cossom (Managing Director)
- Mr. Trent Franklin (Non-Executive Director)
- Mr. Scott Brown (Non-Executive Director)
- Ms. Debra Fullarton (Non-Executive Director)

PRINCIPAL ACTIVITIES

The activities of the Group during the financial year were in the mineral exploration industry principally exploration for gold and base metals. There were no significant changes in the nature of the activities of the Group that occurred during the period.

DIRECTORS' REPORT

OPERATIONS REVIEW

The Company has established a high-quality exploration landholding at its Gidgee Gold Project, located in the Murchison goldfields of Western Australia. This Project is the sole focus of all of the Company's exploration funding and activities. The Company still maintains an interest in several former projects through a series of Farm-out and Joint Venture Agreements that leave Gateway exposed to discovery opportunities through leveraged third-party expenditure.

GIDGEE GOLD PROJECT - INTRODUCTION

Gateway's Gidgee Gold Project is located approximately 70km north of the township of Sandstone, Western Australia. The Gidgee Project comprises a consolidated area of ~1,000km² covering the southern extension of the Archaean aged Gum Creek Greenstone Belt.

The Project is easily accessible from Perth via major sealed and well-formed gravel roads, with the town of Sandstone providing limited logistics support. The Project is centrally located within a ~120km radius of six operational gold treatment facilities.

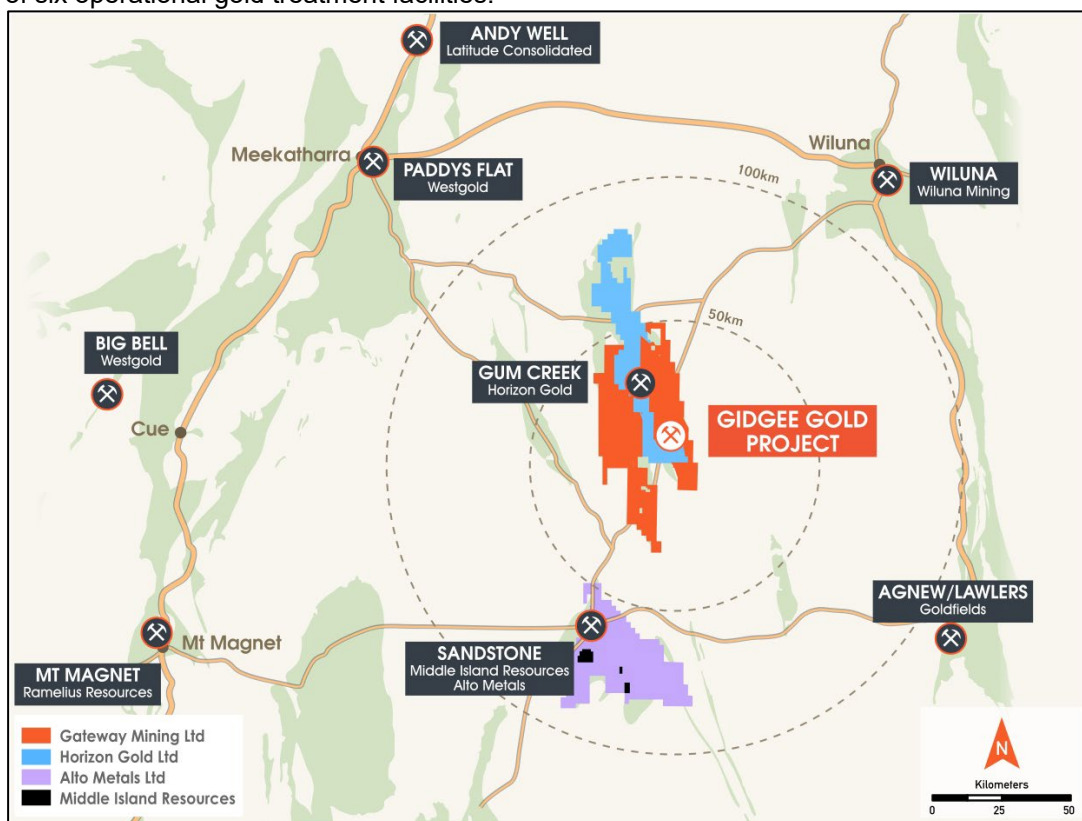

Figure (1): Gidgee Gold Project Location Plan

DIRECTORS' REPORT

MONTAGUE GRANODIORITE DOME

MINERAL RESOURCE UPDATE

The Gidgee Gold Project Mineral Resource has been updated to 8,165,000t @ 1.7g/t Au for 449,000oz Au, classified as Indicated and Inferred (Table 1) and reported in accordance with the JORC Code (2012).

This updated Mineral Resource represents an increase of 87% from the maiden Mineral Resource announced on 3 October 2019. The updated Total Mineral Resource consists of the previously announced estimate for the Whistler deposit, an updated estimate for the Montague-Boulder deposit, and maiden estimates for the Evermore and Achilles North/Airport deposits (Figure 2).

The new resource estimates for the Montague-Boulder, Evermore and Achilles North/Airport deposits were undertaken by Elizabeth Haren of Haren Consulting Pty Ltd, based on a drill database and mineralisation interpretations compiled by Gateway geological staff and Omni GeoX consultants.

The Whistler Mineral Resource was not re-estimated as part of this process. Full details of the Whistler Mineral Resource were provided in the ASX Release dated 3 October 2019. For full details of the updated Mineral Resource please refer to ASX announcement dated 14 December 2021.

Table 1. Gidgee Gold Project – December 2021 Mineral Resource Estimate Summary

	Indicated			Inferred			Total		
	Tonnes (t)	Au (g/t)	Au (oz)	Tonnes (t)	Au (g/t)	Au (oz)	Tonnes (t)	Au (g/t)	Au (oz)
Montague-Boulder	522,000	4.0	67,000	2,556,000	1.2	96,000	3,078,000	1.7	163,000
Whistler	-	-	-	1,700,000	2.2	120,000	1,700,000	2.2	120,000
Evermore	-	-	-	1,319,000	1.6	67,000	1,319,000	1.6	67,000
Achilles Nth/Airport	221,000	2.0	14,000	1,847,000	1.4	85,000	2,068,000	1.5	99,000
Total	743,000	3.4	81,000	7,422,000	1.5	368,000	8,165,000	1.7	449,000

*Notes: Montague-Boulder, Evermore and Achilles Nth/Airport Mineral Resources reported above 0.6g/t Au
Whistler Mineral Resource reported above 0.5g/t Au for open pit and 2.0g/t Au for underground
Rounding errors may occur

