JUNE 2022

Disclaimer and Important Information

Disclaimer

This presentation has been prepared by Vango Mining Limited ("Company" or "Vango") to provide summary information about Vango and its activities as at the date of this presentation. The information contained in this presentation does not purport to be complete, and it should be read in conjunction with Vango's other periodic and continuous disclosure announcements lodged with the Australian Securities Exchange, which are available at www.asx.com.au. This presentation contains forecasts and forward-looking statements which are not a guarantee of future performance and which involve certain risks. Actual results and future outcomes may differ from those outlined herein. The presentation should not be construed as an offer or invitation to subscribe for or purchase securities in Vango.

Forward-looking statements are statements that are not historical facts. Words such as "expect(s)", "feel(s)", "believe(s)", "will", "may", "anticipate(s)" and similar expressions are intended to identify forward-looking statements. These statements include, but are not limited to statements regarding future production, resources or reserves and exploration results. All such statements are subject to certain risks and uncertainties, many of which are difficult to predict and generally beyond the control of the Company, that could cause actual results to differ materially from those expressed in, or implied or projected by, the forward-looking information and statements. These risks and uncertainties include, but are not limited to: (i) those relating to the interpretation of drill results, the geology, grade and continuity of mineral deposits and conclusions of economic evaluations, (ii) risks relating to possible variations in reserves, grade, planned mining dilution and ore loss, or recovery rates and changes in project parameters as plans continue to be refined, (iii) the potential for delays in exploration or development activities or the completion of feasibility studies, (iv) risks related to commodity price and exchange rate fluctuations, (v) risks related to failure to obtain adequate financing on a timely basis and on acceptable terms or delays in obtaining governmental approvals or in the completion of development or construction activities, and (vi) other risks and uncertainties related to the Company's prospects, properties and business strategy. Our audience is cautioned not to place undue reliance on any forward-looking statements that speak only as of the date hereof, and other than as required by law the ASX listing rules. Vango does not undertake any obligation to revise and disseminate forward-looking statements to reflect events or circumstances after the date hereof, or to reflect the occurrence of or non-occurrence of any events.

Neither the Company, its related bodies corporate nor any of their directors, officers, employees, agents or contractors make any representation or warranty (either express or implied) as to the accuracy, correctness, adequacy, reliability or likelihood of fulfilment of any forward-looking statement, or any events or results expressed or implied in any forward-looking statement, except to the extent required by law.

Competent Person's Statements

The information in this report that relates to exploration results has been reviewed, compiled and fairly represented by Mr David Jenkins, a Member of the Australian Institute of Geologists and a full time employee of Terra Search Pty Ltd. Mr Jenkins has sufficient experience, including over 28 years' experience in exploration and resource evaluation relevant to the style of mineralisation and type of deposits under consideration to qualify as a Competent Person as defined in the 2012 Edition of the Joint Ore Reserves Committee ('JORC') Australasian Code for Reporting of Exploration Results, Minerals Resources and Ore Reserves. Mr Jenkins consents to the inclusion in this report of the matters based on this information in the form and context in which it appears.

The Statement of Mineral Resource Estimates has been compiled by Dr. Spero Carras who is a full-time employee of Carras Mining Pty Ltd and a Fellow of the Australian Institute of Mining and Metallurgy ("FAusIMM"). Dr. Carras has sufficient experience relevant to the style of mineralisation and type of deposits under consideration to qualify as a Competent Person as defined in the 2012 Edition of the Joint Ore Reserves Committee ("JORC") Australasian Code for Reporting of Exploration Results, Minerals Resources and Ore Reserves. Dr. Carras consents to the inclusion in this report of the matters based on this information in the form and context in which it appears. Dr. Carras has over 40 years experience in gold mine evaluation.

Information in this announcement is extracted from reports lodged as market announcements available on the Company's website <u>https://vangomining.com/.</u> The Company confirms that it is not aware of any new information that materially affects the information included in the original market announcements and that all material assumptions and technical parameters underpinning the estimates in the relevant market announcements continue to apply and have not materially changed. The Company confirms that the form and context in which the Competent Persons' findings are presented have not been materially modified from the original market announcements.

