

TEM | Quarterly Report - Period Ending 30 June 2022

Key Points

- **Meleya Project:**
 - Orion target:
 - EIS Funding for first drill holes into entirely new province
 - Data continues to be collected on the 2 drill holes
 - All samples now submitted to laboratory for analysis
 - First batches received confirmed presence of copper and other base metals
 - DHEM Survey conducted
 - Works in preparation:
 - Multiple geophysics programs
 - Multiple drilling programs across the mineralised belt
- **Euro Project**
 - JV (non-binding) signed with Karara Mining to explore adjacent tenements
 - Gold and polymetallic mineralisation confirmed at Calais target
 - Further drilling and other works in progress
- **Rocky Hill Project**
 - Multiple geochem anomalies detected
 - Application for Increase of tenure

Projects

Yalgoo Region

Tempest has 4 exciting project areas in the Yalgoo region of Western Australia totalling more than 900km². The projects are located within the prolific Yalgoo Greenstone Belt which hosts a number of world class mines. Tempest has used data driven processes to identify poorly or unexplored areas of highly prospective geology which includes multiple instances of proven mineralisation.

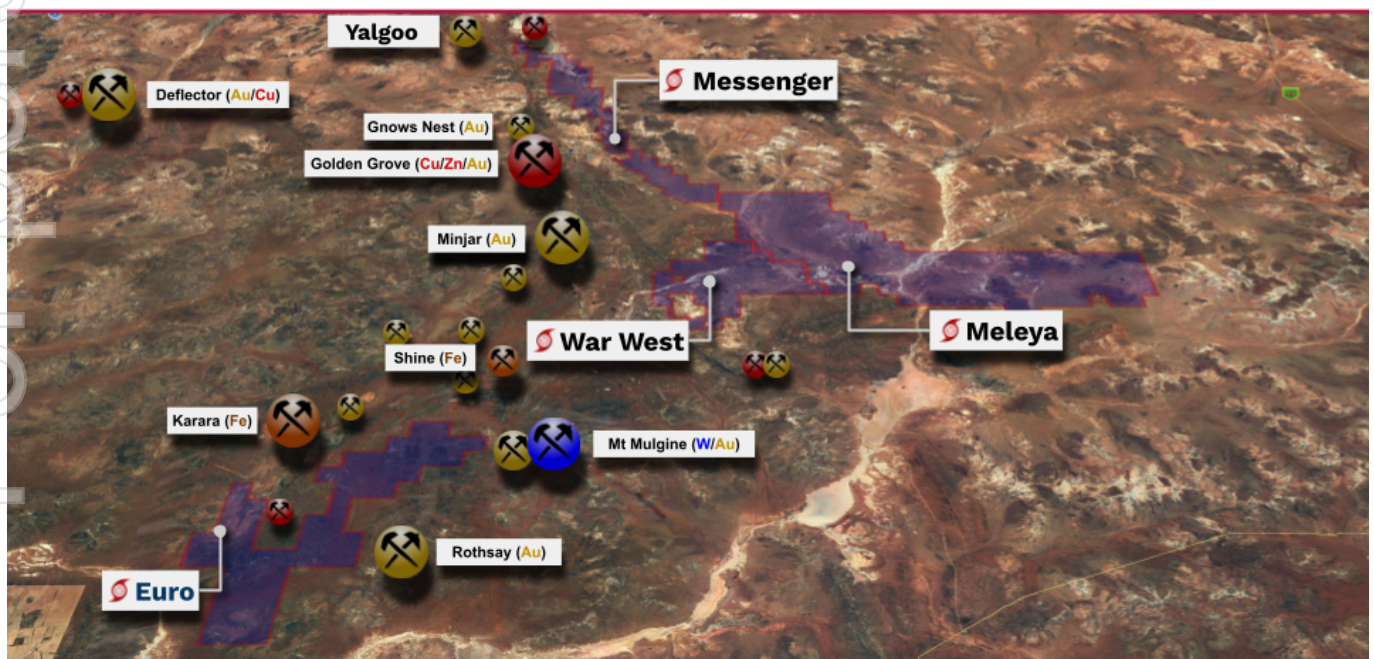

Figure 01: Overview of the TEM Yalgoo Projects

Meleya

The Meleya project is a previously unrecognised part of the Warriedar Fold Belt with outcropping supracrustal mafic and felsic 'greenstone' units wrapped around felsic to intermediate intrusions known as the Walganna Suite. This setting is considered highly favourable for the formation of high grade Volcanogenic Massive Sulphide (VMS) and IRG deposits and Lode Hosted / Orogenic vein style gold.

Tempest has previously demonstrated the extensive prospectivity of this project⁰¹ and extended its holding with additional tenure applications to the north and east.

Figure 02: Evolution of the Meleya Project (Legacy map, outcrop, 2021 interpreted geology and targets)

Tempest was successful in its application in round 24 of the Western Australian Government's highly competitive Exploration Incentive Scheme. The Exploration Incentive Scheme (EIS) is a Western Australia Government initiative which has been providing a funding mechanism for research based geoscience (including drilling) with aims to stimulate increased private sector resource exploration and new discoveries".

This will allow up to \$150,000 towards co-funded drilling at the Meleya Project⁰².

Tempest announced in March 2022 the granting of several tenements totalling approximately 204km² which essentially doubled the size of the Meleya Project⁰³. This new tenure includes known outcrops of up to 59.6% Iron and anomalous gold in soils, neither of which have been followed up with exploration.

