Tshipi Borwa Manganese Mine

- Operational improvement program progressed but high rainfall and equipment availability affected operations
- HG ore production on target
- LG ore stockpiled due to market pressure on sales of LG
- Trucking capacity assisted the logistics chain to ensure shipping schedule was achieved
- Logistics costs increased due to increased road haul
- Continued issues with rail network cable theft, power outages, derailments, weather
- 3,251,920 tonnes shipped in FY2022
- Two vessels (85,000 tonnes) rolled into March
- Average cost of production reduced from US\$2.05 to US\$1.93 for high grade lumpy product

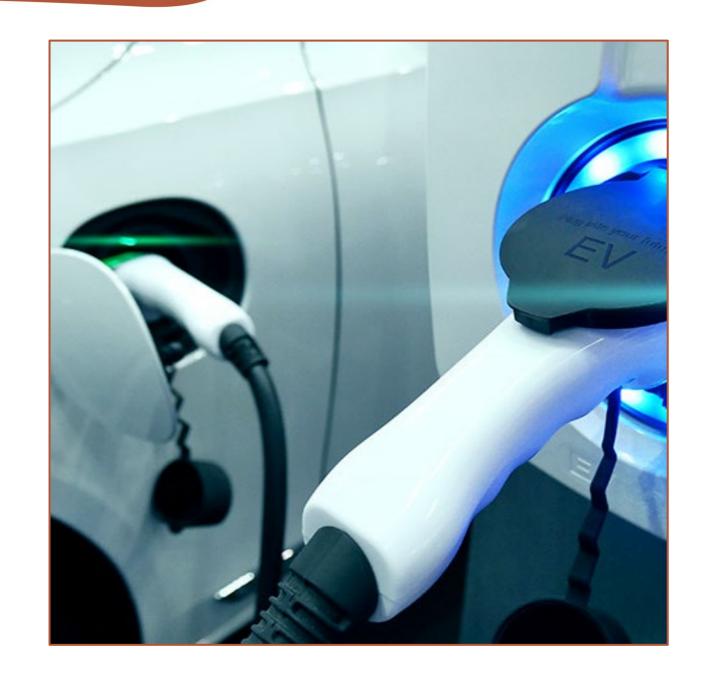

Challenges and Opportunities for FY2023

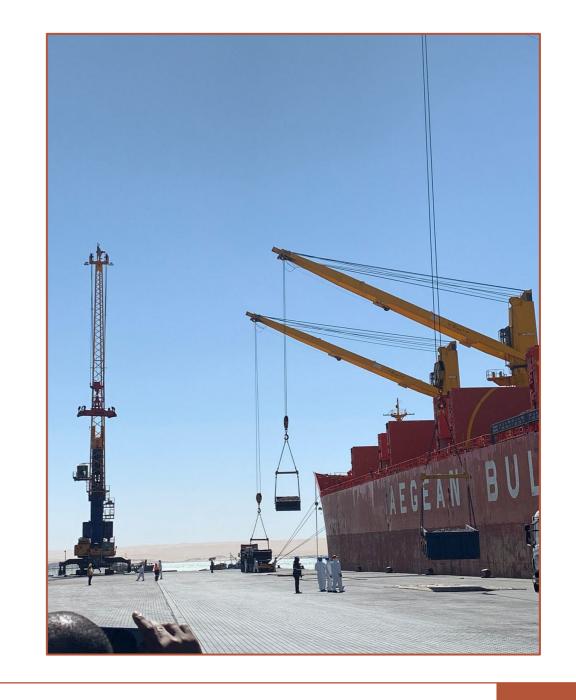

- Implementation of revised strategy for Jupiter
- Capitalise on growth opportunities
- Optimisation of logistics network to maintain low haulage rates
- Efficiency and quality gains through materials handling projects
- Review of Tshipi ramp up feasibility study
- Mining and logistics operational improvements
- Diversification of Tshipi's customer base
- Capturing opportunistic HG tonnes
- Volatile manganese price
- Volatile freight rates

Manganese Market

- Predominantly influenced by crude steel production in China, which was depressed in FY2022 as a result of COVID-19 impacts, and the constraints placed on producers in and around the Beijing Olympics.
- Recovery expected in FY2023 however in the near term both China and India have continued to see the trailing impacts of COVID and larger stockpiles at mills and ports.
- Downstream steel demand fundamental remain and will likely return to the market later than expected in FY2023, supported by stimulus measures.
- In general the India ferro manganese and steel production increasing and becoming a greater importer of manganese ores from South Africa.
 - Elevated bulk freight rates throughout the FY2022 and early FY2023 due to supply chain disruptions, oil prices and port congestion.
- Expect to see decreasing freight in FY2023 with lower fuel pricing and trade route rearrangement.
 - New developments and opportunities for utilising manganese concentrate in the battery sector, especially in higher grade and specialty ores.

Thank You
