Pathway to Production

APRIL 2022

Disclaimer, Distribution and Disclosure

Disclaimer and not for US distribution

This presentation includes forward-looking statements including, but not limited to, comments regarding the timing and content of upcoming work programs, geological interpretations, receipt of property titles, potential mineral recovery processes, and other related matters. Forward-looking statements address future events and conditions and therefore involve inherent risks and uncertainties. When used in this document, the words such as "could", "plan", "estimate", "expect", "intend", "may", "potential", "should" and similar expressions are forward-looking statements. The Company's current projects in Australia are at an early stage of assessment and all estimates and projections are based on limited, and possibly incomplete data. More work is required before geological and economic aspects can be fully modelled. Actual results may differ materially from those currently anticipated in this presentation. Although Black Cat Syndicate Limited. ("**Black Cat**") believes that the expectations reflected in these forward-looking statements are reasonable, such statements involve risks and uncertainties and no assurance can be given that actual results will be consistent with these forward-looking statements.

This document contains reference to certain targets and plans of Black Cat which may or may not be achieved. The performance of Black Cat may be influenced by a number of factors, uncertainties and contingencies, many of which are outside the control of Black Cat and its directors, staff and consultants.

This presentation has been prepared by Black Cat for the purpose of providing an overview of its current prospects and development strategy to recipients. This presentation and its contents are provided to recipients in confidence on the basis that it may not be reproduced or disclosed in whole or in part to any other person, without the written consent of Black Cat.

This presentation is provided on the basis that neither Black Cat nor its respective officers, shareholders, related bodies corporate, partners, affiliates, employees, representatives and advisers, make any representation or warranty (express or implied) as to the accuracy, reliability, relevance or completeness of the material contained in this presentation and nothing contained in the presentation is, or may be relied upon, as a promise, representation or warranty, whether as to the past or the future. Black Cat hereby excludes all warranties that can be excluded by law.

All persons should consider seeking appropriate professional advice in reviewing the presentation and all other information with respect to Black Cat and evaluating the business, financial performance and operations of Black Cat. Neither the provision of the presentation nor any information contained in the presentation or subsequently communicated to any person in connection with the presentation is, or should be taken as, constituting the giving of investment advice to any person.

This presentation has been prepared for publication in Australia and may not be released to US wire services or distributed in the United States. This presentation does not constitute an offer to sell, or a solicitation of an offer to buy, securities in the United States or any other jurisdiction. Any securities described in this presentation have not been, and will not be, registered under the US Securities Act of 1933 and may not be offered or sold in the United States except in transactions exempt from, or not subject to, registration under the US Securities Act and applicable US state securities laws.

Competent Person's Statements

The information in this announcement that relates to geology, exploration results, planning, and Mineral Resources was compiled by Mr. Iain Levy, who is a Member of the AIG and an employee, shareholder and option holder of the Company. Mr. Levy has sufficient experience which is relevant to the style of mineralisation and type of deposit under consideration and to the activity being undertaken to qualify as a Competent Person as defined in the 2012 Edition of the 'Australasian Code for Reporting of Exploration Results, Mineral Resources and Ore Reserves'. Mr. Levy consents to the inclusion in the report of the matters based on the information in the form and context in which it appears.

The Company confirms that it is not aware of any new information or data that materially affects the information in the original reports, and that the form and context in which the Competent Person's findings are presented have not been materially modified from the original reports.

Where the Company refers to the Mineral Resources in this report (referencing previous releases made to the ASX), it confirms that it is not aware of any new information or data that materially affects the information included in that announcement and all material assumptions and technical parameters underpinning the Mineral Resource estimate with that announcement continue to apply and have not materially changed.

The information in this announcement that relates to exploration results and mineral resources, other than as quoted under the 2012 Edition of the JORC Code, is considered to be an accurate representation of the available data and studies, and was compiled by Mr. Iain Levy, who is a Member of the AIG and an employee, shareholder and option holder of the Company. Mr. Levy consents to the inclusion in the report of the matters based on the information in the form and context in which it appears.

The information in this announcement regarding historical Exploration Results, Mineral Resources or Ore Reserves has been extracted from various Northern Star and Tanami Gold ASX announcements which are available on the company's websites at https://www.nsrltd.com.au or https://www.tanami.com.au. The Black Cat ASX announcement 19 April 2022 provides all required documentation and reporting information on the above acquisition in relation to historical Exploration Results and Mineral Resources.

