

ASX ANNOUNCEMENT

ASX RELEASE: 14 June 2022

XTC advances Key Development Milestones by almost doubling its footprint of Lithium Brine Tenements in Argentina from 12,400 to 21,900 Ha.

HIGHLIGHTS

Option to acquire 4 additional land packages in Catamarca.

La Fortuna, La Fortuna1, La Potola and Justina have a total area of 9,500Ha in close proximity to Lake Resources Kachi project.

Potential for development of a world class Lithium Brine project with further ground acquisitions being considered.

Exercise of option on Luz Maria completed.

Xantippe Resources Limited (ASX: XTC) (Xantippe, XTC, or the Company) is pleased to advise it has, pursuant to its rights to purchase the shares in Carolina Lithium Pty Ltd¹, secured an option to acquire four additional tenements in close proximity to Lake Resources' Kachi Project (**Acquisition**). These four tenements have a total area of 9,500Ha which brings the total XTC tenement holding to 21,900 Ha. All are prospective for lithium brine deposits in Catamarca, Argentina and are to be known as the **Carachi Pampa Lithium Project**.

Xantippe Managing Director, Richard Henning, commented:

Having recently finalised our investment of Luz Maria² which gives XTC a total of 12,400 Ha, we have now secured an exclusive option over a further 9,500Ha. This Triangle is one of the most exciting and valuable regions in the world providing high purity lithium to drive the world's electric vehicle future.

ASX ANNOUNCEMENT

2022

At Xantippe, we are fortunate to be working with two of the most prominent and successful families in Argentina and we look forward to a strong partnership as we strive to reach our mutual goal of clean and environmentally responsible Lithium production.

We are delighted to have acquired such high-quality projects, located next to Tier One clean lithium developers. We will commence exploration activities as soon as possible. We look forward to keeping shareholders updated on our progress.

The acquisition of the additional land option adds to our strategy of extending our footprint in Catamarca with plans to develop a Lithium product sourced from brines that will offer a clean product using direct lithium extraction (DLE) which requires a smaller environmental footprint and uses less water."

Tenement Details

The Acquisition comprises four tenements being the La Fortuna, La Fortuna 1, La Potola and Justina in Catamarca, Argentina and are located in the Carachi Pampa Salt Flat and cover 9,571 Ha (together the **La Fortuna Properties**).

ASX ANNOUNCEMENT

2022

The lithium brine target in Carachi Pampa is a paleo salar found at depth and not entire related to current salt flat layout. This paleo salar continues under a more recent alluvial fan cover to the northeast and west of Lake Resources (LKE) areas. LKE areas are in the salt lake and are prone to flooding whereas the target areas are covered by alluvial fans and easy to access.

ASX ANNOUNCEMENT

2022

LKE resources of 4.4 million tons LCE were defined after studying an area of 172 Km² with 14 wells and includes a pyroclastic complex (ASX: LKE 27 November 2018). LKE’s PFS study only considered inferred resources of 1.1 million tons LCE to support 25,000ton LCE/year for 25 years. The resource estimate at the LKE Kachi project is reported as 1M tonnes at 290mg/L Lithium (Indicated) and 3.4M tonnes @210mg/L lithium (Inferred) (ASX: LKE 27 November 2018).

Carachi Pampa has proven lithium bearing brines and has the potential to host a project similar to LKE. The objective at Carachi Pampa is to prove, via exploration, that the area can hold sufficient resources for a similar project.
