

Quarterly Activities Report – March 2022

- **Drill Program and Resource Estimation at Koppies**

Initial JORC Resource Estimation in progress.

A review of the Koppies resource drilling to date, identifies substantial additional areas to drill.

- **73 km of Prospective Palaeochannels Identified at Capri**

Airborne EM survey identified 73 km of palaeochannels, with coincident uranium channel radiometric anomalies.

Prospective for calcrete hosted uranium, similar to that at the Marenica Uranium Project on which *U-pgrade™* was developed.

- **Exploration at Angela and Minerva**

Geochemical surveys were completed at the Angela and Minerva Uranium Projects in the Northern Territory

Drilling and Resource Definition activities at Koppies

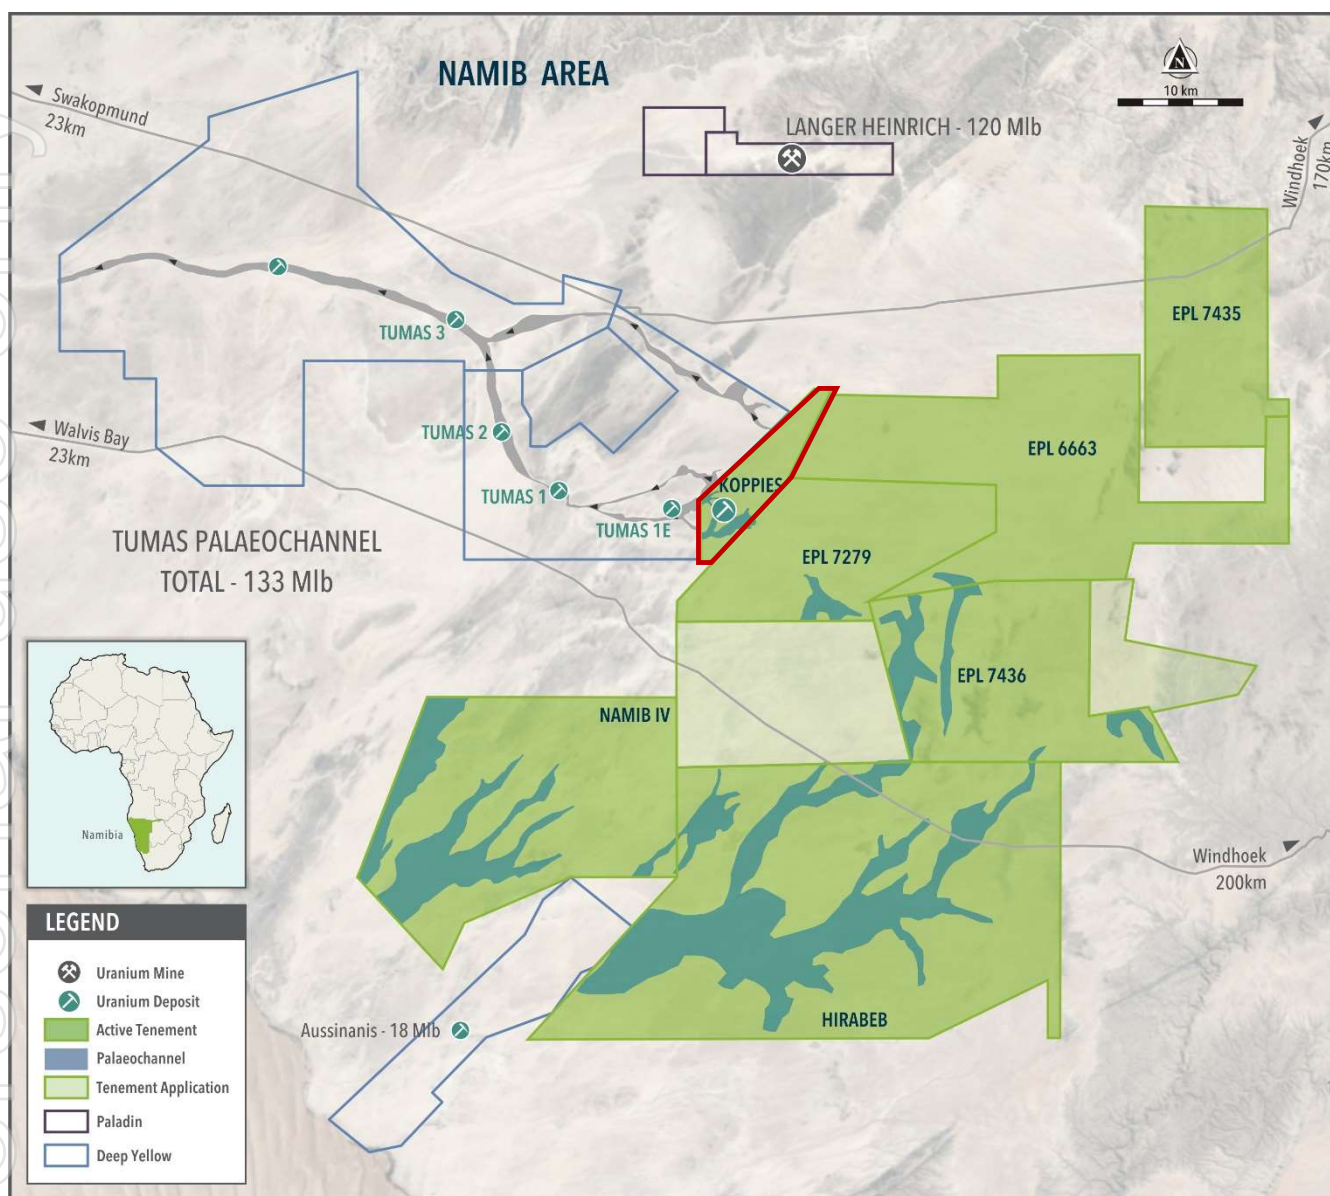

During the quarter, a review of drilling results to date at the Koppies Project, identified substantial areas that will require additional drilling to further delineate the extent of mineralisation beyond that to be included in the upcoming mineral resource estimate. Nevertheless, the Company is preparing a mineral resource estimate using the drilling results to date, to provide guidance to the market. Follow up drilling programs are currently being planned and will be commenced in the near future.

As can be seen from Figure 1, Koppies is a small portion of the area that the Company controls in the Namib Area in the Southern Erongo Region of Namibia, highlighting the substantial opportunities to increase the Company's mineralisation in the greater Namib Area.

The location of the Koppies project relative to the Company's contiguous tenement position in the Namib Area of Namibia and Deep Yellow Ltd's Tumas 1 East deposit, is shown in Figure 1, and relative to the Company's Namibian tenements in Figure 2.

Figure 2 Elevate’s Licence Map – Namibia

Airborne Survey at Capri

During the quarter, an airborne electro-magnetic (“EM”) and radiometric survey was flown over EPL7508 (named Capri) in the Central Erongo Area, Namibia (Figure 2 above). See ASX announcement dated 16 March 2022, titled “73 km of Prospective Palaeochannels Identified at Capri”.