Who is Vango Mining

Vango Mining is a **gold exploration and development company** focused on exploring and developing the **Company's key asset, the 100% owned Marymia Gold Project in the Mid-West region of Western Australia.**

In the near-term, the Company is focused on **expanding its high-grade resource base** to support **plans to become a significant gold mining and production company** – **Resource upgrade planned.**

Vango also has a Farm-in, Joint Venture Agreement with Lodestar Minerals (ASX: LSR) for the nearby Ned's Creek Project, confirming Vango's dominant ground position in the world-class Marymia Gold Belt.

About the Marymia Gold Project

40km

- **Dominant ground position in world-class Marymia Gold Belt** - extending from >5.5Moz Plutonic Gold Mine¹
- Project sits on 45 granted Mining Leases which are all pre-native title with >40km in strike length
- 1Moz high-grade resource and growing 1.02Mt @ 3.0
 g/t Au² includes:
 - Underground: 541,000oz @ 7.9g/t Au
 - Open pit: 461,000oz @ 1.7g/t Au
- Extensive open-pit focused resource expansion drilling campaign partially completed designed to deliver resource upgrade
- Exploration to date has targeted just 3 key gold corridors of 6 identified corridors – major exploration upside within Project area

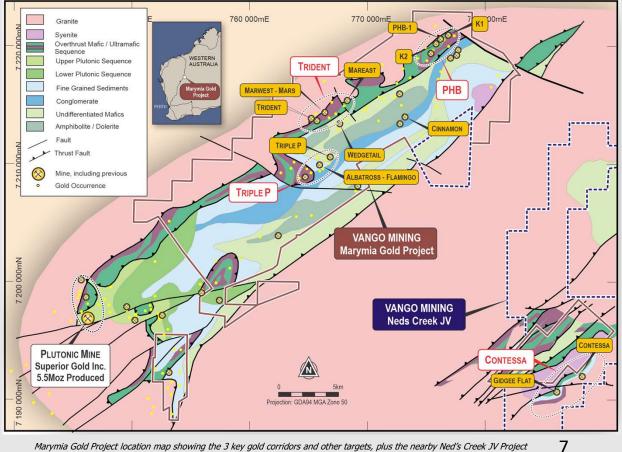

Outline of Marymia Gold Project area showing the >40km strike length and the >5.5Moz Plutonic Gold Mine immediately to the south

¹ Superior Gold Inc., TSX-V:SGI, Corporate Website <u>www.superior-gold.com</u> ² VAN ASX 19/05/20 Marymia Mineral Resource Increases to 1Moz

Marymia Project – 1Moz and Growing

- 1Moz JORC 2012 Mineral Resource confirmed May 2020: 10.38Mt @ 3.0 g/t Au for 1.02Moz Gold¹
- 2020: 20,000m RC and diamond drilling drill campaign - focused on priority targets at the 'crown-jewels' Trident gold corridor and PHB gold corridor at Marymia
- H2, 2021: Major open-pit focused Resource expansion drilling campaign completed designed to add near-surface resources to the Marymia Resource
- Results from 2020 and 2021 drilling programs to be included in Resource upgrade planned to be completed by end of Q2, 2022
- Next phase of drilling planned to commence July 2022

Marymia Gold Project location map showing the 3 key gold corridors and other targets, plus the nearby Ned's Creek JV Project