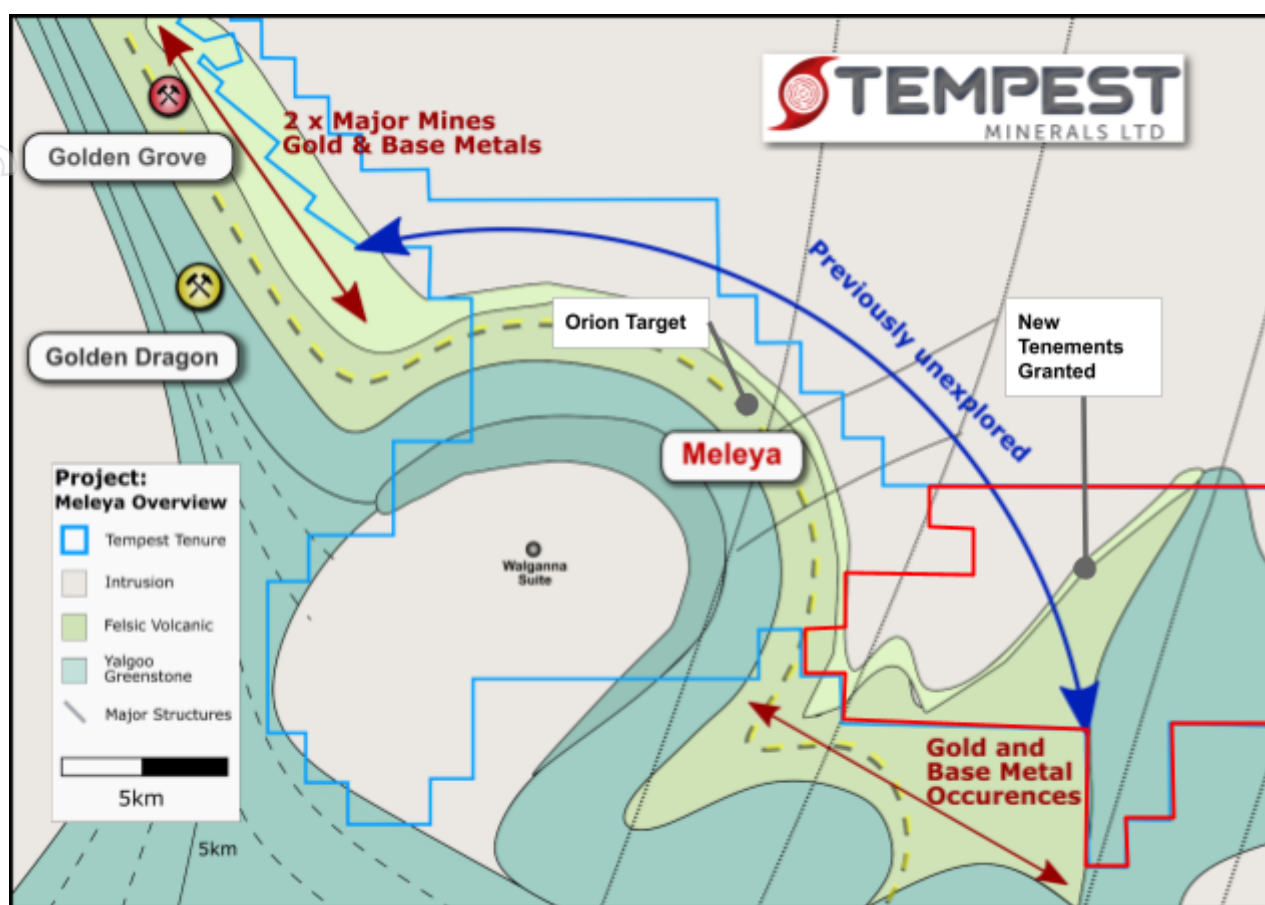

Figure 03: Overview of the Meleya Project

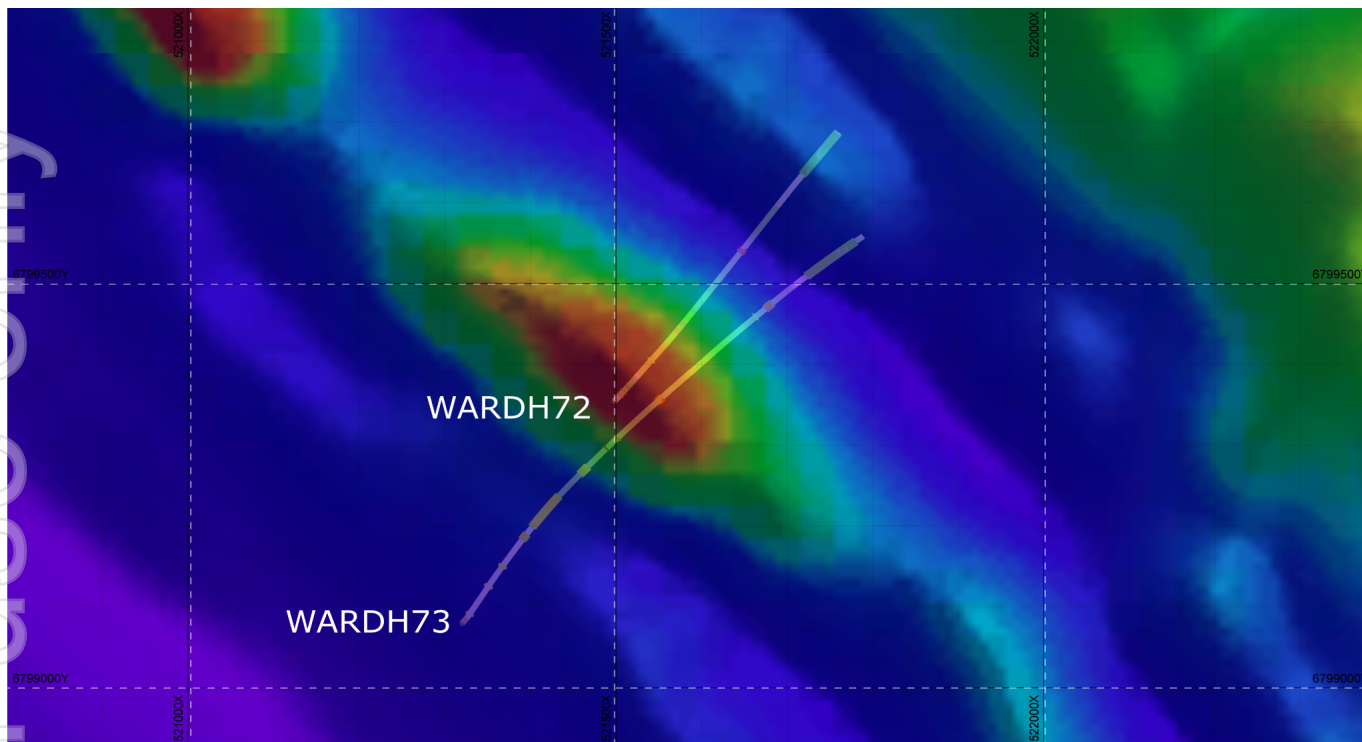

Orion Target

In February, Tempest commenced a ^{04, 05} drilling program at the Meleya Project, consisting of 2 x deep diamond drill holes for a total of 1,730.5m. The purpose of the program was to drill a coherent cross section of the newly identified extension of the Yalgoo Greenstone belt to develop a strong understanding of the stratigraphy to assist with future exploration in the new mineral province. The two drill holes were also designed to test a correlative geochemical and magnetic anomaly known as the Orion Target.

Drill holes WARDH72 and WARDH73 were drilled to a final depth of 709.1 metres and 1021.4 metres respectively and both intersected multiple zones ^{06, 07} of mineralisation including copper and other metal bearing sulphides.

Assay results reported in July 2022 confirmed the presence of copper and other base metals. TEM are excited by these results as it proves the fertility of the region and the justification of extensive further exploration across the entirely new unexplored mineral field.

A Downhole ElectroMagnetic (DHEM) geophysical survey on WARDH72 and WARDH73 was completed in July 2022⁰⁸ and the results of this survey are expected to highlight any nearby offhole conductors to the drill holes, confirm the presence of the logged mineralisation and provide a 'signature' that can be used for future exploration and drilling.