Gold Intercepts are based on 1 g/t cut-off with <1m of internal dilution.

Unless otherwise indicated, all dollar amounts referred to in this presentation are expressed in Australian dollars.

COYOTE

Pathway to Production

History:	
• 1998:	Discovered by Anglo Gold Ashanti
• 2003:	Project acquired by Tanami Gold NL
• 2006:	Construction commences
• 2009:	Upgrade of plant to 300kpta
• 2013:	Mining ceases - care & maintenance
• 2015-2016:	Process plant leased by ABM to process Old Pirate
• 2017:	NST 100% acquisition

High-grade production:

- 211koz @ 4.9 g/t Au produced from OP & UG
- Averaging 95.8% recovery
- UG typically around 8 g/t Au

Financial Year	Operator	Ore tonnes	Grade g/t Au	Recovery %	Gold oz (rec)
2006	Tanami	82	1.8	84.0	4,032
2007	Tanami	213	3.3	92.6	20,997
2008	Tanami	184	3.6	95.4	20,134
2009	Tanami	201	6.3	97.3	39,711
2010	Tanami	220	6.3	96.0	52,503
2011	Tanami	257	5.3	95.6	41,446
2012	Tanami	184	5.7	97.4	32,828
2013	Tanami	71	4.3	97.5	9,569
Total		1,411	4.9	95.8	211,220

Coyote - Current Status

Access: Airstrip on site or 300km from Halls Creek via Tanami Road (currently being sealed)

Care & maintenance (\$300k per quarter):

- Everything installed, ready to go minimal capital ~300ktpa CIL processing facility Fully operational +180 person camp
- Buildings: administration, maintenance, stores
 Power, bores, RO water supply
 Mines, not dewatered

Indicative Replacement Value: ~\$60M

Resources 3.1Mt @ 5.0g/t Au for 493koz

Open Pit:1.9Mt @ 3.4g/t Au for 209kozUnderground:0.8Mt @ 10.4g/t Au for 267kozStockpiles:0.4Mt @ 1.4g/t Au for 17koz

Restart Plan:

BLACK CAT

SYNDICATE

Coyote - Five Year Plan

BLACK CAT

High-grade underground Resource with simple geology:

- 267koz @ 10.4 g/t Au Resource
- Multiple host targets
- Multiple structural controls

Excellent continuity of mineralisation and repeat lodes

Potential 5-year plan based on processing stockpiles and mining known Resources

2022:

- Confirmation drilling
- Restart studies & approvals
- R Low capital mill refurbishment

2023:

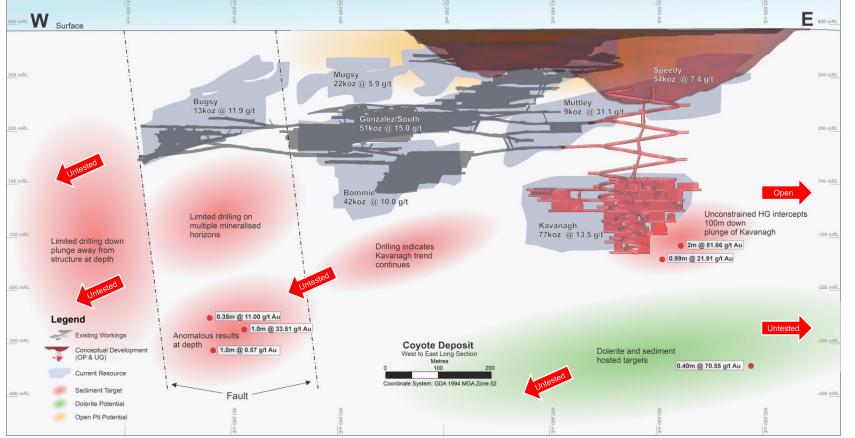

- Ongoing drilling
- Stockpile processing
- DFS study for mining commencement

2024/25:

Speedy open pit cutback

2026 onwards:

- Underground mining at Kavanagh
- Opportunity to re-enter old Coyote mine

Long section of Coyote workings and Resources showing exploration targets and conceptual mining areas

BLACK CAT

Mineralisation controlled by intersection of NW/NE faults and folded Coyote stratigraphy; priority targets include:

Coyote West

2km Au/As anomaly immediately west of Coyote mine; possible plunge extension

Coyote East

Untested As anomaly at fault intersection

Road Runner (RR)

High grade drilling on Coyote stratigraphy

Pebbles/Pebbles North

Untested fault intersection of RR trend and Coyote fault.