¹ VAN ASX 19/05/20 Marymia Mineral Resource Increases to 1Moz

Marymia's 3 Key Gold Corridors

Vango's exploration to date has targeted only 3 of 6 identified gold corridors

- Trident the 'Crown Jewells'
 PHB
- Triple P

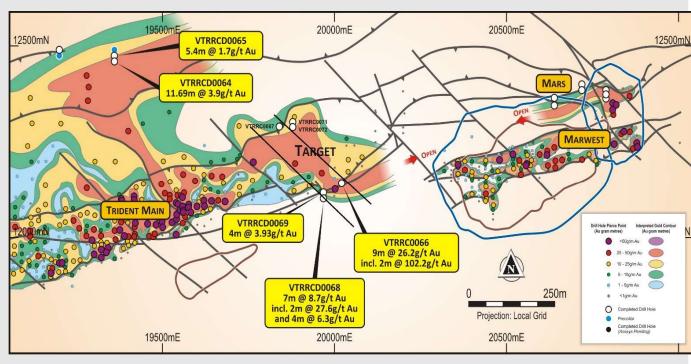

Highlights major exploration upside potential within project area

Trident Gold Corridor – The Crown Jewels

- 28 RC holes for 6,622m and 7 Diamond holes for 1781.8m completed at Trident in 2020
- Drilling successfully extended dip and strike extent of mineralisation outside existing Resource - 410,000 @ 8g/t Au¹
- Trident extension drilling significantly extended gold mineralised zone to the north-east by ~250m towards the Marwest Deposit.
- Potential for Trident and Marwest to form one large high-grade gold system with a strike length of at least 3km
- Drilling for depth extensions extended down dip extent of mineralisation by 200m - thick, high-grade zones with potential to add further significant resources to the Trident resource

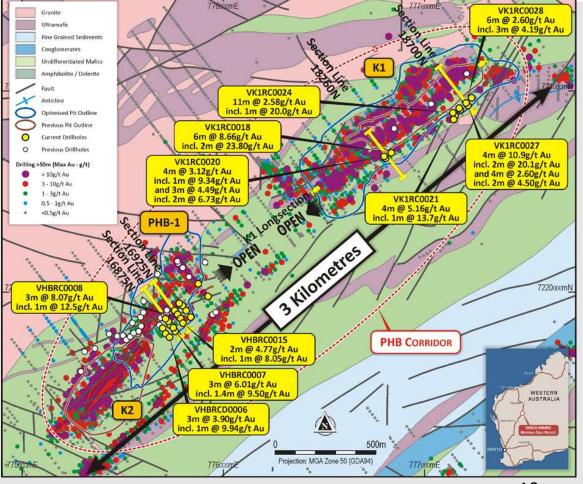

Selected drill results from drilling at Trident Gold Corridor at Marymia Gold Project – showing Marwest target to the north-east²

¹ VAN ASX 19/05/20 Marymia Mineral Resource Increases to 1Moz ² VAN ASX 24/03/21 Marymia Exceptional Gold Results and Project Update

PHB Gold Corridor

- Drilling also completed at the PHB gold corridor in 2020 field season
- 23 RC holes for 5,751m and 6 Diamond holes for 1,412.8m completed
- PHB drilling successfully targeted high-grade extensions of the three key lode structures – the Main, Central and West Loads
- Drilling at the PHB corridor also delivered a new, high-grade lode discovery below the K1 open pit, northeast of PHB-1

¹ VAN ASX 25/11/20 AGM 2020 Presentation – Developing a Major Australian Gold Project

 ¹⁵ VAN ASX, 29/06/17 High Grade Gold Intersections from Drilling at Plutonic Dome
 ¹⁶ VAN ASX, 18/02/21 High-Grade Gold Extensions at Trident

- Major open-pit focused resource expansion drilling campaign commenced July 2021
- **Drilling completed:** 8,914 metres of RC drilling across 56 holes at 11 targeted open-pits
- Targeted open-pits not part of the existing Marymia resource - targets ranked in order of priority based on historic gold inventory and review of historic drilling
- **11 open pits;** Skyhawk, Parrot, Apollo, Prickleys, Ibis,
 Exocet, Rosella, Pigeon, Kookaburra, Redfin and Speckled
- Drilling was also designed to;
- 2nd pl target
 minera
 - Enhance understanding of mineralised zones within the targeted open pits – to assist with mine planning
 - Deliver 'critical mass' of resources to increase proposed mine life of a potential future mining operation at Marymia
 - 2nd phase drilling also completed at selected targets - testing for further extensions of gold mineralisation to potentially add to the resource base

11 open pit drill targets drilled in 2021 field season at Marymia Project

- The Marymia open-pits were previously mined at a time of depressed gold prices, presenting an opportunity for Vango's open-pit focused drilling to add substantial mineable resources.
- There are significant historic gold intersections below the open-pits and Vango's drilling is testing for extensions to these resources and for repeating structures at depth.