Euro

Background

The Euro Project comprises four (4) 100% Tempest owned tenements (more than 176km²) within the prospective Southern Yalgoo Greenstone Belt located between the neighbouring Rothsay (Gold), Mt Mulgine (Tungsten/Gold) and the Karara (Iron/Gold) Mines. The project has thick gold intercepts in legacy drilling, however due to depressed metal prices at the time were never thoroughly assessed by previous owners. While most of the greater Euro Project remains unexplored or unexplored, significant gold mineralisation has been recorded previously in the north of the project but not thoroughly tested for continuity.

Tempest had a strong flow of exploration activity at the Euro Project in 2021 including multiple fieldwork campaigns⁰⁹⁻¹¹, discovery of iron rich geology and the recognition of lithium potential at the project¹² through the Company's data analysis. Tempest continues to evaluate methods to explore this phenomenon further.

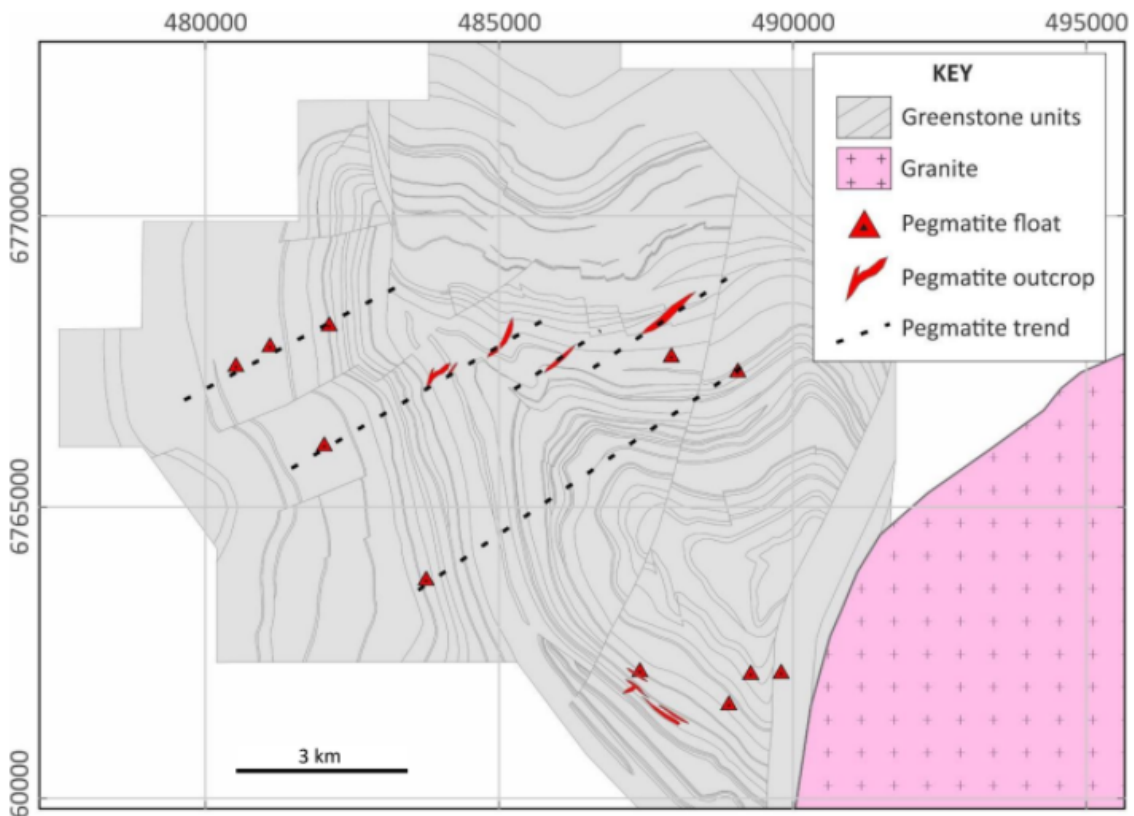

Figure 06 Pegmatite outcrops at the Euro Project after Price et al 2020

Drilling

TEM completed an initial reconnaissance diamond drilling program in early 2022 ¹³⁻¹⁵ which tested several new targets, in addition to testing the historic thick, high grade intercepts previously drilled at the Calais target.