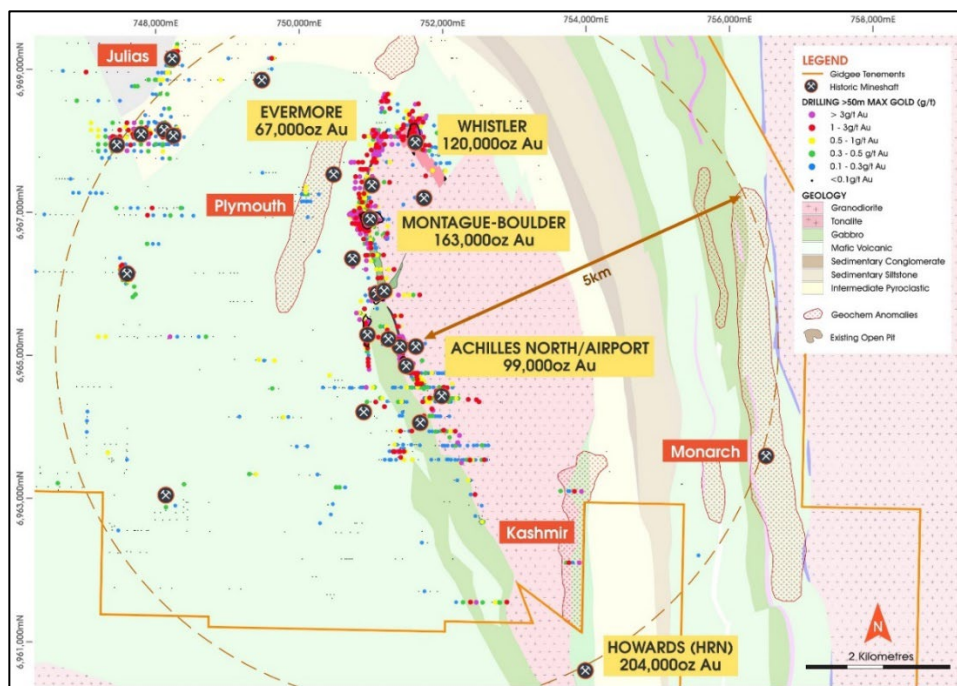

Figure (2): Gidgee Gold Project – Deposit Location Diagram

DIRECTORS' REPORT

MONTAGUE BOULDER RESOURCE EXTENSION RC DRILLING

During the reporting period, assay results returned from RC drilling immediately adjacent to the Montague-Boulder Mineral Resource included significant intersections within the margin of the granodiorite immediately adjacent to the Resource. Significant intercepts returned included:

- **GRC583:** 5m @ 2.7g/t Au from 115m (previously reported)¹
- **GRC696:** 7m @ 3.0g/t Au from 84m; and
7m @ 1.5g/t Au from 113m

The newly-discovered mineralised structure remains largely untested along strike to the north and south. The quality of the mineralisation intersected in this drilling – and its close proximity to the current Resource – provides the opportunity to significantly upgrade the Resource with additional drilling.

GRC696 was drilled ~75m up-dip of the intersection in GRC583, confirming the presence of multiple lenses of continuous flat-lying mineralisation over a dip extent of at least 125m. The strength of the mineralisation also provides a strong vector down-dip to where the structure intersects the mafic lithologies. This position is considered to be an additional high-priority target for future drill testing.

Additional potential for shallow extensions to the granodiorite-hosted mineralisation has also been identified to the south of the current Resource and existing open pit. Drilling by Gateway² intersected significant shallow mineralisation in GRC623 (6m @ 1.3g/t Au) in an area of sparse historical drilling (including GRB1518: 8m @ 3.9g/t Au). There is significant potential to test this trend at depth for additional stacked lodes.

MONTAGUE BOULDER PIT TO NORTHEAST PIT RC DRILLING

During the reporting period, final results were received from RC drilling completed between the historic Montague-Boulder and Northeast Open Pits. Assay results indicated a new high-grade zone of gold mineralisation that is interpreted as an extensive, moderately-dipping structure, with a series of steep "Link Structures" (Figure 3). These linking structures have only recently been identified and represent a highly prospective new target. Significant high-grade gold intersections (located ~300m apart) reported include:

- **GRC698:** 3m @ 11.5g/t Au from 177m
- **GDD023:** 3.2m @ 5.0g/t Au from 314m

Subsequent interpretation of these results indicates that they correspond to the Gordon's Lode, part of the current Mineral Resource at Montague Boulder. There is no effective drilling of this structure between the two positions. Previously reported high-grade intersections from the Gordon's Lode include³:

- **GRC330:** 4m @ 24g/t Au from 241m
- **GRC603:** 2m @ 5.6g/t Au from 178m

These intersections, from sections spaced approximately 80m apart, have stepped out approximately 550m to the south of those intersections within the Montague-Boulder Mineral Resource area. The intersections represent a down-dip extent of over 300m and remain open along strike and down-dip. The high-grade tenor of these intercepts, returned from sparse deeper drilling over a wide area, is significant in that it points to the potential for substantial high-grade domains to be present along this structure south of the Montague-Boulder Mineral Resource.

¹ ASX announcement 18 December 2020.

² ASX announcement 11 January 2021.

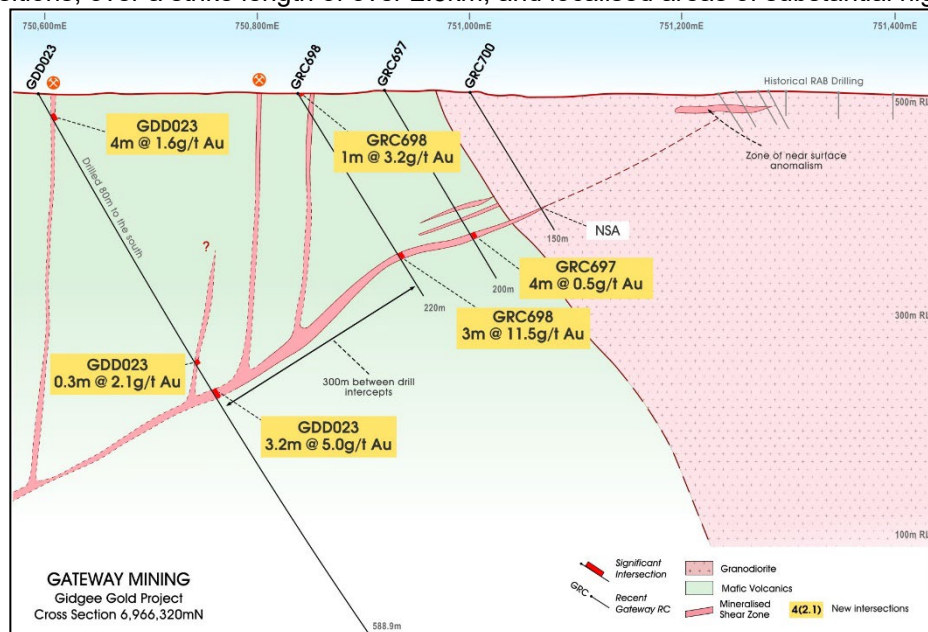

³ ASX Releases dated 10 July 2018 and 18 December 2020.