Vango completed 8,914m of RC drilling across 11 open-pits in its 2021 field season at the Marymia Project

Resource Expansion Drilling Campaign - Results

- Multiple high-grade intersections returned reaffirm and strengthen the Project's significant open-pit potential
- Demonstrated the continuation of significant zones of near-surface gold mineralisation across the targeted open-pits
- Identified previously un-mined high-grade mineralisation below the open pits and confirmed continuity of mineralised structures below the open-pits – open pits were previously mined to only shallow depths at a time of low gold prices
- Confirmed continuation of mineralised zones from substantial historical drilling at the Marymia open-pits.

Historic drilling also returned many high-grade gold intersections at the open-pits – the historical results will be included in planned resource upgrade for the first time

ROSELLA Open-Pit¹

Next Phase of Drilling

Targeted drilling designed to test depth and strike extensions at 4 priority targets

Marymia Gold Project location map showing the four target areas for next phase of drilling, to commence July 2022

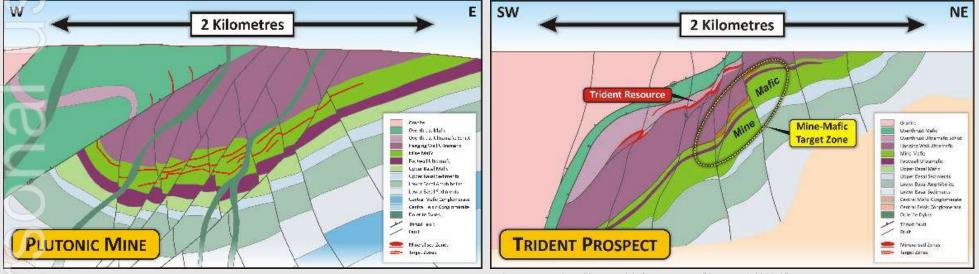

- Next phase of drilling at Marymia Gold Project planned to commence in July 2022¹
- Drilling will target extensions to gold mineralisation along strike and at depth at 4 priority targets -Triple P, Mareast, Apex and the Salmon area
- Drilling will also seek to potentially add further ounces to the Marymia Resource
- Program is planned to consist of an initial 5,140m of RC drilling in 25 holes:
 - Triple P: 2,500m in 9 holes
 - Mareast: 800m in 8 holes
 - Apex: 640m in 4 holes
 - Salmon area: 1,200m in 4 holes
- Results to be progressively released when available

Marymia Project Exploration Model

Trident Corridor – recognition of analogous setting to Plutonic Gold Mine

- Geological setting of Trident Corridor similar to >5.5Moz¹ Plutonic Gold Mine, located immediately south of Marymia Project
 - Mine-Mafic stratigraphy hosts entire Plutonic deposit and identified in Trident footwall
 - High-grade gold mineralisation at Plutonic and Trident controlled by steeply dipping structures where they pass through the host units
 - Mine-Mafic stratigraphy at Trident is largely un-tested in 5km structural corridor
- Extensive shallow drilling database complemented by deeper geophysical data highlights high-priority, largely un-tested, multiple Plutonic look-a-like targets

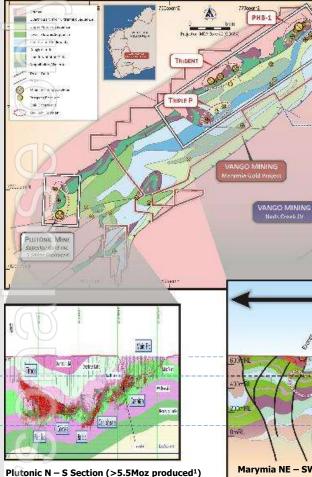

¹ Superior Gold Inc., TSX-V:SGI, 22/07/19 Corporate Presentation, Corporate Website www.superior-gold.com