Drilling at the project encountered broad zones of strong alteration (chlorite, biotite, albite and garnet with visible mineralisation of quartz breccias) consistent with historic gold results in addition to zones which included sulphides ¹⁶ as part of skarn or vms like alteration. In February 2022 Tempest announced that further mineralisation including further sulphides had been encountered in drilling and that this was indicative of a larger mineralised corridor ¹⁷.

In May 2022, TEM announced the results from this initial drilling with an extensive array of results spanning multiple commodities ¹⁸ including:

Gold

- WARDH71: 0.6m @ 0.9gpt gold from 15.4m; and
1.0m @ 1.0gpt gold from 58m; and
2.9m @ 4.1gpt gold from 130m
Including 1.6m @ 6.9gpt gold from 131.3m
0.9m @ 3.2gpt gold from 144m
- WARDH67: 1.2m @ 0.5gpt gold from 8m; and
0.8m @ 1.7gpt gold from 9.2m
- WARDH66: 0.9m @ 0.7gpt gold from 19.1m
1.0m @ 0.8gpt gold from 54m
- WARDH65: 1.4m @ 0.9gpt gold from 10.8m

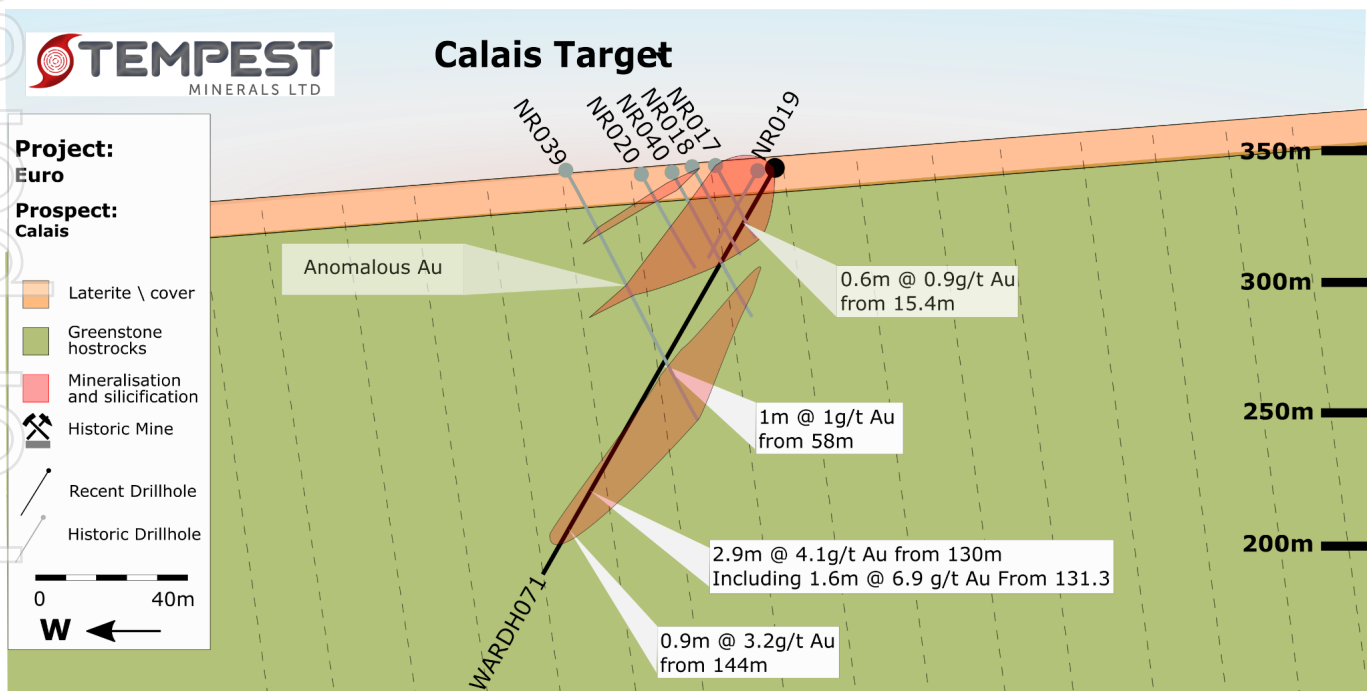

Figure 07: WARDH71 Cross-section showing newly discovered high-grade gold shoot with 1.6m intersection at 6.9g/t Au

Base Metals

- WARDH71: 3.6m @ 0.16% arsenic from 12.4m; and
0.6m @ 0.12% copper from 15.4m
1.0m @ 0.14% copper from 153m
2.5m @ 0.15% copper from 163m:
- WARDH70A: 0.5m @ 630ppm tungsten from 24.3m
- WARDH69: 0.6m @ 640ppm tungsten from 77.4m
- WARDH68: 0.1m @ 0.4% copper from 164.1m
- WARDH67: 0.9m @ 0.11% copper from 10.8m
- WARDH66: 1m @ 0.35% arsenic from 60m; and
3.3m @ 0.14% zinc from 68.7m

