

23 May 2022

COMPANY ANNOUNCEMENTS PLATFORM**AUSTRALIAN SECURITIES EXCHANGE****Institutional investors presentation and market update**

We are pleased to lodge the presentation pack for our Institutional Investors on campus tour of Codan's facilities in Adelaide today.

Although we will not be commenting in detail on our financial results during the presentation, we believe it is important to provide a brief update to all shareholders at this time, given the many uncertainties across global markets.

While the timing of project sales or unforeseen challenges in supply chains could still impact revenues and profitability as we approach the end of the financial year, the Board is expecting the record FY22 first half profit of \$50 million to be matched in the second half of FY22. This will result in a record FY22 full year profit.

Codan's strategy to diversify revenues and profitability continues to deliver results, with the increased profitability of the Communications division continuing in the second half of FY22. The DTC and Zetron businesses have been excellent acquisitions, with integration of both businesses and their expanding opportunity pipelines tracking ahead of schedule. Both businesses are expected to deliver a strong second half result consistent with the first half performance.

In terms of revenues and profit, FY22 will be Minelab's second best year ever, and we expect it to form a new base from which the business will grow in future years. The growth will come from continued penetration of new geographic markets and new product releases that will drive further market share increases. Minelab's excellent profit margins have continued in the second half, so while sales into Russia have ceased and consumer demand has normalised post-Covid in our recreational markets, the profit contribution from Minelab is expected to be comparable to the first half.

Our decision to invest in inventory rather than let customers down has proven to be the correct one. Notwithstanding this investment in inventory, \$41 million of cash has been generated from operating activities so far in the second half of FY22, this is a significant improvement over the first half, which had an operating cash outflow of \$13 million.

On behalf of the Board

Michael Barton
Company Secretary

This announcement was authorised by the Board of Directors.

For personal use only

Codan is a technology company that develops robust technology solutions to solve customers' communications, safety, security and productivity problems in some of the harshest environments around the world.

KEY OBSERVATIONS

First 5 Months as Managing Director & CEO

The strategy is sound and will deliver future growth opportunities

Business fundamentals are very strong

World class technology

Strong acquisition program

DTC and Zetron are good acquisitions

Exceptional people and culture

ersonal use only

“The business will deliver record profits, despite operating under very challenging circumstances.”

- Continuity of supply, despite **global supply chain shortages** and long lead times on key components
- Ability to respond to **inflation by increased prices**
- **Freight** expenses reduced in a disrupted global freight environment
- **Challenging business conditions** in Sudan for the Minelab business
- **Ukraine conflict** impact

MILITARY / DEFENCE MARKET

- **Paradigm shift in battlefield information requirements**
 - Consider Ukraine as an unfortunate 'live' example
 - Dynamic Situational Awareness is a key success factor
 - Live Troop positions, Video footage from Drones for situational awareness
 - >10 times the information traffic is required
- **How is Codan | DTC technology applicable?**
 - **Software Defined Radio is a Core Technology within Codan & DTC**
 - Waveform enhancement is decoupled from Hardware change
 - Multiple waveforms can be implemented in one platform
 - Each waveform targeting different military applications
 - **Codan | DTC Mesh offers**
 - Mobility, IP, Video, Voice and Position Data from one radio
 - Product offerings with MIL-STD compliance

LAW ENFORCEMENT AND INTELLIGENCE TECHNOLOGY

- Market now demands 'IP streams' for all Surveillance streams with evidence recording moving to the 'Cloud'
- How is Codan | DTC technology applicable?
 - Tailored Waveforms providing Non-Line-Of-Sight communications
 - Ultra reliable products (dependable solution)
 - Size, Weight and Power advantages easing deployment
 - 'Spectrum Sensing' capability
- Deep Domain knowledge (especially in Spectronic)
 - Product design and functionality is tailored for the application
 - Accredited Encryption and 'court tested' evidential integrity
- Comprehensive Solutions with the Portfolio
 - Tactical stand-alone deployments
 - Wide area collection systems using deployed 'base-stations'
 - Integrated software solutions collecting and managing the data

UNCREWED TECHNOLOGY

- “Uncrewed Robotics are an efficient technology in any conflict” *
 - Nagorno-Karabakh Conflict (Sep – Nov 2020)
 - Ukraine (Feb 2022 ongoing)
- Growing Opportunities exists in the Military, Law Enforcement /Intel & Commercial sectors

How is Codan | DTC technology applicable?