The survey totalled 477 line kilometres of EM and radiometric data on NW-SE oriented flight lines spaced at 250 metres, using a sensor flying height of nominally 35 metres. The survey covered the northern portion of the tenement and is complementary with an older frequency domain electro-magnetic survey flown to the south of the tenement. These two surveys have been interpreted to infer the palaeochannels shown in Figure 3, which total 73 km.

The combined EM surveys have identified north-western and south-eastern palaeochannels in a geological location prospective for “calcrete-type” uranium, similar to that at the Marenica Uranium Project, located only 20 kilometres to the southeast (Figure 2 above), on which the Company developed its **U-pgrade™** beneficiation process.

The north-western palaeochannel extends for at least 48 kilometres within Capri. Of particular significance is the presence of a 10 x 5 kilometre area of anomalous radiometric uranium response coincident with or immediately adjacent to, an inferred palaeochannel. This is significant because it could indicate shallow mineralisation.

The south-eastern palaeochannel is much broader (up to 7 to 10 kilometres) and coincident with the current ephemeral drainage. Approximately 25 kilometres of this palaeochannel occurs within Capri.

Exploration drilling is expected to commence at Capri in the June Quarter 2022.

Figure 3 Inferred palaeochannels with respect to airborne radiometric (U channel) anomalies in Capri

Australia

Geochemical surveys were undertaken at the Angela Uranium Project and the Minerva Uranium Project, in the Northern Territory. The trial surveys were undertaken to determine if uranium mineralisation could be detected under cover, using these techniques. If so, these techniques could benefit future exploration of these areas. The survey results are not expected until the June Quarter 2022.