Road Runner East

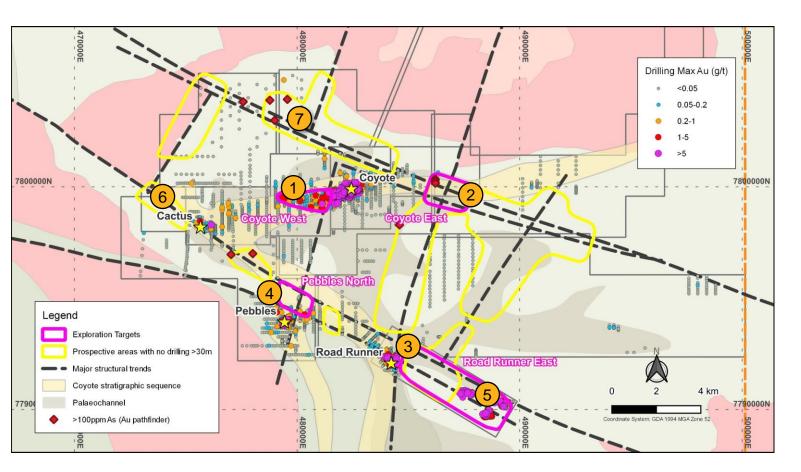

Significant near surface mineralisation with high grades at depth along Trans-Tanami Fault

Cactus

6

Anomalous RAB drilling on larger scale fold of Coyote stratigraphic sequence

Untested AS anomaly at fault intersection

Refer BC8 ASX announcement 19/04/22

Coyote - Unmodelled Drilling Intersections

Area	Gram-metres	Significant Intercept
Coyote	198	3.4m @ 58.36 g/t Au from 188.9m (CYUG0036)

2017	NST	340	4.6	87.7	55,490
Total		4,186	7.3	92.0	907,344

Access: Wyloo station airstrip or 2.5 hour drive to Paraburdoo

Care & maintenance (\$600k per quarter):

- 450ktpa CIL processing facility
- Fully operational +110 person camp
- Buildings: administration, maintenance, stores, lab
- Well established exploration facilities
- Power, bores, RO water supply
- Dewatered/Ventilated underground mine

Indicative Replacement Value: ~\$80M

Resources 2.9Mt @ 2.5 g/t Au for 231koz

Open Pit:2.4Mt @ 1.8g/t Au for 141kozUnderground:0.5Mt @ 5.8g/t Au for 89koz

Current Northern Star Ore Reserves¹

Restart Plan

- Low capital requirements to restart plant and underground
- Potential open pits to complement underground

Structural review and significant drilling planned

- Repeat lode and offset positions
- Apollo, gabbro veins, hangingwall lodes and shallow unmodelled mineralisation

Significant remnant mining opportunities:

- Current Northern Star Reserve¹
- Minimal development required

2022:

- Drill for additional Resources to extend life
- Restart studies and approvals

2023:

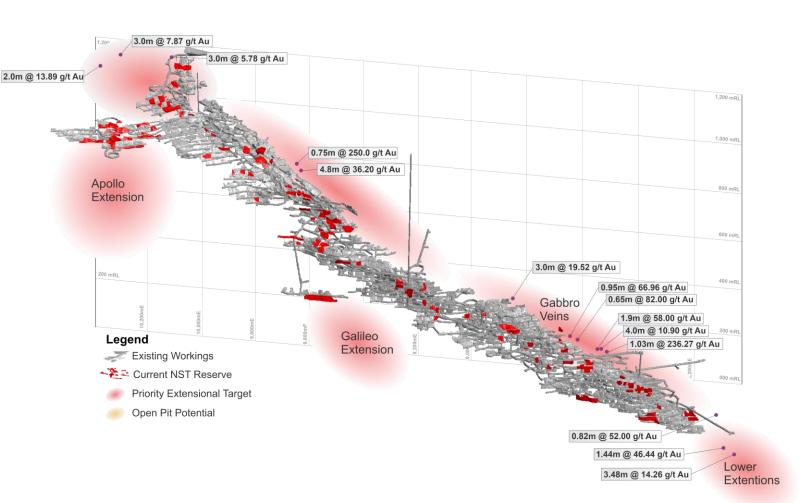

Ongoing drilling for another Paulsens orebody
 Study work for open pit Reserves

2024:

- Congoing drilling and Resource buildup
- Complete DFS for restart of operations