DIRECTORS' REPORT

In addition, a series of the "Link Structures", which appear to coincide with extensive lines of historic shafts, have now been identified over a strike length of approximately 500m. Initial RC drilling results from these structures were reported during the June 2021 Quarter⁴. Results now returned to date include:

- **GRC679:** 26m @ 2.1g/t Au from 64m, including 5m @ 7.9g/t Au⁵
- **GRC671:** 2m @ 5.9g/t Au from 11m and 4m @ 4.5g/t Au from 32m⁶
- **GRC698:** 1m @ 3.2g/t Au from 18m
- **GDD023:** 4m @ 1.6g/t Au from 23m

This work has been critical to understanding the "live" structures present and identifying the controls on the high-grade components. There is clear potential to delineate further economic mineralisation within a system that has seen five open pits mined historically over those areas where mineralisation has outcropped. Work to date has identified significant mineralisation away from these pits in relatively shallow positions, over a strike length of over 2.5km, and localised areas of substantial high grades.

JULIAS AIR-CORE DRILLING

During the reporting period, results were received from a 27-hole, 1,991m air-core program completed at the Julias target. Julias is located on a highly prospective litho-structural corridor approximately 5km to the west of the Mineral Resources of the Gidjee Gold Project and immediately north of the previously defined gold mineralisation at Flametree. The results continue to demonstrate the wider potential of the Gidjee Project, and support Gateway's strategy of systematically developing and drill testing targets within this 5km radius.

⁴ See ASX Release dated 1 June 2021.

⁵ See ASX Release dated 1 June 2021.

⁶ See ASX Release dated 1 June 2021.

DIRECTORS' REPORT

Significant near-surface oxide gold mineralisation was intersected at Julias over a strike length of ~1.2km, building on and enhancing a series of significant historical intersections (Figure 4). Results include:

- **GWAC0971:** 13m @ 4.0g/t Au from 30m
- **GWAC0972:** 3m @ 7.2g/t Au from 26m
- **GWAC0974:** 14m @ 1.1g/t Au from 37m
- **GWAC0978:** 7m @ 1.6g/t Au from 22m; and
1m @ 8.6g/t Au from 41m
- **GWAC0965:** 24m @ 1.4g/t Au from 16m
- **GRC294:** 17m @ 1.3g/t Au from 54m⁷
- **GRC196:** 14m @ 2.9g/t Au from 67m⁸
- **GRC180:** 25m @ 1.5g/t Au from 65m⁹

The results also extend towards the Flametree target zone, located approximately 500m along trend to the south, where significant zones of near-surface oxide gold mineralisation have previously been defined by Gateway.

Significant results include¹⁰:

- **GWAC0267:** 5m @ 10.4g/t Au from 52m
- **GWAC0256:** 4m @ 3.8g/t Au from 20m
- **GWAC0257:** 9m @ 1.1g/t Au from 17m
- **GWAC0247:** 5m @ 3.8g/t Au from 23m
- **GWAC0246:** 3m @ 3.5g/t Au from 44m

The extensive zone of oxide gold mineralisation is located on a sheared contact between sedimentary siltstones and overlying volcanic-derived sediments. This coherent zone of mineralisation appears to correspond to a gossan representing a weathered pyrite-rich zone within the shear.

Existing geophysical datasets suggest that this corridor extends for a further 1.5km north along strike, with no effective drill testing. Extensional air-core drilling is planned to test this corridor to the north.

⁸ ASX announcement 23rd April 2008.

⁹ ASX announcement 19 October 2005.

¹⁰ ASX announcement 4 March 2020.

DIRECTORS' REPORT

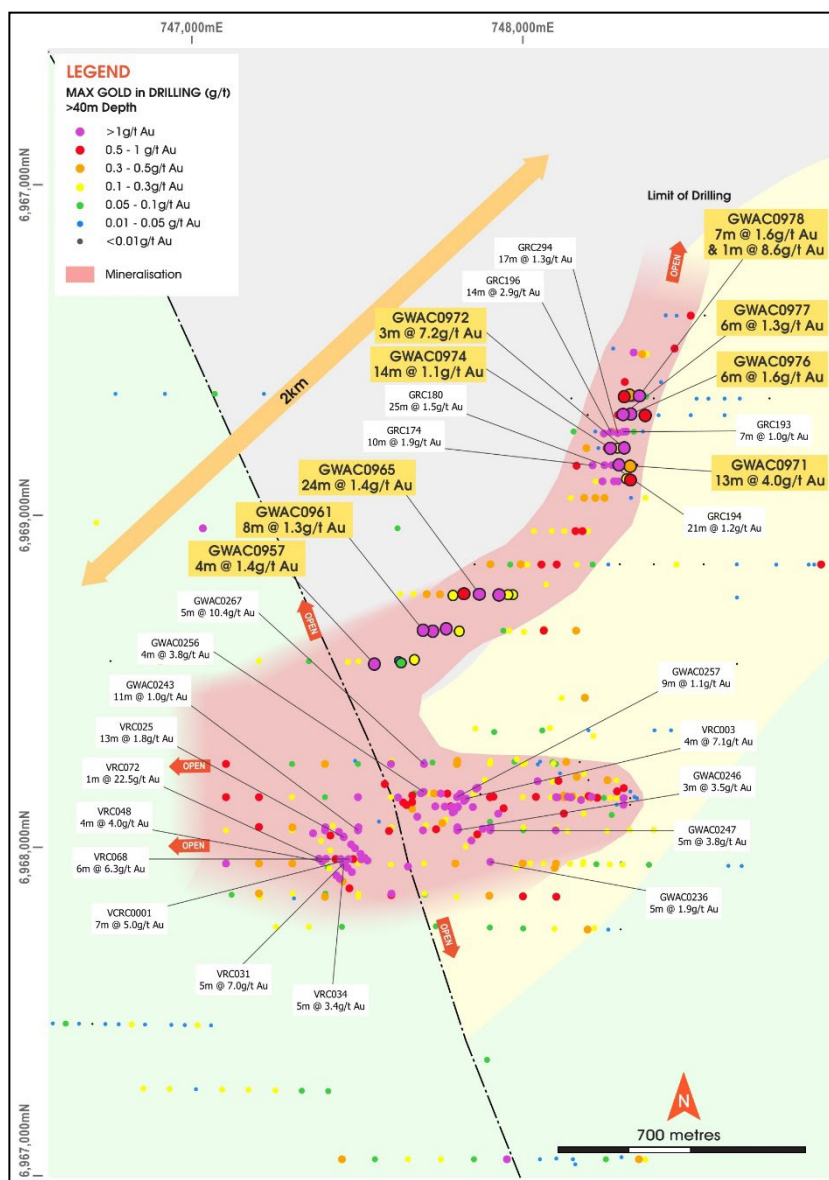

Figure (4): Julius air-core drilling maximum down-hole gold, with historic drilling >40m depth

DIRECTORS' REPORT

PLYMOUTH AIR-CORE DRILLING

During the reporting period, results were returned from an initial 91-hole, 6,888m air-core drilling program designed to test the Plymouth target, a large gold anomaly located 850m west of and parallel to the key Montague-Boulder to Evermore trend that was defined by fine-fraction soil sampling conducted in 2020.