Figure 4 Elevate's Licence Map – Australia

Trading on OTCQX

On 7 February 2022, Elevate Uranium's trading status was upgraded to the OTCQX Best Market in the United States (U.S.). The Company's primary listing and securities trading remained on the Australian Securities Exchange. The Company's ticker on the OTCQX is ELVUF.

Trading on the OTCQX allows for greater access to U.S. retail and institutional investors, with investors being able to trade and settle in U.S. hours and U.S. dollars, allowing for greater visibility and accessibility of the Company.

The OTCQX is the top market tier operated by OTC Market Group, Inc. in New York, on which over 11,000 U.S. and global securities trade. Upgrading to the OTCQX Market is an important step for companies seeking to provide transparent trading in the U.S., for their U.S. investors. To qualify for OTCQX, companies must meet high financial standards, follow best practice corporate governance and demonstrate compliance with applicable securities laws.

Expenditure

During the quarter, the Group incurred exploration expenditure of \$881,613.

Payments to Related Parties

During the quarter, the Company paid directors' fees plus superannuation to the non-executive directors and salary plus superannuation to the managing director, which totalled \$111,375.

Authorisation

This report was authorised for release by the Board of Elevate Uranium Ltd.

The Mineral Resource Estimates for the Bigryli, Marenica and MA7 resources in the table above were prepared and first disclosed under the 2004 Edition of the Australian Code for the Reporting of Exploration Results, Minerals Resources and Ore Reserves (JORC Code 2004). They have not been updated since to comply with the 2012 Edition of the Australian Code for the Reporting of Exploration Results, Minerals Resources and Ore Reserves (JORC Code 2012) on the basis that the information has not materially changed since it was last reported. A Competent Person has not undertaken sufficient work to classify the estimate of the Mineral Resource in accordance with the JORC Code 2012; it is possible that following evaluation and/or further exploration work the currently reported estimate may materially change and hence will need to be reported afresh under and in accordance with the JORC Code 2012.

Resource Confirmation:

The Company confirms that the Mineral Resource Estimates have not changed since the annual review included in the 2021 Annual Report. The Company is not aware of any new information, or data, that effects the information in the 2021 Annual Report and confirms that all material assumptions and technical parameters underpinning the estimates continue to apply and have not materially changed.

About Elevate Uranium

Elevate Uranium Ltd (ASX:EL8) (OTCQX:ELVUF) is an Australian Securities Exchange listed company focused on uranium exploration, development and application of its **U-pgrade™** beneficiation process.

Elevate Uranium has a portfolio of tenements and projects which are suitable for value add through application of the Company's proprietary **U-pgrade™** process.

Elevate Uranium has a large tenement position in the globally recognised Erongo uranium province of Namibia, a country with an established and longstanding uranium mining industry. In Namibia, Elevate Uranium has three uranium exploration project areas, being the Namib Uranium Project, the Marenica Uranium Project and the Mile 72 Uranium Project. The Marenica Uranium Project has a large, inferred uranium resource of 61 million pounds. These project areas are located in the North West, North and South East of the Erongo region, which provides diversity and opportunity to explore in a large tenement position.

In Australia, Elevate Uranium has tenements and joint venture interests containing substantial uranium resources. The Angela, Thatcher Soak, Minerva and Oobagooma project areas and joint venture holdings in the Bigirlyi, Malawiri, Walbiri and Areva joint ventures, contain 48 Mlbs of high-grade uranium mineral resources.

U-pgrade™ Beneficiation Process

Elevate Uranium's portfolio of uranium projects in Namibia and Australia, contain uranium mineralisation suitable for processing via its proprietary **U-pgrade™** beneficiation process.

A study on the Marenica Uranium Project, indicated that **U-pgrade™** can materially lower development and operating costs on calcrete hosted uranium projects.

About U-pgrade™

U-pgrade™ is potentially an industry leading and economically transformational beneficiation process for upgrading surficial uranium ores.

This breakthrough process was developed on ore from Elevate Uranium's Marenica Uranium Project in Namibia and subsequently, testwork has been undertaken on ore samples from a number of other uranium resources.