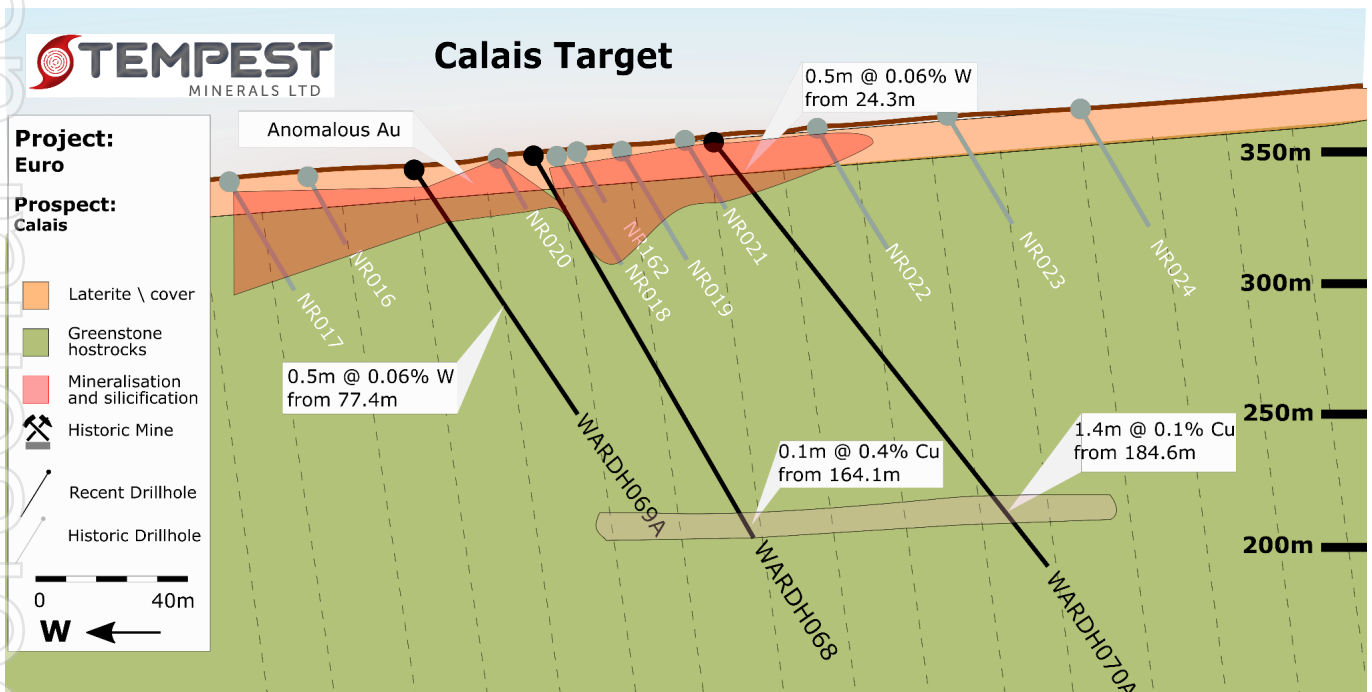

Figure 08: Cross-section through WARDH68-WARDH70A highlighting polymetallic mineralisation

Magnetite/Iron

- WARDH71: 4.0m @ 29.3% Iron from 4.9m
Including 0.9m @ 38.6% Iron from 4.9m; and
9.15m @ 30.5% Iron from 52.85; and
9.30m @ 28.4% Iron from 125.7m
13.0m @ 27.8% Iron from 152.5m
- WARDH67: 1.2m @ 38.7% Iron from 4m
0.4m @ 42.5% Iron from 23.2m
- WARDH66: 0.9m @ 37.8% Iron from 3.5m; and
1.0m @ 30.3% Iron from 54m
- WARDH65: 2.0m @ 26.1% Iron from 37m; and
4.8m @ 25.5% Iron from 45.2m

Figure 09: WARDH65 Cross-section showing multiple intercepts of gold and iron mineralisation