Drilling intersected a wide shear zone within the basalt unit that hosts mineralisation at Montague-Boulder and Evermore, and associated volcanoclastic units. The weathered oxide zone at Plymouth averaged approximately 60m below surface, with weathering noticeably deeper over the shear zone, down to depths of over 100m below surface.

A coherent anomalous supergene gold "blanket" was intersected, at the base of the saprolite zone within the weathering profile. The saprolite anomaly was intersected over a 2km strike length (Figure 5) and remains open to the south. Several higher-grade intersections were returned, which is highly encouraging for first-pass air-core drilling. These intersections include:

- **GWAC0645:** 10m @ 0.8g/t Au from 52m, including 4m @ 1.8g/t Au
- **GWAC0637:** 12m @ 0.5g/t Au from 36m, including 4m @ 1.0g/t Au
- **GWAC0644:** 12m @ 0.4g/t Au from 48m
- **GWAC0647:** 6m @ 0.5g/t Au from 48m

In addition, a channel of surficial laterite style mineralisation was intersected across several traverses, correlating to gravels that have been the focus of historic dry blower activities.

Significant intersections were returned at surface in several holes, including:

- **GWAC0593:** 12m @ 0.6g/t Au from 0m, including 4m @ 1.4g/t Au

Further drilling will be planned to extend coverage to the south and in-fill within the existing anomaly.

DIRECTORS' REPORT

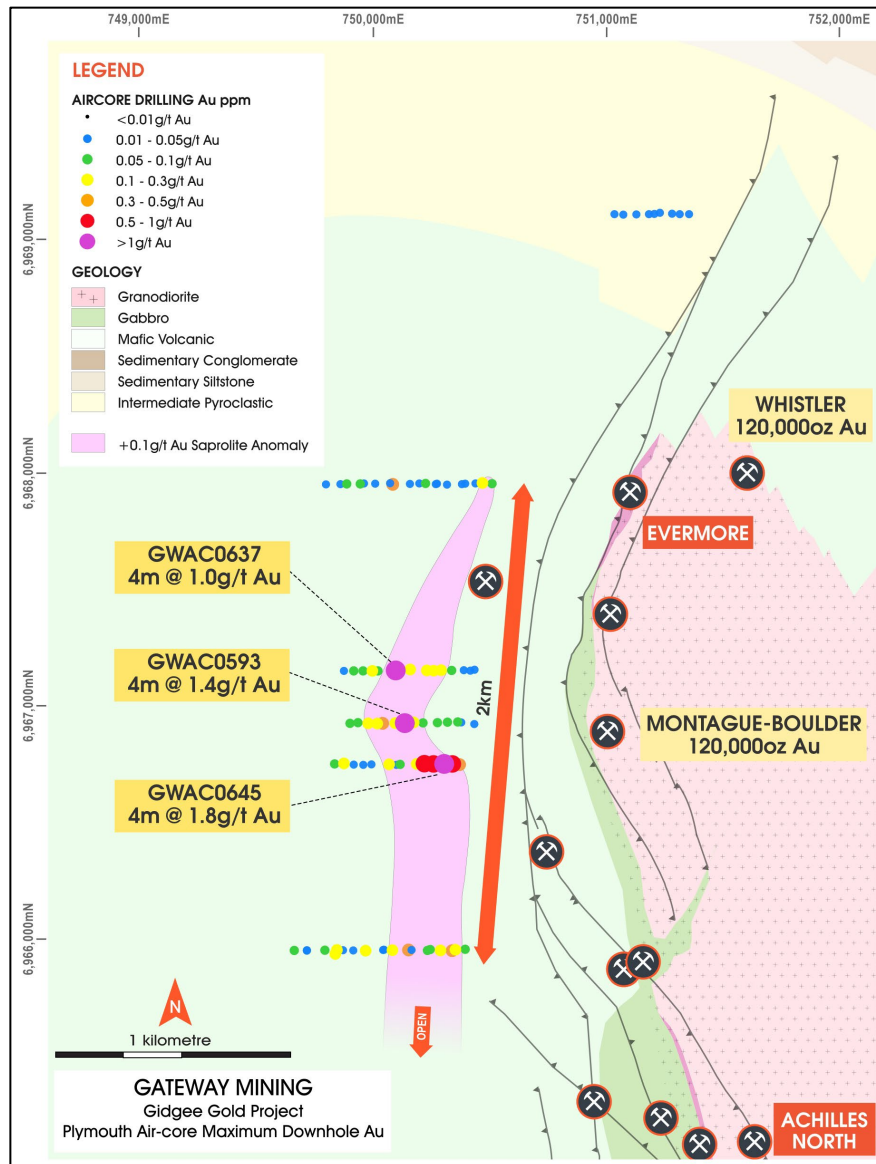

Figure (5): Plymouth air-core drilling maximum down-hole gold

DIRECTORS' REPORT

ACHILLES NORTH REVERSE CIRCULATION DRILLING

During the reporting period, results were returned from a shallow 15-hole, 1,536m RC drilling program designed to extend the strike coverage at the Achilles North target, a shallow zone of oxide gold mineralisation extending over 500m north of the historic Rosie open pit mine.

The mineralisation targeted by Gateway consists predominantly of oxide mineralisation broadly associated with the sheared margin of the Montague Granodiorite. Mineralisation persists at shallow depths, in places immediately below the thin layer of transported overburden (Figure 6). Several significant intersections were returned, including:

- **GRC733:** 11m @ 1.1g/t Au from 2m, and
10m @ 1.2g/t Au from 43m
- **GRC735:** 5m @ 3.0g/t Au from 107m
- **GRC725:** 5m @ 1.2g/t Au from 25m

These results are consistent with those returned from previous drilling campaigns conducted by Gateway between 2018 and 2020¹¹, which extended the unmined, near-surface extensions to mineralisation north of the historic open pit. Previously released intersections include:

- **GRC507:** 14m @ 1.0g/t Au from 3m
- **GRC508:** 7m @ 2.5g/t Au from 61m, and
6m @ 1.5g/t Au from 45m
- **GRC501:** 4m @ 2.9g/t Au from 64m
- **GRC446:** 21m @ 2.1g/t Au from 32m
- **GRC447:** 13m @ 3.4g/t Au from 5m
- **GRC430:** 11m @ 3.0g/t Au from 32m

All RC results were utilised in the maiden Mineral Resource estimate for the Achilles North target, as detailed above. Further RC drilling will be conducted during 2022 with an aim of further extending the zone of mineralisation north.