In summary, Elevate Uranium has demonstrated, in bench scale testwork, that the **U-pgrade™** beneficiation process;

- Concentrates the uranium by a factor of 50
- Increases Marenica Project ore grade from 93 ppm to ~5,000 ppm U₃O₈
- Rejects ~98% of the mass prior to leaching
- Produces a high-grade concentrate in a low mass of ~2% (leach feed)
- Rejects acid consumers
- Potentially reduces operating costs by ~50% and capital costs by ~50% as compared to conventional processing.

Beyond application at the Marenica Uranium Project, Elevate Uranium has determined, through bench scale testing, that calcrete hosted uranium deposits in Namibia and Australia are amongst those that are amenable to the **U-pgrade™** process.

7.3 Other (please specify)		
7.4 Total financing facilities		
7.5 Unused financing facilities available at quarter end		
7.6 Include in the box below a description of each facility above, including the lender, interest rate, maturity date and whether it is secured or unsecured. If any additional financing facilities have been entered into or are proposed to be entered into after quarter end, include a note providing details of those facilities as well.		

8. Estimated cash available for future operating activities	\$A'000
8.1 Net cash from / (used in) operating activities (item 1.9)	(1,045)
8.2 (Payments for exploration & evaluation classified as investing activities) (item 2.1(d))	-
8.3 Total relevant outgoings (item 8.1 + item 8.2)	(1,045)
8.4 Cash and cash equivalents at quarter end (item 4.6)	16,720
8.5 Unused finance facilities available at quarter end (item 7.5)	-
8.6 Total available funding (item 8.4 + item 8.5)	16,720
8.7 Estimated quarters of funding available (item 8.6 divided by item 8.3)	16
<i>Note: if the entity has reported positive relevant outgoings (ie a net cash inflow) in item 8.3, answer item 8.7 as "N/A". Otherwise, a figure for the estimated quarters of funding available must be included in item 8.7.</i>	
8.8 If item 8.7 is less than 2 quarters, please provide answers to the following questions:	
8.8.1 Does the entity expect that it will continue to have the current level of net operating cash flows for the time being and, if not, why not?	
Answer:	
8.8.2 Has the entity taken any steps, or does it propose to take any steps, to raise further cash to fund its operations and, if so, what are those steps and how likely does it believe that they will be successful?	
Answer:	

Mining exploration entity or oil and gas exploration entity quarterly cash flow report

8.8.3 Does the entity expect to be able to continue its operations and to meet its business objectives and, if so, on what basis?

Answer:

Note: where item 8.7 is less than 2 quarters, all of questions 8.8.1, 8.8.2 and 8.8.3 above must be answered.

Compliance statement

- 1 This statement has been prepared in accordance with accounting standards and policies which comply with Listing Rule 19.11A.
- 2 This statement gives a true and fair view of the matters disclosed.

Date: 27 April 2022.

Authorised by: .By the board.
(Name of body or officer authorising release – see note 4)

Notes

1. This quarterly cash flow report and the accompanying activity report provide a basis for informing the market about the entity's activities for the past quarter, how they have been financed and the effect this has had on its cash position. An entity that wishes to disclose additional information over and above the minimum required under the Listing Rules is encouraged to do so.
2. If this quarterly cash flow report has been prepared in accordance with Australian Accounting Standards, the definitions in, and provisions of, *AASB 6: Exploration for and Evaluation of Mineral Resources* and *AASB 107: Statement of Cash Flows* apply to this report. If this quarterly cash flow report has been prepared in accordance with other accounting standards agreed by ASX pursuant to Listing Rule 19.11A, the corresponding equivalent standards apply to this report.
3. Dividends received may be classified either as cash flows from operating activities or cash flows from investing activities, depending on the accounting policy of the entity.
4. If this report has been authorised for release to the market by your board of directors, you can insert here: "By the board". If it has been authorised for release to the market by a committee of your board of directors, you can insert here: "By the [name of board committee – eg Audit and Risk Committee]". If it has been authorised for release to the market by a disclosure committee, you can insert here: "By the Disclosure Committee".
5. If this report has been authorised for release to the market by your board of directors and you wish to hold yourself out as complying with recommendation 4.2 of the ASX Corporate Governance Council's *Corporate Governance Principles and Recommendations*, the board should have received a declaration from its CEO and CFO that, in their opinion, the financial records of the entity have been properly maintained, that this report complies with the appropriate accounting standards and gives a true and fair view of the cash flows of the entity, and that their opinion has been formed on the basis of a sound system of risk management and internal control which is operating effectively.