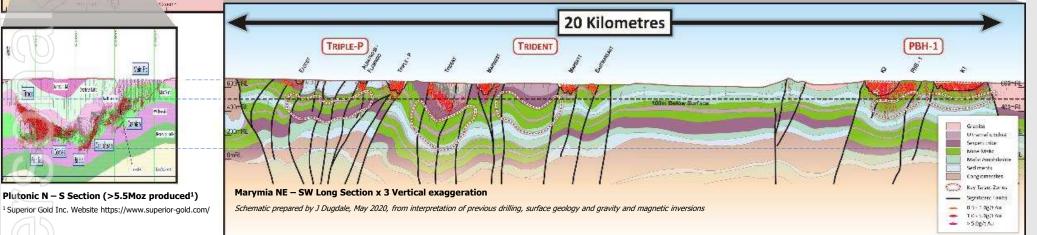

Cross section adapted by J Dugdale from B Bourne, "Orogenic Gold 2019" poster presentation.

Marymia Gold Project – Untested Potential

7213500r

- To date exploration focused on only three key gold corridors over 20km strike with deeper Plutonic¹ look-a-like targets identified
- Plutonic Gold Mine mined/drilled to >600m for >5.5Moz produced to date¹
- Marymia Project has extensive drilling and geological data base project largely untested >100m depth
- Major upside potential at depth, and at other untested corridors within project area
- Drilling in current field season targeting open pits to deliver substantial additional near-surface ounces to existing Resource
- Further resource potential from nearby Ned's Creek Farm-in JV Project

Ned's Creek Farm-in Joint Venture Project

- **Farm-In and JV** with Lodestar Minerals (ASX: LSR) at **Ned's Creek Project - Vango to earn a 51% interest** by expending \$5m on exploration over 3yrs from 2019¹
- Latest phase of **drilling confirmed extensive gold anomalies and mineralisation** on southern margin of Contessa granite in areas of minimal previous drilling²
- All holes intersected strong hydrothermal alteration characterised by silica-pyrite alteration with elevated Bi, Mo, Pb and W

- Holes LNRC095 and LNRC097 separated by 1200m with no drilling (below the base of oxidation) between the two areas
- 1m rig split samples confirm wide intervals of anomalous gold
 - LNRC099: 44m at >0.1g/t gold from 98m, including 10m at 0.86g/t Au from 131m at Central Park target
 - LNRC097: 17m at 0.7g/t Au from 122m, including 9m at 0.86g/t Au from 122m at Contessa target

Drill hole locations in latest drilling at Ned's Creek, showing the 1200m untested area between Contessa and Central Park

Next steps: RC drilling over the 1200m gap between Contessa and Central Park. A discrete magnetic anomaly adjacent to the contact presents a specific target within this planned drilling

Next Steps

- Marymia Project Resource upgrade by end Q2, 2022
- Marymia Next phase of drilling commence July 2022
- Results to be progressively released when available
- Next phase of exploration and results at Ned's Creek Farm-in JV Project - 2022
- Marymia Project Mine Planning ongoing in parallel
- Marymia Project Permitting/Approvals ongoing in parallel

¹VAN ASX 19/05/20 Marymia Mineral Resource Increases to One Million Ounces

1. Mineral Resources reported in accordance with the Australasian Code for Reporting of Exploration Results, Mineral Resources and Ore Reserves (Joint Ore Reserves Committee Code – JORC 2012 Edition).

2. Open pit resources reported within optimised conceptual pit shells at A\$2,500/oz gold price above a 0.5 g/t Au cut off and include oxide, transition and fresh material.

3. Trident underground resources are retained as first reported 18 April 2019, above a 3.0 g/t Au cut-off grade, and modelled at a gold price of A\$2,000/oz, on the basis that the information has not materially changed since last reported. Other underground resources reported above a 3.0 g/t Au cut off (with minor 2.5 g/t Au cut-off material included for continuity purposes) and includes fresh material only.

4. Totals may differ due to rounding, Mineral Resources reported on a dry in-situ basis.

VANGO.