¹¹ See ASX Announcements dated 17 September 2020 and 12 December 2019.

DIRECTORS' REPORT

EVERMORE NORTH REVERSE CIRCULATION DRILLING

During the reporting period, Gateway completed a 6-hole, 770m RC drilling program designed to test the northern and north-eastern extents of the Evermore deposit, which was discovered by Gateway in 2020. The drilling focused both on extending the main host shear at Evermore to the north, as well as testing for extensions around the “nose” of the Montague Granodiorite towards the Whistler deposit (120,000oz Inferred Resource) to the east (Figure 7).

The drill program was completed on two separate drill sections. One section was drilled on a north-south orientation and was designed to test the “nose” of the granodiorite dome between Evermore and Whistler. The second, orientated east-west, was drilled to step-out 50m north of the previous extents of drilling to test the main moderately-dipping shear structure at Evermore.

Figure (7): Oblique view towards north showing the “nose” of the Montague Granodiorite dome, highlighting the existing Montague-Boulder, Evermore and Whistler deposits and recent drill intersections

Diamond drilling completed by Gateway in 2021, part-funded by the WA Government’s Exploration Incentive Scheme, indicated that the northern end of the granodiorite dome is plunging steeply to the south. As such, a section of RC holes orientated from south to north were drilled to adequately test this “nose” area. Excitingly, drilling intersected silicified and bleached granodiorite with trace pyrite-chalcOPYrite sulphides, with the following significant intersections returned:

- **GRC717:** 21m @ 1.7g/t Au from 132m including 2m @ 9.3g/t Au; and 3m @ 1.1g/t Au from 163m (EOH)

The entire northern end of the Montague Granodiorite remains an exciting exploration target, being a prime geological setting immediately proximal to two established gold deposits, and with the majority of drilling being shallow and orientated in an east-west direction.

DIRECTORS' REPORT

In addition, a series of RC holes were drilled to step-out to the north of the previous limit of drilling on the main Evermore host structure. These holes were designed to scope the potential for shallow strike extensions to the current 67,000oz Inferred Resource. These holes successfully intersected the moderately west-dipping, biotite-altered shear zone within the western basalt sequence, and returned a significant oxide zone intersection of:

- **GRC718: 8m @ 1.8g/t Au from 42m**

This intersection opens the northern strike extent of the Evermore deposit, where no drilling has been undertaken to sufficient depth to test for mineralisation (Figure 8). Further drilling to test the strike potential of the Evermore deposit will be undertaken in early 2022.

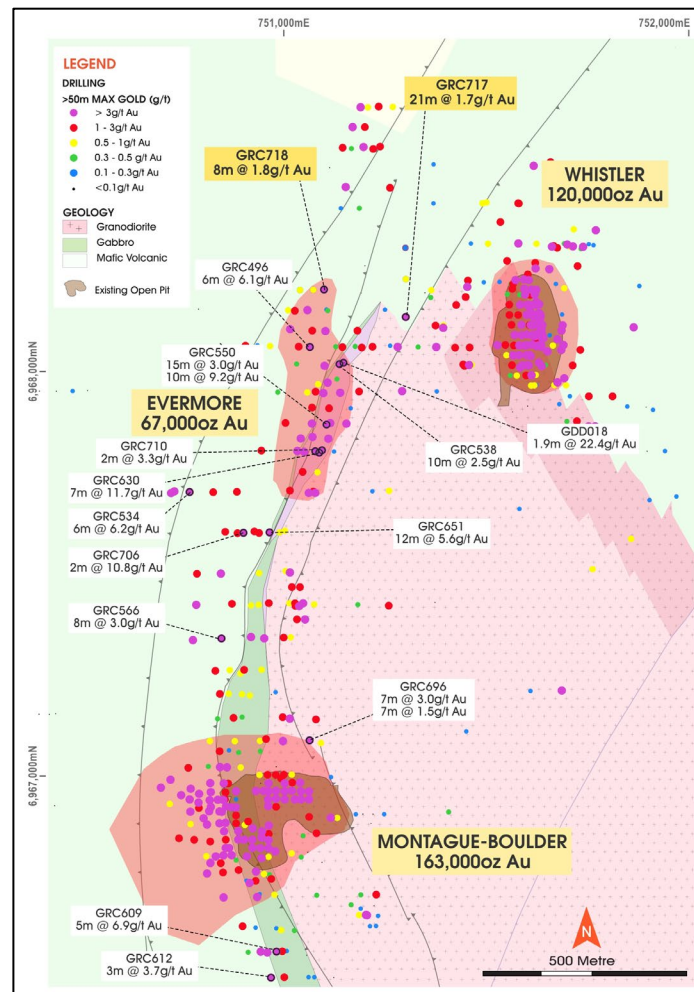

Figure (8): Evermore North recent RC drilling and significant intercepts

DIRECTORS' REPORT

Golden Mile Farm-In

During the reporting period, the Company provided an update in relation to its strategic Earn-In Agreement with Golden Mile Resources Ltd (ASX: G88) (**Golden Mile**) that significantly increases the footprint of the Company's Gidgee Gold Project in Western Australia to over 1,000km² as announced on 23 July 2020 (**Earn-In Agreement**).

The Earn-In Agreement was conditional upon Golden Mile obtaining appropriate exemptions under the Mining Act 1978 (WA) in relation to the expenditure conditions on the tenements comprised in the Earn-In Agreement (**Condition Precedent**).

The Condition Precedent has now been met, granting Gateway the right to acquire up to an 80% interest in the Gidgee Project (refer to ASX announcement 23 July 2020).

Gateway has recently accelerated exploration efforts on the Earn-In Agreement tenure with the collection of a series of core geophysical datasets, heritage and environmental studies and Program of Work (PoW) applications for future drilling.

REGIONAL PROJECTS

Edjudina Joint Venture (Gateway 20%, Discover Resources Ltd 80%)

No work on the Joint Venture tenements was reported by Discover.

Bryah Basin Joint Venture (Gateway 15 %, Auris Minerals Ltd 85%)

No work on the Joint Venture tenements was reported by Auris.

DIRECTORS' REPORT

CORPORATE ACTIVITIES

Capital Raising

During the reporting period, the Company announced it successfully completed a capital raising of A\$6 million (before costs) (**Placement**) to institutional, professional and sophisticated investors.

The Placement, which comprised the issue of 352,941,355 shares at an issue price of \$0.017 per share (**New Shares**), was overwhelmingly supported by existing and new investors including the Company's Directors.