2025:

Restart underground and mill (low capital/risk)

3D view of Paulsens underground mine with workings and NST Reserve areas, showing exploration targets and significant intercepts

For drilling results refer BC8 ASX announcement 19/04/2022

1. Announced by NST to ASX 03/05/2021

\$2M 3D seismic completed in 2018 by Northern Star

Identified both a Lower Gabbro and further offsets of the Paulsens Gabbro

Lower Gabbro position tested with drilling and confirmed

Target 1

100-150m from current development Intersection of Lower Gabbro and fault hosting Paulsens

Target 2

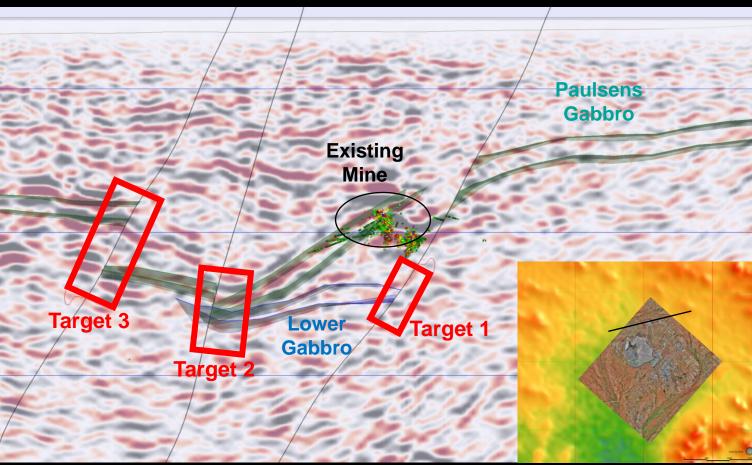

530m from current development

Confluence of Paulsens and Lower Gabbro

Target 3

890m from current development Offset of Paulsens Gabbro

3D Seismic section (MIVA90) – HiSeis upper and lower gabbro interpretation with fault surfaces. Target zones in red.

Paulsens - Regional Opportunities

Mineralisation host on splay structures from Nanjilgard Fault; priority targets include:

- Paulsens Underground Extension Extensions around current system
- Paulsens East/Eagle Ridge Untested Au in soil anomalies of up to 29.7 g/t Au

3) Melrose/Hardey Fault

Untested along main Paulsens mineralising fault

Gecko

Untested strike parallel fault system

Paulsens South

Anomalous rock chips along Highway fault zone, peak assay 641 ppb Au

Belvedere/Tombstone

Extensions and repeats of Belvedere along strike

Billeroo Bore/Ingrids Reef

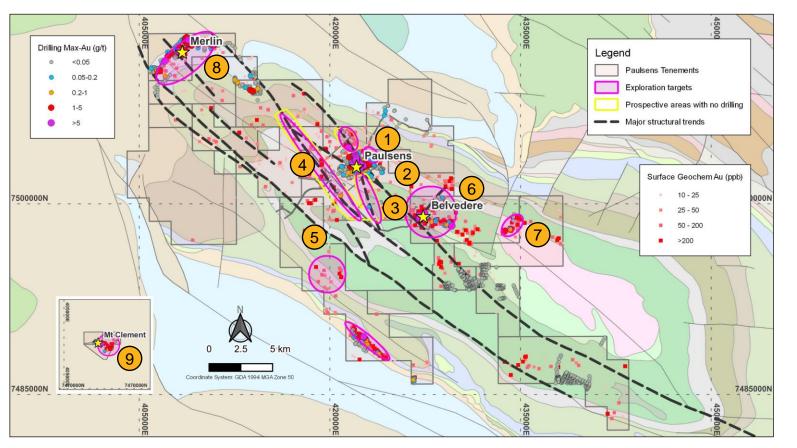

Soil/rock chip anomalies with no recent drilling, peak assay 10.6 g/t Au in rock chips

Merlin

Extensive Au anomaly; 15m @ 2.13 g/t Au from 6m and 8m @ 4.3 g/t Au from 97m

Mt Clement

Resource open along strike; gold, silver, copper, lead, antimony potential

Refer BC8 ASX announcement 19/04/22

Kal East - Background

1894-1914:

- Gold rush at Bulong; 150koz produced **1980's-2007:**
- Limited exploration by public companies **2007-2018:**

Significant prospecting and small scale mining **2016-2018**:

113koz mined from Imperial/Majestic open pits
2018:

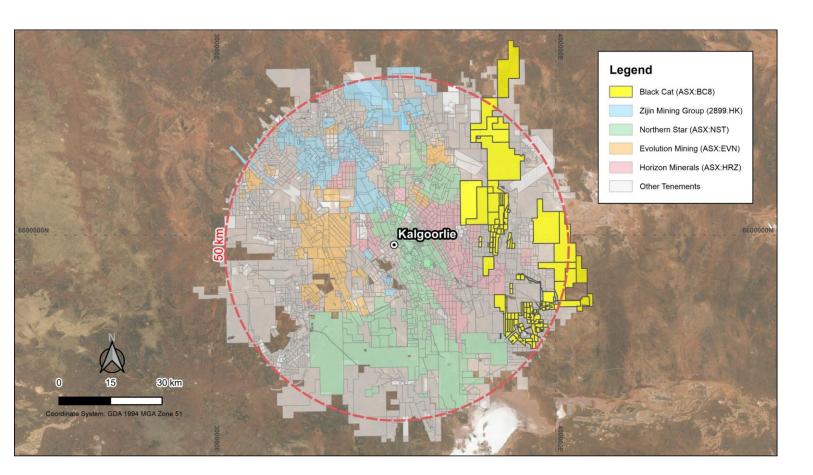

BC8 IPO - consolidate Bulong gold field (80 km²) **2018-2021:**

Ongoing consolidation +520koz of Resources **2018-2021:**

Highly active ~200km of drilling discovering 762koz of new Resources

2020-2022:

2 mills & associated infrastructure acquired Engineering designs completed Mining studies Approvals in place

Kal East - Current Status

BLACK CAT

Pre-development:

4 Mining Centres: Myhree, Majestic, Trojan, Fingals Resources ~1.3Moz @ 2.1 g/t Au Approved

June 2022 quarter:

- Maiden Ore Reserves
- Issued for construction drawings
- Grid power study
 - Management team in place

Temporary deferral of construction to align with availability of skilled labour:

Full approvals/planning for when conditions improve Continue growing Resources/Reserves Advance regional exploration

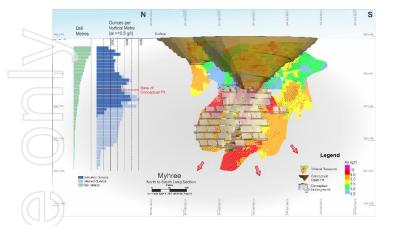

Currently undertaking tender to mine and toll treat fully approved Myhree open pit:

Potential cashflow in 2023

Kal East - Five Year Production Plan

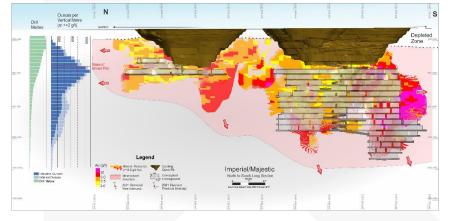

BLACK CAT

MYHREE MINING CENTRE 259koz @ 2.8 g/t Au Open at depth

Myhree open pit:

- Fully approved Grade control drilling commenced Toll treatment tender
- Myhree underground potential:
 - High grades at depth
 - 4.6m @ 11g/t from 185m

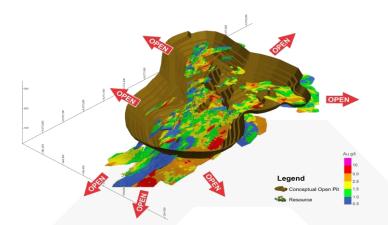

MAJESTIC MINING CENTRE

528koz @ 2.0 g/t Au

- 204koz @ 4.5 g/t Au (UG) (open)
- >1000 oz per vertical metre
- Drilling constrained

Underground mine designed, high grade intercepts include:

- 9m @ 6.16g/t Au from 136m
- 14m @ 5.27g/t Au from 152m
- 7m @ 11.69g/t Au from 152m

FINGALS MINING CENTRE

275koz @ 2.2 g/t Au

• Scale will grow with drilling

Significant high grade zones:

- 4.00m @ 13.30 g/t Au from 122m
- 13.00m @ 37.43 g/t Au from 151m
- 8.00m @ 4.74 g/t Au from 152m
- 2.49m @ 12.43 g/t Au from 170m

Potential underground mining after open pits completed

- Positive AC drilling results

Balagundi (BC8 75%)