- **Size Weight and Power (SWAP)**
 - DTC possesses a ‘sweet spot’ in power, weight and size .v. capability
 - Enables future ‘Swarm Drone’ applications
- **Low and Consistent Transmission Latency**
 - DTC Mesh technology offers a consistent ‘low latency’ link that is ideal for Video streaming from a UAV
 - The radio link can be combined with DTC low latency digital video codec providing a powerful capability in a credit card sized package

* *Unmanned Ground Forces: The Emergence of a New Industry in Europe & its Future Implications*, Source: FINABLE, 8th December 2020

BROADCAST TECHNOLOGY

- **Broadcast Customers are now demanding 'remote production' rather than production at the 'venue'**
- **How is Codan | DTC technology applicable?**
 - **Highest Quality Video Encoding**
 - **Ultra High Def (UHD) 4k Video** encoding and decoding
 - **Low latency Video Codec solutions** (HEVC and H.264)
 - **Robust Non-Line-Of-Sight Wireless links**
 - Highest performing RF links in the market
 - DBS offers both 'COFDM Point-to-Point' & 'Mesh' Technology
 - **Remote Production and Systems Integration**
 - Ultra High Definition Video over IP links enabling the 'Production' to be mixed, editing and produced and distributed remotely

Personal use only

COMMERCIAL / NGO TECHNOLOGY

- How is Codan | DTC technology applicable?
- Customers such as International Aid Agencies require reliable voice communications independent of local infrastructure and IP Data networking

Codan's waveform technology provides the best end-user experience through innovations such as:

Digital Voice Waveforms

- Eliminates the hiss and crackle associated with legacy radio comms
- Clearest possible voice in difficult conditions

Automatic Link Establishment (ALE)

- Implemented to global standards for agency / partner interoperability
- Codan unique enhancements dramatically simplify operations and remove the requirement for specialist radio operators

DTC Mesh

- The IP distribution and the comprehensive 'Talk groups' play into this sector
- DTC Mesh sells into natural resources markets sharing machinery metadata

Markets We Serve

Primary Markets

Public Safety

Emergency Communications Centers | Police | Fire | EMS

Integrated systems that streamline emergency response and management

Transportation

Air | Rail | Maritime | DOT

Command & Control solutions powering the most complex control room environments in the world

Utilities

Electric | Natural Gas | Water | Waste

Communications that help keep the lights on and restore vital services when they're down

Domestic Security

Quickly deployed transportable communications wherever the motorcade, rally or event goes

Natural Resources

Oil & Gas | Mining | Forestry | Land Management

Reliable communications connecting HQ with land, sea or underground field operations

Institutional

Higher Education | Healthcare | Corrections

Campus communications for staff, student, patient and population efficiency and safety

ersonal use only

Public Safety Market

- Market segmentation:
 - Urban – agencies serving large, densely populated regions
 - Suburban/Rural – agencies serving less populated and/or remote regions
- Motorola - market share leader in urban systems
- Zetron - traditionally strong in suburban/rural systems
- Motorola and Zetron only end-to-end mission critical communications solution platform providers

Public Safety Markets

Why We Win

- Interoperability = seamless communications regardless of technology
- Brand reputation for quality and reliability
- Untapped market share drivers...

**Land Mobile Radio Systems
Into Zetron Command &
Control Base**

**Command & Control
Systems Into Land Mobile
Radio Base**

**Investment in New
Technologies**

**Next Gen 911 Readiness &
Funding**

Case Study

“The shared services really provides 911 answering points the reliability, ease of use, and financial incentive to bring their center into next generation 911.”

Blake Derouchey, Iowa State 911 Program Manager

Iowa Department of Homeland Security & Emergency Management (USA)