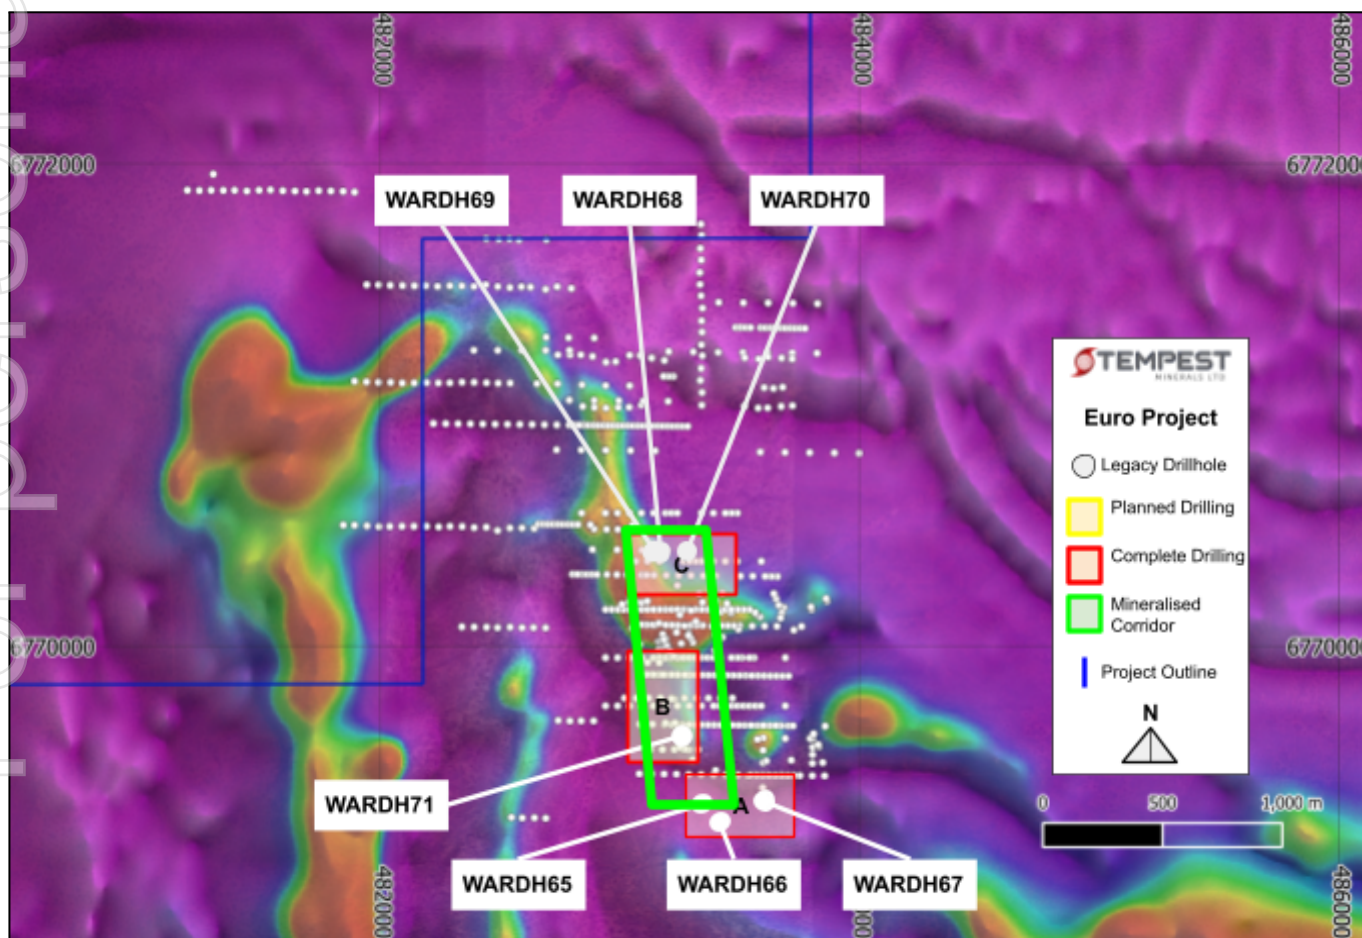

Figure 10: Drillholes completed at the Euro Project - Jan 2022 with magnetic (TMI) imagery

Karara JV

In June 2022, TEM announced it had signed a Non-binding memorandum of understanding to enter into a joint venture (JV) with Karara Mining Limited ¹⁹.

Upon completion of the agreement, the JV will allow TEM to explore 138km² of highly prospective and underexplored Yalgoo Greenstone Belt directly adjacent to the Euro Project.

TEM will have the exclusive right to earn up to a 70% legal and beneficial interest in the Assets over a 4 year earn-in period. The JV is a staged agreement - subject to normal due diligence and other conditions being met - will entail exploration expenditure of up to \$1.2M and milestone payments totalling \$50,000.

Figure 11: Map showing proposed KML JV ground and TEM Euro Project

Messenger

The Messenger Project comprises five granted tenements located adjacent to the world class EMR Golden Grove base and precious metal mine. The Messenger Project has outcrops of the key Golden Grove Unit and is prospective for VMS and shear / lode hosted gold mineralisation.

The 'Messengers Patch' is a well known historic mining centre hosting numerous high-grade mines (up to 10 ounces gold per ton) and a state battery (government built gold processing facility) in the early 1900s [20-21](#) .

During the June quarter, Tempest reviewed existing data for the northern part of the project and commenced planning for field work to begin in the September quarter.

Warriedar West

The Warriedar West Project is an exploration project targeting Intrusive Related Gold (IRG) and orogenic gold mineralisation. Tempest has previously announced large multi-kilometre scale indicator geochemical anomalies [22](#) within the Warriedar Project. The discovery of gold at Warriedar West is within kilometres of underutilised gold processing facilities with established haulage routes in place.

Previous drilling by Tempest focussed on several target areas of shallow, outcropping zones of highly altered silica rich intrusive and previously mapped large outcropping gold bearing quartz veins which confirmed the widespread presence of shallow gold within the silica rich lithocap accompanied by zones of quartz vein swarms with grades of up to 5g/t [23-24](#) .

In addition drilling in 2020 revealed major new extensions to the Yalgoo greenstone belt under shallow cover throughout the Wee Lode area [25-26](#) . Much of the Warriedar West Project is now being considered within the full context of the new greenstone belt at Meleya and may hold similar prospectivity for gold and base metals undercover. This is currently being translated into fieldwork and potential drilling plans over the next 12 months.

Mount Magnet Region

Mt Magnet is a prolific multi-million ounce gold mining centre with numerous large scale, long life open pit and underground mines currently in operation. It has been operated by major resources companies such as Western Mining Corporation and Harmony Gold Ltd as well as more contemporary successful mid-tier companies such as Ramelius Resources Ltd and Westgold Ltd.