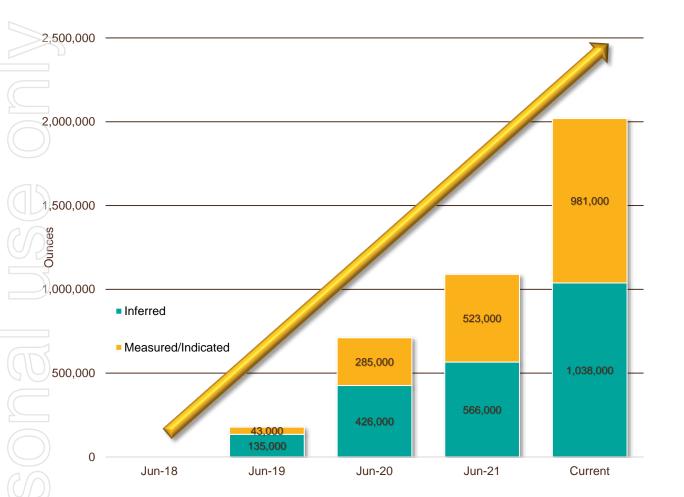

Highly anomalous gold and base metals EIS drilling planned June 2022 quarter

Virgin Dam

10m @ 6.93 g/t Au from 211m³

Track Record of Rapid Resource Growth

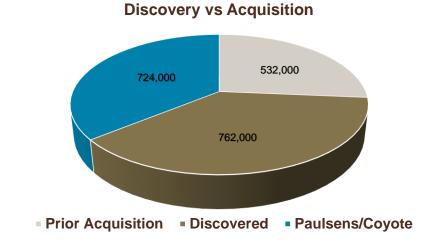

BC8 Resource Growth

Resource - >2Moz in 4 years:

- 1.3Moz Resource acquired
- 0.8Moz Resource discovered
- For every 1 oz acquired, 1.5 oz discovered (before this acquisition)
- Pre-transaction Compound Annual Growth Rate (CAGR) of 94%

Active and growing:

- >200,000m drilled in 4 years
- >80% of expenditure into the ground

Decision to Mine Plan

2022 - Build strong foundation:

- Let COVID/hard border issues pass
- Build Resources (+2Moz Resources)
 Approvals for operations restart
 Tender Myhree toll treatment

2023 - Low risk cashflows & continue to grow business:

- Cashflows from Coyote stockpiles
- Continue to build Resources & define Ore Reserves
- Complete DFS for Coyote aiming for 5 year LOM restart
- Complete PFS for Paulsens mining restart

2024 - First operation commences at Coyote:

Continue building Resource (targeting 2.3Moz) & Ore Reserves Commence potential open pit mining at Coyote Complete DFS for Paulsens aiming for 5 year LOM restart

2025 - Second operation starts at Paulsens:

Continue potential open pit mining at Coyote Commence low capital restart at Paulsens

2026 - Third operation commences at Kal East:

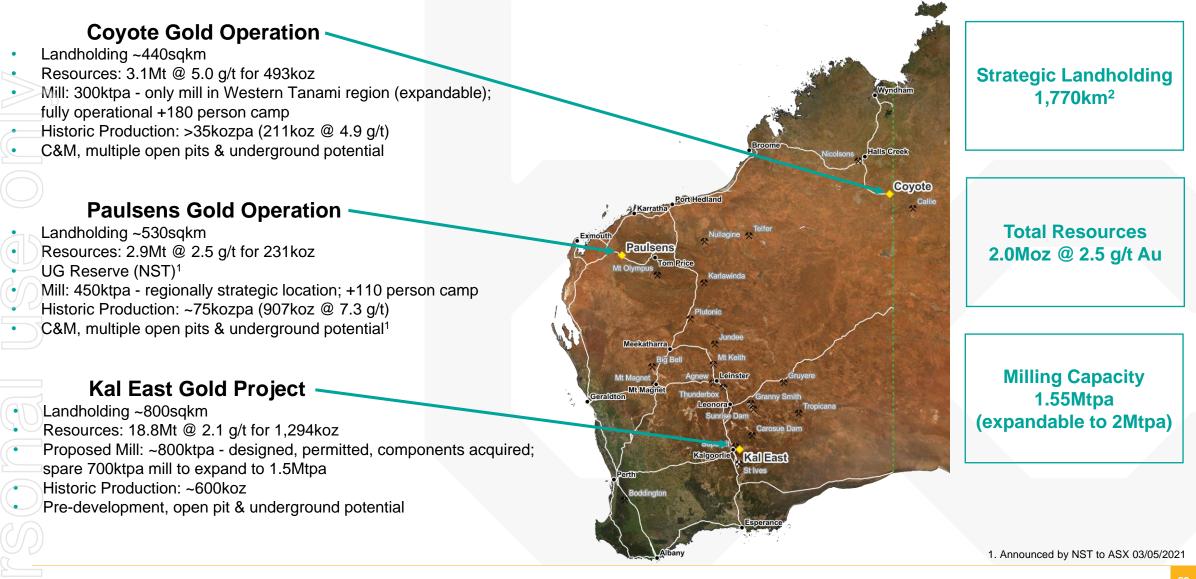

- Decision to mine at Kal East
- Mining moves to potential underground at Coyote
- Continue building Resource (targeting 3.0Moz) & Ore Reserves

3-year Activity Schedule - Coyote	Metres	Mar- 22	Jun- 22	Sep- 22	Dec- 22	Mar- 23	Jun- 23	Sep- 23	Dec- 23	Mar- 24	Jun- 24	Sep- 24	Dec 24
Upgrade Speedy open pit to Indicated (54koz @ 5.4 g/t Au)	10,660m												
Test Muggsy open pit potential (22koz @ 5.9 g/t Au)	4,000m												
Upgrade Bald Hill open pit (10koz @ 3.8 g/t Au)	3,000m												
Upgrade & extend Kavanagh underground (77koz @ 13.5 g/t Au)	8,500m												
Test advanced exploration targets (Road Runner, Pebbles, etc)	9,000m												
Sample all stockpiles, dams, ponds, mill site	3,000m												
Planned mill refurbishment & stockpile processing													
Restart studies & approvals						PFS			DFS				
Decision to mine													
3-year Activity Schedule - Paulsens													
Upgrade scoping to PFS study	2,000m												
Test Apollo (surface drilling)	3,000m												
Test Upper Gabbro Veins	1,000m												
Test Galileo	1,000m												
Find Paulsens 2.0	15,000m												
Upgrade Mt Clement/Belvedere Resources	10,000m												
Test advanced regional exploration targets	6,000m												
Restart studies & approvals										PFS			DFS
Decision to mine													
3-year Activity Schedule - Kal East													
Myhree open pit tender	7,500m												
Resource Growth and Exploration	15,000m												
Decision to mine													2025

BLACK CAT

Business Overview

BLACK CAT

Investment Summary

Five year vision to become a multi-operation gold mining business following the acquisition of Coyote and Paulsens

Highly attractive valuation based on current 2Moz Resource base with immediate Resource expansion potential

Deep pipeline of exploration opportunities close to processing infrastructure for a team with a track record of exploration success

Drilling across multiple project areas in the coming months

Combined portfolio delivers the ability to sequentially start operations in a lower risk and lower capital manner

Potential to be producing cashflow from 2023

Increased scale and optionality of the expanded asset base provides a pathway to be an Australian multi-operation producer

Board and Management team with a proven history of building successful gold companies

Thank you.

SYNDICATE

Sustainability & Community

Community:

Heritage Management:

Indigenous Engagement Strategy:

- Long term job creation
- Regional employment and local business support
- Royalties to Government and Traditional Owners
- Committed to cultural heritage management plans
- Engaged in meaningful negotiations with relevant claimant groups

Committed to minimising our impact on the land, including:

- In-pit tailing storage
- Grid power at Kal East
- Solar power at Coyote & Paulsens

Committed to engaging with the Traditional Owners at each of our projects; we provide:

- Business & employment opportunities
- Cultural awareness training
- Tourism and local business opportunities

Coyote - Big Picture Opportunities

Extension of the Tanami - host of world class gold deposits (e.g. Callie):

Same geology: interbedded sediments +/dolerite and tightly folded antiforms Same key structures: located adjacent to the Trans-Tanami Fault Same potential: numerous high grade narrow vein structures. Started small with Resource growth over time Inderexplored and undercover: Requires +30m drilling depth Region has seen a strong increase in exploration activity Numerous regional targets and highly prospective for: Gold **Rare Earths** Ni & PGEs

Major structural trends **Coyote Tenements** Bald Hill (0.25Moz Au) Groundrush (1.7MozAu) Coyote (0.5Moz Au) 7800000N 800000 Tanami Mine Corridor (3Moz Au) Cactus Road Runner Buccaneer (0.7Moz Au) Gremlin Old Pirate (0.14Moz Au) Oberon (0.45Moz Au) Callie (14MozAu) The Granites (1.1 Moz Au) 25 50 km GDA 1994 MGA Zone 5 7700000N Western Australia Northern Territory