Participants in the Placement received free-attaching options (**New Options**) on a one (1) for two (2) basis, with each New Option being exercisable at \$0.03 and expiring on 15 December 2024.

The Placement was Co-Lead Managed by Enrizen Capital and JP Equities (**Lead Manager**).

The Directors committed their support for the Placement. Mark Cossom, Trent Franklin and Scott Brown (and or their nominees) have agreed to invest a collective total of \$272,625 under the Placement being 16,036,784 New Shares.

The New Shares issued under the Placement are fully-paid ordinary shares and will rank equally with the shares currently on issue.

Use of Funds

The proceeds of the Placement will underpin the next phase of drilling at the Company's 100%-owned Gidgee Gold Project. The proceeds will also be used for further technical studies, including first-pass metallurgical and geotechnical test work.

Key upcoming exploration activities will include programs to target both along strike extensions to identified shallow mineralisation as well as first-pass testing of significant new areas of the Montague granodiorite contact:

- Further in-fill drilling along strike of the Achilles North target, including initial metallurgical testwork;
- Systematic drilling prioritising the evaluation of the exciting air-core results from the Julias target. RC drilling to commence in late November and further air-core drilling early next year to continue testing along strike to the northeast;
- RC drill testing of the Kashmir target, directly along strike from the 204koz Howards deposits (ASX: HRN), with a 2.5km long soil anomaly and first-pass RC results of 2m @ 7.9g/t Au and 1m @ 8.8g/t Au, as well as extensions along the almost 8km of strike of the eastern margin of the Montague Granodiorite;
- RC drilling to test the Monarch anomaly, with extensive historic workings and rock chip samples up to 17.8g/t Au;
- Drilling along strike south of the Montague-Boulder Mineral Resource; and
- Air-core and RC drilling to test the resource potential and extensions around the historic Caledonian open pit.

The proceeds will also be used for corporate and general working capital purposes.

Financial Results

The loss of the Group for the half-year to 31 December 2021 was \$745,050 compared to a loss of \$1,135,342 for the previous comparative half-year.

The Group incurred exploration expenditure of \$2,209,008 during the current half-year to 31 December 2021 compared to \$2,660,152 for the prior half-year to 31 December 2020.

DIRECTORS' REPORT

The Group's cash and cash equivalents at 31 December 2021 was \$6,170,500 (June 2021: \$3,574,249). The total net assets of the Group at 31 December 2021 stands at \$26,431,483 (June 2021: \$19,823,954) of which investment in exploration expenditure accounts for \$16,827,306 (June 2021: \$14,618,298).

The Group is a mining exploration entity, and as such does not earn income from the sale of product. No dividends have been declared or paid during the year.

SIGNIFICANT CHANGES IN THE STATE OF AFFAIRS DURING THE FINANCIAL YEAR AND AFTER THE END OF THE REPORTING PERIOD

Change of Registered Address

Subsequent to the reporting period, the Company announced that effective from 1 March 2022, its registered office, principal place of business and postal address has changed to:

**B1/431 Roberts Road
Subiaco WA 6008**

Expiry of Options

Subsequent to the reporting period on 1 March 2022, the Company announced that the following options had expired:

- 6,666,667 unlisted options expiring 28 February 2022 with exercise price \$0.017;
- 6,666,667 unlisted options expiring 28 February 2022 with exercise price \$0.018; and
- 6,666,666 unlisted options expiring 28 February 2022 with exercise price \$0.02.

COVID-19 Response

The Company continued to implement several measures in response to the COVID-19 pandemic subsequent to the reporting period, including prudent cost saving measures such as reduction in administrative costs.

As intra-state travel restrictions within Western Australia have been lifted, the Company made the decision to continue drilling operations and exploration at the Gidgee Project as part of the Company's strategy to expand on its Mineral Resources estimates and accelerate exploration across the project.

The impact of the COVID-19 pandemic is ongoing and, it is not practicable to estimate the potential impact, positive or negative, after the reporting date. The situation is rapidly developing and is dependent on measures imposed by the Australian Government and other countries, such as maintaining social distancing requirements, quarantine, travel restrictions and any economic stimulus that may be provided.

No other matter or circumstance has arisen since the reporting date that has significantly affected or may significantly affect the Group's operations, the results of those operations or the Group's state of affairs in future financial years.

DIRECTORS' REPORT

AUDITOR INDEPENDENCE DECLARATION

The auditor's independence declaration under Section 307C of the *Corporations Act 2001* for the half-year ended 31 December 2021 is enclosed and forms part of this interim financial report.

This report is signed in accordance with a resolution of the Board of Directors.

Trent Franklin
Non-Executive Chairman
Dated this 11th of March 2022

Mark Cossom
Managing Director

Auditor's Independence Declaration Under Section 307C of the *Corporations Act 2001* to Directors of Gateway Mining Limited

As lead auditor for the review of the interim financial report of Gateway Mining Limited for the half-year ended 31 December 2021, I declare that to the best of my knowledge and belief, that there have been:

- (i) no contraventions of the auditor independence requirements of the *Corporations Act 2001* in relation to the review; and
- (ii) no contraventions of any applicable code of professional conduct in relation to the review.

Yours sincerely
Crowe Sydney

Suwarti Asmono
Partner

The accompanying notes form part of these financial statements.

**NOTES TO THE FINANCIAL STATEMENTS
FOR THE HALF-YEAR ENDED 31 DECEMBER 2021**

NOTE 1: SIGNIFICANT ACCOUNTING POLICIES

a. Basis of Preparation

The financial statements are general purpose interim financial statements that have been prepared in accordance with Australian Accounting Standard AASB 134: Interim Financial Reporting and the requirements of Corporations Act 2001.

The interim financial report is intended to provide users with an update on the latest annual financial statements of Gateway Mining Limited and its controlled entities. It is therefore recommended that this financial report to be read in conjunction with annual financial statements of the group for the year ended 30 June 2021, together with any public announcements made during the following half-year.

Except for the cash flow information, the financial statements have been prepared on an accruals basis and are based on historical costs, modified, where applicable, by the measurement at fair value of selected non-current assets, financial assets and financial liabilities.

b. Accounting Policies

The financial statements are general purpose interim financial statements that have been prepared in accordance with Australian Accounting Standard AASB 134: Interim Financial Reporting and the requirements of Corporations Act 2001. The Group is a for-profit entity for financial reporting purposes under Australian Accounting Standards.

c. Critical Accounting Estimates and Significant Judgments Used in Applying Accounting Policies

The critical estimates and judgments are consistent with those applied and disclosed in the June 2021 annual report.

d. New, revised or amending Accounting Standards and Interpretations adopted

Any new, revised or amending Accounting Standards or Interpretations that are not yet mandatory have not been early adopted.

e. Going Concern

The directors believe that the going concern basis is appropriate for the preparation and presentation of the financial statements, notwithstanding continued operating losses, negative operating cash flows, and no ongoing revenue streams, as the Directors believe that the Group has sufficient cash and liquid assets or can access cash to continue operations. The cash is managed through:

- a) tight control of administrative expenses;
- b) raising additional share capital, for which the Company has a history of raising funds; and
- c) by reducing the exploration program to maintain cash flow.