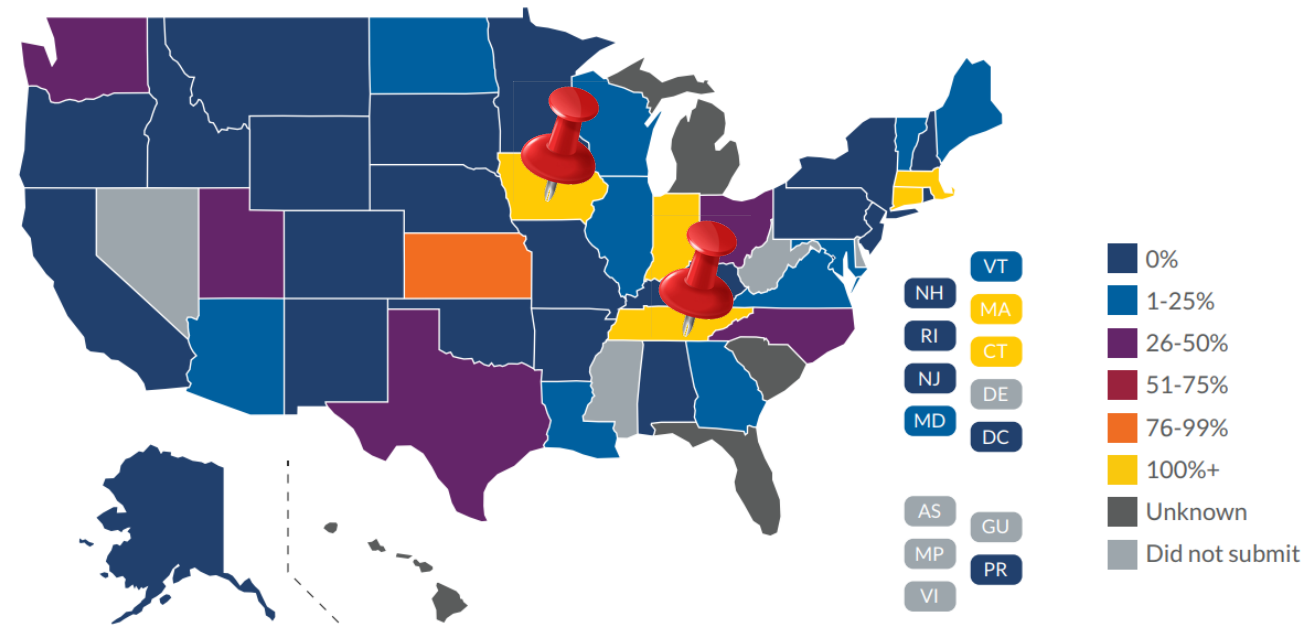

- **Challenge:** 99 counties operating independent, premise-based public safety answering point communications systems, many with outdated and obsolete technology
- **Solution:** A virtually consolidated, statewide hosted next generation 911 technology platform, geographically diverse and with FirstNet network backup, available to all counties and funded by the state
- **Benefits:** The latest in next generation 911, superior reliability and quality, with significant cost savings to the state and local agencies

Federal Next Generation 911 Funding

Modernization of 911 Networks – IP-Based Unified Communications

- Funding Sources Available and Growing

- 911 mobile phone tax: \$2 billion annually
- Funding required: \$10 to \$14 billion
- Build Back Better Act: proposed
\$470 million US appropriated (FY23-25)

Sources: Next Generation 911 Cost Estimate Report to Congress (2018), On State Collection and Distribution of 911 and Enhanced 911 Fees and Charges (2020), H.R.5376 - Build Back Better Act

Transportation Markets

Why We Win

- Interoperability through technology convergence
- Customization and configurability to manage complex requirements
- Application diversity: Rail, Transit, Maritime, Airports, Airlines

Shift to LTE presents opportunity

Command & Control (ACOM) combines Radio & Telephone for ideal customer fit

Investment in New Technologies

Asset Tracking & Mapping Integration

Case Study – Transportation

The logo for Yarra Trams, featuring the word "yarra" in white on a blue background and "trams" in white on a green background.

Yarra Trams (Australia)

➤ **Challenge:** Analog dispatch system used to communicate with trams was approaching end of life and could not be expanded or made future proof.

➤ **Solution:** Two ACOM Command & Control systems – one installed at the operations center and another at the DR center. 28 console positions – 16 at the new OC, 11 in the DR operations room that would replicate the consoles at the OC, and one administrator's console in the maintenance facility.

➤ **Benefits:** A cost effective, efficient and future proof system providing interoperability with all other radio technologies and existing transceivers, as well as scalability to meet future needs.

“ACOM's IP architecture will allow us to expand and upgrade easily when the time comes to support additional transceivers and digital radio technologies.”

Darren Young, Team Manager, Operational Control System

Public Utilities & Energy Markets

Why We Win

- Technology convergence
- Scalability to meet population and coverage area expansion
- Market expansion: Industry Consolidation, Renewables and Smart Grid

Shift to DMR & Private LTE radio presents opportunity

Command & Control (ACOM) combines Radio & Telephone for ideal customer fit

Multi-Site Wide-Area Interconnectivity

Asset Tracking & Mapping Integration

Case Study – Utilities

“ Powerco now has coverage in some remote parts of New Zealand that no other provider of mobile or radio has. We are set up for the future. ”

Phil Marsh, Network Operations Manager, Powerco

Powerco (New Zealand)

- **Challenge:** Current system didn't have enough reach for staff to contact the control room from many remote areas.
- **Solution:** ACOM Command & Control System – Driving the company's 32-position console system that also complements its new fleet of Hytera DMR 3 VHF radios.
- **Benefits:** A highly customizable touch screen display with support for multiple simultaneous active calls. Included visual and audio alerts. The ability to leverage advanced features, such as Bluetooth, encrypted messaging and SIP gateways, in addition to Request-to-Talk and Press-to-Talk communications.