Classic orogenic gold deposit setting

- Multiple splays from major crustal scale fault cutting dome
- Multiple large deposits in a district
- Multiple mineralising events lead to different deposit styles

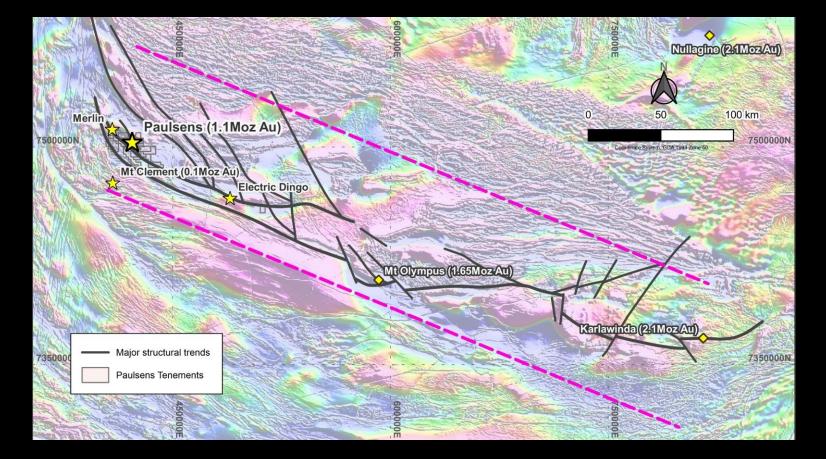

Underexplored

- Limited regional exploration
- Historic focus around mine
- Geochemical anomalies require followed up

Exploration Review

Initial targets for testing in first 2 years:

- Near mine: Paulsens
- Historic mines: Belvedere, Mt Clement & Merlin
- Regional: fault splays and gold/base metal anomalies
- District highly prospective for
 - Gold
 - Base metals

Kal East - Big Picture Opportunities

20-50km east of the world class gold mining center of Kalgoorlie:

Underexplored:

Historically less exploration activity than the central/western areas of Kalgoorlie due to distance from milling infrastructure

East of Kalgoorlie has seen a strong increase in recent exploration activity

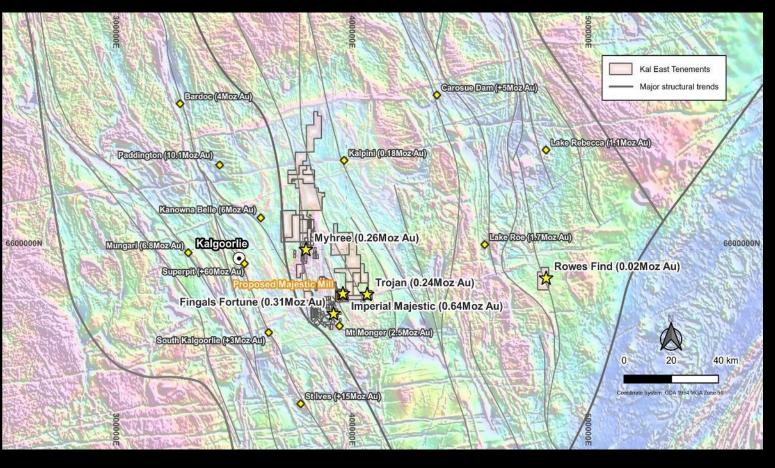

Numerous significant regional targets

District is highly prospective for:

- Gold
- Nickel

Lithium

Base metals

Resources

SYNDICATE

The preceding statements of Mineral Resources conforms to the 'Australasian Code for Reporting of Exploration Results Mineral Resources and Ore Reserves (JORC Code) 2012 Edition' and JORC 2004. For a breakdown by deposit and JORC reporting standard please refer to ASX 19 April 2020 All tonnages reported are dry metric tonnes.

bata is rounded to thousands of tonnes and thousands of ounces gold. Discrepancies in totals may occur due to roundings. Resources have been reported as both open pit and underground with varying cut-offs based off a number of factors discussed in the corresponding Table 1 which can be found with the original ASX announcements for each Resource

Cautionary Statement: Coyote and Paulsens are not yet owned by Black Cat. Conditions Precedent are to be satisfied prior to Completion.