The Directors have prepared a forecast for the foreseeable future reflecting the above mentioned expectations and their effect on the Group.

**NOTES TO THE FINANCIAL STATEMENTS
FOR THE HALF-YEAR ENDED 31 DECEMBER 2021**

NOTE 2: CRITICAL ACCOUNTING JUDGEMENTS, ESTIMATES AND ASSUMPTIONS

The preparation of the financial statements requires management to make judgements, estimates and assumptions that affect the reported amounts in the financial statements. Management continually evaluates its judgements and estimates in relation to assets, liabilities, contingent liabilities, revenue and expenses. Management bases its judgements, estimates and assumptions on historical experience and on other various factors, including expectations of future events, management believes to be reasonable under the circumstances. The resulting accounting judgements and estimates will seldom equal the related actual results. The judgements, estimates and assumptions that have a significant risk of causing a material adjustment to the carrying amounts of assets and liabilities within the next financial year are discussed below.

Exploration and evaluation costs

Exploration and evaluation costs have been capitalised on the basis that the Group will commence commercial production in the future, from which time the costs will be amortised in proportion to the depletion of the mineral resources. Key judgements are applied in considering costs to be capitalised which includes determining expenditures directly related to these activities and allocating overheads between those that are expensed and capitalised. In addition, costs are only capitalised that are expected to be recovered either through successful development or sale of the relevant mining interest. Factors that could impact the future commercial production at the mine include the level of reserves and resources, future technology changes, which could impact the cost of mining, future legal changes and changes in commodity prices. To the extent that capitalised costs are determined not to be recoverable in the future, they will be written off in the period in which this determination is made.

NOTE 3: OPERATING SEGMENTS

Identification of reportable operating segments

The Group is organised into one operating segment, being exploration operations. This operating segment is based on the internal reports that are reviewed and used by the Directors (who are identified as the Chief Operating Decision Makers (**CODM**) in assessing performance and in determining the allocation of resources.

The CODM reviews operating expenses in relation to the exploration activities and the Group's cash position. The accounting policies adopted for internal reporting to the CODM are consistent with those adopted in the financial statements.

The information reported to the CODM is on at least a monthly basis. Information is presented on a consolidated cash flow basis. Cash flow funding is treated as one pool of liquid assets noting relevant terms of any maturity or exercise of any investments for the purpose of funding exploration.

Types of products and services – The principal products and services of this operating segment are in exploration operations predominately in Australia.

NOTE 4: CASH AND CASH EQUIVALENTS

	31-Dec-21	30-Jun-21
	\$	\$
Cash and cash equivalents	6,170,500	3,574,249

Interest is on a variable rate. The group is not sensitive to interest rate movement.

**NOTES TO THE FINANCIAL STATEMENTS
FOR THE HALF-YEAR ENDED 31 DECEMBER 2021**

NOTE 5: TRADE AND OTHER RECEIVABLES

	31-Dec-21 \$	30-Jun-21 \$
CURRENT

Term deposit	29,752	29,752
Total financial assets	3,624,722	2,127,672

Fair Value

The fair values of listed investments have been valued at the fair value predominantly being the quoted market bid price at the end of the reporting period.

Fair value hierarchy

The following tables detail the Group's assets and liabilities, measured or disclosed at fair value, using a three-level hierarchy, based on the lowest level of input that is significant to the entire fair value measurement, being:

Level 1: Quoted prices (unadjusted) in active markets for identical assets or liabilities that the entity can access at the measurement date

Level 2: Inputs other than quoted prices included within Level 1 that are observable for the asset or liability, either directly or indirectly

Level 3: Unobservable inputs for the asset or liability.

All financial assets held by the Group are assessed as Level 1 and Level 2 financial assets.

**NOTES TO THE FINANCIAL STATEMENTS
FOR THE HALF-YEAR ENDED 31 DECEMBER 2021**

NOTE 6: FINANCIAL ASSETS (CONTINUED)

	Level 1 \$	Level 2 \$	Level 3 \$	Total \$
Consolidated – Dec 2021				
Assets				
Ordinary shares - listed investments	3,113,042	-	-	3,113,042
Ordinary shares - unlisted investments	-	481,928	-	481,928
Total assets	3,113,042	481,928	-	3,594,970
Consolidated – June 2021				
Assets				
Ordinary shares - listed investments	1,615,992	-	-	1,615,992
Ordinary shares - unlisted investments	-	481,928	-	481,928
Total assets	1,615,992	481,928	-	2,097,920

NOTE 7 - EXPLORATION AND EVALUATION EXPENDITURE

	31-Dec-21 \$	30-Jun-21 \$
NON-CURRENT ASSET		
Capitalised expenditure in respect of areas of interest at the beginning of the period	14,618,298	10,032,088
Expenditures during the period	2,209,008	5,580,125
Disposals	-	(535,651)
Written off	-	(458,264)
Capitalised exploration expenditure at the end of the period	16,827,306	14,618,298

The recoverability for the carrying amount of exploration assets is dependent upon further exploration and exploitation of commercially viable mineral deposits.

Exploration and evaluation expenditure for areas of interest for which rights of tenure are current is carried forward as an asset where it is expected that the expenditure will be recovered through the successful development of an area or by its sale; or exploration activities are continuing in an area and activities have not reached a stage which permits a reasonable estimate of the existence of economically recoverable reserves. Where a project or an area has been abandoned, the expenditure incurred thereon is written off in the year in which the decision is made.

In order to maintain current rights of tenure to exploration tenements, the Group is required to comply with the minimum expenditure obligations under the Mining Act. These obligations have been met. The future obligations which are subject to renegotiation when an application for a mining lease is made and at other times are not provided for in the financial statements.

Basic Earnings Per Share (cents)	(0.04)	(0.06)
Diluted Earnings Per Share (cents)	(0.04)	(0.06)

**NOTES TO THE FINANCIAL STATEMENTS
FOR THE HALF-YEAR ENDED 31 DECEMBER 2021**

NOTE 11: CONTINGENT LIABILITIES, CAPITAL EXPENDITURE AND MINING TENEMENT COMMITMENTS

The Board of Directors believe that there are no contingent liabilities or capital equipment commitments up to or subsequent to the 31st December 2021 (30 June 2021: nil) for either the parent company or its subsidiaries. The mining tenement commitment as at the 31st December 2021 is \$1,687,600 (30 June 2021: \$1,870,100).