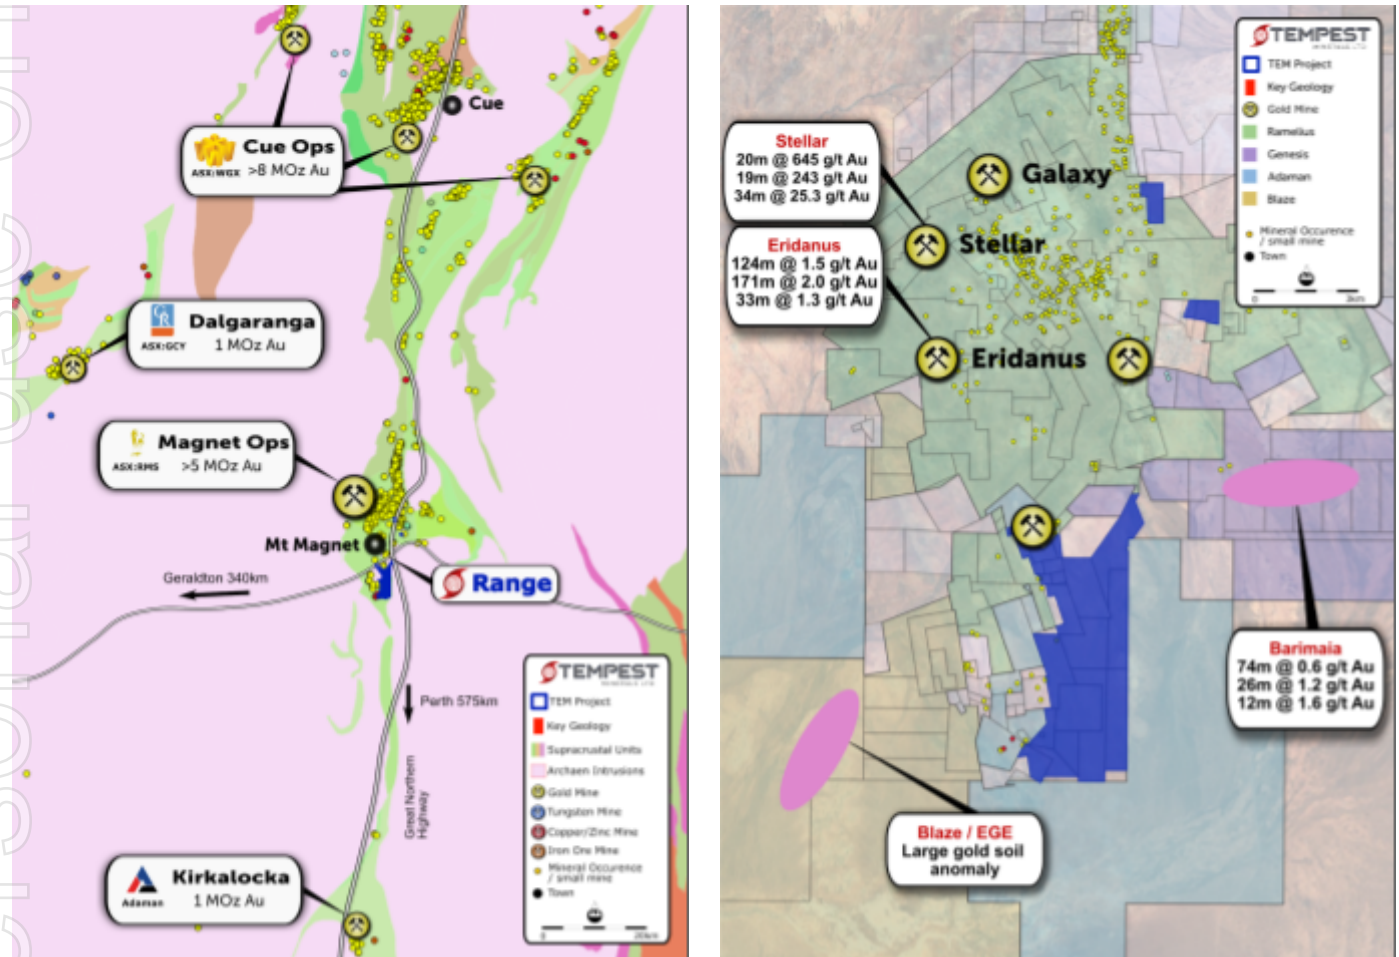

Figure 12: Overview of Mt Magnet and the Range Project

Range

Located in the heart of the Mount Magnet mineral field and 5km along strike of the prolific +6Moz Mount Magnet Operations, the Range Project consists of 17 tenements for 20km².

Work completed during the quarter included interpretation of data with respect to similarities to other nearby gold occurrences to the East of the project. Additionally, a review of the potential for critical minerals on the project, based on work performed by other companies in the area is underway.

Multiple drill targets have been identified within the project and are currently being ranked and scheduled into future fieldwork planning.

YLP

Rocky Hill

Reconnaissance field mapping and surface sampling ²⁷ commenced in May 2022. Results of more than 60 surface samples taken across the project yielded multiple anomalous geochemical zones with Lithium grades in soil up to 60.3 ppm and strong signals from Lithium–caesium–tantalum (‘LCT’) and pathfinder elements ²⁸.

It is considered that these results warrant further investigation. Also in support of this view, a new application for an extension of the project which substantially expands the footprint and takes in potential new target zones is in progress.

Figure 13: LCT SnWNb assay data plotted upon total magnetic intensity

Australian Lithium

The YLP consists of 2 pending tenements (2 pending) for a total of approximately 65 km² in the Yilgarn craton of Western Australia ²⁹.

Tempest has previously conducted a review of the projects and confirmed the Company view that these are highly prospective for Lithium and other commodities ³⁰ and are progressing the applications.

International Lithium Exposure

Tempest maintains a strong de-risked position in the global lithium market which it has been developing since 2017³¹. Tempest's interests are both in Australia through its portfolio of Western Australian exploration projects as well as Internationally through holdings or interests in projects in Africa and the USA.

In addition to the Company's Australian focussed assets, Tempest has strong de-risked interests and exposure to the international Lithium which include hard rock lithium exploration targets in Africa and lithium brine in the USA.

Africa

Through a divestment deal in 2020³², Tempest retains a sizable holding (65 million shares) in London listed Premier African Minerals (AIM:PREM). PREM are enjoying a significant premium to the deal price due to ongoing developments and potential upside in the portfolio³³.

USA

Argosy (ASX:AGY) are progressing³⁴ their headline Tonopah Lithium Project (TLP) located in a world class mining jurisdiction of Nevada, United States of America. Tempest retains an interest³⁵ in the project through a A\$250,000 milestone based cash payment entitlement.

Corporate

Growth

Tempest continues to actively investigate and evaluate new growth opportunities in a number of jurisdictions and commodities which may bring added value to Tempest shareholders.

September 2022 Quarter Exploration

Exploration activities are continuing at the Company's Projects with the following programs planned for the period:

- Geophysics both downhole and airborne at the Yalgoo Projects
- Further field work to progress additional drill targets at the Euro Project
- Further field work to progress additional drill targets at the Euro Project
- Preparation for further drilling at the Meleya Project
- Preparation for further drilling at the Euro Project

ASX Additional Information

1. ASX Listing Rule 5.3.1: Exploration and Evaluation Expenditure (excluding staff costs) during the Quarter was \$951,187. Full details of exploration activity during the Quarter are set out in this report.
2. ASX Listing Rule 5.3.2: \$95,000 was paid to related parties during the quarter comprising the Managing Director's salary and Non-Executive Director fees. \$299,434 was paid to Galt Mining Solutions Pty Ltd, a company controlled by directors Don Smith and Owen Burchell for technical consulting services regarding the exploration programs undertaken by the Company and for provision of office space. Legal fees amounting to \$68,531 was paid to Hopgood Ganim Lawyers, a legal firm where director Brian Moller is a partner in their Brisbane office.