Native Title and Aboriginal Heritage

Native title claims have been made with respect to areas which include tenements in which the Company has an interest. The Company is unable to determine the prospects for success or otherwise of the claims and, in any event, whether or not what extent the claims may significantly affect the Company or its prospects. An Agreement is being reached with various native title claimants in relation to Aboriginal Heritage issues regarding certain areas in which the Company has an interest.

NOTE 12: LEASE LIABILITIES

	31-Dec-21	30-Jun-21
	\$	\$
Lease Liabilities (current)	21,041	33,092
Lease Liabilities (non-current)	90,120	90,120
Total lease liabilities	<u>111,161</u>	<u>123,212</u>

A lease liability is recognised at the commencement date of a lease. The lease liability is initially recognised at the present value of the lease payments to be made over the term of the lease, discounted using the interest rate implicit in the lease or, if that rate cannot be readily determined, the Group's incremental borrowing rate. Lease payments comprise of fixed payments less any lease incentives receivable, variable lease payments that depend on an index or a rate, amounts expected to be paid under residual value guarantees, exercise price of a purchase option when the exercise of the option is reasonably certain to occur, and any anticipated termination penalties. The variable lease payments that do not depend on an index or a rate are expensed in the period in which they are incurred.

Lease liabilities are measured at amortised cost using the effective interest method. The carrying amounts are remeasured if there is a change in the following: future lease payments arising from a change in an index or a rate used; residual guarantee; lease term; certainty of a purchase option and termination penalties. When a lease liability is remeasured, an adjustment is made to the corresponding right-of use asset, or to profit or loss if the carrying amount of the right-of-use asset is fully written down.

	31-Dec-21	30-Jun-21
	\$	\$
Interest expenses	1,773	1,950
Depreciation expenses	19,988	19,988
Total	<u>21,761</u>	<u>21,938</u>

NOTES TO THE FINANCIAL STATEMENTS FOR THE HALF-YEAR ENDED 31 DECEMBER 2021

NOTE 13: EVENTS SUBSEQUENT TO REPORTING DATE

Change of Registered Address

Subsequent to the reporting period the Company announced that effective from 1 March 2022, its registered office, principal place of business and postal address has changed to:

**B1/431 Roberts Road
Subiaco WA 6008**

Expiry of Options

Subsequent to the reporting period on 1 March 2022, the Company announced that the following options had expired:

- 6,666,667 unlisted options expiring 28 February 2022 with exercise price \$0.017;
- 6,666,667 unlisted options expiring 28 February 2022 with exercise price \$0.018; and
- 6,666,666 unlisted options expiring 28 February 2022 with exercise price \$0.02.

COVID-19 Response

The Company continued to implement several measures in response to the COVID-19 pandemic subsequent to the reporting period, including prudent cost saving measures such as reduction in administrative costs.

As intra-state travel restrictions within Western Australia have been lifted, the Company made the decision to continue drilling operations and exploration at the Gidgee Project as part of the Company's strategy to expand on its Mineral Resources estimates and accelerate exploration across the project.

The impact of the COVID-19 pandemic is ongoing and, it is not practicable to estimate the potential impact, positive or negative, after the reporting date. The situation is rapidly developing and is dependent on measures imposed by the Australian Government and other countries, such as maintaining social distancing requirements, quarantine, travel restrictions and any economic stimulus that may be provided.

No other matter or circumstance has arisen since the reporting date that has significantly affected or may significantly affect the Group's operations, the results of those operations or the Group's state of affairs in future financial years.

NOTE 14: RELATED PARTY TRANSACTIONS

a. Directors and Key Management Persons

Key Management Persons	Position

Subiaco WA 6008 Australia

DIRECTORS DECLARATION

In the directors' opinion:

- 1 the financial statements and notes, as set out on pages 23 to 34 are in accordance with the Corporations Act 2001, the Corporations Regulations 2001 and other mandatory professional reporting requirements:
 - (a) comply with Accounting Standard AASB 134: Interim Financial Reporting; and
 - (b) give a true and fair view of the financial position as at 31 December 2021 and of the performance for the half-year ended on that date of the Group;
- 2 in the directors' opinion there are reasonable grounds to believe that the Company will be able to pay its debts as and when they become due and payable.

This declaration is made in accordance with a resolution of the Board of Directors.

Trent Franklin
Non-Executive Chairman

Independent Auditor's Review Report to the Members of Gateway Mining Limited

Conclusion

We have reviewed the half-year financial report of Gateway Mining Limited (the Company) and its controlled entities (the Group), which comprises the statement of financial position as at 31 December 2021, the statement of profit or loss and other comprehensive income, statement of changes in equity and statement of cash flows for the half-year ended on that date, a summary of significant accounting policies and other explanatory information, and the directors' declaration.

Based on our review, which is not an audit, we have not become aware of any matter that makes us believe that the accompanying half-year financial report of the Group does not comply with the *Corporations Act 2001* including:

- (a) giving a true and fair view of the Group's financial position as at 31 December 2021 and of its performance for the half-year ended on that date; and
- (b) complying with Accounting Standard AASB 134 *Interim Financial Reporting* and the *Corporations Regulations 2001*.

Basis of Conclusion

We conducted our review in accordance with ASRE 2410 *Review of Financial Report Performed by the Independent Auditor of the Entity*. Our responsibilities are further described in the Auditor's Responsibilities for the Review of the Financial Report section of our report. We are independent of the Company in accordance with the auditor independence requirements of the *Corporations Act 2001* and the ethical requirements of the Accounting Professional and Ethical Standards Board's APES 110 *Code of Ethics for Professional Accountants (including Independence Standards)* (the Code) that are relevant to our audit of the annual financial report in Australia. We have also fulfilled our other ethical responsibilities in accordance with the Code.

Responsibility of the Directors for the Financial Report

The directors of the Company are responsible for the preparation of the half-year financial report that gives a true and fair view in accordance with Australian Accounting Standards and the *Corporations Act 2001* and for such internal control as the directors determine is necessary to enable the preparation of the half-year financial report that gives a true and fair view and is free from material misstatement, whether due to fraud or error.

Auditor's Responsibility for the Review of the Financial Report

Our responsibility is to express a conclusion on the half-year financial report based on our review. ASRE 2410 requires us to conclude whether we have become aware of any matter that makes us believe that the half-year financial report is not in accordance with the *Corporations Act 2001* including giving a true and fair view of the Group's financial position as at 31 December 2021 and its performance for the half-year ended on that date, and complying with Accounting Standard AASB 134 *Interim Financial Reporting* and the *Corporations Regulations 2001*.

A review of a half-year financial report consists of making enquiries, primarily of persons responsible for financial and accounting matters, and applying analytical and other review procedures. A review is substantially less in scope than an audit conducted in accordance with Australian Auditing Standards and consequently does not enable us to obtain assurance that we would become aware of all significant matters that might be identified in an audit. Accordingly, we do not express an audit opinion.