The Board of the Company has authorised the release of this announcement to the market.

About TEM

Tempest Minerals Ltd is an Australian based mineral exploration company with a diversified portfolio of projects in Western Australia considered highly prospective for precious, base and energy metals.

The Company has an experienced board and management team with a history of exploration, operational and corporate success.

Tempest leverages the team's energy, technical and commercial acumen to execute the Company's mission - to maximize shareholder value through focussed, data-driven, risk-weighted exploration and development of our assets.

Forward-looking statements

This document may contain certain forward-looking statements. Such statements are only predictions, based on certain assumptions and involve known and unknown risks, uncertainties and other factors, many of which are beyond the company's control. Actual events or results may differ materially from the events or results expected or implied in any forward-looking statement.

The inclusion of such statements should not be regarded as a representation, warranty or prediction with respect to the accuracy of the underlying assumptions or that any forward-looking statements will be or are likely to be fulfilled. Tempest undertakes no obligation to update any forward-looking statement to reflect events or circumstances after the date of this document (subject to securities exchange disclosure requirements).

The information in this document does not take into account the objectives, financial situation or particular needs of any person or organisation. Nothing contained in this document constitutes investment, legal, tax or other advice.

Competent Person Statement

The information in this announcement that relates to Exploration Results and general project comments is based on information compiled by Don Smith who is a geologist and Managing Director of Tempest Minerals Ltd. Mr Smith is a Member of the AusIMM and the AIG and has sufficient experience relevant to the style of mineralisation under consideration and to the activities undertaken to qualify as a Competent Person as defined in the 2012 Edition of the 'Australasian Code for Reporting of Exploration Results, Mineral Resources and Ore Reserves'. Mr Smith consents to the inclusion in the report of the matters based on his information in the form and context in which it appears.

7.4 Total financing facilities	-	-
7.5 Unused financing facilities available at quarter end		-
7.6 Include in the box below a description of each facility above, including the lender, interest rate, maturity date and whether it is secured or unsecured. If any additional financing facilities have been entered into or are proposed to be entered into after quarter end, include a note providing details of those facilities as well.		

8. Estimated cash available for future operating activities	\$A'000
8.1 Net cash from / (used in) operating activities (item 1.9)	(334)
8.2 (Payments for exploration & evaluation classified as investing activities) (item 2.1(d))	(966)
8.3 Total relevant outgoings (item 8.1 + item 8.2)	(1,300)
8.4 Cash and cash equivalents at quarter end (item 4.6)	7,890
8.5 Unused finance facilities available at quarter end (item 7.5)	-
8.6 Total available funding (item 8.4 + item 8.5)	7,890
8.7 Estimated quarters of funding available (item 8.6 divided by item 8.3)	6.06
<i>Note: if the entity has reported positive relevant outgoings (ie a net cash inflow) in item 8.3, answer item 8.7 as "N/A". Otherwise, a figure for the estimated quarters of funding available must be included in item 8.7.</i>	
8.8 If item 8.7 is less than 2 quarters, please provide answers to the following questions:	
8.8.1 Does the entity expect that it will continue to have the current level of net operating cash flows for the time being and, if not, why not?	
Answer: N/A.	
8.8.2 Has the entity taken any steps, or does it propose to take any steps, to raise further cash to fund its operations and, if so, what are those steps and how likely does it believe that they will be successful?	
Answer: N/A.	
8.8.3 Does the entity expect to be able to continue its operations and to meet its business objectives and, if so, on what basis?	
Answer: N/A.	
<i>Note: where item 8.7 is less than 2 quarters, all of questions 8.8.1, 8.8.2 and 8.8.3 above must be answered.</i>	

Compliance statement

- 1 This statement has been prepared in accordance with accounting standards and policies which comply with Listing Rule 19.11A.
- 2 This statement gives a true and fair view of the matters disclosed.

Date: 28 July 2022

Authorised by: The Board of Directors

Notes

1. This quarterly cash flow report and the accompanying activity report provide a basis for informing the market about the entity's activities for the past quarter, how they have been financed and the effect this has had on its cash position. An entity that wishes to disclose additional information over and above the minimum required under the Listing Rules is encouraged to do so.
2. If this quarterly cash flow report has been prepared in accordance with Australian Accounting Standards, the definitions in, and provisions of, *AASB 6: Exploration for and Evaluation of Mineral Resources* and *AASB 107: Statement of Cash Flows* apply to this report. If this quarterly cash flow report has been prepared in accordance with other accounting standards agreed by ASX pursuant to Listing Rule 19.11A, the corresponding equivalent standards apply to this report.
3. Dividends received may be classified either as cash flows from operating activities or cash flows from investing activities, depending on the accounting policy of the entity.
4. If this report has been authorised for release to the market by your board of directors, you can insert here: "By the board". If it has been authorised for release to the market by a committee of your board of directors, you can insert here: "By the [name of board committee – eg Audit and Risk Committee]". If it has been authorised for release to the market by a disclosure committee, you can insert here: "By the Disclosure Committee".
5. If this report has been authorised for release to the market by your board of directors and you wish to hold yourself out as complying with recommendation 4.2 of the ASX Corporate Governance Council's *Corporate Governance Principles and Recommendations*, the board should have received a declaration from its CEO and CFO that, in their opinion, the financial records of the entity have been properly maintained, that this report complies with the appropriate accounting standards and gives a true and fair view of the cash flows of the entity, and that their opinion has been formed on the basis of a sound system of risk management and internal control which is operating effectively.
